BEFORE THE OIL CONSERVATION COMMISSION OF THE STATE OF NEW MEXICO

IN THE MATTER OF THE HEARING CALLED BY THE OIL CONSERVATION COMMISSION OF NEW MEXICO FOR THE PURPOSE OF CONSIDERING:

> CASE No. 3748 Order No. R-3402

THE APPLICATION OF THE OIL CONSERVATION COMMISSION UPON ITS OWN MOTION FOR AN ORDER CREATING, ABOLISHING, CONTRACTING, REDEFINING VERTICAL LIMITS, AND EXTENDING CERTAIN POOLS IN CHAVES, EDDY, LEA, AND ROOSEVELT COUNTIES, NEW MEXICO.

ORDER OF THE COMMISSION

BY THE COMMISSION:

This cause came on for hearing at 9 a.m. on April 17, 1968, at Hobbs, New Maxico, before the Oil Conservation Commission of New Maxico, hereinafter referred to as the "Commission."

NOW, on this 25th day of April, 1968, the Commission, a quorum being present, having considered the testimony presented and the exhibits received at said hearing, and being fully advised in the premises.

FINDS:

(1) That due public notice having been given as required by law, the Commission has jurisdiction of this cause and the subject watter thereof.

(2) That there is need for the creation of a new gas pool in Eddy County, New Mexico, for the production of gas from the Upper Pennsylvanian formation, said pool to bear the designation of intelops Sink-Upper Pennsylvanian Gas Pool. Said Antelope Sink-Upper Pennsylvanian Gas Pool was discovered by Marathon Oil Company, Antelope Sink Unit No. 1, located in Unit 6 of Section 18, Township 19 South, Range 24 East, NMPM. It was completed in Upper Pennsylvanian on July 21, 1963. The top of perforations is 6366 feet. -2-CASE No. 3748 Order No. R-3402

(3) That there is need for the creation of a new oil pool in Eddy County, New Mexico, for the production of oil from the Delaware formation, said pool to bear the designation of Big Eddy-Delaware Pool. Said Big Eddy-Delaware Pool was discovered by Pan American Petroleum Corporation, Big Eddy Unit Well No. 11, located in Unit I of Section 7, Township 20 South, Range 31 East, NMFM. It was completed in Delaware on January 2, 1968. The top of perforations is 5165 feet.

(4) That there is need for the creation of a new oil pool in The County, New Mexico, for the production of oil from the Abo formation, said pool to bear the designation of House-Abo Pool. Said House-Abo Pool was discovered by Pan American Petroleum Corporation, Howse "C" No. 1, located in Unit H of Section 11, Township 20 South, Range 38 East, NMPM. It was completed in Abo on November 8, 1967. The top of perforations is 7214 feet.

(5) That there is need for the creation of a new gas pool in Eddy County, New Mexico, for the production of gas from the Morrow formation, said pool to bear the designation of Huapache-Morrow Gas Pool. Said Huapache-Morrow Gas Pool was discovered by Humble Oil & Refining Company, Huapache Unit No. 10, located in Unit F of Section 10, Township 23 South, Range 22 East, NMPM. It was completed in Morrow on May 18, 1963. The top of perforations is 9942 feet.

(6) That there is need for the creation of a new oil pool in Lea County, New Mexico, for the production of oil from the Tubb-Drinkard formation, said pool to bear the designation of Imperial Tubb-Drinkard Pool. Said Imperial Tubb-Drinkard Pool was discovered by Bronco Oil Corporation, S. C. Mill "A" No. 3, located in Unit O of Section 27, Township 20 South, Exage 37 Fig., MMRM. It was completed in Tubb-Drinkard on December 13, 1967. The top of periorations is 6081 feet.

(7) That there is need for the consolidation of the Middle whe Fermo-Pennsylvanian Sool and the Inbe Vermo-Pennsylvanian Fool insemuch as the pools produce from a common source of supply. Said consolidation to be accomplished by abolishing the Middle Lans Permo-Junneylvanian Pool and extending the Internet Pennsylvanian Fool.

(8) That there is need for the deletion of cortain acreage from the Cave-Grayburg bool is Mody County, New Mexico, in order to climinate non-productive acreage and to place all acreage in the Grayburg Jackson West Cooperative Unit in the Grayburg-Jackson Pool. -3-CASE No. 3748 Order No. R-3402

(9) That there is need for the deletion of certain acreage from the Monument Grayburg-San Andres Pool in Lea County, New Mexico, in order that the deleted acreage may be included in the Eunice Grayburg-San Andres Pool.

(10) That there is need for the redesignation of the Cedar Hills-Wolfcamp Gas Pool in Eddy County, New Hexico, to be the Cedar Hills-Upper Pennsylvanian Gas Pool in order to correctly reflect the producing interval in said pool.

(11) That there is need for certain extensions to the Twin Lakes-San Andres Pool in Chaves County, New Mexico, the Grayburg-Jackson Pool, the North Indian Hills-Morrow Gas Pool, the McMillan-Morrow Gas Pool, and the Cedar Hills-Upper Pennsylvanian Gas Pool, all in Eddy County, New Mexico, the West Bronco-Devonian Pool, the East Brunson-McKae Pool, the Eunice Grayburg-San Andres Pool, the Inbe Permo-Pennsylvanian Pool, the Tatum-Wolfcamp Pool, and the Teague-Blinebry Pool, all in Les County, New Mexico, and the Todd-Lower San Andres Pool in Roosevelt County, New Mexico.

IT IS THEREFORE ORDERED:

Re: April Nomenclature Case, Southeast New Mexico

Dear George:

We urgently need to make an addition to the nomenclature advertisement for the April 17th Commission Hearing. We wish to abolish the Cedar Hills - Wolfcamp Gas Pool, T21S, R27E, Sec. 15, SE/4 and create the Cedar Hills - Upper Pennsylvanian Gas Pool, T21S, R27E, Sec. 15, E/2 or, in the alternative, amend the vertical limits of the forementioned pool from Wolfcamp to Upper Pennsylvanian and extend the pool to include all of the E/2 of Section 15.

The operator has requested this change, see enclosed letter. My own studies of this matter, made some time ago, confirm the operator's opinion as to the formation designation.

Further, the operator wishes to dedicate 320 acres to the well. As both the current pool and the surviving pool will have been created after June 1, 1964, there should be no problem on this point.

This matter needs to be heard at the April hearing in order

March 15, 1968

Mr. George Hatch N. M. Oil Conservation Commission P. O. Box 2088 Santa Fe, New Mexico 87501

to facilitate the operators application for a 320 acre communitization agreement. If there are any problems or questions on this matter, please call me.

Very truly yours,

RE: Cedar Hills Unit T21S R27E NMPM

Dear Sirs:

We respectifully request the pool name changed from Cedar Hills Wolfcamp Gas to Cedar Hills Upper Pennsylvanian Gas, for the following reasons:

Our Geologist determined the production from perforations 9558-9569 is from the Upper Pennsylvanian formation on well log correllation.

Also the gravity of the gas and condensate, and the appearance of the condensate is similar, to other Upper Pennsylvanian Gas distillate production in the area.

We further request 320 acre spacing for said Cedar Hills-Upper Pennsylvanian Gas Pool.

Yours truly, E Males

REQUEST FOR EXAMINER HEARING PILOT WATERFLOOD PROJECT EUNICE (GRAYBURG-SAN ANDRES) OIL POOL LEA COUNTY, NEW MEXICO . . .

Oil Conservation Commission (3) P. 0. Box 2088 Santa Fe, New Mexico 87501

260 MAR 15 AM 8 27

Attn: Mr. A. L. Porter, Jr.

Gentlemen:

DOMESTIC PRODUCING DEPARTMENT

MIDLAND DIVISION

٢

It is respectfully requested that an examiner hearing be scheduled in Santa Fe, New Mexico to consider the application of Texaco Inc. for Oil Conservation Commission approval to conduct a pilot waterflood operation in the Eunice (Grayburg-San Andres) 011 Pool in Lea County, New Mexico.

The proposed project area of the waterflood project is comprised of the proration unit upon which the injection well is located plus all the proration units directly or diagonally offsetting the injection well and having producing wells completed thereon in the same formation as provided by Statewide Rule 701, S.2. This area comprises all Texaco's New Mexico "C" State NCT-2 Lease, being the NE/4 of Section 19, T-20-S, R-37-E, Lea County, New Mexico, containing 160 acres.

Approval will be requested to convert Well No. 7 located in Unit G to water injection. Initially, this will be the only injection well. It is anticipated that after establishing successful pilot operations, consideration will be given to expanding this waterflood project by unitizing adjacent tracts and converting additional wells to injection service.

The injection fluid for this proposed pilot project will be fresh water from the Ogallala formation, obtainable from a water well presently completed in the SE/4 of the NE/4 of Section 19, T-20-S, R-37-E. This well was drilled and completed in accordance with State Engineer Water Right Permit No. L-4410. Injection will be down 2-3/8"

ALASSY MALLED

Date 7-4-68

plastic coated tubing with a packer set at approximately 3620' into the open hole interval from 3670' to 3866'. It is estimated that initial injection rates will approximate 500 barrels of water per day with a surface injection pressure of approximately 500 psi.

In addition to requesting an order authorizing the formation of this pilot project and the conversion of Well No. 7 to injection service, Texaco Inc. will also request Commission approval to transfer Wells No. 5 and 6 on the subject lease from the Monument (Grayburg San Andres) Pool to the Eunice (Grayburg-San Andres) Oil Pool. Of the four wells completed on the New Mexico "C" State NCT-2 Lease, Numbers 5 and 6 are currently assigned to the Monument Pool while Numbers 7 and 8 are assigned to the Eunice Oil Pool. All four wells produce from the same formation.

In support of this application and in compliance with Statewide Rule 701 B., we attach hereto a plat showing the location of the subject lease, project area, producing and injection well, and offset operators. In addition, a diagrammatic sketch of the proposed injection well is attached showing the subsurface installation. Also attached is a copy of the Schlumberger Electrical Log of the proposed injection well.

Listed below are all of the offset operators to Texaco's New Mexico "C" State NCT-2 Lease. A copy of this letter is being mailed this date to each of the offset operators.

Yours very truly,

C. L. Whigham Division Proration Engineer
