

**C-147 Extension request (Sand Dunes 2RF-171)**

Date: 7/3/2024

NMOCD,

Chevron MCBU is requesting a **“6-month Extension” from NMOCD** for our Sand Dunes 2RF-171 (Section 11) Recycling Water Containments Structure (RWCS), due to well pad frac schedule shift for the next 6 months, which the last 20% water usage was January 2024.

Thank you for your time and support.

Thank you,

**2RF-171 - SAND DUNES SECTION 11 RECYCLING CONTAINMENT FACILITY ID [fVV2208136959]**

Good afternoon Mr. Barchetti,

NMOCD has reviewed the extension of the cessation of operations request for 2RF-171 - SAND DUNES SECTION 11 RECYCLING CONTAINMENT FACILITY ID [fVV2208136959], received from [4323] CHEVRON USA INC on 7/3/2024, Application ID 360926. The extension of the cessation of operations is approved with the following conditions of approval:

- 2RF-171 - SAND DUNES SECTION 11 RECYCLING CONTAINMENT FACILITY ID [fVV2208136959] registration/permit expires on March 15, 2027.
- 2RF-171 - SAND DUNES SECTION 11 RECYCLING CONTAINMENT FACILITY ID [fVV2208136959] extension of cessation of operations is approved from August 1<sup>st</sup>, 2024, to January 31<sup>st</sup>, 2025. Per NMAC 19.15.34.13.C extensions of the cessation of operations are considered for a maximum length of six months. If after this 6-month approved period, the containment was not utilized at a minimum of 20% fluid capacity, no additional extensions would be granted, and the operator would be directed to remove all fluids and proceed with the closure requirements.
- [4323] CHEVRON USA INC will maintain a liquid level in the containment that is at least equal to the weight of the liner plus 20%. [4323] CHEVRON USA INC may maintain a higher liquid level if they choose.
- [4323] CHEVRON USA INC will provide written notice to OCD at least 72 hours, but no more than one week, prior to the recommencement of operations. Recommencement of recycling operations means that the operator plans to resume moving fluids through the containment and discharging fluids from the containment
  - At the resumption of recycling operations, [4323] CHEVRON USA INC is required to perform an incremental fluid level test for containment liquid levels above the minimum liquid level.
  - [4323] CHEVRON USA INC will fill the containment. [4323] CHEVRON USA INC will pause filling operations at every 10% of total fluid capacity above the minimum level.
  - [4323] CHEVRON USA INC will maintain the liquid level for each 10% volume increase for 24 hours and inspect and operate the leak detection system at the end of the 24-hour period.
  - If there are no liquids present in the leak detection system, [4323] CHEVRON USA INC may proceed to fill the next 10% volume and repeat the process until the containment full design capacity minus the 3-feet of freeboard is reached. If liquids are present, [4323] CHEVRON USA INC should immediately cease the incremental fill test and perform a liner inspection. [4323] CHEVRON USA INC should provide written notice of the fluid detection and liner inspection findings through OCD Online using a C-147 (long form) with the "Other" box checked and "Notice of fluid detection" written as the explanation of "Other."
  - If the detected fluid is confirmed to be condensation, [4323] CHEVRON USA INC will proceed with the incremental fluid level test.
  - If the detected fluid is confirmed to be produced water, [4323] CHEVRON USA INC must comply with 19.15.34.13 NMAC. [4323] CHEVRON USA INC must provide written notification through OCD Online on the actions taken to comply with 19.15.34.13 NMAC.

- [4323] CHEVRON USA INC must submit copies of the detailed containment inspection records for the prior three (3) months and a report detailing the incremental fluid level test process and results to through OCD Online using a C-147 (long form) with the "Other" box checked. "Recommendation of Operations - Incremental Fluid Level Test" should be written as the explanation of "Other." Form C-147 must be completed and include information in sections 1 General Information, 2 Recycling Facility 3 Recycling Containment, 4 Bonding, and 10 Operator Application Certification. Section 9 Recycling Facility and/or Containment Checklist may also need to be partially completed. [4323] CHEVRON USA INC should verify that the resumption of operations notification does not result in any changes to the recycling containment operating and maintenance plan or the closure plan. If the recommencement of operations will affect the operating and maintenance plan or closure plan, operators should check those boxes in section 9 and provide updated plans or plan addendums as attachments to the C-147.
- [4323] CHEVRON USA INC will continue to operate, maintain, and close the 2RF-171 - SAND DUNES SECTION 11 RECYCLING CONTAINMENT FACILITY ID [fVV2208136959] in compliance with 19.15.34 NMAC, to include but not limited detailed inspection records, removal of trash/oil from containment, and monthly C-148 reporting (even if there is zero activity).
- A minimum of 3-feet freeboard must always be maintained in the recycling containment during operations.

Please let me know if you have any additional questions.
