Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Gas was routed to flare to protect personnel and equipment when an air compressor unexpectedly shut down. The shutdown was caused by a failed pressure switch, which prevented the auto shutoff from working and caused the fuses to fail and prevented the unit from working properly.
Steps taken to limit the duration and magnitude of vent or flare	Gas was flared until the unit could be restarted.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	The failed fuses were replaced and the air compressor was restarted. Normal operations resumed, and flaring ceased. After this event the failed pressure switch was replaced.
