STATE OF NEW MEXICO  
ENERGY AND MINERALS DEPARTMENT  
OIL CONSERVATION DIVISION

IN THE MATTER OF THE HEARING  
CALLED BY THE OIL CONSERVATION  
DIVISION FOR THE PURPOSE OF  
CONSIDERING:

CASE NO. 6466  
Order No. R-5957

APPLICATION OF GETTY OIL COMPANY  
FOR A DUAL COMPLETION, LEA  
COUNTY, NEW MEXICO.

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 9 a.m. on February 28, 1979, at Santa Fe, New Mexico, before Examiner Richard L. Stamets.

NOW, on this 30th day of March, 1979, the Division Director, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS:

- (1) That due public notice having been given as required by law, the Division has jurisdiction of this cause and the subject matter thereof.
- (2) That the applicant, Getty Oil Company, seeks authority to complete its State 35 Well No. 1, located in Unit K of Section 35, Township 21 South, Range 34 East, NMPM, Lea County, New Mexico, as a dual completion (conventional) to produce oil from an undesignated Wolfcamp pool and gas from the Grama Ridge-Morrow Gas Pool through parallel strings of tubing.
- (3) That the evidence presented established that the "Wolfcamp" pool is more properly defined as a Bone Spring pool.
- (4) That the mechanics of the proposed dual completion are feasible and in accord with good conservation practices.
- (5) That the Division Director should be authorized to rescind the authority granted by this order whenever it should appear that the method of production of the Bone Spring zone is no longer efficient.

-2-

Case No. 6466  
Order No. R-5957

(6) That approval of the subject application will prevent waste and protect correlative rights.

IT IS THEREFORE ORDERED:

(1) That the applicant, Getty Oil Company, is hereby authorized to complete its State 35 Well No. 1, located in Unit K of Section 35, Township 21 South, Range 34 East, NMPM, Lea County, New Mexico, as a dual completion (conventional) to produce oil from an undesignated Bone Spring pool and gas from the Grama Ridge-Morrow Gas Pool through parallel strings of tubing with separation of the zones to be achieved by means of a packer to be set at approximately 10,187 feet.

PROVIDED HOWEVER, that the applicant shall complete, operate, and produce said well in accordance with the provisions of Rule 112-A of the Division Rules and Regulations insofar as said rule is not inconsistent with this order;

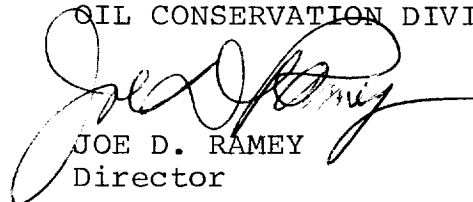

PROVIDED FURTHER, that the applicant shall take Packer-Leakage tests upon completion and annually thereafter during the Annual Shut-In Pressure Test Period for gas wells in South-eastern New Mexico.

(2) That the Division Director may administratively rescind the dual completion authority granted by this order if it should appear that the method of production of the Bone Spring zone is no longer efficient.

(3) That jurisdiction of this cause is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year herein-above designated.
