**Re: Closure Report
Copperhead 31 Federal Com #1H
API #: 30-015-38532
RP#: 2RP-4276 & 2RP-4277
Unit Letter G Section 30, Township 26S, Range 29E
Eddy County, NM**

Mr. Bratcher/Ms. Price,

COG Operating, LLC (COG) is pleased to submit for your consideration the following closure report for the Copperhead 31 Federal Com #1H. This closure report is in reference to releases that occurred on June 26, 2017 and June 27, 2017. A work plan was submitted to the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM) on September 25, 2017. On October 10, 2017 the NMOCD approved of the workplan with COA's. On April 12, 2018 COG requested that a liner be installed at 4' in lieu of the COA's requested by the NMOCD. Following this request NMOCD approved the revision on April 13, 2018 and the BLM approved the revision on April 24, 2018.

BACKGROUND

The first release was discovered on June 26, 2017, and released approximately ten (10) barrels of produced water due to a power loss at the Schmitt SWD, causing the flow line to pressure up and split. None of the fluids were recovered from the release. The second release overlapped the footprint of the first release and occurred the following day on June 27, 2017, due to a weld failure on the flowline that was recently repaired. The second spill released approximately fifty (50) barrels of produced water and none was recovered.

June 8, 2018

REMEDIAL ACTIONS

- The entire impacted area was excavated to 4' BGS and a liner was installed.
- All of the excavated material was hauled to an NMOCD approved solid waste disposal facility.
- The excavation was backfilled with like material and contoured to match the surrounding location.

Based on the information provided, COG Operating LLC, would like to request closure of the RP numbers 2RP-4276 & 2RP-4277 associated with this release. Please feel free to contact me with any questions or concerns at (432) 215-2783.

Sincerely,

Dakota Neel
HSE Coordinator

RE: COG * Copperhead 31 Fed Com 1H * 2RP-4276 & 2RP-4277

Henryetta & Shelly,

OCD has approved a revision to the original approval. A liner will be installed at 4' bgs in lieu of the deeper excavation. Please advise if BLM does not concur.

Thank you,

Mike Bratcher

Mr. Bratcher,

Would it be possible to meet with you tomorrow to discuss the approved work plan for 2RP-4276 and 2RP-42767?

You approved this site with the condition that we dig out the area of T1 to 6' BGS, T2 to 4' BGS and T3 to 3' BGS. I would like to discuss with you the possibility of installing a liner instead of excavating to the requested depths.

I am available anytime tomorrow to meet.

Please let me know what works best for you.

Thanks,

Dakota Neel

Greetings,

Your proposal for remediation of the above referenced site is approved with the following:

The NMOCD Environmental Bureau has requested District staff to initiate RRAL for chloride delineation/remediation to 600 mg/kg. With that, OCD requests T-1 be excavated to 6', T-2 to 4', and T-3 to 3'. Please notify OCD in the event excavation depths are not achieved. Federal sites will require like approval from BLM. Please advise once remedial activities have been scheduled.

If you have any questions or concerns, please contact me or Jim Griswold, NMOCD Environmental Bureau Chief.
