Please explain reason for why this event was beyond this operator's control	Operator has no control over nor advanced knowledge of downstream pipeline malfunctions.
Steps taken to limit the duration and magnitude of vent or flare	The well will be produced at the minimum production volume which still allows the well to flow. This well will die at a certain rate and once it is dead it requires increasingly long duration swabbing, typically over a week long.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Operator has no control over downstream pipeline malfunctions. This well will have artificial lift installed sometime in the future, which will allow us to shut the well in and avoid having to flare during future emergencies.
