To:

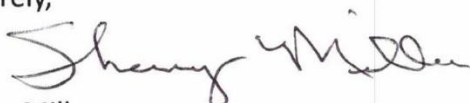

Mr. Joe Kennedy
State of New Mexico
Energy Minerals and Natural Resources
Oil Conservation Division
1220 South St. Francis Dr.
Santa Fe, New Mexico 87505

RE: Environmental Plus, Inc. Landfarm permit #NM-1-013 Closure Report Date: May 2026

Dear Mr. Kennedy,

Included herewith, please find the Closure Report dated May 2026 for the Environmental Plus, Inc. (EPI) Landfarm permit #NM-1-013. This report provides the analytical results of closure sampling in accordance with the NMOCD approved Closure Plan and Sampling and Analysis Plan (SAP). The environmental data collected by the SAP and provided in the report confirms that the EPI Landfarm, as permitted and operated, has functioned as designed and has been and will continue to be protective of the fresh water, public health, and the environment and documents acceptable levels of unattenuated CoC residuals in the Treatment Zone Soils, Vadose Zone, and Perimeter Berms Soils sufficient to justify a "clean closure declaration" by the NMOCD. This "clean closure declaration" along with EPI's achievement of the Post Closure requirements of 19.15.36.18.E NMAC, previously acknowledged by the NMOCD, supports NMOCD's decision to permanently vacate the Environmental Plus, Inc. Landfarm permit #NM-1-013 and the release of the financial assurance. Thank you for your consideration.

Sincerely,

Sherry Miller
Environmental Plus, Inc.

I. INTRODUCTION AND PURPOSE

Environmental Plus, Inc. (EPI) was formed in 1993 as a for profit corporation to provide environmental remediation and construction services to the oil & gas industry of southeast New Mexico and west Texas. The State of New Mexico Oil Conservation Division (NMOCD), on February 15, 1993, issued permit #NM-1013 authorizing receipt of non-hazardous/non-liquid oilfield wastes. Contaminated soil was received and remediated until 2017, when the decision was made by EPI to close the business. The landfarm, even though not accepting waste, remains under permit until the closure and post-closure requirements are achieved and the NMOCD vacates the permit.

This report provides a summary of the EPI C137A Permit Minor Modification and Closure Plan application dated September 17, 2025 which was approved in the NMOCD letter dated November 12, 2025 and references the NMOCD letter dated November 10, 2022 which approved EPI's previous Permit Minor Modification application. Submitted herewith is the closure information collected in December 2025, February 2026, and April 2026 by the implementation of the approved Closure Sampling and Analysis Plan (SAP) sufficient to justify a "clean closure" declaration by the NMOCD and subsequent vacating of the permit and release of the financial assurance.

II. APPROVED PERMIT STIPULATIONS

The Minor Modification approved in NMOCD letter dated November 12, 2025, focused on identifying final closure requirements of the permit, i.e., identifying specifically the Constituents of Concern (CoC), acceptable CoC closure thresholds, appropriate sampling protocols, and post closure requirements as summarized below.

Permit Stipulation #4

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #4, the following:

"Analysis of total petroleum hydrocarbons (TPH) shall be represented as the sum of GRO, DRO and MRO (hydrocarbon chain range from C₆ through C₃₆) by EPA Method 8015M or 8015M Extended, in lieu of TPH by EPA Method 418.1, to establish background and to conduct all future vadose zone and treatment zone monitoring;"

In the letter dated November 12, 2025, the NMOCD approved EPI's Permit Minor Modification proposal to forgo establishing background concentrations for use as acceptable closure thresholds for the CoCs, relying rather, on thresholds considered to be protective of the fresh water, public health, and the environment as published in;

- Table 1 of 19.15.29.12 NMAC – Remediation and Closure for Vadose Zone Benzene, BTEX, the GRO and DRO combined fraction, TPH, and Chloride.
- Table A-1 of the New Mexico Environment Department "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" for the 15 CoCs in "Subsections A and B of 20.6.2.3103 NMAC as determined by EPA SW-846 methods 6010B or 6020," applying

the most conservative NMED Soil Screening Levels (excluding the columns titled “Tap Water Cancer”, “Tap Water Noncancer”, and “Cw, DAF 20”).

The NMOCD also approved EPI’s request, relative to the background concentration references in Permit Stipulation #4, exceptions to:

- 19.15.36.15.B NMAC, Background testing,
- 19.15.36.15.E(2) NMAC, regarding Vadose Zone Semi-annual monitoring and comparing results to background soil thresholds,
- 19.15.36.15.E(3) NMAC, regarding Vadose Zone Five-year monitoring and comparing results to background soil thresholds, and
- 19.15.36.15.F(5) NMAC, regarding Treatment Zone closure performance standards for the CoCs in “Subsections A and B of 20.6.2.3103 NMAC as determined by EPA SW-846 methods 6010B or 6020,” and comparing monitoring results to background soil thresholds. (The treatment zone closure thresholds for Benzene, BTEX, the combined fractions of GRO and DRO, TPH, and Chloride listed in 19.15.36.15.F(1,2,3,4) NMAC, respectively, will apply to the historical and future treatment zone and perimeter berm data to be used to justify closure of the treatment zones in the cells and the perimeter berms.)

The NMOCD also approved the application of the published thresholds in Table I of 19.15.29.12 NMAC for Benzene, BTEX, the GRO and DRO combined fractions, TPH, and Chloride to be applied to the Vadose Zone and considered to be protective of the fresh water, public health, and the environment for locations where ground water is between 51-100 feet below ground surface (‘bgs), (i.e. the EPI Landfarm), and are provided below.

Table I of 19.15.29.12 NMAC	
Constituents of Concern	mg/Kg
Benzene by 8021B or 8260B	10
Total BTEX by 8021B or 8260B	50.0
GRO+DRO combined fraction by 8015M	1,000
TPH (hydrocarbon chain range from C ₆ - C ₃₆) by 8015M Extended	2,500
Chloride by Standard Method SM4500Cl-B or EPA Method 300.1	10,000**
**Ground Water 51-100 ‘bgs	

Environmental Plus, Inc. Landfarm
 Closure Report May 2026
 Permit #NM-1-013

Listed below are the treatment zone and perimeter berm closure thresholds for Benzene, BTEX, the GRO and DRO combined fractions, TPH, and Chloride listed in 19.15.36.15.F(1,2,3,4) NMAC, respectively, i.e;

Treatment Zone Closure Performance Standards - 19.15.36.15.F(1,2,3,4) NMAC	
Constituents of Concern	mg/Kg
Benzene by 8021B or 8260B	0.2
Total BTEX by 8021B or 8260B	50.0
GRO+DRO combined fractions by 8015M	500
TPH (hydrocarbon chain range from C ₆ - C ₃₆) by 8015M Extended	2,500
Chloride by Standard Method SM4500Cl-B or EPA Method 300.1	500*
*Ground Water is <100 but at least 50' below the lowest elevation where soil will be placed	

Environmental Plus, Inc. Landfarm

Closure Report May 2026

Permit #NM-1-013

The NMOCD also approved the use of the most conservative New Mexico Environment Department (NMED) Soil Screening Levels (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20") from Table A-1 of the "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" as acceptable closure thresholds for the compounds referenced in "Subsections A and B of 20.6.2.3103 NMAC determined by EPA SW-846 methods 6010B or 6020" of 19.15.36.15(E) and (F) and are listed below and also provided in Attachment 3-Tables.

<p style="text-align: center;">Subsections A and B of 20.6.2.3103 NMAC determined by EPA SW-846 methods 6010B or 6020 The Most Conservative NMED Soil Screening Levels (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20") from Table A-1 of the "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" (See Attachment 3-Tables)</p>	
Constituent of Concern	Soil Screening Levels (mg/Kg)
Antimony	3.13E+01
Arsenic	7.07E+00
Barium	4.39E+03
Beryllium	1.48E+02
Cadmium	7.05E+01
Chromium (Total)	9.66E+01
Copper	3.13E+03
Iron	5.48E+04
Lead ¹	2.97E+01
Manganese	4.64E+02
Mercury (elemental)	2.07E+01
Selenium	3.91E+02
Silver	3.91E+02
Thallium	7.82E-01
Zinc	2.35E+04
<p>¹EPA doesn't provide an exposure level for Lead in Table A-1. The calculated value being proposed is based on a previously NMOCD approved Dilution Attenuation Factor (DAF) of 2.2 for Soil Screening Level concentrations listed in Table A-3 of the Risk Assessment Guidance document.</p>	

Environmental Plus, Inc. Landfarm
Closure Report May 2026
Permit #NM-1-013

Permit Stipulation #7

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #7, the following:

Vadose zone sampling and monitoring shall be performed in accordance with 19.15.36.15.E NMAC in lieu of the NM1-013 permit requirements;

In letter dated November 12, 2025, the NMOCD approved the minor modification to Permit stipulation #7, i.e.; Confirmatory Vadose Zone closure sampling be conducted in accordance with 19.15.36.15.E.2– Semi-annual Monitoring for TPH, BTEX, and Chloride and the CoCs of 19.15.36.15.E.3 - Five-year monitoring program with the results compared to the thresholds approved in the exception request to Permit stipulation #4 rather than background concentrations.

Permit Stipulation #9

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #9, the following:

EPI shall utilize the most conservative (lowest) exposure limits of either the Risked-based SSL DAF 1 or the NMGW/MCL based SSL DAF 1 values listed in Table A-3, Summary of Soil to Groundwater Screening Levels, from the June 2022 NMED Risk Assessment Guidance for Site Investigations and Remediation, Volume I, Soil Screening Guidance for Human Health Risk Assessments for each constituent listed in Subsections A and B of 20.6.2.3103 NMAC (except for GRO, DRO, TPH, BTEX and Chloride) to assist in the recalculation of the groundwater exposure pathway for each constituent. OCD wishes to clarify that the application of a risked based approach to change a numerical standard specified for Benzene, BTEX, GRO, DRO, TPH, and/or Chlorides, as recognized in Paragraphs (1-4) of 19.15.36.15.F NMAC, is a major modification pursuant to 19.15.36.7.B(9) NMAC and cannot be considered in a minor modification request;

In letter dated November 12, 2025, the NMOCD approved EPI's request for an exception to Permit stipulation #9 requiring the use of the most conservative exposure limits in Table A-3, Summary of Soil to Groundwater Screening Levels, from the June 2022 NMED Risk Assessment Guidance for Site Investigations and Remediation, Volume I, Soil Screening Guidance for Human Health Risk Assessments. The NMOCD approved using the most conservative Soil Screening Level (SSL) concentrations for the "Subsections A and B of 20.6.2.3103 NMAC" CoCs listed in Table A-1 of the New Mexico Environment Department "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20").

Permit Stipulation #10

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #10, the following:

Environmental Plus, Inc. Landfarm
 Closure Report May 2026
 Permit #NM-1-013

EPI shall utilize a dilution attenuation factor (DAF) of 2.2 to recalculate the groundwater exposure pathway threshold values and establish acceptable SSL performance threshold concentrations for the constituents listed in Subsections A and B of 20.6.2.3103 NMAC (except for GRO, DRO, TPH, BTEX and Chloride) rather than establish background for the constituents pursuant to 19.15.36.15.B NMAC. EPI shall compare the recalculated groundwater exposure pathway threshold values to the other applicable exposure pathway threshold values provided in Table A-1, NMED Soil Screening Levels, from the June 2022 NMED Risk Assessment Guidance for Site Investigations and Remediation, Volume I, Soil Screening Guidance for Human Health Risk Assessments, to determine which of the most stringent exposure pathway threshold values should be applied for each constituent;

In letter dated November 12, 2025, the NMOCD approved EPI's request for an exception to Permit stipulation #10, i.e.; EPI proposed using the most conservative exposure limits in Table A-1, NMED Soil Screening Levels (SSLs) concentrations for the "Subsections A and B of 20.6.2.3103 NMAC" CoCs listed in Table A-1 of the New Mexico Environment Department "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20"), rather than Table A-3, Summary of Soil to Groundwater Screening Levels, from the June 2022 NMED Risk Assessment Guidance for Site Investigations and Remediation, Volume I, Soil Screening Guidance for Human Health Risk Assessments (See Attachment 3-Tables). These SSLs were approved in Permit stipulation #4.

Permit Stipulation #12

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #12, the following:

EPI shall exclude the following toxic pollutants, listed in 20.6.2.7.T(2) NMAC from the facility background demonstration required of 19.15.36.15.B NMAC, since the analytes are not considered associated with oil field waste:

- a. nitroaromatics and high explosives (20.6.2.7.T(2)(p)(i)-(viii) NMAC);***
- b. Endosulfan (20.6.2.7.T(2)(t)(vi) NMAC); and***
- c. Prometon (20.6.2.7.T(2)(t)(xi) NMAC).***

In letter dated November 12, 2025, the NMOCD approved EPI's request for an exception to Permit stipulation #12 and 19.15.36.15.B NMAC – Background testing, i.e.; the NMOCD approved EPI's request, in Permit Stipulation #4, for an exception to 19.15.36.15.B NMAC – Background testing, and proposed using published thresholds considered to be protective of the fresh water, public health, and the environment. Furthermore, these 3 compounds are not listed as CoCs in the compounds in "Subsections A and B of 20.6.2.3103 NMAC as determined by EPA SW-846 methods 6010B or 6020" and will no longer be relevant.

Environmental Plus, Inc. Landfarm
Closure Report May 2026
Permit #NM-1-013

Permit Stipulation #13

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #13, the following:

Mercury shall be analyzed by EPA Method 7471A, in lieu of EPA Methods 6010B or 6020, to establish background and to conduct all future vadose zone and treatment zone monitoring;

In letter dated November 12, 2025, the NMOCD approved EPI's request for a minor modification to Permit stipulation #13 be changed to allow analysis of Mercury using EPA Methods 6010B or 6020 in addition to EPA Method 7471A. Some historical data exists that was analyzed using both methods.

Permit Stipulation #16

The NMOCD, in letter dated November 10, 2022, in response to EPI's Permit Minor Modification application, stipulated in Permit Stipulation #16, the following:

EPI shall submit a facility background sampling and analysis plan, within 30 days of receipt of this letter, to OCD for review and consideration of approval for the following constituents: GRO, DRO, MRO, BTEX, Chlorides, Combined Radium-226 and Radium-228, pH, and Sulfate.

In letter dated November 12, 2025, the NMOCD approved EPI's request for an exception to Permit stipulation #16 proposing to forgo establishing background concentrations for the CoCs in Permit Stipulation #4, relying rather, on thresholds published by the NMED and NMOCD which are considered to be protective of the fresh water, public health, and the environment.

Permit stipulation #4 requested exceptions to the following Rule 36 requirements:

- 19.15.36.15.B NMAC, Background testing,
- 19.15.36.15.E(2) NMAC, regarding Vadose Zone Semi-annual monitoring and comparing results to background soil thresholds,
- 19.15.36.15.E(3) NMAC, regarding Vadose Zone Five-year monitoring and comparing results to background soil thresholds, and
- 19.15.36.15.F(5) NMAC, regarding Treatment Zone closure performance standards for the CoCs in "Subsections A and B of 20.6.2.3103 NMAC as determined by EPA SW-846 methods 6010B or 6020," and comparing monitoring results to background soil thresholds. (The treatment zone closure thresholds for Benzene, BTEX, GRO and DRO, TPH, and Chloride listed in 19.15.36.15.F(1,2,3,4) NMAC, respectively, will apply to the historical and future treatment zone data to be used to justify closure of the treatment zones in the cells.)

New Permit Stipulation #18 – Closure and Post Closure

In letter dated November 12, 2025, the NMOCD approved EPI's C137A Minor Modification to grant achievement of the Closure and Post Closure requirements of 19.15.36.18 NMAC.

Environmental Plus, Inc. Landfarm
 Closure Report May 2026
 Permit #NM-1-013

19.15.36.18 Closure and Post Closure:

If the NMOCD declares “clean closure” is achieved, the NMOCD agreed that the documentation included with EPI C137A Permit Minor Modification and Closure Plan application dated September 17, 2025 demonstrated acceptable completion of the stipulations of the closure and post-closure requirements of 19.15.36.18 NMAC – Closure and Post Closure. The rationale being that the landfarm cells have revegetated naturally since cessation of waste receipt in 2017 and cessation of tilling/disking in December of 2019. The NMOCD agreed that the New Mexico State University Extension Agent for Lea County and personnel from the United States Department of Agriculture-Natural Resources Conservation Service (NRCS) Roswell, New Mexico Office surveyed the landfarm cells and identified adequate plant species and status of re-vegetation, i.e. the report identified nine (9) perennial native grasses, one (1) annual native grass, six (6) forbs, and four (4) different species of shrubs. The report is available as an attachment to the EPI 137A Minor Modification application approved by the NMOCD in it’s letter dated November 12, 2025.

Regarding the man-made berms, Stipulation #14 of the permit approved in letter dated November 10, 2022, allows the berms to remain in place as they have become nesting habitat for Burrowing Owls. As provided for in 19.15.36.18.F NMAC – Alternatives to Re-vegetation, consultation with the landowner (who is also owner the owner of EPI), wants the berms to remain in place and also allow the cells and berms to continue to revegetate naturally. Additionally, pushing the berms down to grade would destroy much of re-vegetated surface.

Post Closure Requirements:

- **19.15.36.18.A(6) NMAC– Upon completion of closure: EPI will document completion of the following stipulations of this rule, i.e.:**

- **Re-vegetation consisting of establishing vegetative cover equal to seventy percent of the native perennial vegetative cover (un-impacted by overgrazing, fire or other intrusion damaging to native vegetation) or**
- **Scientifically documented ecological description of at least three native plant species, including at least one grass, but not including noxious weeds and maintenance of that cover through two successive growing seasons.**

In letter dated November 12, 2025, the NMOCD approved EPI’s Response: The remediated emplaced soils have not been disturbed for six (6) years and have re-vegetated naturally. The Ecological Study identified nine (9) different perennial native grasses, one (1) annual native grass, six (6) different species of forbs, and four (4) different species of shrubs.

- **19.15.36.18.C(4) NMAC– Surface waste management facility and cell closure:**

- **(4)a – Disking of cells –**

In letter dated November 12, 2025, the NMOCD approved EPI’s Response: Stipulation #2 of the permit approved in letter dated November 10, 2022 allows disking to be discontinued.

□ **(4)b – Soils left in place will be re-vegetated in accordance with 19.15.36.18.A(6) NMAC.**

In letter dated November 12, 2025, the NMOCD approved EPI's Response: See previous response to 19.15.36.18.A(6) NMAC.

□ **(4)c & d – Unremediated Land farmed soils according to 19.15.36.15.F will be:**

- **Remediated on site or**
- **Removed to a NMOCD approved facility and replaced with native soil and re-vegetated in accordance with 19.15.36.18.A(6) NMAC.**

In letter dated November 12, 2025, the NMOCD approved EPI's Response: The emplaced soil has been remediated to acceptable levels, see Attachment 5 – Analytical Results Summary.

□ **(4)e – Berms are removed.**

In letter dated November 12, 2025, the NMOCD approved EPI's Response: Stipulation #14 of the permit approved in letter dated November 10, 2022, "If EPI achieves the closure performance standards specified in 19.15.36.15.F NMAC, then EPI may either leave the treated soils and cell berms constructed of treated soils in place, or, with prior division approval, reuse the treated soils in an alternative manner. EPI shall include closure protocols for the sampling of the berms constructed of treatment zone soils for closure performance standards in 19.15.36.15.F NMAC in the closure and post-closure plan;"

- **(4)f – Buildings, fences, roads and equipment are removed, the site cleaned-up and tests conducted on the soils for contamination.**

In letter dated November 12, 2025, the NMOCD approved EPI's Response: Stipulation #15 of the permit approved in letter dated November 10, 2022 states, "EPI may leave the existing roads in place after closure to accommodate access and monitor the property after closure and post closure;"

- **4(g) – Annual reports of vadose zone and treatment zone sampling are submitted to the division's environmental bureau until the division has approved the surface waste management facility's final closure:** EPI Response:

Annual reports will be submitted if required.

- **4(h) – for an operator who chooses to use the landfarm methods specified in Subsection H of 19.15.36.15 NMAC, that the soil has an ECs of less than or equal to 4.0 mmhos/cm (dS/m) and a SAR of less than or equal to 13.0.**

Not applicable.

○ 19.15.36.18.E NMAC - Landfarm Post Closure

- **Post Closure care period shall be three years if the operator has achieved clean closure.**

In letter dated November 12, 2025, the NMOCD approved EPI's Response: If clean closure is achieved, EPI requests credit be given for the 6 (six) years the cells have lain fallow and have naturally re-vegetated to an acceptable level as documented in the Ecological Study Report.

Environmental Plus, Inc. Landfarm
Closure Report May 2026
Permit #NM-1-013

- ***The operator shall regularly inspect and maintain required re-vegetation.***
In letter dated November 12, 2025, the NMOCD approved EPI's Response: If clean closure is not achieved, EPI will inspect regularly and maintain required re-vegetation.
- ***If there has been a release to the vadose zone or to ground water, then the operator shall comply with the applicable requirements of 19.15.30 NMAC and 19.15.29 NMAC.***
In letter dated November 12, 2025, the NMOCD approved EPI's Response: Historical data supports the preliminary conclusion that there has not been a release to the vadose zone or to ground water. The Closure Sampling and Analysis Plan has collected supplementary data to confirm that there has not been a release to the vadose zone or to ground water, see Attachment 5 - Analytical Results Summary. It is assumed that the NMOCD will issue Final Closure of the landfarm if "clean closure" is achieved and that EPI will be credited with the required post-closure time requirement and acknowledge acceptable re-vegetation. If EPI achieves the Closure and Post-Closure goals as approved and accepted by the NMOCD, the NMOCD will issue final closure and, in accordance with 19.15.36.18.B, release EPI of the financial assurance requirements.

III. IMPLEMENTATION OF THE CLOSURE SAMPLING AND ANALYSIS PLAN (SAP)

On December 8, 2026, EPI notified the NMOCD via email that the SAP sampling event was scheduled to commence on the morning of December 9, 2026 and all subsequent sampling events. Samples were collected from the Treatment Zone soils, Vadose Zone soils, and soils from the facility Berms. Below is the matrix showing the descriptive Cell ID numbers for the single and combined cells. The Sample Location Maps for the discrete samples collected from the Vadose Zone are included in Attachment 1 – Sample Location Maps as are the Sample Location Maps for the Berms. The table of GPS coordinates for the Vadose Zone sample locations is included in Attachment 3- Tables.

Single and Combined Cell Closure Sampling Matrix				
Cell	Single and Combined Cells ID	Vadose Zone (3-4 feet below native ground surface)- From each Single and each Combined Cell, 4 Discrete random Closure samples were collected (31 samples) Treatment Zone (0-8 inches from lift surface)- From each single Cell and each Combined Cell 1, 1 Composite Sample was prepared from 4 Discrete random Closure samples (7 composite samples)		Combined Acres
		Vadose Zone Samples per Cell	Treatment Zone Samples per Cell	
1	1	4	1	5.7
2	2-4	2	1	5.9
3		2		
4		2		
5	5	4	1	4.9
6	6	4	1	5.8
7	7-8	2	1	5.6
8		2		
9	9-10	1	1	4.7

11	11-15	1	1	5.8
12		1		
13		1		
14		1		
15		1		

Treatment Zone Closure Sampling

On December 9, 2025, in accordance with the NMOCD approved SAP, for each of the 7 cells (single and combined cells), a composite sample was prepared from 4 (four) discrete samples collected from random locations from the 0-8 inch lift interval consistent with the sample collection protocols approved in the SAP. The GPS coordinates for the discrete random sample locations are not presented due to the random nature of the sampling within the cells. On December 12, 2025, these samples were submitted under Chain of Custody to Cardinal Laboratories in Hobbs, New Mexico for analysis of the CoCs, i.e;

- The treatment zone closure thresholds for Benzene, BTEX, GRO+DRO combined fraction, TPH, and Chloride are listed in 19.15.36.15.F(1,2,3,4) NMAC, respectively, i.e;
 - Benzene – 0.2 mg/Kg
 - BTEX – 50 mg/Kg
 - GRO+DRO combined fraction – 500 mg/Kg
 - TPH – 2500 mg/Kg
 - Chloride – 500 mg/Kg (ground water is <100 but at least 50' below the lowest elevation where soil will be placed).
- Table A-1 of the New Mexico Environment Department "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" for the 15 CoCs in "Subsections A and B of 20.6.2.3103 NMAC as determined by EPA SW-846 methods 6010B or 6020," applying the most conservative NMED Soil Screening Levels (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20"), i.e:

Subsections A and B of 20.6.2.3103 NMAC determined by EPA SW-846 methods 6010B or 6020 The Most Conservative NMED Soil Screening Levels (excluding the columns titled "Tap Water Cancer", "Tap Water Noncancer", and "Cw, DAF 20") from Table A-1 of the "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022" (See Attachment 3-Tables)	
Constituent of Concern	Soil Screening Levels (mg/Kg)
Antimony	3.13E+01
Arsenic	7.07E+00
Barium	4.39E+03
Beryllium	1.48E+02
Cadmium	7.05E+01
Chromium (Total)	9.66E+01
Copper	3.13E+03
Iron	5.48E+04
Lead ¹	2.97E+01
Manganese	4.64E+02

Subsections A and B of 20.6.2.3103 NMAC determined by EPA SW-846 methods 6010B or 6020 The Most Conservative NMED Soil Screening Levels (excluding the columns titled “Tap Water Cancer”, “Tap Water Noncancer”, and “Cw, DAF 20”) from Table A-1 of the “Risk Assessment Guidance for Investigations and Remediation Volume I November 2022” (See Attachment 3-Tables)	
Mercury (elemental)	2.07E+01
Selenium	3.91E+02
Silver	3.91E+02
Thallium	7.82E-01
Zinc	2.35E+04
¹ EPA doesn't provide an exposure level for Lead in Table A-1. The calculated value being proposed is based on a previously NMOCD approved Dilution Attenuation Factor (DAF) of 2.2 for Soil Screening Level concentrations listed in Table A-3 of the Risk Assessment Guidance document.	

Discussion of Treatment Zone Closure Analytical Results

There were no CoC exceedances reported for any of the Treatment Zone Closure samples nor were there any issues with the laboratory Quality Control analyses. The analytical results for the CoCs, along with the regulatory thresholds, are provided in Attachment 5 – Analytical Results Summary and the Laboratory Reports are included in Attachment 6 – Analytical Reports.

Vadose Zone Closure Sampling

Using the protocols and requirements of 19.15.36.15.E NMAC – Five Year Monitoring Program and the approved sampling protocols of the SAP, EPI, on December 10 & 11, 2025, collected 4 (four) randomly selected, not previously sampled, independent/discrete Vadose Zone samples from an interval of 3 to 4 feet below native ground surface (‘bngs) from the 7 cells (3-single and 4-combined cells). The sample location maps are included in Attachment 1 – Sample Location Maps and the Vadose Zone Closure Sample GPS Coordinates are provided in Attachment 3 – Tables. Attachment 4 – Sample Trench Photographs, provides examples of the sampling trenches and the excavator used to advance the trenches. All trenches were backfilled with the excavated soil. The samples were then submitted separately, under Chain-of Custody, for laboratory analysis for the CoCs of;

- 19.15.36.E(2), i.e. “TPH, BTEX, and Chlorides” and compared to the appropriate thresholds listed in Table I of 19.15.29.12 NMAC and the
- 19.15.36.E(3), i.e. CoCs listed in “Subsections A and B of 20.6.2.3103 NMAC shall be determined by EPA SW-846 methods 6010B or 6020,” with the results compared to the most stringent Soil Screening Levels in Table A-1 of the NMED Risk Assessment Guidance for Site Investigations and Remediation, Volume I, Soil Screening Guidance for Human Health Risk Assessments, November 2022 (excluding the columns titled “Tap Water Cancer”, “Tap Water Noncancer”, and “Cw, DAF 20”), recognizing that laboratory detection limits must be at or below regulatory thresholds.

Environmental Plus, Inc. Landfarm
Closure Report May 2026
Permit #NM-1-013

Discussion of Vadose Zone Closure Analytical Results

There were no CoC exceedances reported for any of the Vadose Zone Closure samples nor were there any issues with the laboratory Quality Control analyses. The analytical results for the CoCs, along with the regulatory thresholds, are provided in Attachment 5 – Analytical Results Summary and the Laboratory Reports are included in Attachment 6.

Perimeter Berm Closure Sampling

Below is the EPI Landfarm Common Perimeter Berm Matrix which identifies the berms that are shared or are common to the perimeter of single or combined cells.

Environmental Plus, Inc. Landfarm

Closure Report May 2026

Permit #NM-1-013

- On December 10, 2026, single discrete samples were collected from the 2-3' bngs interval from each perimeter berm of the single and combined cells, shared or common berms were sampled once. The annotated sample location map is included in Attachment 1 – Sample Location Maps. These samples were submitted to the laboratory for CoC analysis. However, the approved SAP required that, “consistent with 19.15.36.15.F(5) NMAC, that a composite sample be prepared, consisting of 4 (four) random, reasonably spaced, discrete samples collected from each berm in each cell, shared berms will be sampled once.” For this reason, the discrete berm sample data from the December 10, 2026 sampling event will be considered “invalid.” Closure sampling of the berms consistent with the SAP occurred during the February 16 & 17 and April 2, 2026 sampling events.
- On February 16 & 17, 2026, as required by the NMOCD approved SAP, “consistent with 19.15.36.15.F(5) NMAC, that a composite sample be prepared, consisting of 4 (four) random, reasonably spaced, discrete samples collected from each berm in each cell, shared berms will be sampled once.” The annotated sample location map is included in Attachment 1 – Sample Location Maps. These samples were submitted on February 18, 2026 under Chain of Custody to Cardinal Laboratories in Hobbs, New Mexico for analysis of the CoCs.
- On April 2, 2026, a 4-point composite sample was collected from the shared/common berm between the combined Cell 10-9 South Berm and combined Cell 7-8 North Berm, which was inadvertently missed during the February 16 & 17, 2026 sampling event. The annotated sample location map is included in Attachment 1 – Sample Location Maps. This sample was submitted on April 2, 2026 under Chain of Custody to Cardinal Laboratories in Hobbs, New Mexico for analysis of the CoCs.

Discussion of Perimeter Berm Closure Analytical Results

- December 10, 2026 Perimeter Berm Sampling Event:
Except for the Cell 5 South Berm discrete sample, which exceeded the 1,000 mg/kg threshold for the sum of GRO & DRO, i.e., 1,130 mg/Kg, the results from analysis of all other single discrete berm samples were below the regulatory thresholds. However, the approved SAP required that, “consistent with 19.15.36.15.F(5) NMAC, that a composite sample be prepared, consisting of 4 (four) random, reasonably spaced, discrete samples collected from each berm in each cell, shared berms will be sampled once.” For this reason, the berm sample data from the December 10, 2026 sampling event will be considered “invalid.” The CoC laboratory results from the analysis of the 4-point composite Closure sample collected on February 16, 2026 of the Cell 5 South Berm was below the 1,000 mg/Kg GRO & DRO regulatory threshold, i.e., C5WBCOMP20260216 = 210 mg/Kg. The analytical results for the CoCs, along with the regulatory thresholds, are provided in Attachment 5 – Analytical Results Summary and the Laboratory Analytical Reports are included in Attachment 6.
- February 16 & 17, 2026 Perimeter Berm Closure Sampling Event:
There were no CoC exceedances reported for any of the Berm Closure samples nor were there any issues with the laboratory Quality Control analyses. The analytical results for the CoCs, along with the regulatory thresholds, are provided in Attachment 5 – Analytical Results Summary and the Laboratory Analytical Reports are included in Attachment 6.

- On April 2, 2026 Perimeter Berm Closure Sampling Event:
There were no CoC exceedances reported for this Closure sample nor were there any issues with the laboratory Quality Control analyses. The analytical results for the CoCs, along with the regulatory thresholds, are provided in Attachment 5 – Analytical Results Summary and the Laboratory Analytical Reports are included in Attachment 6.

IV. CONCLUSION

The information collected by the EPI Closure Sampling and Analysis Plan and presented in this Closure Report confirms that the EPI Landfarm, as permitted and operated, has functioned as designed and has been and will continue to be protective of the fresh water, public health, and the environment. Additionally, the information collected by the Closure SAP, documents acceptable levels of unattenuated CoC residuals in the Treatment Zone Soils, Vadose Zone, and Perimeter Berms Soils sufficient to justify a “clean closure declaration” by the NMOCD. This “clean closure declaration” along with EPI’s achievement of the Post Closure requirements of 19.15.36.18.E NMAC, previously acknowledged by the NMOCD, supports NMOCD’s decision to permanently vacate the Environmental Plus, Inc. Landfarm permit #NM-1-013 and the release of the financial assurance.

¹The Most Conservative NMED Soil Screening Levels (excluding the "Tap Water Cancer," "Tap Water Noncancer," and Cw DAF 20 columns) from Table A-1 of the "Risk Assessment Guidance for Investigations and Remediation Volume I November 2022." For Chloride: 19.15.36.15.F(4) NMAC (ground water is <100 but at least 50' below the lowest elevation where soil will be placed).

RE: EPI LANDFARM CLOSURE

Enclosed are the results of analyses for samples received by the laboratory on 12/12/25 11:45.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

- Method EPA 552.2 Total Haloacetic Acids (HAA-5)
- Method EPA 524.2 Total Trihalomethanes (TTHM)
- Method EPA 524.4 Regulated VOCs (V1, V2, V3)

Cardinal Laboratories is accredited through the State of New Mexico Environment Department for:

- Method SM 9223-B Total Coliform and E. coli (Colilert MMO-MUG)
- Method EPA 524.2 Regulated VOCs and Total Trihalomethanes (TTHM)
- Method EPA 552.2 Total Haloacetic Acids (HAA-5)

Accreditation applies to public drinking water matrices for State of Colorado and New Mexico.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence on any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence on any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence on any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

- SD2 Serial Dilution RPD exceeded the laboratory control limit. All other QC for analyte acceptable.
- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
- QR-03 The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
- QM-07 The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- M5 Sample was chosen for matrix spike. Spike recovery did not meet laboratory acceptance criteria, possible matrix interference in sample.
- H1 Sample was received several days after collected and subsequently analyzed past hold time.
- D2 The sample was diluted due to matrix interference.
- B2 Target analyte detected in continuing calibration blank at or above method reporting limit. Sample concentration found to be 10 times above the concentration found in the blank or less than the reporting limit.
- ND Analyte NOT DETECTED at or above the reporting limit
- RPD Relative Percent Difference
- ** Samples not received at proper temperature of 6 C or below.
- *** Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6 C
Samples reported on an as received basis (wet) unless otherwise noted on report

RE: EPI LANDFARM CLOSURE

Enclosed are the results of analyses for samples received by the laboratory on 02/18/26 9:55.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2 Total Haloacetic Acids (HAA-5)
Method EPA 524.2 Total Trihalomethanes (TTHM)
Method EPA 524.4 Regulated VOCs (V1, V2, V3)

Cardinal Laboratories is accredited through the State of New Mexico Environment Department for:

Method SM 9223-B Total Coliform and E. coli (Colilert MMO-MUG)
Method EPA 524.2 Regulated VOCs and Total Trihalomethanes (TTHM)
Method EPA 552.2 Total Haloacetic Acids (HAA-5)

Accreditation applies to public drinking water matrices for State of Colorado and New Mexico.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene
Lab Director/Quality Manager

Notes and Definitions

- V2 Continuing calibration verification recovery was above method acceptance limits. Result potentially biased high.
 - SD2 Serial Dilution RPD exceeded the laboratory control limit. All other QC for analyte acceptable.
 - R1 Duplicate sample RPD exceeded laboratory acceptance criteria. Sample(s) may be difficult to homogenize.
 - M5 Sample was chosen for matrix spike. Spike recovery did not meet laboratory acceptance criteria, possible matrix interference in sample.
 - M3 Matrix spike recovery did not meet acceptance criteria. Accuracy of the spike is reduced since the analyte concentration in the sample is more than four times the spike level.
 - M2 Matrix spike recovery was below laboratory acceptance criteria. Recovery possibly affected by a matrix interference in the sample. The method blank spike recovery was acceptable.
 - M1 Matrix spike recovery was above laboratory acceptance criteria.
 - B2 Target analyte detected in continuing calibration blank at or above method reporting limit. Sample concentration found to be 10 times above the concentration found in the blank or less than the reporting limit.
 - B1 Target analyte detected in method blank at or above method reporting limit. Sample concentration found to be 10 times above the concentration found in the method blank or less than the reporting limit.
 - ND Analyte NOT DETECTED at or above the reporting limit
 - RPD Relative Percent Difference
 - ** Samples not received at proper temperature of 6 C or below.
 - *** Insufficient time to reach temperature.
 - Chloride by SM4500Cl-B does not require samples be received at or below 6 C
Samples reported on an as received basis (wet) unless otherwise noted on report
-

RE: EPI LANDFARM CLOSURE

Enclosed are the results of analyses for samples received by the laboratory on 04/02/26 15:20.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

- Method EPA 552.2 Total Haloacetic Acids (HAA-5)
- Method EPA 524.2 Total Trihalomethanes (TTHM)
- Method EPA 524.4 Regulated VOCs (V1, V2, V3)

Cardinal Laboratories is accredited through the State of New Mexico Environment Department for:

- Method SM 9223-B Total Coliform and E. coli (Colilert MMO-MUG)
- Method EPA 524.2 Regulated VOCs and Total Trihalomethanes (TTHM)
- Method EPA 552.2 Total Haloacetic Acids (HAA-5)

Accreditation applies to public drinking water matrices for State of Colorado and New Mexico.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence or any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damage including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

- R1 Duplicate sample RPD exceeded laboratory acceptance criteria. Sample(s) may be difficult to homogenize.
- M3 Matrix spike recovery did not meet acceptance criteria. Accuracy of the spike is reduced since the analyte concentration in the sample is more than four times the spike level.
- M2 Matrix spike recovery was below laboratory acceptance criteria. Recovery possibly affected by a matrix interference in the sample. The method blank spike recovery was acceptable.
- M1 Matrix spike recovery was above laboratory acceptance criteria.
- B1 Target analyte detected in method blank at or above method reporting limit. Sample concentration found to be 10 times above the concentration found in the method blank or less than the reporting limit.
- ND Analyte NOT DETECTED at or above the reporting limit
- RPD Relative Percent Difference
- ** Samples not received at proper temperature of 6 C or below.
- *** Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6 C
Samples reported on an as received basis (wet) unless otherwise noted on report

joseph.kennedy	The Oil Conservation Division (OCD) has reviewed Environmental Plus, Inc.'s (EPI) Closure Report for EPI Landfarm, Permit NM1-013, dated May 7, 2026. As indicated in Attachment 5 of the report, the treatment zone closure performance sampling, perimeter berm sampling, and semi-annual vadose zone sampling results all indicate constituent concentrations are below the most stringent soil screening levels approved for EPI Landfarm in the permit minor modification dated November 12, 2025. Based on these results, the OCD concludes that the treatment zone and perimeter berm soils have been remediated, and that no releases to the vadose zone have occurred, demonstrating clean closure. The OCD approved, in the minor modification, that EPI has satisfied all post-closure requirements. Therefore, OCD approves final closure of the landfarm.	5/19/2026
