Notice of Intent No. 6921
IDEA ID No. 37089 - PRN20160001
COG Operating - Cookie Tosser State Com
1H & 2H Battery
AIRS No. 35-015-1548

Dear Mr. McNeill:

This letter acknowledges the receipt of your Air Quality Bureau Notice of Intent (NOI) application dated May 24, 2016 to construct and operate the COG Operating - Cookie Tosser State Com 1H & 2H Battery. The facility is located at latitude/longitude 32.7538°N, 103.9717°W (32°, 45', 13.5" N; 103°, 58', 18.2" W). The legal description is: New Mexico, New Mexico Meridian T18S, R30E, sec16. The UTM coordinates are zone 13 (X,Y) 596327, 3624456 in Eddy County, New Mexico. The Department received the application on June 2, 2016.

This facility will be a crude oil production battery consisting of two (2) production batteries with four (4) 500 bbl fixed roof storage tanks, two (2) 500 bbl fixed roof produced water tanks, and one (1) 500K Btu/hr fired production treater, each located adjacent to each other. The production facility gathers crude oil from a producing well and separates the oil, natural gas, and water from the produced fluid through the heater treater.

Gas from the inlet separation process is piped to downstream markets. Crude oil from the inlet separation process will be routed to the storage tanks and then trucked to sales. Tank vapors will be routed to the Vapor Combustion Units for destruction. Produced water will be routed to the produced water tanks and then to disposal.

As described in the application, this facility shall consist of the following equipment: (cont.)

Unit Number ¹	Source Description	Manufacturer	Model #	Serial #	Maximum or Rated Capacity ³ (Specify Units)	For Each Piece of Equipment, Check One	Applicable State & Federal Regulation(s) (i.e. 20.2.X, JJJJ, ...)
F-01	Fugitive Emission	N/A	N/A	N/A	N/A	X New/Additional	N/A
HR-01	Haul Road Emissions	N/A	N/A	N/A	N/A	X New/Additional	N/A
TL-01	Truck Loading	N/A	N/A	N/A	N/A	X New/Additional	N/A
FL-01	Emergency Flare	N/A	N/A	N/A	N/A	X New/Additional	N/A

Based on the information provided in the submitted application, the Department has determined that the potential emission rate (PER) of any regulated air pollutant from this facility for which there is a National or New Mexico Ambient Air Quality Standard is less than ten (10) pounds per hour and twenty-five (25) tons per year. Therefore, in accordance with Title 20, Chapter 2, Part 72 of the New Mexico Administrative Code, (20.2.72 NMAC), an air quality permit is not required and construction may commence. Because the potential emission rate is greater than ten (10) tons per year, this facility is subject to 20.2.73 NMAC. The submitted application will serve as the Notice of Intent in accordance with 20.2.73.200.A. NMAC.

In addition to 20.2.73 NMAC, this facility may be subject to additional state and federal regulations *such as* those found in Table 1. The issuance of an NOI does not constitute a determination of regulatory applicability, regardless of statements of anticipated applicability made in the application. It is the permittee's responsibility to determine applicability and to comply with all applicable regulations.

Table 1: Other Regulations

Citation	Title
20.2.38 NMAC	Hydrocarbon Storage Facilities
20.2.61 NMAC	Smoke and Visible Emissions
20.2.70 NMAC	Operating Permits
40 CFR 60 Subpart Ka	Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After May 18, 1978, and Prior to July 23, 1984

Table 1: Other Regulations (cont.)

Citation	Title
40 CFR 60 Subpart Kb	Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) For Which Construction, Reconstruction, or Modification Commenced After July 23, 1984
40 CFR 60, Subpart IIII	Standards of Performance for Stationary Compression Ignition Internal Combustion Engines
40 CFR 60, Subpart JJJJ	Standards of Performance for Stationary Spark Ignition Internal Combustion Engines
40 CFR 60, Subpart OOOO	Standards of Performance for Crude Oil and Natural Gas Production, Transmissions and Distribution
40 CFR 63 Subpart ZZZZ	National Emissions Standards for Hazardous Air Pollutants (NESHAP) for Stationary Reciprocating Internal Combustion Engines
40 CFR 63 Subpart HH	National Emission Standards for Hazardous Air Pollutants From Oil and Natural Gas Production Facilities

Note: Some New Mexico state regulations are not federally enforceable (e.g. 20.2.35, 20.2.36, 20.2.38 NMAC) and while these regulations can be used for determining the PER, they cannot be used in determining facility wide potential to emit (PTE) unless included in a federally enforceable permit such as a 20.2.72 NMAC permit. This could result in non-applicability of 20.2.72 NMAC or 20.2.73 NMAC but applicability of 20.2.70 NMAC and/or 20.2.74 NMAC should still be considered.

Please be advised that this NOI issuance was based upon the information provided in the application and these sources when constructed will be subject to inspection.

Before any asbestos demolition or renovation work, you shall determine whether 40 CFR 61, Subpart M, National Emission Standard for Asbestos applies.

Any changes in the method of operation or addition of more units at the site may constitute a modification, which requires the Department's prior approval for construction and/or operation.

QUESTIONS

Action 603018

QUESTIONS

Operator: Maverick Permian LLC 500 Dallas Street, Suite 2300 Houston, TX 77002	OGRID: 331199
	Action Number: 603018
	Action Type: [UF-FAC] TB Registration (TB-REG)

QUESTIONS

Facility Details	
Please answer all the questions in this group.	
Name of the facility	Cookie Tosser State 1H
Date the facility was or will commence operation	05/24/2016
Depth to ground water, if known	Not answered.

Verification	
Does the operator have other facilities with a matching name	No
Are there other facilites located within approximately 50 feet	No
