Location of Release Source

Latitude 32.67018

	Longitude	-	1()4	.50052	2
		_				_

(NAD 83 in decimal degrees to 5 decimal places)

Site Name Roy AET #5	Site Type Well Pad
Date Release Discovered 10/13/2022	API# (if applicable) 30-015-27843

Unit Letter	Section	Township	Range	County
Р	8	19S	25E	Eddy

Surface Owner: State Federal Tribal Private (Name: Howell Revocable Trust

Nature and Volume of Release

Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)

Crude Oil	Volume Released (bbls)	Volume Recovered (bbls)	
Produced Water	Volume Released (bbls) Unknown	Volume Recovered (bbls)	
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	Ves No	
Condensate	Volume Released (bbls)	Volume Recovered (bbls)	
Natural Gas	Volume Released (Mcf)	Volume Recovered (Mcf)	
Other (describe)	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)	
Cause of Release Notice was provided from the private surface owner of possible impacts remaining on the well pad of the P&A'd location. An environmental consultant was retained to investigate and assess the site. Based on the assessment of the site, scattered areas of minimal chloride impaction were discovered, which individually would not meet a threshold for reportability based on the size and volume of soil. However, if the areas become contiguous then the volume could possibly be considered for reportable. In an abundance of caution, a C-141 is being submitted for the site and remediation will be completed to current Spill Rule (NMAC 19.15.29) requirements.

Was this a major release as defined by 19.15.29.7(A) NMAC?	If YES, for what reason(s) does the responsible party consider this a major release?
🗌 Yes 🗹 No	
If YES, was immediate no	otice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

 \checkmark The source of the release has been stopped.

 \checkmark The impacted area has been secured to protect human health and the environment.

Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.

 \checkmark All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
