Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Emergency shut down and instrument gas supply froze off in the middle of the night, causing the vent valve to open and release gas to atmosphere. Harvest could not have prevented the freeze
Steps taken to limit the duration and magnitude of vent or flare	Harvest personnel immediately dispatched to site after gas loss was remotely detected. Harvest personnel isolated release and determined cause, to prevent further gas release to atmosphere
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Harvest has added additional insulation to the valve and is replacing a pressure switch on the ESD system
