3. 2007 年 10 月 1 日

Figure 1 consists of two schematic diagrams. Diagram (a) is a top-down view of a rectangular arena with a central black circle. A robot is positioned at the bottom center, facing the circle. Diagram (b) is a side view of the robot, showing its internal components and the arena floor.

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$ . It is shown that the solutions of the system (1) tend to zero as  $t \rightarrow \infty$  if and only if the matrix  $A$  is Hurwitz. This result is obtained by using the method of the variation of constants.

1ST QUARTER 2022

A line graph on a grid. The horizontal axis (x-axis) and vertical axis (y-axis) are both marked with grid lines every 1 unit. The line starts at the origin (0,0) and passes through the points (2, 1), (4, 2), (6, 3), and (8, 4). The line has a constant positive slope of 1/2.

Figure 1 is a schematic representation of the experimental design. It shows a sequence of events: 'Stimulus presentation' (with 'Stimulus duration' indicated), followed by 'Response', 'Response time', and 'Response accuracy'. A feedback loop labeled 'Feedback' connects the 'Response' back to the 'Stimulus presentation' stage.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (CG) and the experimental group (EG). The CG was divided into two subgroups: the control group (CG) and the control group (CG). The EG was divided into two subgroups: the experimental group (EG) and the experimental group (EG). The CG was divided into two subgroups: the control group (CG) and the control group (CG). The EG was divided into two subgroups: the experimental group (EG) and the experimental group (EG).

92

2. 2000

The diagram illustrates the experimental design across two studies. Study 1 includes a 'Pretest' phase and a 'Main Study' phase. Study 2 also includes a 'Pretest' phase and a 'Main Study' phase. The 'Main Study' in Study 2 is further divided into 'Control' and 'Intervention' groups. The flow is indicated by arrows connecting the phases of the two studies.
