Was this a major release as defined by 19.15.29.7(A) NMAC? ☐ Yes ☐ No	If YES, for what reason(s) does the responsible party consider this a major release?	
If YES was immediate no	notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?	
11 125, was immediate in	netice given to the edge. By whom: To whom: When that by what mounts (phone, email, etc).	
	Initial Response	
The responsible p	e party must undertake the following actions immediately unless they could create a safety hazard that would result in injury	,
☐ The source of the rele	elease has been stopped.	
☐ The impacted area ha	nas been secured to protect human health and the environment.	
☐ Released materials ha	have been contained via the use of berms or dikes, absorbent pads, or other containment devices.	
☐ All free liquids and re	recoverable materials have been removed and managed appropriately.	
Per 19.15.29.8 B. (4) NM	MAC the responsible party may commence remediation immediately after discovery of a release. I	f remediation
has begun, please attach	n a narrative of actions to date. If remedial efforts have been successfully completed or if the releast area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluate	ease occurred
regulations all operators are public health or the environr failed to adequately investig	formation given above is true and complete to the best of my knowledge and understand that pursuant to OCD re required to report and/or file certain release notifications and perform corrective actions for releases which n nment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operate and remediate contamination that pose a threat to groundwater, surface water, human health or the environge of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or	nay endanger erations have onment. Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	(ft bgs)
Did this release impact groundwater or surface water?	☐ Yes ☐ No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	☐ Yes ☐ No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	☐ Yes ☐ No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	☐ Yes ☐ No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	☐ Yes ☐ No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	☐ Yes ☐ No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	☐ Yes ☐ No
Are the lateral extents of the release within 300 feet of a wetland?	☐ Yes ☐ No
Are the lateral extents of the release overlying a subsurface mine?	☐ Yes ☐ No
Are the lateral extents of the release overlying an unstable area such as karst geology?	☐ Yes ☐ No
Are the lateral extents of the release within a 100-year floodplain?	☐ Yes ☐ No
Did the release impact areas not on an exploration, development, production, or storage site?	☐ Yes ☐ No
Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and ver contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.	tical extents of soil
Characterization Report Checklist: Each of the following items must be included in the report.	
Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring well Field data Data table of soil contaminant concentration data Depth to water determination Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release Boring or excavation logs Photographs including date and GIS information Topographic/Aerial maps Laboratory data including chain of custody	ls.

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: Each of the following items must be included in the closure report.

A scaled site and sampling diagram as described in 19.15.29.1	1 NMAC
Photographs of the remediated site prior to backfill or photos must be notified 2 days prior to liner inspection)	of the liner integrity if applicable (Note: appropriate OCD District office
Laboratory analyses of final sampling (Note: appropriate ODC	C District office must be notified 2 days prior to final sampling)
Description of remediation activities	
and regulations all operators are required to report and/or file certain may endanger public health or the environment. The acceptance of	ntions. The responsible party acknowledges they must substantially nditions that existed prior to the release or their final land use in

Subject: XTO - 48 hour liner inspection - Remuda 100 battery - released 3/31/2023

Good morning,

This is sent as a 48-hour notification. XTO is scheduled to inspect the lined containment at the Remuda 100 battery, released (3/31/2023), on Thursday April 13 2023 at 10:30am MST. A 24 hour release notification not sent since the release was less than 25 barrels in volume. We have not yet received an incident number but will include that on future correspondence. Please call us with any questions or concerns.

GPS Coordinates: (32.276896, -103.943127)

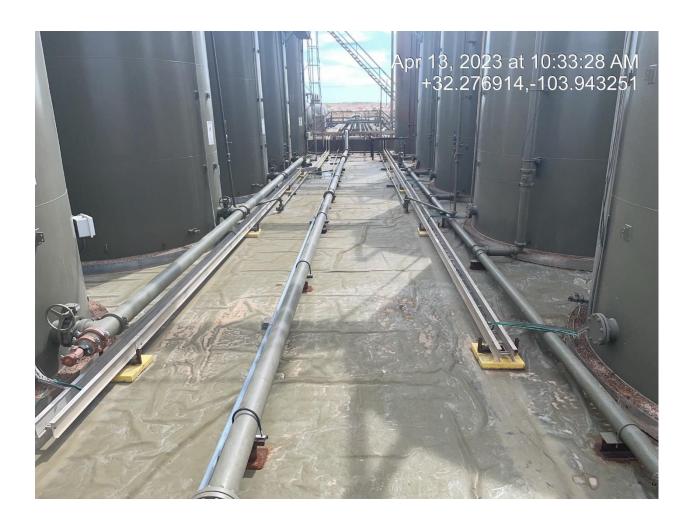

Thank you,
