### Nature and Volume of Release

| Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below) |  |   |  |  |
|---|--|---|--|--|
| Crude Oil   | Volume Released (bbls)   | Volume Recovered (bbls)                 |  |  |
| Produced Water  | Volume Released (bbls) 23.5  | Volume Recovered (bbls) 23.5            |  |  |
|   | Is the concentration of dissolved chloride in the produced water >10,000 mg/l? | Yes No                                  |  |  |
| Condensate  | Volume Released (bbls)   | Volume Recovered (bbls)                 |  |  |
| Natural Gas   | Volume Released (Mcf)  | Volume Recovered (Mcf)                  |  |  |
| Other (describe)  | Volume/Weight Released (provide units)   | Volume/Weight Recovered (provide units) |  |  |

Cause of Release

Operator arrived on location to a pinhole failure in the 4" ball valve on the main water leg off of water tank 2. This failure resulted in the release of approx.. 23.5 bbl. of produced water inside of the lined, secondary containment. Because the standing fluid was so shallow, a vac truck was unable to recover the fluid, so a crew was called to pressure was the containment and all fluid was recovered in tandem. A notice will be sent out prior to a liner integrity inspection.

#### **Initial Response**

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

 $\square$  The source of the release has been stopped.

The impacted area has been secured to protect human health and the environment.

Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.

All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
