Attention: Mr. Harold S. Winston

Re: Proposed Dual Completion
Grizzel No. 1, SW/4 NE/4,
Section 5, Township 22
South, Range 37 East, Lea
County, New Mexico.

Gentlemen:

Reference is made to your letter of November 7, 1960, inquiring as to the testing data to be submitted that could demonstrate the feasibility of dually completing the subject well utilizing one string of tubing. The equal gas-oil ratio tests as suggested cannot be considered, but gas-oil ratio tests will be considered if both annular and tubing flow of the Tubb Zone is conducted on a 72 hour test basis with the GOR taken on the final 24 hours. Daily test data of each day tested shall also be submitted.

Very truly yours,

J. E. KAPTEINA
Engineer

JEK/og

Lea County, New Mexico

New Mexico Oil Conservation Commission
P. O. Box 871
Santa Fe, New Mexico

Attention: Mr. Elvis Utz,
Gas Engineer

Gentlemen:

During July and August of this year there were several written and verbal communications between you and Mr. John P. McNaughton of our Fort Worth office in regard to the subject proposed dual completion. We had requested Administrative approval to complete the subject well with one string of tubing, producing the Tubb (gas) zone through the casing annulus and the Drinkard (oil) zone through the tubing. You advised that Administrative approval could not be given for such a completion and a hearing was set for July 27, 1960. This hearing was subsequently continued to August 24 and then cancelled.

In declining Administrative approval for the proposed dual completion it is my understanding that you indicated that you were concerned that the Tubb (gas) zone could not be efficiently produced through the casing annulus. I also understand that there were certain data you desired to see presented in order to prove that producing the Tubb (gas) zone through the annulus would be efficient and would not cause waste. Included in this data were four-point back pressure tests, shut-in pressure build-up tests, gas-liquid ratio tests, bottom-hole sample analyses, etc.

We have completed opening the Tubb zone in the subject well and are now planning to test it. Would you consider equal gas-oil ratios obtained from the Tubb zone through both the casing annulus and the tubing to be adequate evidence of the efficiency of the annular completion? If not, what is the minimum testing program you would recommend in order to demonstrate the efficiency of the annular completion.

We are most anxious to try and demonstrate the efficiency of the annular Tubb completion because the low productivity of the Drinkard zone will hardly justify running two strings of tubing.

We will sincerely appreciate your advice in this matter.

Very truly yours,

Harold S. Winston

IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
COMMISSION OF NEW MEXICO FOR
THE PURPOSE OF CONSIDERING:

CASE NO. 2040
Order No. R-1788

APPLICATION OF NEVILLE G. PENROSE, INC.,
FOR A GAS-OIL DUAL COMPLETION IN THE
TUBB GAS POOL AND THE DRINKARD POOL,
LEA COUNTY, NEW MEXICO.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a.m. on August 24, 1960, at Santa Fe, New Mexico, before Daniel S. Hutter, Examiner duly appointed by the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission," in accordance with Rule 1214 of the Commission Rules and Regulations.

NOW, on this 30th day of August, 1960, the Commission, a quorum being present, having considered the application, and the recommendations of the Examiner, Daniel S. Hutter, and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant has requested that Case No. 2040 be dismissed.

IT IS THEREFORE ORDERED:

That Case No. 2040 be and the same is hereby dismissed.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

Re: Case #2040 (Continuance)
Grizzell #1
Lea County, New Mexico
Dual Completion

Gentlemen:

This letter is to request that you withdraw our application for dual completion of the Neville G. Penrose, Inc. Grizzell #1 as it was originally submitted. This application requested permission to produce gas from the Tubbs Pool and oil from the Drinkard Pool through the casing annulus and 2 3/8" tubing respectively. Hearing on this application was scheduled for August 24, 1960 at the regular examiners hearing and was assigned Case #2040.

It has been decided that the method of dual completion in all probability would be made using two strings of tubing and, therefore, would not necessitate an examiners hearing. We would appreciate your withdrawing our original application and canceling Case #2040. A new application will be submitted in the very near future.

Thank you for your courtesies in this matter.

Yours truly,

NEVILLE G. PENROSE, INC.

APPLICATION FOR DUAL COMPLETION

Field Name Drinkard		County Lea		Date 5/23/60
Operator Neville G. Penrose, Inc.		Lease Grizzell		Well No. 1
Location of Well	Unit G	Section 5	Township 22-S	Range 37-E

1. Has the New Mexico Oil Conservation Commission heretofore authorized the dual completion of a well in these same pools or in the same zones within one mile of the subject well? YES ☒ NO ☐
2. If answer is yes, identify one such instance: Order No. _____ ; Operator, Lease, and Well No.:

Skelly Oil Co., E. A. Sticher #4, Unit L, Sec. 4, T-22S, R-37E, Lea County

3. The following facts are submitted:	Upper Zone	Lower Zone
a. Name of reservoir	Tubbs	Drinkard
b. Top and Bottom of Pay Section (Perforations)	Perforations: 6045' - 6057' - 6094' - 6146'	6492' To 6549' Open Hole
c. Type of production (Oil or Gas)	Gas	Oil
d. Method of Production (Flowing or Artificial Lift)	Flow	Flow

4. The following are attached. (Please mark YES or NO)

- ☒ a. Diagrammatic Sketch of the Dual Completion, showing all casing strings, including size and setting, top of cement, perforated intervals, tubing strings, including diameters and setting depth, location and type of packers and side door chokes, and such other information as may be pertinent.
- ☒ b. Plat showing the location of all wells on applicant's lease, all offset wells on offset leases, and the names and addresses of operators of all leases offsetting applicant's lease.
- ☐ c. Waivers consenting to such dual completion from each offset operator, or in lieu thereof, evidence that said offset operators have been furnished copies of the application.*
- ☐ d. Electrical log of the well or other acceptable log with tops and bottoms of producing zones and intervals of perforation indicated thereon. (If such log is not available at the time application is filed, it shall be submitted as provided by Rule 112-A.)

5. List all offset operators to the lease on which this well is located together with their correct mailing address.

Tidewater Oil Co., P. O. Box 1231, Midland, Texas

Gulf Oil Corp., Petroleum Bldg., Roswell, New Mexico

Ohio Oil Co., P. O. Box 552, Midland, Texas

Pan American Petroleum Corp., P. O. Box 1540, Midland, Texas

G. R. Zachary, Box 1685, Hobbs, New Mexico

Southern Petroleum Exploration, Inc., White Bldg., Roswell, New Mexico

6. Were all operators listed in Item 5 above notified and furnished a copy of this application? YES ☒ NO ☐ . If answer is yes, give date of such notification **5/23/60**

CERTIFICATE I, the undersigned, state that I am the **Asst. Vice Pres.** of the **Neville G. Penrose, Inc.** (company), and that I am authorized by said company to make this report; and that this report was prepared under my supervision and direction and that the facts stated therein are true, correct and complete to the best of my knowledge.

[Signature]
Signature

Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed dual completion will result in an unorthodox well location and/or a non-standard perforation unit in either or both of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.

Case 2040

DOCKET: EXAMINER HEARING AUGUST 24, 1960

Oil Conservation Commission - 9 a.m., Mabry Hall, State Capitol, Santa Fe

The following cases will be heard before Daniel S. Nutter, Examiner, or Oliver E. Payne, Attorney, as alternate Examiner:

- CASE 2053: Application of Continental Oil Company for a triple completion utilizing three strings of casing. Applicant, in the above-styled cause, seeks an order authorizing it to triple complete its Jicarilla 22-22 Well No. 1, located in the NW/4 SE/4 of Section 22, Township 25 North, Range 4 West, Rio Arriba County, New Mexico, in such a manner as to permit the production of oil from the Gallup formation, the production of oil from the Greenhorn formation and the production of oil from the Dakota formation through parallel strings of 4½-inch, 2 7/8-inch, and 4½-inch casing respectively, cemented in a common well bore. Applicant proposes to install tubing to the Gallup and Dakota formations.
- CASE 2054: Application of Continental Oil Company for a triple completion utilizing three strings of casing. Applicant, in the above-styled cause, seeks an order authorizing it to triple complete its Jicarilla 28-27 Well No. 3, located in the NW/4 SE/4 of Section 27, Township 25 North, Range 4 West, Rio Arriba County, New Mexico, in such a manner as to permit the production of oil from the Gallup formation, the production of oil from the Greenhorn formation and the production of oil from the Dakota formation through parallel strings of 4½-inch, 2 7/8-inch, and 4½-inch casing respectively, cemented in a common well bore. Applicant proposes to install tubing to the Gallup and Dakota formations.
- CASE 2055: Application of Aztec Oil & Gas Company for a gas-gas dual completion utilizing two strings of casing. Applicant, in the above-styled cause, seeks an order authorizing the dual completion of its Hanks Well No. 12-D, located in Unit H, Section 7, Township 27 North, Range 9 West, San Juan County, New Mexico, in such a manner as to permit the production of gas from the Fulcher Kutz-Pictured Cliffs Pool and the production of gas from the Dakota Producing Interval through parallel strings of 2 7/8-inch and 4½-inch casing cemented in a common well bore. Applicant proposes to install 2 3/8-inch tubing to produce the Dakota gas.

CASE 2056: Application of Gulf Oil Corporation for permission to commingle the production from all wells on several leases in Townships 21 and 22 South, Range 36 East, Lea County, New Mexico, and for approval of two automatic custody transfer facilities to handle said commingled production from the Arrowhead Pool, Eumont Pool, Eunice-Monument Pool, South Eunice Pool and Jalmat Pool, all in Lea County, New Mexico.

CASE 2057: Application of Kay Kimbell for an order force-pooling all interests in a 320-acre standard gas unit in the Dakota Producing Interval. Applicant, in the above-styled cause, seeks an order force-pooling all mineral interests in the Dakota Producing Interval in a 320-acre standard gas unit consisting of the W/2 of Section 22, Township 29 North, Range 11 West, San Juan County, New Mexico.

CASE 2058: Application of Anderson-Prichard Oil Corporation for a triple completion and for a 181-acre non-standard gas proration unit. Applicant, in the above-styled cause, seeks an order authorizing the triple completion of its Western-Federal Well No. 1, located 330 feet from the North and West lines of Section 5, Township 23 South, Range 38 East, Lea County, New Mexico, in such a manner as to permit the production of oil from the Blinebry Pool, the production of gas from the Tubb Gas Pool and the production of oil from the Drinkard Pool through parallel strings of 2 3/8-inch tubing, 2 1/16-inch tubing, and 2 3/8-inch tubing respectively. Applicant, further seeks the establishment of a 181-acre non-standard gas proration unit in the Tubb Gas Pool consisting of Lots 1, 2, 3, and 4 of said Section 5, to be dedicated to the said Western-Federal Well No. 1.

CASE 2059: Application of Humble Oil & Refining Company for an oil-oil dual completion utilizing two strings of casing. Applicant, in the above-styled cause, seeks an order authorizing the dual completion of its State "M" Well No. 24, located in Unit O, Section 19, Township 22 South, Range 37 East, Lea County, New Mexico, in such a manner as to permit the production of oil from the Langlie-Mattix Pool and the production of oil from an undesignated Drinkard Pool through parallel strings of 2 7/8-inch and 4 1/2-inch casing cemented in a common well bore.

CASE 2060: Application of Drilling and Exploration Company, Inc., for approval of a unit agreement. Applicant, in the above-styled cause seeks approval of its Mescalero Unit Agreement, which unit is to embrace approximately 4829 acres of Federal and State land in Townships 18 and 19 South, Ranges 33 and 34 East, Lea County, New Mexico.

CASE 2061: Application of Ralph Lowe for approval of a unit agreement. Applicant, in the above-styled cause, seeks approval of its Northeast Maljamar Unit Agreement, which unit is to embrace approximately 800 acres in Townships 16 and 17 South, Range 33 East, Lea County, New Mexico.

CASE 2040: (Continued)

Application of Neville G. Penrose, Inc., for an order authorizing the dual completion of its Grizzel Well No. 1, located in Unit G, Section 5, Township 22 South, Range 37 East, Lea County, New Mexico, in such a manner as to permit the production of gas from the Tubb Gas Pool and the production of oil from the Drinkard Pool through the casing-tubing annulus and 2 3/8-inch tubing respectively.

Re: Application For Dual Completion
Grizzell Well No. 1, located in
the SW/4 NW/4 of Section 5, T-22-S,
R-37-E, NMPM, Lea County, New Mexico

Dear Mr. Kapteina:

In addition to our May 16, 1960 application and reply to your June 7, 1960 letter, we are enclosing a revised diagrammatic sketch of the proposed dual completion of the above well. The revised sketch shows the following items which were omitted from the original:

Top of cement outside casing strings.
Length of tubing string.
Location of packer.
Location of side door chokes.

Also, enclosed you will find data on surrounding wells completed in the Tubbs Zone. This data covers both gas and condensate production as well as gas-oil ratio tests.

We trust this additional information will enable you to process our application for dual completion of the Neville G. Penrose, Inc. #1 Grizzell and also for an 80 acre non-standard gas proration unit.

Thank you for your attention to this matter.

Yours truly,

NEVILLE G. PENROSE, INC.
