Yes, that is correct the 26 on the list need to be transferred from [330447] Contango Resources, Inc. to [372290] Riley Permian Operating Company, LLC

Thank you for breaking that all down for me and for the information on how to register a facility. I went back through the facilities that weren't registered and they do only have one well associated with them so that explains that.

Subject: RE: [EXTERNAL] Question

Good morning Deb,

Just to clarify, the 26 facility IDs (f#) listed on the spreadsheet you attached need to be transfer from [330447] Contango Resources, Inc. to [372290] Riley Permian Operating Company, LLC?

Here are my answers to your questions from yesterday.

- "Yes, that is correct for the tank batteries on the pad."
- "No, not regarding reporting of venting or flaring. I was just tasked with making sure information has been updated to Riley since the purchase. The wells have all been changed but no one had submitted for the facilities yet."

If the tank battery that shares the pad with the wellhead are only associated with that well, meaning that product from other wells is not stored in the tanks, that tank battery should not be registered as a facility. If a facility is created for a tank battery that is only associated with one well, it will skew the venting and flaring data.

- "Also, how does one register a facility with the OCD? I can't find any guidance."

If you have a central tank battery or gathering point that accepts product from multiple wells that needs to be registered as a facility, the registration is done through the OCD Permitting website. Once you log in under your OGRID, hover over the *Submissions* tab and move down to the *Facilities* group. Another drop down should appear and the first choice will be *Facility Registration*. Please see below for a snip of what to look for:

You will then select the type of facility you are registering (flare stack, tank battery, etc) by clicking on the link located in the far-right hand column. Please let me know if you need additional help after this step.

Thank you,

Subject: RE: [EXTERNAL] Question

I am not seeing any facility IDs associated with the pads of those 2 wells.

What is the need for a facility transfer? For the tank batteries on the pad? And is this in regards to reporting venting and flaring?

Thank you,

I have names but no coordinates. They didn't give us that information and we are having a hard time getting them to respond.

If they never registered them is that something Riley can get in trouble for?

Subject: RE: [EXTERNAL] Question

Deb,

There may be a few reasons why. Probably the most common reason would be is that the facility has not been registered with the OCD.

Do you have a name and GPS coordinates for the facility? I may be able to find something on our end if it is registered.

Thank you,

Ms. Fiorda,

We will need a list of all facility IDs (##) and facility names that will need to be transferred from Contango to Riley Permian. Include the correct OGRID number for Riley Permian as well. None of the documentation you have attached to this email has the ##'s for the facilities.

Please include a statement that Riley Permian has also accepted any environmental liability for any open releases that may be associated with these facilities.

Thank you,

Good morning Deb,

I just would like to clarify that all the facility IDs listed on the spreadsheet need to be transferred from Redwood Operating (OGRID 330211) to Riley Permian (OGRID 372290)?

If this information is incorrect, please let me know what the correct OGRID is to update the facilities. Also please note that any open incident numbers associated with the facility IDs will also be transferred to Riley Permian.

Thank you,
