Subject: [EXTERNAL] FW: Leak found in primary liner at JRU Legg 2RF-125 Facility ID (fab1805930906)

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Victoria,

Please use this as a notice that the XTO Ops team identified a leak in the corner rub sheet of the primary (upper) liner on the northern (RW) pit at the JRU Legg 2RF-125 Facility ID (fab1805930906) late yesterday. Please inform the NMOCD that we are working to drain the pond (we are below the leak spot currently), and we will be repairing the leak as soon as we can safely enter the pond. We expect at least a week required to get to a pond level low enough for safe entry.

I received this from our team this morning, if you have any questions, please let me know.

Thank you,

Kristen Houston
