Notice of Intent No. 9681
Agency Interest No. 40554 - PRN20220001
GL Erwin Battery
AIRS No. 350252274

Dear Glenda De Leon:

This letter acknowledges the receipt of your Air Quality Bureau Notice of Intent (NOI) form dated July 7, 2022 for an Oil & Gas facility in New Mexico. The notice was received by the Department on July 15, 2022.

Construction or modification may commence 6.4 mi NNE of Jal in Lea County at latitude and longitude decimal degrees: 32.192936, -103.1297, as represented in the notice. Any changes in the method of operation or addition of more units at the site may constitute a modification, which requires the Department's prior review for construction and/or operation. This NOI determination was based upon the information provided in the NOI forms. The sources, when constructed, will be subject to inspection.

In the event of any change in ownership or operator of this facility, the new owner or operator shall notify the Department in writing within thirty (30) days of that change. This facility will be subject to periodic emissions inventory reporting per 20.2.73.300 NMAC.

Based on the information provided in the submitted NOI, the Department has determined that the potential emission rate (PER) of any regulated air pollutant from this facility for which there is a National or New Mexico Ambient Air Quality Standard is less than ten (10) pounds per hour and twenty-five (25) tons per year. Therefore, in accordance with Title 20, Chapter 2, Part 72 of the New Mexico Administrative Code (20.2.72 NMAC), an air quality permit is not required, and construction may commence. Because the potential emission rate is greater than ten (10) tons per year, this facility is subject to 20.2.73 NMAC. The submitted forms will serve as the Notice of Intent in accordance with 20.2.73.200.A. NMAC.

In addition to 20.2.73 NMAC, this facility may be subject to additional state and federal regulations *such as* those found in Table 1. **The review of an NOI does not constitute a determination of regulatory applicability, regardless of statements of anticipated applicability made in the forms.** It is the permittee's responsibility to determine applicability and to comply with all applicable regulations.

Note: Some New Mexico state regulations are not federally enforceable (e.g., 20.2.35 and 20.2.38 NMAC) and while these regulations can be used for determining the PER, they cannot be used in determining facility-wide potential to emit (PTE) unless included in a federally enforceable permit, such as a 20.2.72 NMAC permit. Applicability of 20.2.70 NMAC (Title V) and 20.2.74 NMAC (PSD) is based on PTE and it is the permittee's responsibility to determine applicability of these regulations. Note that this determination could result in additional permitting requirements under 20.2.70 NMAC and/or 20.2.74 NMAC and, thus, applicability of these regulations should be considered.

Before any asbestos demolition or renovation work, you shall determine whether 40 CFR 61 Subpart M, National Emission Standard for Asbestos applies.

Dear Glenda De Leon:

This letter acknowledges the receipt of your Air Quality Bureau Notice of Intent (NOI) form dated July 7, 2022 for an Oil & Gas facility in New Mexico. The notice was received by the Department on July 15, 2022.

Construction or modification may commence 6.4 mi NNE of Jal in Lea County at latitude and longitude decimal degrees: 32.192936, -103.1297, as represented in the notice. Any changes in the method of operation or addition of more units at the site may constitute a modification, which requires the Department's prior review for construction and/or operation. This NOI determination was based upon the information provided in the NOI forms. The sources, when constructed, will be subject to inspection.

In the event of any change in ownership or operator of this facility, the new owner or operator shall notify the Department in writing within thirty (30) days of that change. This facility will be subject to periodic emissions inventory reporting per 20.2.73.300 NMAC.

Based on the information provided in the submitted NOI, the Department has determined that the potential emission rate (PER) of any regulated air pollutant from this facility for which there is a National or New Mexico Ambient Air Quality Standard is less than ten (10) pounds per hour and twenty-five (25) tons per year. Therefore, in accordance with Title 20, Chapter 2, Part 72 of the New Mexico Administrative Code (20.2.72 NMAC), an air quality permit is not required, and construction may commence. Because the potential emission rate is greater than ten (10) tons per year, this facility is subject to 20.2.73 NMAC. The submitted forms will serve as the Notice of Intent in accordance with 20.2.73.200.A. NMAC.

In addition to 20.2.73 NMAC, this facility may be subject to additional state and federal regulations *such as* those found in Table 1. **The review of an NOI does not constitute a determination of regulatory applicability, regardless of statements of anticipated applicability made in the forms.** It is the permittee's responsibility to determine applicability and to comply with all applicable regulations.

Determination of Reporting Requirements <i>Answer all questions that apply. The Reason(s) statements are calculated based on your answers and may provide additional guidance.</i>	
Was this vent or flare caused by an emergency or malfunction	Yes
Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event	Yes
Is this considered a submission for a vent or flare event	Yes, minor venting and/or flaring of natural gas.
An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.	
Was there at least 50 MCF of natural gas vented and/or flared during this event	Yes
Did this vent or flare result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No
Was the vent or flare within an incorporated municipal boundary or withing 300 feet from an occupied permanent residence, school, hospital, institution or church in existence	No
