Other Released Details	Not answered.
Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	As noted on previous reports for this facility Cimarex is in the process of swapping compressors. Compressors continue to go down due to do multiple issues and the facility flares intermittently
Steps taken to limit the duration and magnitude of vent or flare	Since the facility flares intermittently the compressors are not down long enough to trigger out well shit in threshold. Our engineering team is trying to increase compressor runtimes.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Field team is working on compressor run time issues.
