Mr. Joel Stone  
Environmental Scientist & Specialist  
New Mexico Oil Conservation Division  
1220 South St. Francis Drive  
Santa Fe, New Mexico 87505

**Re: Targa Northern Delaware, LLC – Discharge Permit Application Proof of Public Notice for Roadrunner Gas Plant, Eddy County, New Mexico**

Mr. Stone:

Ensolum, LLC (Ensolum) on behalf of Targa Northern Delaware, LLC (Targa), is submitting the discharge permit application proof of public notifications for the Roadrunner Gas Plant (Facility ID: fAB1806740738) in accordance with 20.6.2.3108(B) NMAC. Please find attached photographs of the notice posted at the front gate of the Roadrunner Gas Plant and at the Loving Post Office, certified registered mail receipts for the mailings, the list of property owners within 1/3 mile of the facility boundary, proof of publication in the Carlsbad Current-Argus newspaper, and an affidavit of the newspaper publication.

Should you have any questions or need any additional information, please contact Ashely Ager (970) 946-1093, ([aager@ensolum.com](mailto:aager@ensolum.com)).

Thank you,

Ashley L. Ager, MS, PG  
Principal

## Notice of An Administratively Complete Discharge Permit Application Roadrunner Gas Plant, Eddy County, New Mexico Targa Northern Delaware, LLC

Targa Northern Delaware, LLC (Targa) announces the submittal of an application for potential unintended discharges at the Roadrunner Gas Plant located approximately 2 1/2 miles south of Loving on Bounds Road. The Facility stores over 95,000 gallons of oil, wastewater, condensates, glycol, amine, lube oil, synthetic oil, hot oil surge, and transformer oil in aboveground storage tanks and vessels and is designed to process 800 barrels per day (2,920,000 barrels per year) of condensate and 490 million standard cubic feet per day (MMSCFD) of natural gas. The Facility is a cryogenic gas plant through which natural gas and condensate from nearby oil and gas production facilities are transported by pipeline for treatment and processing. Once gathered at the Facility, the produced natural gas is dehydrated to remove the water content and compressed through cryogenic processing. The discharge permit includes a description of materials stored and used at the Facility and any waste generated. Groundwater occurs less than 50 feet below ground surface and contains total dissolved concentrations (TDS) typically less than 3,000 milligrams per liter (mg/L). The discharge permit addresses how liquids and solid waste will be handled, stored, and disposed of, including procedures to prevent unintended discharge. Response actions and abatement requirements for spills and leaks are addressed.

The NMOCD has determined the application is administratively complete and is in the process of preparing a draft permit. The NMOCD shall post notice on its website and distribute notice of the submittal of the application to affected local, state, federal, tribal, or pueblo government agency, political subdivisions, ditch associations, and land grants as identified by the department, and persons on a general and facility-specific list maintained by the department who have requested notice of discharge permit applications. Interested persons may obtain information, submit comments, and request to be placed on a facility-specific mailing list for future notices. The NMOCD will also accept comments and statements of interest regarding the draft permit and will create a facility-specific mailing list for persons who wish to receive future notices. Prior to ruling on any proposed permit, the Director shall allow a period of at least (30) days after the draft permit is posted, during which time interested persons may submit comments. Persons interested in obtaining further information, submitting comments, or requesting to be on a facility-specific mailing list for future notices may contact the:

AVISO DE PUBLICACIÓN

Por la presente se notifica que, de conformidad con las Regulaciones de la Comisión de Control de Calidad del Agua de Nuevo México (20.6.2.3106 del Código Administrativo de Nuevo México), se ha presentado la siguiente solicitud de permiso de descarga al director de la División de Conservación de Petróleo de Nuevo México ("NMOCD"), 1220 S. Saint Francis Drive/ Calle San Francisco Sur, Santa Fe, Nuevo México 87505, Teléfono (505) 476-3441:

Número de permiso de descarga de NMOCD GW-XXX

Planta de gas Roadrunner

Targa Northern Delaware (Targa de Norte Delaware), LLC (Targa)

N32.265590, W104.107922; Sección 32, Municipio 235, Rango 28E

1098 Bounds Road, Loving, Nuevo México 88256

James Aguilar (575-200-8895; james.aguilar@targaresources.com)

Targa anuncia la presentación de una solicitud para posibles descargas no deseadas en la planta de gas Roadrunner ubicada aproximadamente a 2 1/2 millas al sur de Loving en Bounds Road. La instalación almacena más de 95,000 galones de petróleo, aguas residuales, condensados, glicol, aminas, aceite lubricante, aceite sintético, aumento de aceite caliente y aceite de transformador en tanques y recipientes de almacenamiento sobre el suelo y está diseñada para procesar 800 barriles por día (2,920,000 barriles por año) de condensado y 490 millones de pies cúbicos estándar por día (MMSCFD) de gas natural. La instalación es una planta de gas criogénico a través de la cual se transporta por tubería gas natural y condensado de instalaciones cercanas de producción de petróleo y gas para su tratamiento y procesamiento. Una vez recolectado en la instalación, el gas natural producido se deshidrata para eliminar el contenido de agua y se comprime mediante un procesamiento criogénico. El permiso de descarga incluye una descripción de los materiales almacenados y utilizados en la instalación y cualquier residuo generado. El agua subterránea se encuentra a menos de 50 pies debajo de la superficie del suelo y contiene concentraciones totales disueltas (TDS) generalmente inferiores a 3000 miligramos por litro (mg/L). El permiso de descarga aborda cómo se manejarán, almacenarán y eliminarán los líquidos y desechos sólidos, incluidos los procedimientos para evitar descargas no deseadas. Se abordan las acciones de respuesta y los requisitos de mitigación de derrames y fugas.

El NMOCD ha determinado que la solicitud está administrativamente completa y está en el proceso de preparar un borrador de permiso. El NMOCD publicará un aviso en su sitio web y distribuirá un aviso de la presentación de la solicitud a las agencias gubernamentales locales, estatales, federales, tribales o de pueblos, subdivisiones políticas, asociaciones de zanjas y concesiones de tierras afectadas según lo identificado por el departamento, y a las personas en una lista general y específica de la instalación mantenida por el departamento que han solicitado notificación de solicitudes de permiso de descarga. Las personas interesadas pueden obtener información, enviar comentarios y solicitar ser incluidos en una lista de correo específica de la instalación para avisos futuros. El NMOCD también aceptará comentarios y declaraciones de interés con respecto al borrador del permiso y creará una lista de correo específica de la instalación para personas

que deseen recibir avisos futuros. Antes de decidir sobre cualquier permiso propuesto, el director permitirá un periodo de al menos (30) días después de que se publique el borrador del permiso, tiempo durante el cual las personas interesadas podrán presentar comentarios.

Las personas interesadas en obtener más información, enviar comentarios o solicitar estar en una lista de correo específica de la instalación para avisos futuros pueden comunicarse con el contacto de la División de Conservación de Petróleo que se detalla a continuación:
