Operator arrived on location to an active leak on the 3" Victaulic clamp on the dump line off the 3H separator that resulted in just under 11 bbl. of produced water to be released into the lined, secondary containment. The standing fluid is going to be recovered in tandem with pressure washing of the facility and a notice will be sent out prior to a liner integrity inspection.

In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
