# BEFORE THE OIL CONSERVATION COMMISSION OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

Yu

CASE No. \_2956 Order No. R-<u>2632</u>

APPLICATION OF UNITED STATES SMELTING REFINING AND MINING COMPANY FOR AN UNORTHODOX LOCATION, LEA COUNTY, NEW MEXICO.

#### ORDER OF THE COMMISSION

#### BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a.m. on <u>December 13</u>, 1963, at Santa Fe, New Mexico, before <u>Elvis A. Utz</u> Examiner duly appointed by the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission," in accordance with Rule 1214 of the Commission Rules and Regulations.

NOW, on this day of <u>December</u>, 1963, the Commission, a quorum being present, having considered the application, the evidence adduced, and the recommendations of the Examiner, Elvis A. Utz , and being fully advised in the premises,

FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant, United States Smelting Refining and Mining Company, seeks an exception to the Special Rules and Regulations governing the Scharb-Bone Springs Oil Pool to drill its State "B" Well No. 1 at an unorthodox location 660 feet from the North line and 660 feet from the West line of Section 18, Township 19 South, Range 35 East, NMPM, Lea Councy, New Mexico. -2-CASE No. 2956

# **IT IS THEREFORE ORDERED:**

(1) That the applicant, United States Smelting Refining and Mining Company, is hereby granted an exception to the Special Rules and Regulations governing the Scharb-Bone Springs Oil Pool and is hereby authorized to drill its State "B" Well No. 1 at an unorthodox location 660 feet from the North line and 660 feet from the West line of Section 18, Township 19 Scuth, Range 35 East, NMPM, Lea County, New Mexico, provided, however, that said well shall not receive more than a 40-acre allowable unless greater productive acreage 15 established at a subsequent hearing.

(2) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

#### BEFORE THE OIL CONSERVATION COMMISSION OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

> CASE No. 2910 Order No. R-2589 NOMENCLATURE

APPLICATION OF BIG (6) DRILLING COMPANY FOR EXTENSION OF AN EXISTING OIL POOL AND SPECIAL POOL RULES, LEA COUNTY, NEW MEXICO.

# ORDER OF THE COMMISSION

#### BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a.m. on October 18, 1963, at Santa Fe, New Mexico, before Daniel S. Nutter, Examiner duly appointed by the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission," in accordance with Rule 1214 of the Commission Rules and Regulations.

NOW, on this <u>30th</u> day of October, 1963, the Commission, a quorum being present, having considered the application, the evidence adduced, and the recommendations of the Examiner, Daniel S. Nutter, and being fully advised in the premises,

#### FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant, Big (6) Drilling Company, seeks extension of the horizontal limits of the Scharb-Bone Springs Oil Pool to comprise the W/2 of Section 5, all of Section 6, and the N/2 of Section 7, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico.

(3) That the applicant also seeks the promulgation of special rules and regulations governing said pool, including provisions for 80-acre spacing units comprising any two contiguous 40-acre tracts, and for fixed well locations.

(4) That in order to prevent the economic loss caused by the drilling of unnecessary wells, to avoid the augmentation of risk caused from the drilling of an excessive number of wells, to prevent reduced recovery which might result from the drilling of too few wells, and to otherwise prevent waste and protect correlative rights, temporary special rules and regulations providing for 80-acre spacing units should be promulgated for the Scharb-Bone Springs Oil Pool.

-2-CASE No. 2910 Order No. R-2589

(5) That in order to encourage the orderly development of the subject pool, the temporary special rules and regulations should provide for 80-acre spacing units comprising the N/2, S/2, E/2, or W/2 of a single governmental quarter section; that due to the configuration of leases, the diversity of ownership, and the locations of wells previously drilled in the SW/4 and W/2 SE/4 of Section 6, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico, the operators in said area should be permitted to dedicate to wells within said area any two quarter-quarter sections contiguous by a common bordering side and lying wholly within said area.

(6) That the temporary special rules and regulations should provide for limited well locations in order to assure orderly development of the pool and protect correlative rights.

(7) That the temporary special rules and regulations should be established for a one-year period in order to allow the operators in the subject pool to gather reservoir information to establish the area that can be efficiently and economically drained and developed by one well.

(8) That this case should be reopened at an examiner hearing in October, 1964, at which time the operators in the subject pool should appear and show cause why the Scharb-Bone Springs Oil Pool should not be developed on 40-acre spacing units.

### IT IS THEREFORE ORDERED:

(1) That the horizontal limits of the Scharb-Bone Springs Oil Pool in Lea County, New Mexico, are hereby extended to include the following-described area:

> TOWNSHIP 19 SOUTH, RANGE 35 EAST, NMPM Section 5: W/2 Section 6: All Section 7: N/2

(2) That Special Rules and Regulations for the Scharb-Bone Springs Oil Pool are hereby promulgated as follows:

# SPECIAL RULES AND REGULATIONS FOR THE SCHARB-BONE SPRINGS OIL POOL

<u>RULE 1</u>. Each well completed or recompleted in the Scharb-Bone Springs Oil Pool or in the Bone Springs formation within one mile of the Scharb-Bone Springs Oil Pool, and not nearer to or within the limits of another designated Bone Springs oil pool, shall be spaced, drilled, operated, and produced in accordance with the Special Rules and Regulations hereinafter set forth. -3-CASE No. 2910 Order No. R-2589

<u>RULE 2</u>. Each well completed or recompleted in the Scharb-Bone Springs Oil Pool shall be located on a standard unit containing approximately 80 acres comprising the N/2, S/2, E/2, or W/2 of a single governmental quarter section; provided, however, that nothing contained herein shall be construed as prohibiting the drilling of a well on each of the quarter-quarter sections in the unit.

<u>RULE 3.</u> The Secretary-Director may grant an exception to the requirements of Rule 2 without notice and hearing when an application has been filed for a non-standard unit comprising a single quarter-quarter section or lot. All operators offsetting the proposed non-standard unit shall be notified of the application by registered or certified mail, and the application shall state that such notice has been furnished. The Secretary-Director may approve the application upon receipt of written waivers from all offset operators or if no offset operator has entered an objection to the formation of the non-standard unit within 30 days after the Secretary-Director has received the application.

<u>RULE 4</u>. The first well drilled on every standard or nonstandard unit in the Scharb-Bone Springs Oil Pool shall be located in the <u>NE/4 or SW/4</u> of a governmental quarter section. All wells shall be located within 200 feet of the center of a governmental quarter-quarter section.

<u>RULE 5.</u> The Secretary-Director may grant an exception to the footage requirements of Rule 4 without notice and hearing when an application has been filed for an unorthodox location necessitated by topographical conditions or the recompletion of a well previously drilled to another horizon, provided the well will be located no nearer than 330 feet to the outer boundary of the unit. All operators offsetting the proposed unorthodox location shall be notified of the application by registered or certified mail, and the application shall state that such notice has been furnished. The Secretary-Director may approve the application upon receipt of written waivers from all offset operators or if no offset operator has entered an objection to the unorthodox location within 20 days after the Secretary-Director has received the application.

<u>RULE 6</u>. A standard proration unit (79 through 81 acres) in the Scharb-Bone Springs Oil Pool shall be assigned an 80-acre proportional factor of 5.67 for allowable purposes, and in the event there is more than one well on an 80-acre proration unit, the operator may produce the allowable assigned to the unit from the wells on the unit in any proportion.

The allowable assigned to a non-standard proration unit shall bear the same ratio to a standard allowable in the Scharb-Bone Springs Oil Pool as the acreage in such non-standard unit bears to 80 acres. -4-CASE No. 2910 Order No. R-2589

### IT IS FURTHER ORDERED:

(1) That an exception is hereby granted to the Special Rules and Regulations for the Scharb-Bone Springs Oil Pool to permit the operators in the SW/4 and W/2 SE/4 of Section 6, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico, to dedicate to existing and future wells within said area any two quarter-quarter sections contiguous by a common bordering side and lying wholly within said area.

(2) That any well drilling to or completed in the Bone Springs formation within the Scharb-Bone Springs Oil Pool or within one mile of the Scharb-Bone Springs Oil Pool on or before October 9, 1963, that will not comply with the well location requirements of Rule 4 is hereby granted an exception to the requirements of said rule. The operator of any such well shall notify the Hobbs District Office of the Commission in writing of the name and location of the well on or before November 15, 1963.

(3) That any operator desiring to dedicate CO acres to a well presently drilling to or completed in the Scharb-Bone Springs Oil Pool shall file a new Form C-128 with the Commission on or before November 15, 1963.

(4) That this case shall be reopened at an examiner hearing in october, 1964, at which time the operators in the subject pool may appear and show cause why the Scharb-Bone Springs Oil Pool should not be developed on 40-acre spacing units.

(5) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

State of New Mexico Oil Conservation Commission Post Office Box 871 Santa Fe, New Mexico

Attention: Mr. Daniel S. Nutter Chief Engineer

> Re: Application for an Unorthodox Location - United States Smelting Refining and Mining Company's State "B" No. 1 Section 18, T-19-S, R-35-E Lea County, New Mexico

# Gentlemen:

Please find attached an application in triplicate for a hearing on United States Smelting Refining and Mining Company's request for an exception to Rule 4 of Order No. R-2589 whereby our State "B" No. 1 may be drilled at an unorthodox location in Section 18, Township 19 South, Range 35 East, Lea County, New Mexico.

On my visit with Mr. A. L. Porter, Jr. and Mr. Daniel S. Nutter on November 26, 1963, the above application was assigned Case No. 2956 and placed on the docket for a special hearing before Mr. Elvis A. Utz, Examiner, at 9:00 A.M. on December 13, 1963, in the Oil Conservation Commission Conference Room.

Yours very truly, B. J. Hinson

DOCKET MAILED

. . .

IN THE MATTER OF THE APPLICATION OF UNITED STATES SMELTING REFINING AND MINING COMPANY FOR AN EXCEPTION TO RULE 4 OF ORDER NO. R-2589 TO DRILL ITS STATE "B" WELL NO. 1 AT AN UN-ORTHODOX LOCATION 660 FEET FROM THE NORTH AND WEST LINES OF SECTION 18, T-19-S, R-35-E, SCHARB BONE SPRINGS POOL, LEA COUNTY, NEW MEXICO.

# APPLICATION

Applicant, United States Smelting Refining and Mining Company, states that:

- Applicant is the owner and operator of the State "B" lease consisting of the W/2 of Section 18, T-19-S, R-35-E, Lea County, New Mexico.
- Special rules and regulations, as given in Order No. R-2589 for the Scharb Bone Springs Pool, apply to subject lease only because the N/2 of said lease is within one mile of the horizontal limits of the Scharb Bone Springs Pool.
- 3. The location of subject well in the approximate center of the NW/4 NW/4 of Section 18, T-19-S, R-35-E rather than in the NE/4 or SW/4 of a governmental quarter section as specified in Rule 4 of Order No. R-2589, was based on seismic and geological data.
- 4. Subject well is located more than one mile from any oil well in the Scharb Bone Springs Pool and is considered an exploratory well.

Applicant requests that this matter be set for a special hearing before an examiner, that notice of the hearing be given as required by law, and that, upon conclusion of the hearing, the Commission enter its order authorizing the proposal set forth above.

Respectfully submitted,

United States Smelting Refining and Mining Company

Veniorn

B. J. Hinson Petroleum Engineer for Applicant

#### DOCKET: EXAMINER HEARINGS DECEMBER 13, 1963 AND DECEMBER 16, 1963

BOTH HEARINGS 9:00 A.M. OIL CONSERVATION COMMISSION CONFERENCE ROOM, STATE LAND OFFICE BUILDING, SANTA FE, NEW MEXICO

Examiner: Elvis A. Utz; Alternate Examiner: Daniel S. Nutter

DOCKET NO. 36-63 - DECEMBER 13, 1963:

CASE 2956:

Application of United States Smelting Refining and Mining Company for an unorthodox location, Lea County, New Mexico. Applicant, in the abovestyled cause, seeks an exception to Rule 4 of Order No. R-2589 to drill its State "B" Well No. 1 at an unorthodox location 660 feet from the North and West lines of Section 18, Township 19 South, Range 35 East, Scharb Bone Springs Pool, Lea County, New Mexico.

DOCKET NO. 37-63 - DECEMBER 16, 1963:

- CASE 2959: Application of Texas Pacific Oil Company for an unorthodox location, Lea County, New Mexico. Applicant, in the above-styled cause, seeks an exception to Rule 3 of Order No. R-2284, to drill its State AE Well No. 1 at an unorthodox location 2310 feet from the South line and 1980 feet from the West line of Section 10, Township 10 South, Range 36 East, South Crossroads-Devonian Pool, Lea County, New Mexico.
- CASE 2960: Application of the British American Oil Producing Company for a unit agreement, Lea County, New Mexico. Applicant, in the above-styled cause, seeks approval of the North Wilson Deep Unit Area comprising 1,905 acres, more or less, of State land in Township 20 South, Range 36 East, and Township 21 South, Range 35 East, Lea County, New Mexico.
- CASE 2961: Application of Amerada Petroleum Corporation for force-pooling, Lea County, New Mexico. Applicant, in the above-styled cause, seeks an order forcepooling all mineral interests in the Morrow, or Atoka, zone of the Pennsylvanian formation underlying the SE/4 of Section 19, Township 9 South, Range 35 East, Le Jounty, New Mexico, to be dedicated to its S. E. Anderson "A" Well No. 1, a gas well located in Unit P of said Section 19.
- CASE 2962: Application of Texaco Inc. for an oil-oil-salt water disposal triple completion, Lea County, New Mexico. Applicant, in the above-styled cause, seeks the approval of the triple completion (tubingless) of its State of New Mexico "BZ" (NCT-10) Well No. 2 located in Unit N of Section 2, Township 25 South, Range 37 East, North Justis Field, Lea County, New Mexico, to produce oil from the North Justis-Blinebry and North Justis-Drinkard Pools through parallel strings of 2 7/8-inch casing and to dispose of produced salt water into the interval from 4310 to 4390 feet, San Andres formation, through a third string of 2 7/8-inch casing. All casing strings would be cemented in a common well bore.

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

> CASE No. 2956 Order No. R-2632

APPLICATION OF UNITED STATES SMELTING REFINING AND MINING COMPANY FOR AN UNORTHODOX LOCATION, LEA COUNTY, NEW MEXICO.

#### ORDER OF THE COMMISSION

# BY THE COMMISSION:

This cause came on for hearing at 9 o'clock a.m. on December 13, 1963, at Santa Fe, New Mexico, before Elvis A. Utz, Examiner duly appointed by the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission," in accordance with Rule 1214 of the Commission Rules and Regulations.

NOW, on this <u>d</u>ay of December, 1963, the Commission, a quorum being present, having considered the application, the evidence adduced, and the recommendations of the Examiner, Elvis A. Utz, and being fully advised in the premises,

#### FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject matter thereof.

(2) That the applicant, United States Smelting Refining and Mining Company, seeks an exception to the Special Rules and Regulations governing the Scharb-Bone Springs Oil Pool to drill its State "B" Well No. 1 at an unorthodox location 660 feet from the North line and 660 feet from the West line of Section 18, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico.

(3) That although the proposed location is within one mile of the Scharb-Bone Springs Oil Pool the evidence presently available indicates that the Bone Springs formation underlying the proposed location may constitute a separate common source of supply.

(4) That approval of the subject application should result in greater ultimate recovery of oil, thereby preventing waste.

(5) That no offset operator has entered an objection to approval of the subject application.

-2-CASE No. 2956 Order No. R-2632

# IT IS THEREFORE ORDERED:

(1) That the applicant, United States Smalling Refining and Mining Company, is hereby granted an exception to the Special Rules and Regulations governing the Scharb-Bone Springs Oil Pool and is hereby authorized to drill its State "B" Well No. 1 at an unorthodox location 660 feat from the North line and 660 feat from the West line of Section 18, Township 19 South, Range 35 East, NMPM, Lea County, New Mexico.

(2) That jurisdiction of this cause is retained for the entry of such further orders as the Commission may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.

Aule Four that I cited above, states that a well is to be located in the Northeest Guarter or the Southwest Guarter of a Govornmental quarter section. Mexico will you refer to your whibit Number One, your owner- $\langle \cdot \rangle$ New ship map or plat, and explain that, please? Exhibit One shows the horizontal limits of the Scharb Albuquerque, Bone Springs Pool outlined in red. This includes all of Section Six, the west half of Section Five, and the North Half of Section Seven, of Township 19 South, Range 35 East. Our lease is shown colored in yellow, and you will notice that the North Half of the Building lease is within one mile of the horizontal limits of the Scharb Bone Springs Pool. For this reason, we came up with the rules Simms and regulations of the Scharb Pool, and have asked for this Suite 1120 exception to the location. You will also notice our proposed location in the Northwest-Northwest Quarter of Section 18, which we call our State "B" Number One.

DEARNLEY, MEIER, WILKINS and CROWNOVER

General Court Reporting Service

 $\widetilde{\mathcal{F}}_{1}$ 

Do you also show the wells in the Scharb Pool? Yes, sir, it does. You will notice in the Scharb Pool,  $\hat{\Omega}$ 

PAGE

there are six completed wells and one that is in the process of being completed. New, making a Lotal of seven that have produced oil. Of that number, three have been drilled or are located on unorthodox locations. You will also notice that our proposed locations slightly in excess of a mile from any proven production.

I notice the offset operator on the west and also on 0 the east is Gulf. Is Gulf in favor of this application for the unorthodox location or well?

Yes. Actually, Gulf is supporting the drilling of our Α wells in the Northwest-Northwest Quarter of Section 18. They are supporting it by contributing two 80 acre tracts in the East Half of Section 18.

Will this unorthodox location encroach on any offset 0 operators?

No, sir. Will not, in my opinion. There is no offset A production. It is in excess of a mile from any production. The the location is a regular 660 location, and in my line--opinion, it doesn't encroach on anyone else's lease.

Now, will you refer to and explain Exhibit Number Two? <u>C</u> Echibit Two is a seismic map of this area, and actually, А our location, our proposed location, is based on this seimic data. Again, you will notice the Scharb area, or pool, and also our lease colored in yellow, with our proposed location so indicated. This seismic map was a result of work we did in 1960, and

243-660 DEARNLEY, MEIER, WILKINS and CROWNOVER Phone . **General Court Reporting Service** Building Simms

Mexico

New

Albuquerque,

PAGE 6

It is a composite map of two separate seismic surveys. It is contoured, of the contour interval is in ten seconds, which is approximately 70 feet between contour lines. You might note that two distinct anomalies, or you might say, histories, are indicated from this survey. One in the vicinity of the Scherb Bone Springs Pool, and one centered in the North Half of the Section 13, overlaps into Section 18. You will also notice that between these two anomalies, you have a channel area, or you might say a trough, which we feel separates the two anomalies. Is very possible that our proposed location will be on a separate structure. That, of course, will be determined upon drilling the well.

Back to our proposed location, you will note from this map that we have located it in what we feel to be the most favorable structural location on our lease, based on the seismic data which we have.

Q You consider this to be an exploratory well?

A Yes, sir, we do, because as I say, it is over a mile from production, and it is the only data we have in this particular area, is our seismic data.

Q In your opinion, do you believe that you will ultimately recover more oil in this unorthodox location then you would on a standard location?

I feel like that is very possible. If the structure is as indicated by the seismic data, we can very well produce more oil than other locations.

Schibit Three is again a plat showing the Scherb Jus springs Pool in Addien to our leave and property in this. This is a sub-structure map, based on the wells builled in the Scharb Bone Springs gool. And I might add that this content these contror lines have been extended. The dates is the 2000 Springs Dolomite, has been extended to the Southwest, and ever interacetation of the structure in that area, of course, las been influenced by our seisale data, because that is all we have. There have not been any doop tests drilled in that immediate area, but we do feel like that we do have a settle between the two areas that I have shown here, the Scharb Pool and the area in the vicinity of our lease. You may also note that our proposed location again, we feel like, is located in the most favorable structural location.

О Here these exhibits prepared by you, or under your direction and supervision?

2 They were prepared by our geophysicist and geological department. It was under my direction.

Is there any urgency as to the issuance of this order  $\mathbb{C}$ in the event the application is approved?

Yes, sir, there is. We have a partner in this venture, Â and he is very anxious to drill a well, at our proposed location. In fact, we have staked the location and we are awaiting the results

The balance of the second contring and buy which second is a postable is our location is approved. Our proposed localist is eposited. Also, versiding back to sald bit One, you sight balance that we of the bange does explore damary 19, 3550, and, of course, as world the to get the well duilled by that time.

 $\zeta$  All right.

MR. MITE: At this time, we offer Wahibits One through Three, and that concludes our testimony.

MR. UTZ: Without objection, Exhibits One through Three will be entered into the record of this case.

#### CROSS EXAMINATION

BY MR. UTZ:

Q Mr. Hinson, the well in the Northeast Quarter would be the Northeast-Northeast of Section 24, let's see, that would be-Did that go to the top of the Bone Springs? In other words- -

A I don't believe it did, Mr. Utz. I don't have the depth of it with me.

Q Well, I can't read it. I think I see 8200 there. Would that be deep enough?

A I was of the opinion the total depth is 9,000 feet, would not have - 9,010 feet to be exact. The Bone Springs would be around 10,200.

Q So, that well wouldn't have influenced your contour- -A The reason I didn't point that well out, we went over

this area, and I did with the geological department, and they pointed out all the deep tests and the nearest that we had to far Bone Springs was in the Scharb area. So, you actually have no structure control down there  $\mathbf{C}^{-}$ 243-6691 whatsoever, except your seisnic information? DEARNLEY, MEIER, WILKINS and CROWNOVER That is correct. i. Phone Now, referring to Exhibit Two, which was your seismic 0 information, I am not suce I completely understand it. This contour, 1.320, is that higher or lower than the 1.340? Mexico А It is higher. General Court Reporting Service New . That would be the crest of the structure in Ç. Higher. Albuquerque, the Scharb area then? Yes, sir. A And the contour, which is - - I don't believe it is 0 In the North part of Section 13, in the South portion marked. Building of Section 12, that would be a local high? Yes, that is correct. That would be a 1.320 contour.  ${\cal A}$ Suite 1120 Simms 1.320? Q. Yes, sir. А Which would be the same as the one in Scharb? Q Yes, sir. А And the finclinal area you spoke of then would be Q between this indicated high and the 1.320 contour in the Scharb area? Yes, sir, that is correct. A

PAGE 10

Now, you say eachbetween each contour 1.8 approximately 70 feet? That is right Ä So, this inclinal area between the 1.320 in 10 and the Ċ same contour up in the Northeast of 12 would be approximately 70 243-6691 DEARNLEY, MEIER, WILKINS and CROWNOVER feet? Phone . It would be approximately that, yes. 7 This location is desired entirely on the premise that 0 you want to crowd the high on the structure? New Mexico Yes, sir. Ä General Court Reporting Service As indicated by the seismic map? Q We feel like it is the most favorable location on our  $\overline{V}$ Albuquerque, lease. Is the Scharb Pool a water drive pool, or solution? Q I do not know. I might add that it has not made any A Building water to my knowledge. And what unit would you dedicate to the well, if you  $\Omega$ Simms were allowed to drill it? We would dedicate the West 80 acres of the Northwest\* Α Suite 1120 Northwest Quarter. After you drill this well, you will have a little better Q control in this area, would you not? Yes, sir, that is right. Of course, as you know, with A seismic data, it is subject to change, and at such time as the well is drilled, these maps will be reworked. And brought up to
