

**STATE OF NEW MEXICO
ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**CASE NO. 11884
Order No. R-10931**

**APPLICATION OF MARATHON OIL
COMPANY FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This cause came on for hearing at 8:15 a.m. on December 4, 1997, at Santa Fe, New Mexico, before Examiner David R. Catanach.

NOW, on this 22nd day of December, 1997, the Division Director, having considered the testimony, the record, and the recommendations of the Examiner, and being fully advised in the premises,

FINDS THAT:

(1) Due public notice having been given as required by law, the Division has jurisdiction of this cause and the subject matter thereof.

(2) Division Case Nos. 11883 and 11884 were consolidated at the time of the hearing for the purpose of testimony.

(3) The applicant, Marathon Oil Company (Marathon), seeks an order pooling all mineral interests from a depth of 3,500 feet (being the base of the San Andres formation) to the base of the Morrow formation underlying the S/2 of Section 4, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico, and in the following manner:

the S/2 thereby forming a standard 320-acre gas spacing and proration unit for any and all formations and/or pools spaced on 320 acres within said vertical extent which presently includes but is not necessarily limited to the Undesignated North Turkey Track-Morrow Gas Pool, Millman-Morrow Gas Pool and Undesignated South Millman-Morrow Gas Pool;

the SW/4 thereby forming a standard 160-acre spacing and proration unit for any and all formations and/or pools spaced on 160 acres within said vertical extent; and,

the NE/4 SW/4 thereby forming a standard 40-acre oil spacing and proration unit for any and all formations and/or pools spaced on 40 acres within said vertical extent.

Said units are to be dedicated to the applicant's proposed Mitchusson "4" State Well No. 1 to be drilled at a standard gas well location within the NE/4 SW/4 of Section 4.

(4) The applicant has the right to drill and proposes to drill its Mitchusson "4" State Well No. 1 at a standard gas well location within the NE/4 SW/4 of Section 4.

(5) There are interest owners in the proposed proration units who have not agreed to pool their interests.

(6) Maralo Inc., Loe Partners, L.P., MRL Partners, L.P., and L. R. French Jr., hereinafter referred to as the "Maralo Group", all interest owners within the proposed proration units, appeared at the hearing in opposition to the application.

(7) The "Maralo Group" testified that prior to drilling the proposed Mitchusson "4" State Well No. 1, Marathon should drill the Courtman "4" State Well No. 1 (being the subject of companion Case No. 11883) and produce that well a sufficient period of time in order to evaluate whether or not a second well within this section, being the proposed Mitchusson "4" State Well No. 1 should be drilled. The "Maralo Group" further requested that its interest within the proposed proration units not be pooled at this time.

(8) At the time of the hearing, Marathon testified that it recently became aware that Hanagan Petroleum (Hanagan) owns an interest within the proposed proration units. Marathon further testified that although it has commenced negotiations with Hanagan, it has not yet reached a voluntary agreement with this party. In anticipation of reaching a voluntary agreement with Hanagan and due to the fact that Hanagan was not provided proper notice of this case in conformance with Division Rule No. 1207.A., Marathon requested that the interest of Hanagan be excluded from the compulsory pooling provisions of this order.

(9) Marathon's request is reasonable and should be granted.

(10) To avoid the drilling of unnecessary wells, to protect correlative rights, to avoid waste, and to afford to the owner of each interest in said units the opportunity to recover or receive without unnecessary expense his just and fair share of the production in any pool completion resulting from this order, the subject application should be approved by pooling all mineral interests (with the exception of Hanagan Petroleum's interest), whatever they may be, within said units.

- (11) The applicant should be designated the operator of the subject well and units.
- (12) Any non-consenting working interest owner should be afforded the opportunity to pay his share of estimated well costs to the operator in lieu of paying his share of reasonable well costs out of production.
- (13) Any non-consenting working interest owner who does not pay his share of estimated well costs should have withheld from production his share of the reasonable well costs plus an additional 200 percent thereof as a reasonable charge for the risk involved in the drilling of the well.
- (14) Any non-consenting working interest owner should be afforded the opportunity to object to the actual well costs but actual well costs should be adopted as the reasonable well costs in the absence of such objection.
- (15) Following determination of reasonable well costs, any non-consenting working interest owner who has paid his share of estimated costs should pay to the operator any amount that reasonable well costs exceed estimated well costs and should receive from the operator any amount that paid estimated well costs exceed reasonable well costs.
- (16) \$5400.00 per month while drilling and \$540.00 per month while producing should be fixed as reasonable charges for supervision (combined fixed rates); the operator should be authorized to withhold from production the proportionate share of such supervision charges attributable to each non-consenting working interest, and in addition thereto, the operator should be authorized to withhold from production the proportionate share of actual expenditures required for operating the subject well, not in excess of what are reasonable, attributable to each non-consenting working interest.
- (17) All proceeds from production from the subject well which are not disbursed for any reason should be placed in escrow to be paid to the true owner thereof upon demand and proof of ownership.
- (18) Upon the failure of the operator of said pooled units to commence the drilling of the well to which said units are dedicated on or before March 15, 1998, the order pooling said units should become null and void and of no effect whatsoever.
- (19) Should all the parties to this forced pooling order reach voluntary agreement subsequent to entry of this order, this order shall thereafter be of no further effect.
- (20) The operator of the well and units shall notify the Director of the Division in writing of the subsequent voluntary agreement of all parties subject to the forced pooling provisions of this order.

IT IS THEREFORE ORDERED THAT:

(1) All mineral interests, (with the exception of Hanagan Petroleum's interest), whatever they may be, from a depth of 3,500 feet (being the base of the San Andres formation) to the base of the Morrow formation underlying the S/2 of Section 4, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico, are hereby pooled in the following manner:

the S/2 thereby forming a standard 320-acre gas spacing and proration unit for any and all formations and/or pools spaced on 320 acres within said vertical extent which presently includes but is not necessarily limited to the Undesignated North Turkey Track-Morrow Gas Pool, Millman-Morrow Gas Pool and Undesignated South Millman-Morrow Gas Pool;

the SW/4 thereby forming a standard 160-acre spacing and proration unit for any and all formations and/or pools spaced on 160 acres within said vertical extent; and,

the NE/4 SW/4 thereby forming a standard 40-acre oil spacing and proration unit for any and all formations and/or pools spaced on 40 acres within said vertical extent.

Said units shall be dedicated to the applicant's proposed Mitchusson "4" State Well No. 1 to be drilled at a standard gas well location within the NE/4 SW/4 of Section 4.

PROVIDED HOWEVER THAT, the operator of said units shall commence the drilling of said well on or before the 15th day of March, 1998, and shall thereafter continue the drilling of said well with due diligence to a depth sufficient to test the Morrow formation.

PROVIDED FURTHER THAT, in the event said operator does not commence the drilling of said well on or before the 15th day of March, 1998, Ordering Paragraph No. (1) of this order shall be null and void and of no effect whatsoever, unless said operator obtains a time extension from the Division Director for good cause shown.

PROVIDED FURTHER THAT, should said well not be drilled to completion, or abandonment, within 120 days after commencement thereof, said operator shall appear before the Division Director and show cause why Ordering Paragraph No. (1) of this order should not be rescinded.

(2) Marathon Oil Company is hereby designated the operator of the subject well and units.

(3) After the effective date of this order and within 90 days prior to commencing said well, the operator shall furnish the Division and each known working interest owner in the subject units an itemized schedule of estimated well costs.

(4) Within 30 days from the date the schedule of estimated well costs is furnished to him, any non-consenting working interest owner shall have the right to pay his share of estimated well costs to the operator in lieu of paying his share of reasonable well costs out of production, and any such owner who pays his share of estimated well costs as provided above shall remain liable for operating costs but shall not be liable for risk charges.

(5) The operator shall furnish the Division and each known working interest owner an itemized schedule of actual well costs within 90 days following completion of the well; if no objection to the actual well costs is received by the Division and the Division has not objected within 45 days following receipt of said schedule, the actual well costs shall be the reasonable well costs; provided however, if there is objection to actual well costs within said 45-day period the Division will determine reasonable well costs after public notice and hearing.

(6) Within 60 days following determination of reasonable well costs, any non-consenting working interest owner who has paid his share of estimated well costs in advance as provided above shall pay to the operator his pro rata share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator his pro rata share of the amount that estimated well costs exceed reasonable well costs.

(7) The operator is hereby authorized to withhold the following costs and charges from production:

- (A) The pro rata share of reasonable well costs attributable to each non-consenting working interest owner who has not paid his share of estimated well costs within 30 days from the date the schedule of estimated well costs is furnished to him.
- (B) As a charge for the risk involved in the drilling of the well, 200 percent of the pro rata share of reasonable well costs attributable to each non-consenting working interest owner who has not paid his share of estimated well costs within 30 days from the date the schedule of estimated well costs is furnished to him.

(8) The operator shall distribute said costs and charges withheld from production to the parties who advanced the well costs.

(9) \$5400.00 per month while drilling and \$540.00 per month while producing are hereby fixed as reasonable charges for supervision (combined fixed rates); the operator is hereby authorized to withhold from production the proportionate share of such supervision charges attributable to each non-consenting working interest, and in addition thereto, the operator is hereby authorized to withhold from production the proportionate share of actual expenditures required for operating such well, not in excess of what are reasonable, attributable to each non-consenting working interest.

(10) Any unleased mineral interest shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for the purpose of allocating costs and charges under the terms of this order.

(11) Any well costs or charges which are to be paid out of production shall be withheld only from the working interest's share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(12) All proceeds from production from the subject well which are not disbursed for any reason shall immediately be placed in escrow in Eddy County, New Mexico, to be paid to the true owner thereof upon demand and proof of ownership; the operator shall notify the Division of the name and address of said escrow agent within 30 days from the date of first deposit with said escrow agent.

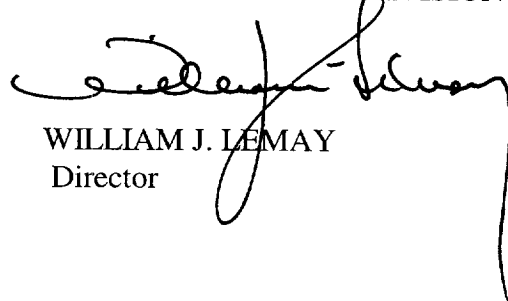

(13) Should all the parties to this forced pooling order reach voluntary agreement subsequent to entry of this order, this order shall thereafter be of no further effect.

(14) The operator of the well and units shall notify the Director of the Division in writing of the subsequent voluntary agreement of all parties subject to the forced pooling provisions of this order.

(15) Jurisdiction is hereby retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
