## Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

**Closure Report Attachment Checklist:** *Each of the following items must be included in the closure report.*

- ☒ A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- ☒ Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- ☒ Laboratory analyses of final sampling (Note: appropriate OCD District office must be notified 2 days prior to final sampling)
- ☒ Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

SUBJECT: Remediation Closure Report for the Poker Lake Line Releases (NAPP2107728692, NAPP2109535682, NAPP2111739546, NAPP2111740970), Eddy County, New Mexico

## 1.0 Executive Summary

On behalf of Enterprise Field Services LLC (Enterprise), Souder, Miller & Associates (SMA) has prepared this Remediation Closure Report that describes the remediation of four (4) releases of natural gas and liquids related to oil and gas production activities at the Poker Lake pipeline. The pipeline is in Unit O, Section 19, Township 24S, Range 30E, Eddy County, New Mexico, on Federal land. Figure 1 illustrates the vicinity and site location on an USGS 7.5 minute quadrangle map.

This report demonstrates that the site has been remediated to meet the standards of Table I of 19.15.29.12 NMAC. In addition to meeting the Closure Criteria, the top four (4) feet of impacted areas meet the reclamation requirement of 19.15.29.13(D)(1). The information provided in this report is intended to fulfill final NMOCD closure requirements.

**SMA recommends no further actions and requests that the releases listed in Table 1 associated with the Poker Lake Pipeline be closed.**

Table 1 summarizes release information and Closure Criteria.

NMOCD Closure Criteria	>100 feet to groundwater		
SMA Response Dates	April 9, 2021, April 30, 2021, May 7, 2021		

## 2.0 Background

Between March 4, 2021 and April 14, 2021, four (4) release were discovered on the Poker Lake pipeline. The cause of the pinholes in the pipeline has yet to be determined. Initial response activities were conducted by Enterprise, and included source elimination and site security, containment, and site stabilization activities. Figure 1 illustrates the vicinity and pipeline location; Figure 2 illustrates the release location. The C-141 forms are included in Appendix A.

## 3.0 Site Information and Closure Criteria

The Poker Lake pipeline is located approximately 9 miles southeast of Malaga, New Mexico on Federal (BLM) land at an elevation of approximately 3,179 feet above mean sea level (amsl).

### Depth to Groundwater

Based upon water well data (Appendix B), depth to groundwater in the area is estimated to be 222 feet below grade surface (bgs).

### Wellhead Protection Area

There are two (2) known water sources within ½-mile of the location, according to the New Mexico Office of the State Engineer (NMOSE) online water well database and USGS National Water Information System (Appendix B).

### Distance to Nearest Significant Watercourse

The nearest significant watercourse is Pecos River, located approximately three (3) miles to the southwest.

Table 2 demonstrates the Closure Criteria applicable to this location. Figure 2 illustrates the site with 200 and 300-foot radii to indicate that it does not lie within a sensitive area as described in 19.15.29.12.C(4) NMAC.

Based on the information presented herein, the applicable NMOCD Closure Criteria for this site is for a groundwater depth of greater than 100 feet bgs in addition to the requirements of reclamation for the upper four feet of impacted soil.

## 4.0 Release Characterization and Remediation Activities

On April 9, 2021, SMA personnel performed site delineation activities at the Poker Lake pipeline for incidents NAPP2107728692 and NAPP2109535682. SMA collected soil samples around the release site and throughout the visibly stained area. The areas of visual impact was located entirely within the Enterprise right-of-way (ROW).

Soil samples were field-screened for chloride using an electrical conductivity (EC) meter and for hydrocarbon impacts using a calibrated MiniRAE 3000 photoionization detector (PID) equipped with a 10.6 eV lamp.

## Poker Lake Closure Report June 22, 2021

Page 3 of 5

A total of eight (8) sample locations were investigated using heavy equipment to depths up to fifteen (15) feet bgs. A total of twelve (12) samples were collected for laboratory analysis for total chloride using EPA Method 300.0; benzene, toluene, ethylbenzene and total xylenes (BTEX) using EPA Method 8021B; and motor, diesel and gasoline range organics (MRO, DRO, and GRO) by EPA Method 8015D. Sample locations are shown on Figure 3A.

As summarized in Table 3A, results indicated that samples S2 and SW2 exceeded NMOCD Closure Criteria and required further excavation.

Subsequent releases (NAPP2111739546, NAPP2111740970) occurred on April 12 and April 14, 2021 on the Poker Lake pipeline.

On April 30, 2021 and May 7, 2021 SMA returned to the site to guide excavation activities by collecting soil samples for field screening. Two separate, but closely located excavations occurred to address the four releases. Samples were screened for chloride using an electrical conductivity (EC) meter and/or for hydrocarbon impacts using a calibrated MiniRAE 3000 photoionization detector (PID) equipped with a 10.6 eV lamp. The walls and base were excavated until field screening results indicated that the NMOCD Closure Criteria would be met.

Excavation dimensions and closure sample locations are depicted in Figure 3B.

Confirmation samples were comprised of five-point composites of the base (CS1-CS5) and walls (CSW1-CSW8).

A total of seventeen (17) samples were collected for laboratory analysis for total chloride using EPA Method 300.0; benzene, toluene, ethylbenzene and total xylenes (BTEX) using EPA Method 8021B; and motor, diesel and gasoline range organics (MRO, DRO, and GRO) by EPA Method 8015D. Laboratory samples were collected in accordance with the sampling protocol included in Appendix C. Samples were placed into laboratory supplied glassware, labeled, and maintained on ice until delivery to Hall Environmental Analysis Laboratory in Albuquerque, New Mexico.

Conformation laboratory results are summarized in Table 3B. Laboratory reports are included in Appendix D.

### **5.0 Site Recommendations**

As demonstrated in Table 3, all closure samples meet the Closure Criteria. The site has been remediated to meet the standards of Table I of 19.15.29.12 NMAC. In addition to meeting the Closure Criteria, the top four (4) feet of impacted areas meet the reclamation requirement of 19.15.29.13(D)(1).

Contaminated soils were removed and replaced with clean backfill material to return the surface to previous contours. The contaminated soil was transported and disposed of at Lea Land LLC, Hobbs, New Mexico, an NMOCD-permitted disposal facility.

SMA recommends no further action and requests closure of Incident Numbers NAPP2107728692, NAPP2109535682, NAPP2111739546, NAPP2111740970.

### **6.0 Scope and Limitations**

The scope of our services included: assessment sampling; verifying release stabilization; regulatory liaison; remediation; and preparing this report. All work has been performed in accordance with generally accepted professional environmental consulting practices for oil and gas releases in the Permian Basin in New Mexico.

If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?          	

**Initial Response**

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury*

<input checked="" type="checkbox"/> The source of the release has been stopped. <input checked="" type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input checked="" type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input checked="" type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.	
If all the actions described above have <u>not</u> been undertaken, explain why:          	
Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

## Explanation

Section	Code	Description
Water-level date-time accuracy	D	Date is accurate to the Day
Parameter code	62610	Groundwater level above NGVD 1929, feet
Parameter code	62611	Groundwater level above NAVD 1988, feet
Parameter code	72019	Depth to water level, feet below land surface
Referenced vertical datum	NAVD88	North American Vertical Datum of 1988
Referenced vertical datum	NGVD29	National Geodetic Vertical Datum of 1929
Status	1	Static
Method of measurement	S	Steel-tape measurement.
Method of measurement	Z	Other.
Measuring agency		Not determined
Source of measurement		Not determined
Water-level approval status	A	Approved for publication -- Processing and review completed.

# APPENDIX C FIELD NOTES & PHOTO LOG

## Polar Lake

- April 9, 2021

Initial Samples S1-S4 and SW1-SW4 were collected at area of initial release for Polar Lake. Samples S1-S4 collected at 15' bgs. Each Sidenall had two samples collected, one at 4-15' and another at 0-4' bgs.

Water well within 1/2 mile has depth to groundwater greater than 100' bgs, allowing a wider closure criteria for lower portion of excavation.

Samples were submitted to Hell Labs in ABQ, NM.

- 5/7/21

SW2 @ 0-4' was extended another 2' to the east. New Confirmation Sample collected at this location cleared Field-Screening for chlorides and TPH.

The location of Sample S2 was extended down to 16.5' bgs. Field-Screening indicated that at this depth, S2 was clear of high chlorides and TPH.

RE: Poker Lake

OrderNo.: 2104602

Dear Ashley Maxwell:

Hall Environmental Analysis Laboratory received 12 sample(s) on 4/14/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to [www.hallenvironmental.com](http://www.hallenvironmental.com) or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman", is written over a light blue horizontal line.

Andy Freeman  
Laboratory Manager  
4901 Hawkins NE  
Albuquerque, NM 87109

RE: Poker Lake

OrderNo.: 2105001

Dear Ashley Maxwell:

Hall Environmental Analysis Laboratory received 15 sample(s) on 5/1/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to [www.hallenvironmental.com](http://www.hallenvironmental.com) or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman".

RE: Poker Lake

OrderNo.: 2105385

Dear Ashley Maxwell:

Hall Environmental Analysis Laboratory received 2 sample(s) on 5/8/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to [www.hallenvironmental.com](http://www.hallenvironmental.com) or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman".
