Was this a major release as defined by 19.15.29.7(A) NMAC? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release? an unauthorized release of a volume, excluding gases, of 25 barrels or more
If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)? OCD Rep Eugene Bolton drove up on location witnessing release. Process was started to create Portal account for NOR and C-141 submission.	

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

- ☒ The source of the release has been stopped.
- ☒ The impacted area has been secured to protect human health and the environment.
- ☒ Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.
- ☒ All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

OBTAINING AN OGRID NUMBER:

To obtain an OGRID number, the Operator must be registered with the Secretary of State as an entity doing business in New Mexico:

This has been directed to Rob Jackson and the Administrative staff, for further information.

Beatrice,

Please see below for instructions on how to set up an administrator account in OCD permitting.

OBTAINING AN ADMINISTRATOR NAME:

Once the Operator obtains an OGRID number, to register an Operator Administrator and submit permit or report applications, you will need to submit the form at the link below:

<https://wwwapps.emnrd.state.nm.us/ocd/ocdpermitting/Signup/Create/Signup.aspx>

You click on the drop down arrow then scroll down until you find your entity then click on your companies name and OGRID number. You basically fill out the form online, print and sign it then scan and email it back. **Note: There are two places on this form requiring a signature.**

Once these processes have been complete and you need direction to upload documents to application portal, I can assist.

Rules Operator needs to know about regarding releases:

- **New Mexico Administrative Code (Title 19, Chapter 15, Oil & Gas):** [Chapter 15 – Oil and Gas – State Records Center & Archives \(nm.gov\)](#)

Proceed to the OCD Permitting [OCD E-Permitting - Oil Conservation \(nm.gov\)](#): first Operator completes the C-141 and complete the Notification of Release (NoR, no fee). This process generates the unique incident number to be used for the specific release Operator recently had. If another release occurs on a different day, different location, etc, a new NoR and incident number must be generated.

After the incident number is generated, you will complete the C-141 and this document is attached to this email (Operator completes at least first two pages of the six page report and includes the calculation for volume reported). When the C-141 is uploaded to OCD Permitting, there is a \$150 fee. Please have a credit card available to complete the process. Every time you need to submit a report (site characterization, remediation, closure reports and any supporting documentation) a fee of \$150 is required. Please keep in mind timelines from release discovery date, outlined in the rules and yes, you can upload some or all the documents at once. Please make sure your latitude and longitude information matches the unit, township and range. This information is required as a OCD site visit might be required.

Please note that if you have a natural gas release that did not result in a fire and or no liquids were released, a C-129 is required instead of the C-141. There is no fee associated with the completion of the document. All OCD documents can be found here: [OCD Forms - Oil Conservation \(nm.gov\)](https://www.nm.gov/oil-conservation/forms)

Please do not hesitate with questions. This is a process, and OCD staff would like Operators to be successful in the completion of their reporting.

Batrice,

You can file a NOR or Notice of Release as well as the initial C-141 on the [OCD Permitting page](#) by selecting the option from the drop down menu as shown below

You will need an operator OGRID # and login information. If you have any further questions please feel free to contact me.

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

I am seeking help with a C141, that I need to file for a ground spill clean up, where ACD truck spilled about 50 bbls of produced water on the ground when the truck and trailer over turned.

Thanks

Beatrice Navarrette
