**Re: XTO Energy, Inc. – Discharge Permit Application Proof of Public Notice for Cowboy Central Delivery Point Terminal, Eddy County, New Mexico**

Mr. Stone:

Ensolum, LLC (Ensolum) on behalf of XTO Energy, Inc. (XTO), is submitting the discharge permit application proof of public notifications for the Cowboy Central Delivery Point Terminal in accordance with 20.6.2.3108(B) NMAC. Please find attached photographs of the notice posted at the front gate of the Cowboy CDP facility and at the Carlsbad, New Mexico Post Office, certified registered mail receipts for the mailings, the list of property owners within 1/3 mile of the facility boundary, proof of publication in the Carlsbad Current-Argus newspaper, and an affidavit of the newspaper publication.

Should you have any questions or need any additional information, please contact Ashely Ager (970) 946-1093, ([aager@ensolum.com](mailto:aager@ensolum.com)).

Thank you,

A handwritten signature in black ink that reads "Ashley L. Ager".

**NOTICE OF PUBLICATION**

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2.3106 of the New Mexico Administrative Code), the following discharge permit application has been submitted to the Director of the New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3441:

NMOCD Discharge Permit Number GW-XXX

XTO Energy, Inc. (XTO)

Cowboy Central Delivery Point Terminal

32.16204745°N, -103.8346986°W; SWSW quarter section of Section 1, Township 25S, Range 30E

900 Buck Jackson Rd, Loving, Eddy County, New Mexico 88263

Ms. Carolina Kysiak (432-661-7232, carolina.d.kysiak@exxonmobil.com)

XTO announces the submittal of an application for potential unintended discharges at the Cowboy Central Delivery Point Terminal located approximately 29 miles southeast of Carlsbad, New Mexico on Buck Jackson Road. The Facility is a compression facility through which oil, natural gas, and condensate from nearby oil and gas production facilities is transported by pipeline for treatment and processing. Once gathered at the Facility, the oil and gas are compressed through cryogenic processing, dehydrated to remove the water content, and processed to remove and recover natural gas liquids. The Facility was designed to process 1000 million standard cubic feet per day of natural gas, 550 kilobarrels (kbd) of oil and 50 kbd of condensate. The discharge permit includes a description of materials stored and used at the Facility and any waste generated for off-site disposal. Groundwater occurs at approximately 425 feet below ground surface and contains total dissolved concentrations (TDS) of approximately 3,000 milligrams per liter (mg/l). The discharge permit addresses how liquids and solid waste will be handled, stored, and disposed of, including procedures to prevent unintended discharge. Response actions and corrective actions for spills and leaks are addressed.

The NMOCD has determined the application is administratively complete and is in the process of preparing a draft permit. The NMOCD shall post notice on its website and distribute notice of the submittal of the application to affected local, state, federal, tribal, or pueblo government agency, political subdivisions, ditch associations, and land grants as identified by the department, and persons on a general and facility-specific list maintained by the department who have requested notice of discharge permit applications. Interested persons may obtain information, submit comments, and request to be placed on a facility-specific mailing list for future notices. The NMOCD will also accept comments and statements of interest regarding the application and will create a facility-specific mailing list for persons who wish to receive future notices. Prior to ruling on any proposed permit, the Director shall allow a period of at least (30) days after the draft permit is posted, during which time interested people may submit comments.

Persons interested in obtaining further information, submitting comments, or requesting to be on a facility-specific mailing list for future notices may contact the Oil Conservation Division contact listed below:

**AVISO DE PUBLICACIÓN**

Por la presente se notifica que, de conformidad con las Regulaciones de la Comisión de Control de Calidad del Agua de Nuevo México (20.6.2.3106 del Código Administrativo de Nuevo México), se ha presentado la siguiente solicitud de permiso de descarga al Director de la New Mexico Oil Conservation Division ("NMOCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, teléfono (505) 476-3441: Número de permiso de descarga de NMOCD GW-XXX

XTO Energy, Inc. (XTO)

Cowboy Central Delivery Point Terminal

32.16204745°N, -103.8346986°W; SWSW quarter section of Section 1, Township 25S, Range 30E

900 Buck Jackson Rd, Loving, Eddy County, New Mexico 88263

Mr. Shelby Pennington (281-723-9353, [Shelby.g.pennington@exxonmobil.com](mailto:Shelby.g.pennington@exxonmobil.com))

XTO anuncia la presentación de una solicitud para posibles descargas no intencionales en la Cowboy Central Delivery Point Terminal ubicada aproximadamente a 29 millas al sureste de Carlsbad, New Mexico en Buck Jackson Road. La instalación es una instalación de compresión a través de la cual el petróleo, el gas natural y el condensado de las instalaciones de producción de petróleo y gas cercanas se transportan por oleoducto para su tratamiento y procesamiento. Una vez recolectados en la instalación, el petróleo y el gas se comprimen mediante un procesamiento criogénico, se deshidratan para eliminar el contenido de agua y se procesan para eliminar y recuperar los líquidos de gas natural. La instalación fue diseñada para procesar 1000 millones de pies cúbicos estándar por día de gas natural, 550 kilobarriles (kbd) de petróleo y 50 kbd de condensado. El permiso de descarga incluye una descripción de los materiales almacenados y utilizados en la instalación y cualquier desecho generado para su eliminación fuera del sitio. El agua subterránea se encuentra aproximadamente a 425 pies bajo tierra y contiene concentraciones totales disueltas (TDS) de aproximadamente 3.000 miligramos por litro (mg/l). El permiso de descarga aborda cómo se manejarán, almacenarán y eliminarán los líquidos y los desechos sólidos, incluidos los procedimientos para evitar la descarga involuntaria. Se abordan las acciones de respuesta y las acciones correctivas para derrames y fugas.

El NMOCD ha determinado que la solicitud está administrativamente completa y está en el proceso de preparar un borrador de permiso. El NMOCD publicará un aviso en su sitio web y distribuirá un aviso de la presentación de la solicitud de descarga a la agencia gubernamental local, estatal, federal, tribal o pueblo afectada, subdivisiones políticas, asociaciones de zanjías y concesiones de tierras según lo identifique el departamento y las personas en una lista general y específica de la instalación mantenida por el departamento que hayan solicitado solicitudes de aviso de permisos de descarga. Las personas interesadas pueden obtener información, enviar comentarios y solicitar ser incluidas en una lista de correo específica de la instalación para recibir avisos futuros. El NMOCD también aceptará comentarios y declaraciones de interés con respecto al borrador del permiso y creará una lista de correo específica de la instalación para las personas que deseen recibir avisos futuros. Antes de pronunciarse sobre cualquier permiso propuesto, el Director deberá esperar al menos 30 días después de que se publique el borrador del permiso, durante los cuales las personas interesadas pueden presentar comentarios.

Las personas interesadas en obtener más información, enviar comentarios o solicitar estar en una lista de correo específica de la instalación. Para recibir avisos futuros pueden comunicarse con el contacto de la Oil Conservation Division que se indica a continuación:
