Did or will this venting or flaring last eight hours or more cumulatively within any 24-hour period from a single event	Yes
Is this considered a submission for a notification of a major venting or flaring	Yes, minor venting or flaring of natural gas.
The operator shall file a form C-141 instead of a form C-129 for a release that includes liquid during venting or flaring that is or may be a major or minor release under 19-13-29 NMAC.	
Was there or will there be at least 50 MCF of natural gas vented or flared during this event	Yes
Did this venting or flaring result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No

Unregistered Facility Site	
<i>Please provide the facility details, if the venting or flaring occurred or is occurring at a facility that does not have an Facility ID (F#) yet.</i>

Steps and Actions to Prevent Waste	
---	--

For this event, the operator could not have reasonably anticipated the current event and it was beyond the operator's control.	True
Please explain reason for why this event was beyond your operator's control	This is a continuous event to flare events early in the month of July due to high line pressure issues attributed to third party gas gatherer. This new flaring started on 7/12. Previous C-129 was filed on 7/16 to capture first flaring event for the first two weeks of July.
Steps taken to limit the duration and magnitude of venting or flaring	Cimarex with working with its gas marketing team to be alerted via e-mail distribution list of flare events and their durations by the the third party midstream company.
Corrective actions taken to eliminate the cause and reoccurrence of venting or flaring	As noted Cimarex gas marketing team is working on a e-mail distribution list to be alerted on events and long durations of these events by the gas gather
