1.0 Introduction

Under the direction of New Mexico's Energy, Minerals and Natural Resources Department (EMNRD) Oil Conservation Division (OCD) and in conformance with the ITB Statewide Price Agreement # 30-00000-22-00001, Souder, Miller & Associates (SMA) has prepared this Summary Report for the remediation and reclamation of the Chuza Tank Battery located in San Juan County, New Mexico.

The Chuza Tank Battery was operated by Chuza Oil Company, a company which stopped operations in 2017, filed bankruptcy in 2018, and is no longer a registered company. As an abandoned tank battery, this facility is being address through OCD's orphan well clean-up program. Chuza Oil Company remains the listed facility operator, but the site is now under the care of OCD. The facility included seven bulk above ground storage tanks (ASTs), a below-grade fiberglass waste tank (BGT), a separator, a 40-foot Conex storage container, pump jack parts, drums, totes, piping, a soil stockpile, and other operational equipment and piping. SMA conducted oversight of decommissioning of the site and provided environmental services as part of remediation and reclamation of the tank battery. Decommissioning of the tank battery and associated dirt work were performed by Kelley Oilfield Services, Inc. (KOSI) and Aztec Well Servicing (AWS).

The facility is located in Unit P, Section 10, Township 30N, Range 16W, within San Juan County, New Mexico, under surface ownership of the Bureau of Land Management (BLM). Figures 1 and 2 illustrate the location and vicinity on a United States Geological Service (USGS) 7.5-minute quadrangle map and the site on Google Earth Pro aerial imagery.

Facility information is summarized as follows:

Site Information			
Facility Name	Chuza Tank Battery	Operator	Chuza Oil Company
Facility ID	fCS2500856447	Location	Unit P, Section 10 of Township 30N, Range 16W San Juan County, NM
OGRID	279508	GPS coordinates	36.824701°, -108.506601° NAD83
Surface Owner	Federal (Bureau of Land Management)	OCD Closure Criteria (19.15.29.12, Table I)	>100 ft Variance requested
Lease SN	NMNM105445544		

2.0 Site Characterization and Release Closure Criteria

Site characterization is governed by 19.15.29.11 NMAC, and due to a confirmed historical release at the facility (see Section 4.0), remediation and closure of the site is governed by 19.15.29.12 NMAC.

Received by OCD: 7/2/2025 2:15:21 PM

Groundwater

Depth to groundwater at the tank battery is currently unknown. According to the USGS National Water Information System, a well located approximately 1.6 miles northwest has a recorded depth to groundwater of 174 feet. The elevation of the well (USGS 365028108313301) is 5,368 feet above mean sea level (ft amsl). Using the elevation differential of the USGS well's recorded depth to groundwater and the estimated bottom of the release (5,391 ft amsl), the vertical distance between the bottom of the release and ground water is 197 ft. The USGS well data is provided in Appendix C.

- Variance Request

  Per 19.15.29.14 NMAC, a variance for depth to groundwater at 197 ft bgs is being requested based on elevation differential between USGS 365028108313301 and the bottom of the Chuza Tank Battery release. A variance is also being requested for the age of the USGS well information and the distance between the well and the release site. The 25-year data review and ½-mile proximity are guidance and are not required under 19.15.29 NMAC.

Surface Waters

The nearest continuously flowing watercourse or other significant watercourse, as defined in 19.15.17.7.P NMAC, is a riverine located approximately 244 feet the northeast of the site (U.S. Fish and Wildlife Services, National Wetlands Inventory, 2025). The riverine is classified as R4SBJ - an intermittent streambed with intermittent flooding. There are no lakebeds, sinkholes, or playa lakes within 200 feet of the release, and there are no wetlands within 100 feet of the release. A map showing surface water features is provided in Figure 3.

- Variance Request

  Per 19.15.29.14 NMAC, a variance for distance to the nearest surface water is being requested. The release is located approximately 244 feet from the nearest watercourse, which is slightly less (56 feet) than the 300-foot screening distance. The watercourse is not continuously flowing, so contaminant transport could potentially only happen during large rainfall events when the riverine is subject to receiving surface runoff. The main contaminants of concern for the release are motor oil range organics (MRO) and diesel range organics (DRO). Given the relatively low mobility of MRO and the moderate mobility of DRO—particularly in sandy soils where vertical migration dominates over lateral transport—the likelihood of these compounds impacting the watercourse is considered low under current site conditions. Additionally, the bottom of the release is characterized by a hard, thick sandstone, which appears to have entrapped much of the contaminants. Given this information, SMA requests a variance to 19.15.29.12 Part C(4)(a).

Floodplain

According to FEMA's National Flood Hazard Layer FIRMette, the release is located in Flood Zone X, an area of minimal flood hazard. The nearest 100-year flood zone is 2.1 miles to the northwest.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Wellhead Protection / Springs or Fresh-Water Wells

There are no springs or freshwater wells for public or livestock consumption within 1,000 feet of the release based on visual inspection of the area and the NM Office of the State Engineer (NMOSE) iWATERs database search. The nearest known water source or well is SJ-04063-POD2, located 3.54 miles east of the facility.

Human Occupied Institutions

There are no permanent residences, schools, hospitals, institutions or churches within 300 feet of the release.

Subsurface Mines or Unstable Area

There are no subsurface mines or known unstable areas located within or adjacent to the release.

Closure Criteria

A summary of the closure criteria described above is shown in the following table. Under SMA's variance requests and site characterization, the closure criteria for the site are the constituent concentration limits associated with the greater than 100-foot depth to groundwater, as stated in Table I of 19.15.29.12 NMAC.

Site Information (19.15.29.11.A(2, 3, and 4) NMAC)		Source/Notes
Depth to Groundwater (feet bgs)	197	USGS Well 365028108313301, located 1.6 mi NW
Wellhead Protection Within 1/2 Mile	none	New Mexico Office of the State Engineer
Distance to Nearest Significant Watercourse	244 ft	USGS Topo Map, US FWS National Wetlands Inventory

Closure Criteria (19.15.29.12.C(4) and Table I NMAC)						
Depth to Groundwater		**Closure Criteria (units in mg/kg)**				
		Chloride *numerical limit or background, whichever is greater	**TPH (GRO+DRO+MRO)**	**TPH (GRO + DRO)**	**BTEX**	**Benzene**
≤ 50' BGS		600	100		50	10
51' to 100'		10,000	2,500	1,000	50	10
>100'	x	20,000	2,500	1,000	50	10
Surface Water	**yes or no**	**If yes, then**				
<300' from continuously flowing watercourse or other significant watercourse?	yes - variance requested	600	100		50	10
<200' from lakebed, sinkhole or playa lake?	no					
<100' from wetland?	no					
within a 100-year floodplain?	no					
Water Well or Water Source						
<500 feet from spring or a private, domestic fresh water well used by less than 5 households for domestic or stock watering purposes?	no					
<1,000' from fresh water well or spring?	no					
Human and Other Areas						
<300' from an occupied permanent residence, school, hospital, institution or church?	no					
within incorporated municipal boundaries or within a defined municipal fresh water well field?	no					
within area overlying a subsurface mine	no					
within an unstable area?	no					

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Documentation in reference to site characterization, including depth to groundwater, surface water features, freshwater wells, floodplains, and subsurface mines/unstable areas are included in Appendix C.

3.0 Field Activities

3.1 Liquid Waste Characterization

Between March 31 and April 1, 2025, SMA personnel assessed the contents of 24 totes and 31 drums stored at the tank battery. A total of 7 totes and 11 drums contained liquid or semi-liquid contents, which were sampled for hazardous waste characterization. Additionally, the contents inside a tanker truck present onsite (Diamond Rio truck) and BGT were sampled for characterization. Samples were collected using a peristaltic pump or glass jar and placed in laboratory supplied containers for analysis. Due to the viscosity of some of the samples, the contracted lab, Eurofins Albuquerque, recommended they be analyzed under a “solid” or “waste” matrix.

Samples were analyzed for the following Methods:

- Resource Conservation and Recovery Act (RCRA) 8 metals
- Method 8260 volatile organic compounds (VOCs)
- Method 8270 semi-volatile organic compounds (SVOCs)
- Reactivity, Conductivity, and Ignitibility (RCI)
- pH

Samples analyzed as a waste matrix were converted from milligram per kilogram (mg/kg) to milligrams per liter (mg/L) using the EPA Rule of 20 Toxicity Characteristic Leaching Procedure (TCLP) conversion in order to compare with the hazardous waste criteria. Results indicated that all samples were within the parameters for non-hazardous waste, with the exception of the following:

- Ignitibility: TOTE-19 and TOTE-20
- pH: TOTE-20, DRM-01, DRM-14, DRM-17, DRM-19, and DRM-20
- Arsenic: DRM-17 and DRM-20

Samples received to the laboratory were outside the appropriate method hold time for pH of 15 minutes, and therefore, laboratory values for pH may be inaccurate. Additionally, samples analyzed under Methods 8260 and 8270 were diluted due to matrix interference, and therefore, some samples resulted in reporting limits that exceeded the hazardous waste criteria limits.

Laboratory results are summarized in Table 1 and laboratory reports are included in Appendix E.

3.2 NORM Assessment

On April 2, 2025, SMA conducted a naturally occurring radioactive material (NORM) sweep of the tank battery using a Ludlums Measurements, Inc. Model 3 Geiger Counter. Background readings were taken from three locations outside of the tank battery in areas likely to have little oilfield impacts.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Background readings ranged from 40 counts per minute (cpm) to 100 cpm, which converts to approximately 0.23 micro roentgen per hour (mR/hr) to 0.57 mR/hr.

Equipment and containers, including all storage tanks, separator, drums, and totes, as well as piping, pump jack parts, and the trash bin, were measured for radioactivity using the Geiger counter. The highest radioactivity measurement came from the BGT with a reading of 140 cpm (0.80 mR/hr). None of the equipment or containers, or fluid within, exceeded the New Mexico NORM disposal threshold of 50 mR/hr (20.3.14.1403 NMAC).

Results of the NORM assessment are provided in Table 2.

3.3 PCB Sampling

Soil was sampled at various locations at the tank battery for polychlorinated biphenyls (PCBs) on April 2, 2025, to determine if a PCB release had occurred. Five-point composite samples were collected from a total of four locations, two of which were below electrical boxes and a transformer (PCB-01 and PCB-02), and two of which were collected at the base of power poles (PCB-03 and PCB-04). Sample locations are shown on Figure 4.

Samples were collected into laboratory supplied containers and analyzed under Method SW846 8082A. Laboratory results indicated that all four samples were below the NMED Soil Screening Levels (SSLs) for PCBs for industrial, occupational, and construction worker for both cancer and noncancer concentrations.

PCB laboratory results are summarized in Table 3, and sample locations for PCB-01 through PCB-03 are shown in Photographs #28-#31 in Appendix D. The photograph for sample location PCB-04 is unavailable due to a corrupt photo file.

3.4 Waste and Equipment Removal

Between April 29 and May 15, 2025, equipment including ASTs, drums, totes, piping, a separator, BGT, a Diamond Rio truck, trash, and miscellaneous operational equipment were removed from the tank battery. Equipment removal was performed by KOSI and AWS, with environmental oversight provided by SMA.

Liquid Waste and Tank Bottom Sludge Removal

Between April 29 and May 5, 2025, the contents within the drums, totes, ASTs, the truck, and the BGT were removed using a vacuum truck with hose and cleaned using fresh water and a pressure washer, as described below:

- Drums and Totes: Many of the drums contained contents with the characteristics of used or waste oil, while the totes appeared to possibly contain mixed wastewater, cleaning fluids, ammonia-based liquids, and thick, viscous material (Photograph #25). Approximately 160 barrels of waste and rinsate from the drums and totes were collected and hauled to Basin Disposal.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

- Connecting piping, tank bottom sludge, truck waste, and BGT fluids: Piping that connected the ASTs were drained of residual fluid, and the ASTs were cleaned of tank bottom sludge (Photographs #61 - #65). The Diamond Rio truck contained approximately 2 inches of near-solid sludge, which was also vacuumed out and rinsed with fresh water. The BGT contained approximately 20 inches of waste fluid, which amounted to approximately 5.6 barrels (Photographs #50 and #51). Between the drained piping fluids, tank bottom sludge, truck waste, BGT fluids, and rinsate, a total of 320 barrels were collected and hauled to Basin Disposal and Envirotech.

A combined total of 480 barrels of waste was disposed of from the Chuza Tank Battery. Disposal manifests for fluids and tank bottoms are included in Appendix F.

Equipment Removal

Between April 29 and approximately May 8, 2025, equipment was disconnected and removed from the tank battery, as described below:

- Drums and totes: The rinsed drums and totes were loaded onto trailers and hauled to CBH Trucking and Salvage (CBH) for salvage and recycling.
- Conex storage container: The Conex storage container was emptied of all contents from within, disconnected from all pipe and electrical conduit, and loaded onto a trailer for transport to CBH on April 30, 2025.
- Diamond Rio truck: The truck was loaded onto a trailer and taken to CBH for salvage on April 30, 2025.
- BGT: The drained and rinsed BGT and plastic liner were removed from its operational location on May 1, 2025. The BGT was used to temporarily store the liner and small facility trash prior to being removed from the tank battery on May 7, 2025. The BGT was disposed of at the San Juan County Landfill. Details describing the BGT removal and closure can be found in the BGT Closure Report (Appendix G).
- Separator: The separator and all lines connected to it were disconnected and drained on April 30, 2025. Fluids within the separator were of minimal volume (Photograph #47). The separator was then loaded onto a trailer and hauled to CBH for scrap.
- ASTs: Emptied, rinsed, and disconnected ASTs were hauled to CBH on May 5 and 6, 2025.
- Scrap steel: Steel infrastructure, including piping, stairs, scaffolding, and other lines were disconnected from equipment and hauled to CBH for scrap.
- Concrete slabs: Concrete slabs and blocks (Photographs #40, #42, #57, and #60) were excavated from the tank battery and hauled to the storage yard at Triple S Trucking Co.
- Facility trash: Trash and other non-metal scrap was transported to the San Juan County landfill (Photograph #76).

Disposal manifests for equipment, piping, scrap, and other solid waste are included in Appendix F.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Sump Casing Plugging and Abandonment

On April 29, 2025, two vertical steel casings were discovered during removal of concrete blocks south of the facility fencing. The casings were approximately 8-inch diameter and extended 10 feet into the ground before appearing to be plugged. Approximately six feet of water was present within the casings. The water did not appear impacted by oilfield activities and was likely rainwater. On May 7, 2025 and under direction of OCD, the casings were exposed, cut four feet below ground surface, and plugged with concrete (Photographs #41 - #45). GPS coordinates for the plugged casings were recorded at latitudes and longitudes 36.824471, -108.506578 and 36.824468, -108.506552.

3.5 Soil Sampling

Between April 29 and May 16, 2025, soil samples were collected from the footprints of facility tanks and equipment. Prior to collecting samples, KOSI scraped the surface of operationally stained soil and placed it within a contaminated soil stockpile. After scraping, SMA collected a five-point composite sample from each tank and equipment footprint. Each sample was collected into a laboratory supplied container and submitted to the lab for analysis for the following EPA Methods:

- Method 300.0 for chlorides
- Method 8015D for Total Petroleum Hydrocarbons (TPH), Gasoline Range Organics (GRO), Diesel Range Organics (DRO), and Motor Oil Range Organics (MRO)
- Method 8021B for benzene, toluene, ethylbenzene, and xylenes (BTEX)

Soil sampling activities and results are summarized below:

- Separator: A five-point composite sample was collected for the separator on April 30, 2025. Analytical results indicate soil contaminant concentrations exceed the OCD Closure Criteria for DRO and total TPH. Additional excavation at the separator was delayed until haul trucks and other equipment did not need the area of the separator space to operate.
- Soil Pile: A composite sample at the soil stockpile located on the south side of the tank battery was collected on April 30, 2025. Samples were collected at 0.5-2.0 feet below the surface of the stockpile. Analytical results indicate concentrations are below the OCD Closure Criteria for all contaminants of concern.
- AST-01 through AST-07: Upon removal of the ASTs and their liners and after surface scraping, five-point composite samples were collected from each AST footprint on May 5 and 6, 2025. Analytical results for all samples indicate concentrations are below the OCD Closure Criteria for all contaminants of concern. Note that additional scraping and sampling occurred for AST-01, AST-02, AST-03, and AST-05. This was due to the assumption that a more strict closure criteria would be required.
- Valve Can: Upon removal of the valve can cribbing, piping, and operational staining, a five-point composite sample was collected on May 7, 2025 for laboratory analysis. Results indicate soil contaminant concentrations exceed the OCD Closure Criteria for DRO and total TPH.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Additional soil excavation at the valve can was delayed due to operations and staging related to the historical release (Section 4).

- Tote Area North: The tote and drum storage area located on the north side of the tank battery was sampled using a five-point composite on May 9, 2025. Analytical results for the sample indicate concentrations are below the OCD Closure Criteria for all contaminants of concern.
- Tote Area South: The tote and drum storage area located on the south side of the tank battery was sampled using a five-point composite on May 9, 2025. Analytical results for the sample indicate concentrations are below the OCD Closure Criteria for all contaminants of concern.

A summary of the facility soil sampling laboratory results is provided in Table 4, and laboratory reports are included in Appendix E. Sample locations are shown on Figure 5.

4.0 Historical Release

4.1 Delineation and Excavation

During removal of the partially buried concrete pad (Photographs #10 and #59), staining was observed in the exposed soils. As part of scraping surface-stained soils, the staining and hydrocarbon odors were observed to go much deeper than what is considered operational staining. Upon telephone consultation with OCD on May 8, 2025, the impacted area was to be delineated. Delineation demonstrated that a historical release had occurred in this portion of the tank battery. Initial delineation estimated the impacted area to be at least 50 feet by 40 feet by 10 feet deep. A grab sample was collected at 10 feet bgs, where sandstone was encountered, and laboratory analyzed for chlorides, TPH, and BTEX. Results indicated contamination above the OCD Closure Criteria for total TPH at 11,210 mg/kg.

On May 13, 2025, OCD assigned the historical release as incident **NAPM2513356224 CHUZA TANK BATTERY @ 0** and issued approval to continue excavation of the impacted soil. From May 13 to May 22, 2025, the release area was excavated and contaminated soil was hauled to the Envirotech landfarm. Clean soil from Envirotech was transported to the site and temporarily staged on the plugged and abandoned well pad located immediately west of the Chuza Tank Battery.

Additional potholing occurred on May 16, 2025 to determine the vertical extent of contamination into the sandstone. The excavator bucket penetrated to 14 feet bgs, at which point a tooth on the bucket cracked and stopped vertical delineation activities (Photographs #110 and #111). A sample was collected at 14 feet bgs and field analyzed for TPH using a DEXSIL PetroFLAG Analyzer System. Knowing the facility contaminants are predominantly DRO and MRO, the PetroFLAG was set to DRO and MRO settings. Results for the sample collected at 14 feet indicated concentrations greater than 10,000 mg/kg for both DRO and MRO, which exceed the OCD Closure Criteria for DRO and total TPH.

A summary of the historical release soil sampling laboratory results is provided in Table 5, and the laboratory report is included in Appendix E. The approximate area of the release and the sample location are shown on Figure 5.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

4.2 Work Stop Activities

On May 20, 2025, OCD directed site activities to stop, effective May 23, 2025, due to the end of the fiscal year. Between May 20 and 23, 2025, dirt work operators with KOSI and AWS prepped the site for temporary abandonment: egress ramps were constructed for the open historical release and BGT excavations, fencing was installed around the open excavations, an earthen berm constructed of contaminated soil was placed around the historical release excavation, and earthen berms constructed of clean soil was placed around the BGT excavation, soil pile, and clean soil stockpile (Photographs #115 to #122).

A total of approximately 1,772 cubic yards of contaminated soil has been removed from the Chuza Tank Battery, which includes surface-scraped operationally stained soil, contaminated soil from the BGT, and contaminated soil from the release (Incident NAPM2513356224). Approximately 1,580 cubic yards of clean soil is stockpiled west of the facility.

A copy of OCD's directive is included in Appendix B and waste manifests are included in Appendix F.

5.0 Final Remediation and Reclamation Activities

Final remediation and reclamation of the site will be completed upon notice to proceed by OCD. Remediation will include excavation of the historical release and separator area until soil concentrations meet the OCD Closure Requirements. Reclamation will include backfilling all open excavations with clean soil, contouring the area to match site pre-disturbance elevations and minimize erosional runoff, and site seeding with a BLM approved seed mix.

6.0 Summary and Recommendations

Between March 31 and May 23, 2025, SMA provided environmental services related to the remediation and reclamation of the Chuza Tank Battery. Liquid waste was characterized for disposal, a NORM assessment was completed on all facility equipment, soil was sampled for PCB analysis, storage containers including drums, totes, and bulk storage tanks were removed of liquid waste and rinsed, the fiberglass BGT was removed and closed, facility equipment and tanks were removed, and contaminated soil was hauled away.

The historical release at the facility was issued Incident NAPM2513356224. The excavation currently measures approximately 88 feet by 40 feet by 10 feet deep.

Approximately 480 barrels of liquid waste and rinsate were disposed, and approximately 1,772 cubic yards of contaminated soil has been removed from the Chuza Tank Battery, which includes contaminated soil from the BGT, surface-scraped operational staining, and the historical release.

Upon notice to proceed from OCD, SMA will provide oversight of final remediation and reclamation activities and request closure to Incident NAPM2513356224 CHUZA TANK BATTERY @ 0.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

7.0 Scope and Limitations

The scope of our services included environmental services related to the remediation and reclamation activities at the Chuza Tank Battery. All work has been performed in accordance with generally accepted professional environmental consulting practices for oil and gas operations in the San Juan Basin in New Mexico.

If there are any questions regarding this report or site conditions, please contact Stephanie Hinds at (505) 325-7535 or stephanie.hinds@soudermiller.com.

TCLP metals measured in mg/L

* EPA "Rule of 20" used for matrices reported by lab in mg/kg

1,4-Dichlorobenzene and Hexachlorobutadiene results in Method 8260

Key:

5.0: above laboratory detection limits but within the limits of non-hazardous waste criteria

<0.200: below laboratory detection limits and within the limits of non-hazardous waste criteria

<14000: below laboratory detection limits but within the hazardous waste criteria threshold

36: within the parameters of hazardous waste criteria

-- not analyzed

HF: Parameter with holding time of 15 minutes. Sample was analyzed outside of hold time.

Attachments: image001.png
image002.png
image003.png
image004.png

Steph,

Please revise the change order for standard turn around on lab costs through Envirotech. Also, we only need one report that will include the incident remediation and reclamation for **NAPM2513356224 CHUZA TANK BATTERY @ 0**, the BGT closure, and the overall activities conducted at the site.

Estimate the excavation at a depth of 20 feet deep.

OCD also approves confirmation samples to be collected every 400 sq feet.

Subject: [EXTERNAL] Chuza TB Change Order

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Hi Ashley,

Attached are the change order costs to address the pit release. The comments column list what is included for professional fees and labs. The lab price is based on 1-day TAT ($220 per sample). Please let me know if you want to reduce the number of samples analyzed.

Also, I included the performance bond, but let me know if that should be taken out.

Thanks,

SMA Since 1985

Subject:	[EXTERNAL]Chuza Tank Battery Stop Work 5/23/2025
Date:	Tuesday, May 20, 2025 8:47:48 AM
Importance:	High

All,

Due to the end of the fiscal year, upper management has decided to stop work at the Chuza Tank Battery effective Friday, May 23, 2025.

Aztec Well Service/Kelley's please conduct the following work:

- Stockpile all remaining **impacted** soils near the excavation.
  - Berm this stockpile with **impacted** soil.
- Install two exit ramps on the open excavation.
  - Using **clean** soil, berm the excavation and place fencing around the excavation to keep animals out.
- If there is clean soil stockpiled on site, berm the stockpile with **clean** soil

SMA please conduct the following work:

- Pending laboratory results for the BGT closure, draft a closure report as written in the BGT closure plan that was submitted in April.
  - If the BGT closure samples are clean, have Aztec/Kelley's backfill the bgt area.
- Submit a final report detailing all activity conducted onsite.
  - Executive summary, site history, what equipment was removed, salvage/disposal of equipment, totes, liquids, tank bottoms, and impacted soil
  - Include leaving the excavation open and the current dimensions of the excavation.
    - Provide details on the estimated dimensions of contamination remaining in place, including cubic yards.
    - Include figures with sample locations.
      - Individual figures for the BGT and the excavation.
    - Include all field notes and NORM survey
    - Include a detailed photo log
    - Include laboratory reports
    - Include disposal tickets from Basin and Envirotech (Shawn Dahl may have these for you as he has been keeping the daily cost sheet)

As of 5/16/2025, based on Daily Reports, this is where the current PO balances stand:

SMA		
	PO Amount	$98,430.28
	Spent	$ 41,007.50
	Remaining	$ 57,422.78

AWS		
	PO Amount	$300,000.00
	Spent	$ 218,093.60
	Remaining	$ 81,906.40

Let me know if the work listed above will exceed the remaining balances of your PO's.

Please give me a call if you have any questions.

Thanks,
Ashley

APPENDIX E

Laboratory Reports

eurofins | Environment Testing

ANALYTICAL REPORT

PREPARED FOR

Attn: Stephanie Hinds
Souder, Miller & Associates
401 W Broadway
Farmington, New Mexico 87401

Generated 5/5/2025 7:24:40 PM

JOB DESCRIPTION

Chuza TB

JOB NUMBER

885-22526-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 7/2/2025 2:17:06 PM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
*1	LCS/LCSD RPD exceeds control limits.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
HF	Parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. Sample was analyzed outside of hold time.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22526-1

Job ID: 885-22526-1 Eurofins Albuquerque

Job Narrative
885-22526-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 5 coolers at receipt time were 0.3°C, 0.8°C, 1.0°C, 1.2°C and 1.6°C.

Receipt Exceptions
The following samples were determined to be waste samples instead of aqueous as listed on the Chain of Custody (COC): TOTE-02 (885-22526-9) and TOTE-24 (885-22526-10).

The following samples for methods 1010, 9045, 9014,9034,7470A were received at the laboratory outside the required temperature criteria: TOTE-02 (885-22526-9) and TOTE-24 (885-22526-10). This does not meet regulatory requirements.

GC/MS VOA
Method 8260B: Surrogate recovery for the following sample was outside control limits: TOTE-19 (885-22526-11). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8260B: The following sample was diluted due to the abundance of non-target analytes: TOTE-02 (885-22526-9). Elevated reporting limits (RLs) are provided.

Method 8260B: The following sample was diluted due to the nature of the sample matrix: TOTE-24 (885-22526-10). Elevated reporting limits (RLs) are provided.

Method 8260B: Surrogate recovery for the following sample was outside control limits: TOTE-19 (885-22526-11). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270C: The following sample was diluted due to the nature of the sample matrix: TOTE-20 (885-22526-4). Elevated reporting limits (RLs) are provided.

Method 8270C: Surrogate recovery for the following samples were outside control limits: TOTE-01 (885-22526-1) and TOTE-20 (885-22526-4). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8270C: The laboratory control sample (LCS) for preparation batch 885-23595 and analytical batch 885-23800 recovered outside acceptance limits for Pyrene and the laboratory control sample duplicate (LCSD) recovered outside acceptance limits for Phenol and Pyrene. There was insufficient sample to perform a re-extraction; therefore, the data have been qualified and reported.

Method 8270C: The following samples were diluted due to the nature of the sample matrix: TOTE-02 (885-22526-9), TOTE-24 (885-22526-10) and TOTE-19 (885-22526-11). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270C - TCLP: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22526-1

Job ID: 885-22526-1 (Continued) Eurofins Albuquerque

preparation batch 885-23772 and 885-23928 and analytical batch 885-25346 recovered outside control limits for the following analytes: 2-Methylphenol, 3 & 4 Methylphenol, Hexachlorobutadiene, Hexachloroethane, Nitrobenzene, Pyridine, 2,4,6-Trichlorophenol and Cresols, Total.

Method 8270C - TCLP: The following samples were diluted due to the nature of the sample matrix: TOTE-21 (885-22526-5) and TOTE-22 (885-22526-6). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
Method 6020A - Total Recoverable: The continuing calibration verification (CCV) associated with batch 885-23760 recovered above the upper control limit for Selenium. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
Method 9034_Reactive: The following sample(s) was received with less than 2 days remaining on the holding time or less than one shift (8 hours) remaining on a test with a holding time of 48 hours or less. As such, the laboratory had insufficient time remaining to perform the analysis within holding time: TOTE-02 (885-22526-9) and TOTE-24 (885-22526-10).

Method 9040B: The pH for the following samples were outside the instrument calibration range of 4 to 10: TOTE-01 (885-22526-1), TOTE-20 (885-22526-4), TOTE-21 (885-22526-5) and TOTE-22 (885-22526-6)

Method 9045D: The reference method does not list a specific holding time for this procedure; therefore, the laboratory defaults to an in-house holding time of midnight of the date of receipt. The following samples were prepared and/or analyzed outside this time period: TOTE-02 (885-22526-9) and TOTE-24 (885-22526-10).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

After printing this label:
CONSIGNEE COPY - PLEASE PLACE IN FRONT OF POUCH
1. Fold the printed page along the horizontal line.
2. Place label in shipping pouch and affix it to your shipment.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
*1	LCS/LCSD RPD exceeds control limits.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
HF	Parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. Sample was analyzed outside of hold time.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22529-1

Job ID: 885-22529-1 Eurofins Albuquerque

Job Narrative
885-22529-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 5 coolers at receipt time were 0.3°C, 0.7°C, 1.0°C, 1.2°C and 1.6°C.

GC/MS VOA
Method 8260B: The continuing calibration verification (CCV) associated with batch 885-23876 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270C: The following sample was diluted due to the nature of the sample matrix: BGT-01 (885-22529-2). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270C: The laboratory control sample (LCS) for preparation batch 885-23595 and analytical batch 885-23800 recovered outside acceptance limits for Phenol and Pyrene. There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

Method 8270C - TCLP: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 885-23772 and 885-23928 and analytical batch 885-24261 recovered outside control limits for the following analytes: 2-Methylphenol, 3 & 4 Methylphenol, Hexachlorobutadiene, Hexachloroethane, Nitrobenzene, Pyridine, 2,4,6-Trichlorophenol and Cresols, Total.

Method 8270C - TCLP: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: (LCS 885-23928/2-A), (LCSD 885-23928/3-A) and (MB 885-23928/1-A). These results have been reported and qualified.

Method 8270C - TCLP: The laboratory control sample (LCS) for preparation batch 885-23928 and analytical batch 885-24261 recovered outside acceptance limits for Pyridine. There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported. The laboratory control sample duplicate (LCSD) recovered within acceptance limits for all reported analytes.

Method 8270C - TCLP: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: TRK-01 (885-22529-1). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
Method 6020A - Total Recoverable: The continuing calibration verification (CCV) associated with batch 885-23760 recovered above the upper control limit for Selenium. The samples associated with this CCV were non-detects for the affected analytes;

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22529-1

Job ID: 885-22529-1 (Continued) Eurofins Albuquerque

therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
Method 9034_Reactive: Reanalysis of the following sample was performed outside of the analytical holding time: TRK-01 (885-22529-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
*3	ISTD response or retention time outside acceptable limits.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.
S1+	Surrogate recovery exceeds control limits, high biased.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
F1	MS and/or MSD recovery exceeds control limits.
F2	MS/MSD RPD exceeds control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
HF	Parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. Sample was analyzed outside of hold time.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22531-1

Job ID: 885-22531-1 Eurofins Albuquerque

Job Narrative
885-22531-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 5 coolers at receipt time were 0.3°C, 0.7°C, 1.0°C, 1.2°C and 1.6°C.

Receipt Exceptions
The following samples were determined to be waste samples instead of aqueous as listed on the Chain of Custody (COC): DRM-13 (885-22531-13), DRM-15 (885-22531-14), DRM-19 (885-22531-15) and DRM-31 (885-22531-16)

The following samples for 1010, 9045, 9014,9034,7470A was received at the laboratory outside the required temperature criteria: DRM-13 (885-22531-13), DRM-15 (885-22531-14), DRM-19 (885-22531-15) and DRM-31 (885-22531-16). This does not meet regulatory requirements.

GC/MS VOA
Method 8260B: The continuing calibration verification (CCV) associated with batch 885-23806 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260B: The continuing calibration verification (CCV) associated with batch 885-23876 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260B: The following samples were diluted due to the abundance of non-target analytes: DRM-19 (885-22531-15) and DRM-31 (885-22531-16). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270C: The following sample was diluted due to the nature of the sample matrix: DRM-16 (885-22531-6) and DRM-20 (885-22531-9). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270C: Surrogate recovery for the following sample was outside control limits: : DRM-14 (885-22531-4) and DRM-17 (885-22531-7). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8270C: The laboratory control sample (LCS) for preparation batch 885-23595 and analytical batch 885-23800 recovered outside acceptance limits for Pyrene and the laboratory control sample duplicate (LCSD) recovered outside acceptance limits for Phenol and Pyrene. There was insufficient sample to perform a re-extraction; therefore, the data have been qualified and reported.

Method 8270C: Internal standard (ISTD) response for the following sample was outside of acceptance limits: DRM-14 (885-22531-4) and DRM-17 (885-22531-7). The sample(s) was not re-analyzed due to holding time expiration. Samples are ND for associated high IS failures; results biased low. The data have been qualified and reported.

Method 8270C: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22531-1

Job ID: 885-22531-1 (Continued) Eurofins Albuquerque

number of surrogate compounds outside limits: (MB 885-23755/1-A). These results have been reported and qualified.

Method 8270C: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 885-23755 and analytical batch 885-24261 recovered outside control limits for the following analyte: Pyrene. The client sample is out of hold and will not be re-extracted. Data have been qualified and reported.

Method 8270C: The following sample was diluted due to the nature of the sample matrix: DRM-24 (885-22531-10). Elevated reporting limits (RLs) are provided.

Method 8270C: The following samples were diluted due to the nature of the sample matrix: DRM-13 (885-22531-13), DRM-15 (885-22531-14), DRM-19 (885-22531-15), and DRM-31 (885-22531-16). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals

Method 6020A - Total Recoverable: The continuing calibration verification (CCV) associated with batch 885-23760 recovered above the upper control limit for Selenium. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 7470A - TCLP: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 570-555091 and 570-556248 and analytical batch 570-556393 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry

Method 9034_Reactive: The following sample(s) was received with less than 2 days remaining on the holding time or less than one shift (8 hours) remaining on a test with a holding time of 48 hours or less. As such, the laboratory had insufficient time remaining to perform the analysis within holding time: DRM-13 (885-22531-13), DRM-15 (885-22531-14) and DRM-19 (885-22531-15).

Method 9040B: pH meter reads negative result for the following samples; pH litmus strip confirms pH of 0: DRM-01 (885-22531-1), DRM-14 (885-22531-4), DRM-17 (885-22531-7), DRM-20 (885-22531-9) and (885-22531-G-1 DU)

Method 9045D: The reference method does not list a specific holding time for this procedure; therefore, the laboratory defaults to an in-house holding time of midnight of the date of receipt. The following samples were prepared and/or analyzed outside this time period: DRM-13 (885-22531-13), DRM-15 (885-22531-14), DRM-19 (885-22531-15) and DRM-31 (885-22531-16).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-22531-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque (Continued)

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Oregon	NELAP	NM100001	02-26-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8270C	3580A	Waste	1-Methylnaphthalene

Laboratory: Eurofins Calscience

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	Identification Number	Expiration Date
A2LA	Dept. of Defense ELAP	7296.01	11-30-26
Arizona	State	AZ0830	11-16-25

After printing this label:
CONSIGNEE COPY - PLEASE PLACE IN FRONT OF POUCH
1. Fold the printed page along the horizontal line.
2. Place label in shipping pouch and affix it to your shipment.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

DRM-24 (885-22531-10)	3/31/25	17:00 Mountain	G	Water			X	X	X	X	2	

Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing South Central, LLC places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the Eurofins Environment Testing South Central, LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing South Central, LLC attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing South Central, LLC.

Possible Hazard Identification	Sample Disposal (A fee may be assessed if samples are retained longer than 1 month)
Unconfirmed	☐ Return To Client ☐ Disposal By Lab ☐ Archive For _____ Months

Login Number: 22531 **List Source: Eurofins Albuquerque**
List Number: 1
Creator: Casarrubias, Tracy

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	Seal present with no number.
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	Reveived in Thawed Blue Ice
Cooler Temperature is acceptable.	False	Cooler temperature outside required temperature criteria.
Cooler Temperature is recorded.	True	8.6
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	N/A	Received project as a subcontract.
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True

JOB DESCRIPTION

Chuza TB

JOB NUMBER

885-22551-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 7/2/2025 2:17:06 PM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22551-1

Job ID: 885-22551-1 Eurofins Albuquerque

Job Narrative
885-22551-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/3/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 0.6°C.

PCBs
Method 8082A: The following samples were diluted due to the nature of the sample matrix : PCB-01 (885-22551-1), PCB-02 (885-22551-2) and PCB-03 (885-22551-3). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza Tank Battery

Job ID: 885-24195-1

Job ID: 885-24195-1 Eurofins Albuquerque

Job Narrative
885-24195-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.6°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-25716 recovered outside acceptance criteria, low biased, for Diesel Range Organics [C10-C28]. Samples affected by the CCV are shown and will be re-ran. The following samples are associated Stockpile CS (885-24195-1), Separator CS (885-24195-2), BGT CS (885-24195-3), (CCV 885-25716/33) and (MB 885-25724/1-A).

Method 8015D_DRO: The following samples required a dilution due to the nature of the sample matrix: Separator CS (885-24195-2) and BGT CS (885-24195-3). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-24672-1

Job ID: 885-24672-1 Eurofins Albuquerque

Job Narrative
885-24672-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The sample was received on 5/10/2025 7:00 AM. Unless otherwise noted below, the sample arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.3°C.

Gasoline Range Organics
Method 8015D_GRO: Surrogate recovery for the following sample was outside control limits: Pit PH-01 (885-24672-1). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
Method 8021B: Surrogate recovery for the following sample was outside control limits: Pit PH-01 (885-24672-1). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The following sample required a dilution due to the nature of the sample matrix: Pit PH-01 (885-24672-1). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-24674-1

Job ID: 885-24674-1 Eurofins Albuquerque

Job Narrative
885-24674-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/10/2025 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.3°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The following sample required a dilution due to the nature of the sample matrix: Valve Can (885-24674-3). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-24674-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-24675-1

Job ID: 885-24675-1 Eurofins Albuquerque

Job Narrative
885-24675-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/10/2025 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.3°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-24675-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-25207-1

Job ID: 885-25207-1 Eurofins Albuquerque

Job Narrative
885-25207-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/20/2025 6:50 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.7°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

1.0 Introduction

In accordance with Rule 19.15.17.13 NMAC, the following information describes the closure activities of the below-grade tank (BGT) at the former Chuza Tank Battery, located in San Juan County, New Mexico.

The Chuza Tank Battery was operated by Chuza Oil Company, a company which stopped operations in 2017, filed bankruptcy in 2018, and is no longer a registered company. As an abandoned tank battery, this facility was considered under New Mexico's Energy Minerals and Natural Resources Department (EMNRD) Oil Conservation Division (OCD) orphan well clean-up program. Chuza Oil Company remains the listed facility operator, but the site is now under the care of OCD. The facility included a below-grade fiberglass waste tank (BGT1). Souder, Miller & Associates (SMA) oversaw closure of BGT1 as part of the tank battery facility remediation and reclamation.

This Closure Report is submitted in conjunction with OCD's Form C-144: Pit, Below-Grade Tank, or Proposed Alternative Method Permit or Closure Plan Application (Appendix A).

The BGT is located in Unit P, Section 10, Township 30N, Range 16W, within San Juan County, New Mexico, under surface ownership of the Bureau of Land Management (BLM). Figures 1 and 2 illustrate the vicinity and BGT location on a United States Geological Service (USGS) 7.5-minute quadrangle map and Google Earth Pro aerial imagery, respectively.

Facility and BGT information are summarized as follows:

Site Information			
Facility Name	Chuza Tank Battery	Below-Grade Tank ID	BGT1
Facility ID	fCS2500856447	Operator	Chuza Oil Company
OGRID	279508	Location	Unit P, Section 10 of Township 30N, Range 16W San Juan County, NM
Surface Owner	Federal (Bureau of Land Management)	GPS coordinates of BGT Elevation of BGT	36.82495°, -108.50627° 5406 ft amsl
Lease SN	NMNM105445544	NMOCD BGT Closure Criteria (19.15.17.13, Table I)	>100 ft (see variance request)
BGT Dimensions	9' D x 3' H	BGT Nominal Volume	~34 bbl

2.0 Closure Criteria Determination

Groundwater

Depth to groundwater at the BGT is currently unknown. According to the USGS National Water Information System, a well located 1.6 miles northwest has a recorded depth to groundwater of 174 feet. The elevation of the well (USGS 365028108313301) is 5,368 feet above mean sea level (ft amsl).

Received by OCD: 7/2/2025 2:15:21 PM

Using the elevation differential of the USGS well's recorded depth to groundwater and the BGT, the depth to groundwater at the BGT is estimated at 212 ft below ground surface (bgs). The USGS well data is provided in Appendix C.

- Variance Request

  Per 19.15.29.14 NMAC, a variance for depth to groundwater at 212 ft bgs is being requested based on elevation differential between USGS 365028108313301 and the Chuza Tank Battery BGT. A variance is also being requested for the age of the USGS well information and the distance between the well and the BGT. The 25-year data review and ½-mile proximity are guidance and are not required under 19.15.29 NMAC.

Surface Waters

There are no surface waters, including continuously flowing watercourses, significant watercourses, lake beds, sinkholes, wetland, or playa lakes within 100 feet of the BGT. The nearest significant watercourse, as defined in 19.15.17.7.P NMAC, is a riverine located approximately 295 feet to the northeast (U.S. Fish and Wildlife Services, National Wetlands Inventory, 2025). A map showing surface water features, including wetlands, is provided in Figure 3.

Springs or Fresh-Water Wells

There are no springs or fresh-water wells for public or livestock consumption within 200 feet of the BGT based on visual inspection of the area and the NM Office of the State Engineer (NMOSE) iWATERs database search.

Closure Criteria

A summary of the closure criteria described above is shown in the following table. Under SMA's variance request and site characterization, the closure criteria for the site are the constituent concentration limits associated with the greater than 100-foot depth to groundwater, as stated in Table I of 19.15.17.

Released to Imaging: 7/2/2025 2:17:06 PM

Site Information (19.15.17.10 NMAC)		Source/Notes
Depth to Groundwater (feet bgs)	212	USGS Well 365028108313301, located 1.6 mi NW
Horizontal Distance From All Water Sources Within 1/2 Mile (ft)	none	New Mexico Office of the State Engineer
Horizontal Distance to Nearest Significant Watercourse (ft)	295 ft	United States Geological Survey Topo Map

Closure Criteria (19.15.17.13 Table I NMAC)						
Depth below bottom of pit to groundwater less than 10,000 mg/L TDS		Closure Criteria (units in mg/kg)				
		Chloride *numerical limit or background, whichever is greater	TPH	GRO + DRO	BTEX	Benzene
25' to 50'		600	100		50	10
51' to 100'		10,000	2,500	1,000	50	10
>100'	x	20,000	2,500	1,000	50	10

Siting Criteria for Temporary Pit (19.15.17.10 NMAC Subsection A)						
Groundwater	yes/no	If yes, then				
(a) <25' from below the bottom of the pit	no	600	100		50	10
Surface Water						
(b)(i) <100' from continuously flowing watercourse or other significant watercourse?	no					
(b)(ii) <200' from lakebed, sinkhole or playa lake?	no					
(f) <100' of wetland	no					
(i) within a 100-year floodplain?	no					
Water Well or Water Source						
(d) <200 feet from spring or a private, domestic fresh water well used by less than 5 households for domestic or stock watering purposes?	no					
Human and Other Areas						
(c) <300' from an occupied permanent residence, school, hospital, institution or church?	no					
(e) within incorporated municipal boundaries or within a defined municipal fresh water well field?	no					
(g) within area overlying a subsurface mine	no					
(h) within an unstable area?	no					

Documentation in reference to site characterization, including depth to groundwater, surface water features, and freshwater wells are included in Appendix C.

3.0 Field Activities

3.1 Tank Removal

Liquid Waste Sampling (April 1, 2025)

Liquid waste within the BGT was sampled on April 1, 2025, for the characterization of hazardous waste and disposal. A grab sample was analyzed for the RCRA 8 metals, EPA Methods 8260 and 8270, RCI, and pH. Results for all parameters were below the concentrations characteristic of hazardous waste. Results are summarized in Table 1 and the laboratory report is included in Appendix E.

BGT Liquid Waste and Tank Removal (April 30 and May 1, 2025)

Liquid waste within the BGT was removed by Kelley Oilfield Services (KOS) on April 30, 2025 by a vacuum truck operated by Aztec Well Servicing (AWS). Liquid waste from the BGT was combined with the tank bottom sludge from the facility ASTs and transported to and disposed at Envirotech Inc.'s

Received by OCD: 7/2/2025 2:15:21 PM

landfarm for tank bottoms (Permit # NM01-0011) on May 2, 2025. A copy of the liquid waste disposal ticket is included in Appendix F.

The BGT and plastic liner were power washed and removed from its operational location on May 1, 2025 by an excavator with bucket operated by KOS. The BGT was temporarily used to collect facility trash before being transported off-site on May 7, 2025 (see Photograph #13). The tank and plastic liner were taken to the San Juan County Landfill for disposal.

3.2 Excavation and Soil Sampling

Initial BGT Soil Sampling (May 1, 2025)

In accordance with the BGT Closure Plan, a five-point composite soil sample was collected from the footprint of the BGT. The sample was placed in a laboratory supplied 4-oz glass jar and stored on ice for transport to Eurofins Albuquerque, located in Albuquerque, NM. The sample was analyzed for the following EPA Methods:

- Method 300.0 for chloride
- Method 8015D for Total Petroleum Hydrocarbons (TPH): Gasoline Range Organics (GRO), Diesel Range Organics (DRO), and Motor oil Range Organics (MRO)
- Method 8021B for Volatile Organic Compounds (VOC): benzene, toluene, ethylbenzene, and xylenes (BTEX)

Visual observation of the tank footprint and the BGT Base confirmation laboratory results indicated soil contaminant concentrations above closure criteria for DRO and MRO. Due to the contaminant concentrations, additional excavation and sampling was required under 19.15.17.13 NMAC.

BGT Soil Excavation and Confirmation Sampling (May 8 and 9, 2025)

Excavation of the contaminated BGT area began on May 8, 2025. The excavation reached an approximate size of 13 feet long by 12 feet wide by 5 feet deep, at which point no more visual staining or hydrocarbon odor was observed. Field samples were collected from the walls and base and analyzed for TPH using a DEXSIL PetroFLAG Analyzer System. Field results indicated TPH concentrations were still above the closure criteria of 1,000 mg/kg for GRO+DRO and 2,500 mg/kg for total TPH. SMA directed KOS to continue excavation.

On May 9, 2025, SMA collected samples from walls and base of the excavation, which was now measured at approximately 20 feet by 20 feet by 10 feet deep. Field results using the PetroFLAG indicated the TPH concentrations were below the closure criteria. A confirmation 5-point composite sample was collected for every 200 square feet of the excavation. As such, a total of one composite from each wall and two composite samples from the base were collected for laboratory analysis.

Laboratory results from the May 9, 2025 sampling event indicated all samples collected were below the closure criteria for chlorides, GRO+DRO, TPH, benzene, and total BTEX.

Released to Imaging: 7/2/2025 2:17:06 PM

Received by OCD: 7/2/2025 2:15:21 PM

Over-Excavation (May 16, 2025)

The BGT was over-excavated on May 16, 2025, resulting in a 22-foot-wide by 22-foot-long by 10-foot-deep excavation. Soil samples were collected from the base and walls and submitted for laboratory analysis. Over-excavation and additional sampling occurred due to the assumption that a more strict closure criteria was going to be required.

A total of approximately 180 cubic yards in-situ of contaminated soil from the BGT were hauled to Envirotech Inc.'s landfarm. A copy of the waste manifests are included in Appendix F.

A figure depicting sample locations is provided in Figure 4, field and laboratory results are summarized in Table 2, photos of BGT closure activities are provided in Appendix D, and laboratory reports are included in Appendix E.

3.3 Backfill

Due to instruction by OCD to pause site activities, the BGT excavation is currently open. An egress ramp was constructed on the northwest side of the excavation and the excavation is secured with perimeter fencing. Backfilling the BGT excavation will be with clean fill material obtained from Envirotech, which is currently stockpiled west of the BGT (see Photograph #27).

3.4 Reclamation Activities

Reclamation of the site will be completed upon notice to proceed by OCD. Reclamation will include backfilling the excavation, contouring the area to match site pre-disturbance elevations and minimizing erosional runoff, and site seeding with a BLM approved seed mix.

4.0 Summary and Recommendations

Between April 30 and May 16, 2025, SMA provided environmental services related to the closure of the Chuza Tank Battery BGT. Liquid waste samples were collected and analyzed for hazardous waste characterization, a composite soil sample was collected beneath the tank footprint, and contaminated soil from the BGT was removed until laboratory results confirmed soil concentrations of chlorides, GRO+DRO, TPH, benzene, and BTEX met closure criteria standards. The excavation measures 22 feet by 22 feet by 10 feet deep. A total of approximately 180 cubic yards of contaminated soil was removed from the BGT.

Upon notice to proceed from OCD, SMA will provide oversight of backfilling and reclamation activities for the BGT.

Based on site characterization, the variance request, and confirmation soil sampling results, SMA requests closure of the Chuza Tank Battery BGT.

5.0 Scope and Limitations

The scope of our services included liquid waste sampling, soil sampling, and directing excavation and remediation activities related to the Chuza Tank Battery BGT. All work has been performed in accordance with generally accepted professional environmental consulting practices for oil and gas operations in the San Juan Basin in New Mexico.

If there are any questions regarding this report or site conditions, please contact Stephanie Hinds at (505) 325-7535 or stephanie.hinds@soudermiller.com.

Form C-144
Revised October 11, 2022

Pit, Below-Grade Tank, or Proposed Alternative Method Permit or Closure Plan Application

Type of action:
- ☐ Below grade tank registration
- ☐ Permit of a pit or proposed alternative method
- ☒ Closure of a pit, below-grade tank, or proposed alternative method
- ☐ Modification to an existing permit/or registration
- ☐ Closure plan only submitted for an existing permitted or non-permitted pit, below-grade tank, or proposed alternative method

Instructions: Please submit one application (Form C-144) per individual pit, below-grade tank or alternative request

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

1.

Operator: Chuza Oil Company OGRID #: 279508

Address: NA

Facility or well name: Chuza Tank Battery

API Number: _____ OCD Permit Number: _____

U/L or Qtr/Qtr Unit P Section 10 Township 30N Range 16W County: San Juan

Center of Proposed Design: Latitude 36.82495 Longitude -108.50627 NAD83

[ ] Signed in compliance with 19.15.16.8 NMAC

8.

Variances and Exceptions:

Justifications and/or demonstrations of equivalency are required. Please refer to 19.15.17 NMAC for guidance.

Please check a box if one or more of the following is requested, if not leave blank:

[x] Variance(s): Requests must be submitted to the appropriate division district for consideration of approval.Depth to groundwater

[ ] Exception(s): Requests must be submitted to the Santa Fe Environmental Bureau office for consideration of approval.

9.

Siting Criteria (regarding permitting): 19.15.17.10 NMAC

Instructions: The applicant must demonstrate compliance for each siting criteria below in the application. Recommendations of acceptable source material are provided below. **Siting criteria does not apply to drying pads or above-grade tanks.**

General siting	
Ground water is less than 25 feet below the bottom of a low chloride temporary pit or below-grade tank. - [ ] NM Office of the State Engineer - iWATERS database search; [x] USGS; [ ] Data obtained from nearby wells	[ ] Yes [x] No [ ] NA
Ground water is less than 50 feet below the bottom of a Temporary pit, permanent pit, or Multi-Well Fluid Management pit . NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	[ ] Yes [ ] No [ ] NA
Within incorporated municipal boundaries or within a defined municipal fresh water well field covered under a municipal ordinance adopted pursuant to NMSA 1978, Section 3-27-3, as amended. **(Does not apply to below grade tanks)** - Written confirmation or verification from the municipality; Written approval obtained from the municipality	[ ] Yes [ ] No
Within the area overlying a subsurface mine. **(Does not apply to below grade tanks)** - Written confirmation or verification or map from the NM EMNRD-Mining and Mineral Division	[ ] Yes [ ] No
Within an unstable area. **(Does not apply to below grade tanks)** - Engineering measures incorporated into the design; NM Bureau of Geology & Mineral Resources; USGS; NM Geological Society; Topographic map	[ ] Yes [ ] No
Within a 100-year floodplain. **(Does not apply to below grade tanks)** - FEMA map	[ ] Yes [ ] No
Below Grade Tanks	
Within 100 feet of a continuously flowing watercourse, significant watercourse, lake bed, sinkhole, wetland or playa lake (measured from the ordinary high-water mark). - Topographic map; Visual inspection (certification) of the proposed site	[ ] Yes [x] No
Within 200 horizontal feet of a spring or a fresh water well used for public or livestock consumption;. - NM Office of the State Engineer - iWATERS database search; Visual inspection (certification) of the proposed site	[ ] Yes [x] No
Temporary Pit using Low Chloride Drilling Fluid (maximum chloride content 15,000 mg/liter)	
Within 100 feet of a continuously flowing watercourse, or any other significant watercourse or within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). (Applies to low chloride temporary pits.) - Topographic map; Visual inspection (certification) of the proposed site	[ ] Yes [ ] No
Within 300 feet from a occupied permanent residence, school, hospital, institution, or church in existence at the time of initial application. - Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	[ ] Yes [ ] No
Within 200 horizontal feet of a spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes, or 300feet of any other fresh water well or spring, in existence at the time of the initial application. NM Office of the State Engineer - iWATERS database search; Visual inspection (certification) of the proposed site	[ ] Yes [ ] No

Within 100 feet of a wetland. - US Fish and Wildlife Wetland Identification map; Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Temporary Pit Non-low chloride drilling fluid	
Within 300 feet of a continuously flowing watercourse, or any other significant watercourse, or within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). - Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within 300 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application. - Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	☐ Yes ☐ No
Within 500 horizontal feet of a spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes, or 1000 feet of any other fresh water well or spring, in the existence at the time of the initial application; - NM Office of the State Engineer - iWATERS database search; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within 300 feet of a wetland. - US Fish and Wildlife Wetland Identification map; Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Permanent Pit or Multi-Well Fluid Management Pit	
Within 300 feet of a continuously flowing watercourse, or 200 feet of any other significant watercourse, or lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). - Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within 1000 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application. - Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	☐ Yes ☐ No
Within 500 horizontal feet of a spring or a fresh water well used for domestic or stock watering purposes, in existence at the time of initial application. - NM Office of the State Engineer - iWATERS database search; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within 500 feet of a wetland. - US Fish and Wildlife Wetland Identification map; Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No

Temporary Pits, Emergency Pits, and Below-grade Tanks Permit Application Attachment Checklist: Subsection B of 19.15.17.9 NMAC

Instructions: Each of the following items must be attached to the application. Please indicate, by a check mark in the box, that the documents are attached.

☐ Hydrogeologic Report (Below-grade Tanks) - based upon the requirements of Paragraph (4) of Subsection B of 19.15.17.9 NMAC
☐ Hydrogeologic Data (Temporary and Emergency Pits) - based upon the requirements of Paragraph (2) of Subsection B of 19.15.17.9 NMAC
☐ Siting Criteria Compliance Demonstrations - based upon the appropriate requirements of 19.15.17.10 NMAC
☐ Design Plan - based upon the appropriate requirements of 19.15.17.11 NMAC
☐ Operating and Maintenance Plan - based upon the appropriate requirements of 19.15.17.12 NMAC
☐ Closure Plan (Please complete Boxes 14 through 18, if applicable) - based upon the appropriate requirements of Subsection C of 19.15.17.9 NMAC and 19.15.17.13 NMAC

☐ Previously Approved Design (attach copy of design) API Number: _____ or Permit Number: _____

11.

Multi-Well Fluid Management Pit Checklist: Subsection B of 19.15.17.9 NMAC

Instructions: Each of the following items must be attached to the application. Please indicate, by a check mark in the box, that the documents are attached.

☐ Design Plan - based upon the appropriate requirements of 19.15.17.11 NMAC
☐ Operating and Maintenance Plan - based upon the appropriate requirements of 19.15.17.12 NMAC
☐ A List of wells with approved application for permit to drill associated with the pit.
☐ Closure Plan (Please complete Boxes 14 through 18, if applicable) - based upon the appropriate requirements of Subsection C of 19.15.17.9 NMAC and 19.15.17.13 NMAC
☐ Hydrogeologic Data - based upon the requirements of Paragraph (4) of Subsection B of 19.15.17.9 NMAC
☐ Siting Criteria Compliance Demonstrations - based upon the appropriate requirements of 19.15.17.10 NMAC

☐ Previously Approved Design (attach copy of design) API Number: _____ or Permit Number: _____

Released to Imaging: 7/2/2025 2:17:06 PM

12.
Permanent Pits Permit Application Checklist: Subsection B of 19.15.17.9 NMAC
Instructions: Each of the following items must be attached to the application. Please indicate, by a check mark in the box, that the documents are attached.

- ☐ Hydrogeologic Report - based upon the requirements of Paragraph (1) of Subsection B of 19.15.17.9 NMAC
- ☐ Siting Criteria Compliance Demonstrations - based upon the appropriate requirements of 19.15.17.10 NMAC
- ☐ Climatological Factors Assessment
- ☐ Certified Engineering Design Plans - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Dike Protection and Structural Integrity Design - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Leak Detection Design - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Liner Specifications and Compatibility Assessment - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Quality Control/Quality Assurance Construction and Installation Plan
- ☐ Operating and Maintenance Plan - based upon the appropriate requirements of 19.15.17.12 NMAC
- ☐ Freeboard and Overtopping Prevention Plan - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Nuisance or Hazardous Odors, including H_2S, Prevention Plan
- ☐ Emergency Response Plan
- ☐ Oil Field Waste Stream Characterization
- ☐ Monitoring and Inspection Plan
- ☐ Erosion Control Plan
- ☐ Closure Plan - based upon the appropriate requirements of Subsection C of 19.15.17.9 NMAC and 19.15.17.13 NMAC

13.
Proposed Closure: 19.15.17.13 NMAC
Instructions: Please complete the applicable boxes, Boxes 14 through 18, in regards to the proposed closure plan.

Type: ☐ Drilling ☐ Workover ☐ Emergency ☐ Cavitation ☐ P&A ☐ Permanent Pit ☒ Below-grade Tank ☐ Multi-well Fluid Management Pit ☐ Alternative

Proposed Closure Method: ☒ Waste Excavation and Removal
☐ Waste Removal (Closed-loop systems only)
☐ On-site Closure Method (Only for temporary pits and closed-loop systems)
☐ In-place Burial ☐ On-site Trench Burial
☐ Alternative Closure Method

14.
Waste Excavation and Removal Closure Plan Checklist: (19.15.17.13 NMAC) ***Instructions: Each of the following items must be attached to the closure plan. Please indicate, by a check mark in the box, that the documents are attached.***

- ☒ Protocols and Procedures - based upon the appropriate requirements of 19.15.17.13 NMAC
- ☒ Confirmation Sampling Plan (if applicable) - based upon the appropriate requirements of Subsection C of 19.15.17.13 NMAC
- ☒ Disposal Facility Name and Permit Number (for liquids, drilling fluids and drill cuttings)
- ☒ Soil Backfill and Cover Design Specifications - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC
- ☒ Re-vegetation Plan - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC
- ☒ Site Reclamation Plan - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC

15.
Siting Criteria (regarding on-site closure methods only): 19.15.17.10 NMAC
Instructions: Each siting criteria requires a demonstration of compliance in the closure plan. Recommendations of acceptable source material are provided below. Requests regarding changes to certain siting criteria require justifications and/or demonstrations of equivalency. Please refer to 19.15.17.10 NMAC for guidance.

Ground water is less than 25 feet below the bottom of the buried waste. - NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	☐ Yes ☐ No ☐ NA
Ground water is between 25-50 feet below the bottom of the buried waste - NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	☐ Yes ☐ No ☐ NA
Ground water is more than 100 feet below the bottom of the buried waste. - NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	☐ Yes ☐ No ☐ NA
Within 100 feet of a continuously flowing watercourse, or 200 feet of any other significant watercourse, lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). - Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within 300 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application. - Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	☐ Yes ☐ No
Within 300 horizontal feet of a private, domestic fresh water well or spring used for domestic or stock watering purposes, in existence at the time of initial application. - NM Office of the State Engineer - iWATERS database; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Written confirmation or verification from the municipality; Written approval obtained from the municipality	☐ Yes ☐ No
Within 300 feet of a wetland. US Fish and Wildlife Wetland Identification map; Topographic map; Visual inspection (certification) of the proposed site	☐ Yes ☐ No
Within incorporated municipal boundaries or within a defined municipal fresh water well field covered under a municipal ordinance	

adopted pursuant to NMSA 1978, Section 3-27-3, as amended. - Written confirmation or verification from the municipality; Written approval obtained from the municipality	☐ Yes ☐ No
Within the area overlying a subsurface mine. - Written confirmation or verification or map from the NM EMNRD-Mining and Mineral Division	☐ Yes ☐ No
Within an unstable area. - Engineering measures incorporated into the design; NM Bureau of Geology & Mineral Resources; USGS; NM Geological Society; Topographic map	☐ Yes ☐ No
Within a 100-year floodplain. - FEMA map	☐ Yes ☐ No

16.
On-Site Closure Plan Checklist: (19.15.17.13 NMAC) ***Instructions: Each of the following items must be attached to the closure plan. Please indicate, by a check mark in the box, that the documents are attached.***

- ☐ Siting Criteria Compliance Demonstrations - based upon the appropriate requirements of 19.15.17.10 NMAC
- ☐ Proof of Surface Owner Notice - based upon the appropriate requirements of Subsection E of 19.15.17.13 NMAC
- ☐ Construction/Design Plan of Burial Trench (if applicable) based upon the appropriate requirements of Subsection K of 19.15.17.11 NMAC
- ☐ Construction/Design Plan of Temporary Pit (for in-place burial of a drying pad) - based upon the appropriate requirements of 19.15.17.11 NMAC
- ☐ Protocols and Procedures - based upon the appropriate requirements of 19.15.17.13 NMAC
- ☐ Confirmation Sampling Plan (if applicable) - based upon the appropriate requirements of 19.15.17.13 NMAC
- ☐ Waste Material Sampling Plan - based upon the appropriate requirements of 19.15.17.13 NMAC
- ☐ Disposal Facility Name and Permit Number (for liquids, drilling fluids and drill cuttings or in case on-site closure standards cannot be achieved)
- ☐ Soil Cover Design - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC
- ☐ Re-vegetation Plan - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC
- ☐ Site Reclamation Plan - based upon the appropriate requirements of Subsection H of 19.15.17.13 NMAC

APPENDIX B
Correspondence

BGT sampling notification

From: Stephanie Hinds
To: Maxwell, Ashley, EMNRD; Burdine, Jaclyn, EMNRD
Cc: Smith, Cory, EMNRD
Subject: Chuza Tank Battery daily report 5/8/2025
Date: Thursday, May 8, 2025 5:30:00 PM
Attachments: DAILY REPORT 2025.05.08.xlsx
image001.png
image002.png
image003.png
image004.png

Hi Ashley and Jackie,

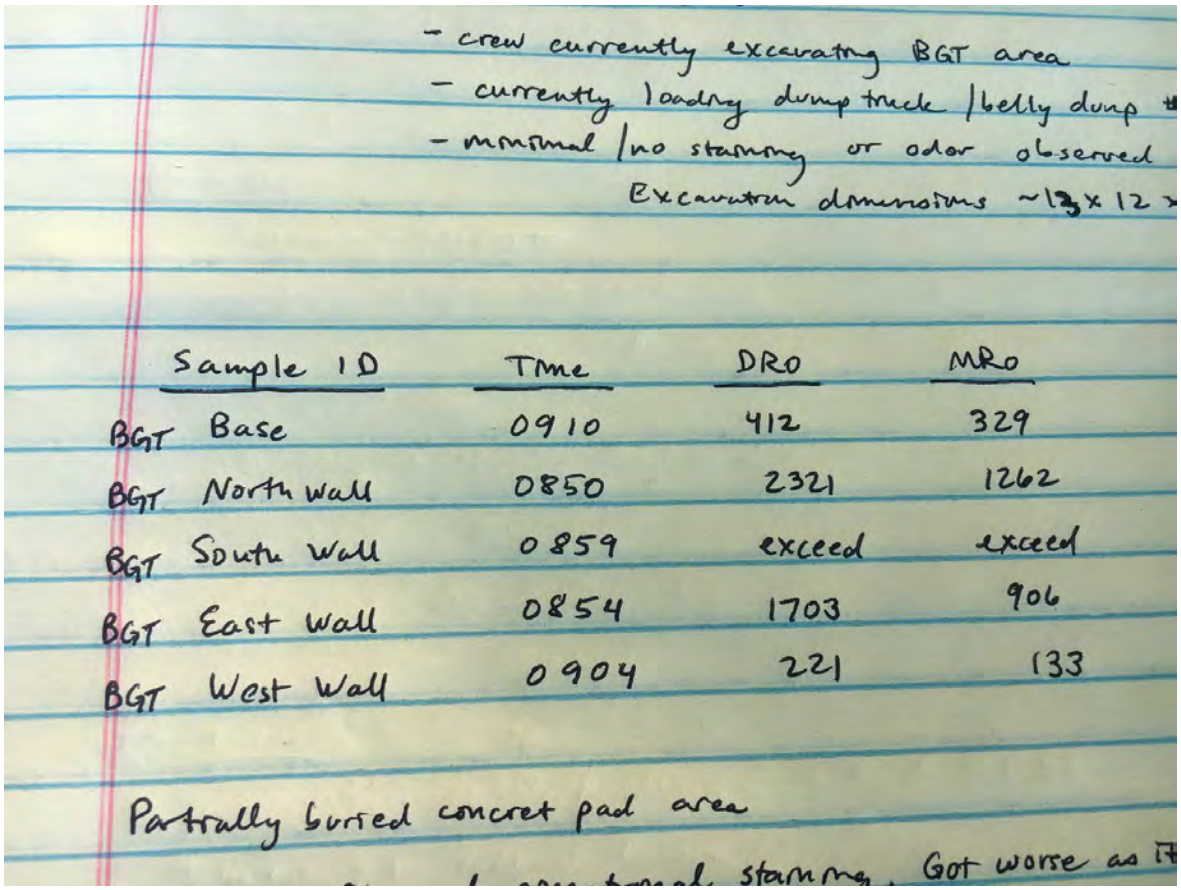
Attached is the daily report for Chuza for May 8, 2025. There was a bit more piping and busted concrete that was loaded and hauled off today. They also backfilled the area that had the two vertical casings, now cut below surface and plugged. All other facility infrastructure is pretty much gone from location (no tanks, no drums/totes).

BGT - We also began delineating the BGT area. It is currently 20' x 20' x 10' deep (~150 yd^3) and ready for confirmation sampling.

Tomorrow (5/9): We plan to collect confirmation samples from BGT. Per our conversation we will rush the base sample. The dirt crew will load and haul the last of the 150 cy of BGT soil. We will also rush the sample we collected today.

Photos from today
Remaining facility piping ready for removal:

PetroFlag results for BGT when excavation was 13’ x 12’ x 5’ deep. No odor or staining was observed, so PetroFlag results were higher than unexpected:



- crew currently excavating BGT area
- currently loading dump truck / belly dump
- minimal / no staining or odor observed

Excavation dimensions ~13 x 12 x

Sample ID	Time	DRO	MRO
BGT Base	0910	412	329
BGT North wall	0850	2321	1262
BGT South Wall	0859	exceed	exceed
BGT East Wall	0854	1703	906
BGT West Wall	0904	221	133

Partially buried concret pad area

staining. Got worse as

Laboratory Reports

eurofins | Environment Testing

ANALYTICAL REPORT

BGT Hazardous Waste Characterization (sampled March 31 and April 1, 2025) - beginning page 9 of report

PREPARED FOR

Attn: Stephanie Hinds
Souder, Miller & Associates
401 W Broadway
Farmington, New Mexico 87401

Generated 4/23/2025 4:55:06 PM

JOB DESCRIPTION

Chuza TB

JOB NUMBER

885-22529-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 7/2/2025 2:17:06 PM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
*-	LCS and/or LCSD is outside acceptance limits, low biased.
*1	LCS/LCSD RPD exceeds control limits.
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
^+	Continuing Calibration Verification (CCV) is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

General Chemistry

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
HF	Parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. Sample was analyzed outside of hold time.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22529-1

Job ID: 885-22529-1 Eurofins Albuquerque

Job Narrative
885-22529-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 5 coolers at receipt time were 0.3°C, 0.7°C, 1.0°C, 1.2°C and 1.6°C.

GC/MS VOA
Method 8260B: The continuing calibration verification (CCV) associated with batch 885-23876 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC/MS Semi VOA
Method 8270C: The following sample was diluted due to the nature of the sample matrix: BGT-01 (885-22529-2). Elevated reporting limits (RLs) are provided. Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270C: The laboratory control sample (LCS) for preparation batch 885-23595 and analytical batch 885-23800 recovered outside acceptance limits for Phenol and Pyrene. There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported.

Method 8270C - TCLP: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 885-23772 and 885-23928 and analytical batch 885-24261 recovered outside control limits for the following analytes: 2-Methylphenol, 3 & 4 Methylphenol, Hexachlorobutadiene, Hexachloroethane, Nitrobenzene, Pyridine, 2,4,6-Trichlorophenol and Cresols, Total.

Method 8270C - TCLP: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: (LCS 885-23928/2-A), (LCSD 885-23928/3-A) and (MB 885-23928/1-A). These results have been reported and qualified.

Method 8270C - TCLP: The laboratory control sample (LCS) for preparation batch 885-23928 and analytical batch 885-24261 recovered outside acceptance limits for Pyridine. There was insufficient sample to perform a re-extraction or re-analysis; therefore, the data have been reported. The laboratory control sample duplicate (LCSD) recovered within acceptance limits for all reported analytes.

Method 8270C - TCLP: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: TRK-01 (885-22529-1). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
Method 6020A - Total Recoverable: The continuing calibration verification (CCV) associated with batch 885-23760 recovered above the upper control limit for Selenium. The samples associated with this CCV were non-detects for the affected analytes;

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-22529-1

Job ID: 885-22529-1 (Continued) Eurofins Albuquerque

therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

General Chemistry
Method 9034_Reactive: Reanalysis of the following sample was performed outside of the analytical holding time: TRK-01 (885-22529-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-22529-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
6010B	3005A	Water	Barium
6010B	3005A	Water	Cadmium
6010B	3005A	Water	Chromium
6010B	3005A	Water	Silver

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
S1-	Surrogate recovery exceeds control limits, low biased.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza Tank Battery

Job ID: 885-24195-1

Job ID: 885-24195-1 Eurofins Albuquerque

Job Narrative
885-24195-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/2/2025 7:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.6°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-25716 recovered outside acceptance criteria, low biased, for Diesel Range Organics [C10-C28]. Samples affected by the CCV are shown and will be re-ran. The following samples are associated Stockpile CS (885-24195-1), Separator CS (885-24195-2), BGT CS (885-24195-3), (CCV 885-25716/33) and (MB 885-25724/1-A).

Method 8015D_DRO: The following samples required a dilution due to the nature of the sample matrix: Separator CS (885-24195-2) and BGT CS (885-24195-3). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Metals
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Project/Site: Chuza Tank Battery

Job ID: 885-24195-1

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
6020A	3050B	Solid	Arsenic
6020A	3050B	Solid	Barium

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-24673-1

Job ID: 885-24673-1 Eurofins Albuquerque

Job Narrative
885-24673-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/10/2025 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.3°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-24673-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5035	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

ANALYTICAL REPORT

BGT Walls results
(sampled May 9, 2025)

PREPARED FOR

Attn: Erin Berry
Souder, Miller & Associates
401 W Broadway
Farmington, New Mexico 87401

Generated 5/15/2025 2:29:56 PM

JOB DESCRIPTION

Chuza TB

JOB NUMBER

885-24676-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 7/2/2025 2:17:06 PM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Project/Site: Chuza TB

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-24676-1

Job ID: 885-24676-1 Eurofins Albuquerque

Job Narrative
885-24676-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/10/2025 7:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.3°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-24676-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

eurofins | Environment Testing

ANALYTICAL REPORT

BGT Walls results (over-excavation, sampled May 16, 2025) - beginning page 7 of report

PREPARED FOR

Attn: Stephanie Hinds
Souder, Miller & Associates
401 W Broadway
Farmington, New Mexico 87401

Generated 5/23/2025 2:59:36 PM

JOB DESCRIPTION

Chuza TB

JOB NUMBER

885-25207-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 7/2/2025 2:17:06 PM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Souder, Miller & Associates
Project: Chuza TB

Job ID: 885-25207-1

Job ID: 885-25207-1 Eurofins Albuquerque

Job Narrative
885-25207-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/20/2025 6:50 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.7°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: Souder, Miller & Associates
Job ID: 885-25207-1
Project/Site: Chuza TB

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total
