## Site Assessment/Characterization

*This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

What is the shallowest depth to groundwater beneath the area affected by the release?	<50 (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Did the release impact areas <b>not</b> on an exploration, development, production, or storage site?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

**Characterization Report Checklist:** *Each of the following items must be included in the report.*

- Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- Field data
- Data table of soil contaminant concentration data
- Depth to water determination
- Determination of water sources and significant watercourses within 1/2-mile of the lateral extents of the release
- Boring or excavation logs
- Photographs including date and GIS information
- Topographic/Aerial maps
- Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

Facility ID	
Application ID	167954

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

## Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

**Closure Report Attachment Checklist:** *Each of the following items must be included in the closure report.*

- A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

Printed Name: Kurt A. Shipley Title: Chief Operating Officer  
 Signature:  Date: 7-11-2023  
 email: kshipley@novoog.com Telephone: 405-286-3916

**OCD Only**

Received by: Shelly Wells Date: 7/13/2023

Closure approval by the OCD does not relieve the responsible party of liability should their operations have failed to adequately investigate and remediate contamination that poses a threat to groundwater, surface water, human health, or the environment nor does not relieve the responsible party of compliance with any other federal, state, or local laws and/or regulations.

## Remediation Plan

**Remediation Plan Checklist:** Each of the following items must be included in the plan.

**A Remediation Plan was not prepared or submitted. Site went directly to Remediation – soil dig, haul, and disposal. Details of the Remediation are provided in the Closure Report.**

- Detailed description of proposed remediation technique
- Scaled sitemap with GPS coordinates showing delineation points
- Estimated volume of material to be remediated
- Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

**Deferral Requests Only:** Each of the following items must be confirmed as part of any request for deferral of remediation.

- Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- Extents of contamination must be fully delineated.
- Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: NOVO OVATION O PAD

Enclosed are the results of analyses for samples received by the laboratory on 12/28/22 16:55.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 12/29/22 16:52.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 12/30/22 14:19.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/03/23 16:32.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/04/23 16:51.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/05/23 16:40.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

\*=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/06/23 16:49.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QR-03 The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
ND Analyte NOT DETECTED at or above the reporting limit
RPD Relative Percent Difference
\*\* Samples not received at proper temperature of 6°C or below.
\*\*\* Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6°C
Samples reported on an as received basis (wet) unless otherwise noted on report

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/09/23 16:35.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/10/23 16:28.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/10/23 16:28.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/11/23 16:08.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/12/23 16:27.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Mike Snyder".

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/13/23 16:10.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style.

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/16/23 15:30.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/17/23 16:09.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

\*=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: NOVO OVATION O PAD RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 01/18/23 16:40.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Novo Oil & Gas – Ovation Pad-O – Well Release  
Discovery Date: December 13, 2022

---

## 1.0 INTRODUCTION

Novo Oil & Gas Northern Delaware, LLC (Novo Oil & Gas) (OGRID No. 372920) operate a facility known as the “Ovation Fed Com 1318” (Ovation Pad-O) located in Unit A, Section 14, T23S, R28E, in Eddy County, New Mexico. On December 13, 2022, field personnel for Novo Oil & Gas responded to a well blow out on Ovation 242H well located at latitude 32.308641°, longitude -104.052567° (**Figure 1 and Figure 2**). This Release Response Action & Closure Report has been prepared to document initial response actions, remediation, and site closure efforts.

### 1.1 Release Details and Initial Response

At 12:07am on December 13, 2022, during a workover of the Ovation 242H well, the well started flowing and BOP equipment could not shut off the flow of the well. While fishing for stuck tubing, Novo was tripping in the hole with wash pipe and tubing. The well was sufficiently killed with 14.8 ppg fluid. Flow from the well started back up with 200 feet of wash pipe in the well. Attempts were made to install a FOSV (full opening safety valve) but were not successful. Shear rams in the BOP could not sever the tubing allowing the well to continue flowing crude oil fluids to the immediate and adjacent land surfaces. The well flowed from 12:07am to 10:35am when the BOP rams activated and shut off the flow. The release affected the surface pad area on the Ovation Pad-O (Onsurez property) from the well head area generally east across the pad and onto BLM property (**Figure 3**) and was irregular shaped due to some initial flow and mist sprayed eastward by the prevailing wind at the time.

Novo Oil & Gas estimated approximately 352 barrels of crude oil and 1,078 barrels of produced water were released; and approximately 295 barrels of crude oil and 1,020 barrels of produced water were recovered using vacuum trucks and initial removal of affected soil. The release volume was estimated based approximate flow calculations that are included in the C-141 Notification Form in **Appendix A**.

Following initial response activities, the perimeter of the release was marked and surveyed based on visual inspection of the ground surface and presence of observed staining.

### 1.2 Notification

Based on the quantity of produced water released being greater than 25 barrels, the release was determined to be a major release per 19.15.29.7.A NMAC. Immediate notification was provided by Kurt Shipley and Bryan Haney to the NMOCD and BLM hotlines on December 13, 2022. Bryan Haney provided additional notification via email to NMOCD representatives on December 13, 2022. The initial online release notification C-141 was submitted to the New Mexico Oil Conservation District (NMOCD) on December 16, 2022. The OCD issued incident ID# nAPP2235068529 in an email response dated December 16, 2022.

The C-141 Release Notification Form was submitted to the online portal on December 17, 2022 (**Attachment A**). The BLM MUE was submitted to the BLM on December 28, 2022 (**Attachment A**).

Release Response Action Completion & Closure Report  
Novo Oil & Gas – Ovation Pad-O - Well Release  
Discovery Date: December 13, 2022

---

### **1.3 Project Objectives**

The project objectives were to: 1) conduct initial release cleanup efforts, 2) physically remove affected soil containing constituent concentrations that exceed the NMOCD cleanup levels, and 3) restore and reclaim the remediated areas.

### **1.4 Regulatory Framework**

The Site is subject to environmental regulatory oversight by the NMOCD. Notification, assessment, and response action activities were conducted in accordance with guidelines outlined in 19.15.29 NMAC. A portion of the release occurred on property owned by the BLM. As such, the BLM requirements will also be adhered to.

## **2.0 STANDARD OF CARE, LIMITATIONS, & RELIANCE**

### **2.1 Standard of Care**

Altamira's services were performed in accordance with standards customarily provided by a firm rendering the same or similar services in the area during the same period of time. Altamira makes no warranties, expressed or implied, as to the services performed hereunder. Additionally, Altamira does not warrant the work of laboratories, regulatory agencies, or other third parties supplying information used in the preparation of the report.

### **2.2 Additional Limitations**

Findings, conclusions and recommendations resulting from these services are based upon information derived from the services performed under this scope of work and it should be noted that this information is subject to change over time. Certain indicators of the presence of hazardous substances, petroleum products, or other constituents may have been latent, inaccessible, unobservable, or not present during these services, and Altamira cannot represent that the Site contains no hazardous substances, toxic materials, petroleum products, or other latent conditions beyond those identified during this scope of services. Environmental conditions at other areas or portions of the Site may vary from those encountered at actual sample locations. Altamira's findings and recommendations are based solely upon data available to Altamira at the time of these services.

## **3.0 RECEPTOR AND WATER SOURCES SURVEY**

### **3.1 Wellhead Protection Discussion**

During assessment field activities, Altamira field personnel conducted a 500-foot walking radius search of the surrounding area to determine the presence of any known private or domestic water sources. During the search, no water wells or springs were identified within 500-feet of the release area. However, Harroun Ditch (dry man-made ditch/canal for irrigation) is present approximately 250 feet west-southwest of the Site. At the time of remediation activities, the ditch was dry. The release did not result in any adverse effects to Harroun Ditch.

Release Response Action Completion & Closure Report  
Novo Oil & Gas – Ovation Pad-O - Well Release  
Discovery Date: December 13, 2022

---

Altamira also reviewed available maps, satellite imagery, and reviewed the New Mexico Office of the State Engineers GIS database to search for known water wells. Altamira ordered a water well search conducted by Banks Environmental Data. No monitoring wells or other subsurface water conveyances were identified within 0.5 miles of the release area (**Appendix B**). The Banks report did identify seven water well locations within 0.25 miles of the release location. The water wells were associated with US Borax and Chemical for exploration and the USGS with unknown use (“not reported”). Based on the location of the release and proximity to possible water wells (if present), there is no risk to the water wells identified in the Banks report.

Based on review of the FEMA Flood Map for the site area, the release area is location in Zone A “No base flood elevations determined” (FIRM Panel 35015C1350D).

### 3.2 Significant Water Source Discussion

Altamira conducted a review of the significant watercourses nearest the release area. The Pecos River is located approximately 280 feet west-southwest of the Site. The release did not result in any adverse effects to the Pecos River. A walking survey was conducted immediately following control of the release. Visual inspection indicated the released liquids remained on the pad in the vicinity of the well location and flowed or was blown in a westward direction away from the Pecos River. Salt Lake is located approximately 1.5 miles east-southeast of the Site area. No other watercourses were identified within a 0.5-mile radius of the release area.

### 3.3 Determination of Depth to Groundwater

Due to the proximity of the Site area to the Pecos River, it was assumed for this specific Site remediation project that depth to groundwater was less than 50 feet below ground surface. Based on the assumed depth to groundwater, analytical data results were compared to Closure Criteria for groundwater encountered at depths less than 51 feet below ground surface.

## 4.0 REMEDIATION

Based on the volume of the release (major – estimated approximately 352 barrels of crude oil and 1,078 barrels of produced water), Novo determined the best course of action was to move directly to remediation of the affected soil located on Pad-O and off-site BLM property to the west. Initial response action and affected soil remediation was conducted on the on-site property and BLM property between December 13, 2022 through May 5, 2023.

Soil remediation was conducted using mechanical and hydro-excavation soil removal methods. Affected soil material from the surface to total depth of excavation was evaluated based on the strictest cleanup levels established by the NMOCD (refer to **Table 1A and Table 1B**).

Confirmation soil sampling was conducted to determine the effectiveness of soil remediation efforts. Details regarding the affected soil remediation and post excavation confirmation soil sampling are provided below. Site photographs are provided in **Appendix C**. Field documentation is provided in **Appendix D**.

Release Response Action Completion & Closure Report  
 Novo Oil & Gas – Ovation Pad-O - Well Release  
 Discovery Date: December 13, 2022

Excavated soil was loaded into trucks for transport and disposal at the LeaLand, LLC disposal facility located at mile marker 64 US Highway 62/180 between Carlsbad and Hobbs, New Mexico (Permit Number WM-01-035 – New Mexico).

Prior to soil remediation on the BLM property, Novo worked with the BLM to identify and clear karst topography, animal and plant species surveys, and archeological survey. A current archeological survey was requested by the BLM and was completed on January 11, 2023 and was cleared by the BLM on January 13, 2023. The BLM approved of affected soil remediation efforts on the BLM owned property.

#### 4.1 Confirmation Soil Sampling and Analysis Plan

Confirmation soil samples collected post excavation were analyzed by Cardinal Laboratories in Hobbs, New Mexico, accredited by the National Environmental Laboratory Accreditation Program (NELAP) for environmental sample analysis requirements. The sampling program and laboratory methods used for the analysis for the project are listed in the following table. Altamira utilized the Oil Conservation Commission guidance and regulations under Title 19, Chapter 15, Part 29 to address the release and constituents of concern. The executed chain-of-custody documents and laboratory reports are provided in **Appendix F**.

Sample Type	Analysis	Laboratory Method
Soil	Total Petroleum Hydrocarbons (TPH)	8015M
Soil	Benzene, Toluene, Ethylbenzene, Xylenes	8260B
Soil	Chlorides	4500-CI-B

#### 4.2 Soil Remediation Activities

Altamira and Novo provided initial notification to the OCD on December 13, 2022. Altamira provided additional notification to the OCD and BLM via email (**Appendix A**) on January 13, 2023 regarding the intent to conduct soil remediation and confirmation soil sampling at the Novo Ovation Pad-O release area. An initial walking survey was conducted by Madron Surveying on December 14, 2022 to determine the approximate visible boundary/perimeter of the release area.

During December 13, 2022 through May 5, 2023, Novo conducted soil remediation activities associated with the December 13, 2022 well blowout/release. The release affected the surface pad area on the Ovation Pad-O from the well head area generally east across the pad and onto BLM property (**Figure 3**) and was irregular shaped due to initial flow of liquids and mist sprayed eastward by the prevailing wind at the time.

A grid system was established to identify the excavation areas and 200-square foot confirmation soil sample grid areas. The sample grids were measured and marked with wooden stakes. The initial sample grids were numbered G-1 through G-154 that include grids on both Ovation Pad O

Release Response Action Completion & Closure Report  
Novo Oil & Gas – Ovation Pad-O - Well Release  
Discovery Date: December 13, 2022

---

and the BLM property. Excavation and sample grids B-1 through B-516 were established for the majority of the BLM owned property. Excavation and sample grids R-1 through R-561 were established for Ovation Pad O area (Onsurez property). Excavation and sampling grids FT-1 through FT-39 were established around the former temporary water tank (**Figure 3**). The overall dimensions of the gridded and remediated area were approximately 575 feet by 210 feet (irregular shaped and variable). The overall remediation area was larger than the original irregular shaped estimated release area due to the various pieces of equipment and to ensure full remediation was achieved. The on-site active pad area consists of limestone-caliche base material used to create the active pad area. The caliche material is hard and dry. There is no vegetation growing on the Ovation Pad-O area. Native soil below the pad base consisted of a reddish silty sand. The BLM property consists of a reddish silty sand, very fine grained and dry.

Crescent Consulting was contracted by Novo to conduct soil excavation, loading, and hauling. Excavated soil was either stockpiled or direct loaded to trucks. Water derived from hydro-excavation was either allowed to dry within the stockpile in a lined area or was removed via vac truck. Soil within each grid was initially excavated to 3-6 inches below ground surface. Sidewalls were tapered towards the natural ground surface along the excavation.

Confirmation soil samples were collected within each 200 square foot grid (14' x 14') and consisted of a 5-point composite sample (generally one from the center and one outward near each corner area). Confirmation soil samples were initially analyzed for chlorides, TPH, and BTEX as described in section 4.1 of this report. Following excavation at each grid, confirmation soil samples were collected and submitted to Cardinal Laboratories for analysis.

Analytical results for each confirmation grid sample were evaluated to the most stringent criteria per *Table 1 – Closure Criteria for Soils Impacted by a Release*. Analytical data results are presented on **Table 1A (Onsurez Pad-O Area)** and **Table 1B (BLM Property)**. If analytical data results showed a chemical constituent exceeded the Closure Criteria Level, soil in that particular grid area was further excavated downward and resampled. Laboratory analysis for soil samples for grids that were further excavated were only analyzed for those chemical constituents that previously exceeded the Closure Criteria Level in the previous depth interval. This process continued until the concentration of all targeted chemical constituents were below the respective Closure Criteria Level.

#### 4.2.1 Former Chevron Reserve Pit Area – Remediation Exclusion Area

During active remediation and in coordination with the OCD and BLM, it was discovered that the southwest corner of Pad-O and a portion of Pad-P (both on Onsurez property) was historically utilized by Chevron production activities and consisted of a former reserve pit area. This was confirmed in the field during excavation as evidenced by plastic and various debris and un-native soils. Once this area was identified during extended excavation, the identified former reserve pit area was immediately backfilled and no further action was conducted in this area. The approximate outline of the former Chevron reserve pit area is depicted on **Figure 3** and **Figure 4A**. Prior to encountering the former reserve pit area, shallow soil excavation and sampling was conducted as depicted on the figures; however, as explained above this effort was discontinued as soon as the former reserve pit was encountered. No further action will be taken in the outlined former reserve pit area located on the Onsurez property.

#### 4.2.2 Excavation Grids R-1, R-7 and R-13 Discussion

Soil excavation and sampling was conducted at grids R-1, R-7, and R-13. Soil excavation and sampling was extended to five feet below ground surface at each grid. Analytical results showed no detectable TPH or BTEX in the first sample depth interval. Chlorides were detected in each sample depth interval at each grid above 600 mg/kg and increased with depth. Chlorides in soil at grid R-1 at the one-foot sampling interval were detected at 880 mg/kg and increased at the five-foot depth interval to 1,490 mg/kg. Chlorides in soil at grid R-7 at the one-foot sampling interval were detected at 688 mg/kg and increased at the five-foot depth interval to 1,180 mg/kg. Chlorides in soil at grid R-13 at the one-foot sampling interval were detected at 704 mg/kg and increased at the five-foot depth interval to 1,220 mg/kg. As a result, it was determined that the chloride concentrations at depth are not a result of the current release since they uniformly increased with depth and are likely representative of a background anomaly. No further remediation at these three grids was conducted beyond five feet in depth.

#### 4.2.3 Deferment of Operational Well and Equipment Area

The release occurred from Ovation well 242-H which is depicted on **Figure 3** and **Figure 4A**. Well 242-H is one of four wells located in this operational area along with associated flow lines and electrical lines running from the well pad area southwest to a series of meters and piping. This area is fully operational. Following initial cleanup, soil in this area was excavated to approximately 0.5 feet below ground surface to remove surface impact. Initial grid sampling was conducted south of the operational area but was discontinued due to extreme safety concerns to human health and Novo operations. As a result, the operational well area was excluded from further remediation. The excluded operational area is depicted on **Figure 3** and **Figure 4A** within the brown outlined area.

Two delineation soil borings and associated soil samples were installed and collected (DB-1 and DB-2) along the north side of the well operational area. Analytical data results for the soil boring samples are provided in **Table 2**. Grid sampling was completed to the northeast and southeast to delineate the extent of impact to soil. Analytical data results for grid sampling is provided in **Table 1A**. Based on the analytical results, lateral delineation of this area has been completed. Novo is requesting an administrative deferment for further remediation of soil in this specific area.

### 4.3 Waste Management

As described above, affected soil associated with the release was transported to the LeaLand, LLC disposal facility located at mile marker 64 US Highway 62/180 between Carlsbad and Hobbs, New Mexico (Permit Number WM-01-035 – New Mexico). A New Mexico Non-Hazardous Oilfield Waste Manifest was prepared for each truck load of soil material. Manifests are provided in **Appendix E**. A total of 12,633.43 tons of soil were transported and disposed for the remediation effort.

## 5.0 DATA RESULTS & EVALUATION

Altamira utilized guidance from 19.15.29 NMAC, specifically *Table I - Closure Criteria for Soils Impacted by a Release* to assess soil sample analytical data collected at the Site. Depth to groundwater at the site was not investigated but assumed to be less than 50 feet below ground

Release Response Action Completion & Closure Report  
Novo Oil & Gas – Ovation Pad-O - Well Release  
Discovery Date: December 13, 2022

---

surface based on the proximity of the Site to the Pecos River. The most stringent closure criteria action levels were utilized to evaluate analytical results for remediation and site closure. Analytical results are provided in **Table 1A and Table 1B** and Laboratory Analytical Data Reports are provided in **Appendix F**.

As previously described, work and confirmation soil sample grids were measured and marked on approximate 14 foot by 14 foot grid areas (less than 200 square feet). The overall grid area was setup in a conservative manner so that grids included known and suspected affected soil areas, but also overlapped into known unaffected soil areas. The remediation area and associated sample grids are depicted on **Figure 3, Figure 4A, and Figure 4B**.

## 5.1 Confirmation Soil Sampling Results

### 5.1.1 Chlorides

All confirmation soil samples were analyzed for chlorides to determine completion of soil remediation. Analytical results for chlorides showed elevated concentrations in multiple grids in soil samples collected within the vertical profile. Those grids were extended in depth incrementally and samples were submitted for analysis of chlorides. Final chloride results demonstrate remediation of chlorides to the Closure Criteria of 600 mg/kg. **Remediation of chlorides in soil has been completed.**

### 5.1.2 TPH

TPH was analyzed on all initial confirmation soil samples. Analytical results showed TPH concentrations were detected in multiple soil samples above 100 mg/kg (total TPH). As a result, the next deeper soil sample was collected and analyzed. Analytical results for all other post excavation confirmation soil samples show low level TPH concentrations were detected below 100 mg/kg, or concentrations not detected above the laboratory reporting limit. **Remediation of TPH in soil has been completed.**

### 5.1.3 BTEX

For the purpose of assessment and in accordance with regulatory guidance, benzene and total BTEX concentrations were compared to an assessment level of 10 mg/kg and 50 mg/kg, respectively. Analytical results for all grids showed BTEX concentrations were either detected at very low levels below the applicable critical criteria levels, or not detected above the laboratory reporting limit. **Remediation of BTEX in soil has been completed.**

## 5.2 Final Data Evaluation

As described above, the known and probable affected soil areas were marked within 200 square foot grids for excavation and confirmation soil sampling. Following excavation activities to remove affected soil, confirmation soil samples were collected per the NMAC guidelines. Analytical data demonstrate remediation efforts (soil removal) was successful. Concentrations of chlorides, TPH, and BTEX were either not detected above the laboratory reporting limit (non-detect) or if detected were below all applicable closure criteria. As a result, no further response or remediation action is necessary.

Release Response Action Completion & Closure Report

 Discovery Date: December 13, 2022

---

## 6.0 RESTORATION, RECLAMATION & RE-VEGETATION

### 6.1 Restoration and Reclamation Activities

Following excavation activities, the excavated site areas were restored to its original condition. The excavated area was backfilled using native topsoil (similar to existing silty-sandy very fine-grained soil) from a nearby native soil borrow source. Following placement and compaction of the new native topsoil material, the area was graded and contoured to match the original topography. Ovation Pad-O was restored to an active pad using crushed limestone and caliche. The site pad was graded to match the original pad conditions. The Ovation Pad-O area will not be seeded.

During the week of May 2, 2023 the Site was seeded using BLM seed mix #2 and a seed drill. Crisha Morgan of the BLM provided Altamira seed mix instructions in an email dated April 4, 2023.

“Seed will be planted using a drill equipped with a depth regulator to ensure proper depth of planting where drilling is possible. The seed mixture will be evenly and uniformly planted over the disturbed area (smaller/heavier seeds have a tendency to drop the bottom of the drill and are planted first). The holder shall take appropriate measures to ensure this does not occur. Where drilling is not possible, seed will be broadcast and the area shall be raked or chained to cover the seed. When broadcasting the seed, the pounds per acre are to be doubled. The seeding will be repeated until a satisfactory stand is established as determined by the authorized officer. Evaluation of growth will not be made before completion of at least one full growing season after seeding”.

Species to be planted in pounds of pure live seed\* per acre:

Species

	<u>lb/acre</u>
Sand dropseed ( <i>Sporobolus cryptandrus</i> )	1.0
Sand love grass ( <i>Eragrostis trichodes</i> )	1.0
Plains bristlegrass ( <i>Setaria macrostachya</i> )	2.0

Following seeding the Site area was watered and followed by minor rainfall. Routine inspection of the Onsurez and BLM properties remediated and reclaimed has not revealed any erosion.

## 7.0 CONCLUSIONS

On December 13, 2022, Novo personnel responded to a release from the Ovation well 242-H. Approximately 352 barrels of crude oil and 1,078 barrels of produced water were released; and approximately 295 barrels of crude oil and 1,020 barrels of produced water were recovered using vacuum trucks and initial removal of affected soil. The well was shut in after a period of time and initial cleanup efforts were initiated.

During December 13, 2022 through May 5, 2023 Novo conducted remediation efforts to remove affected soil and restore each area to pre-release conditions. A series of three grids (G-1, G-7, and G-13) and the former Chevron reserve pit area were not further evaluated. The area

Release Response Action Completion & Closure Report  
Novo Oil & Gas – Ovation Pad-O - Well Release  
Discovery Date: December 13, 2022

---

associated with the active well operational area has been delineated laterally. Novo is requesting this area be deferred from further remediation due to human health and operational safety concerns.

Analytical data results for post excavation confirmation soil validate the completion of affected soil removal from the release area.

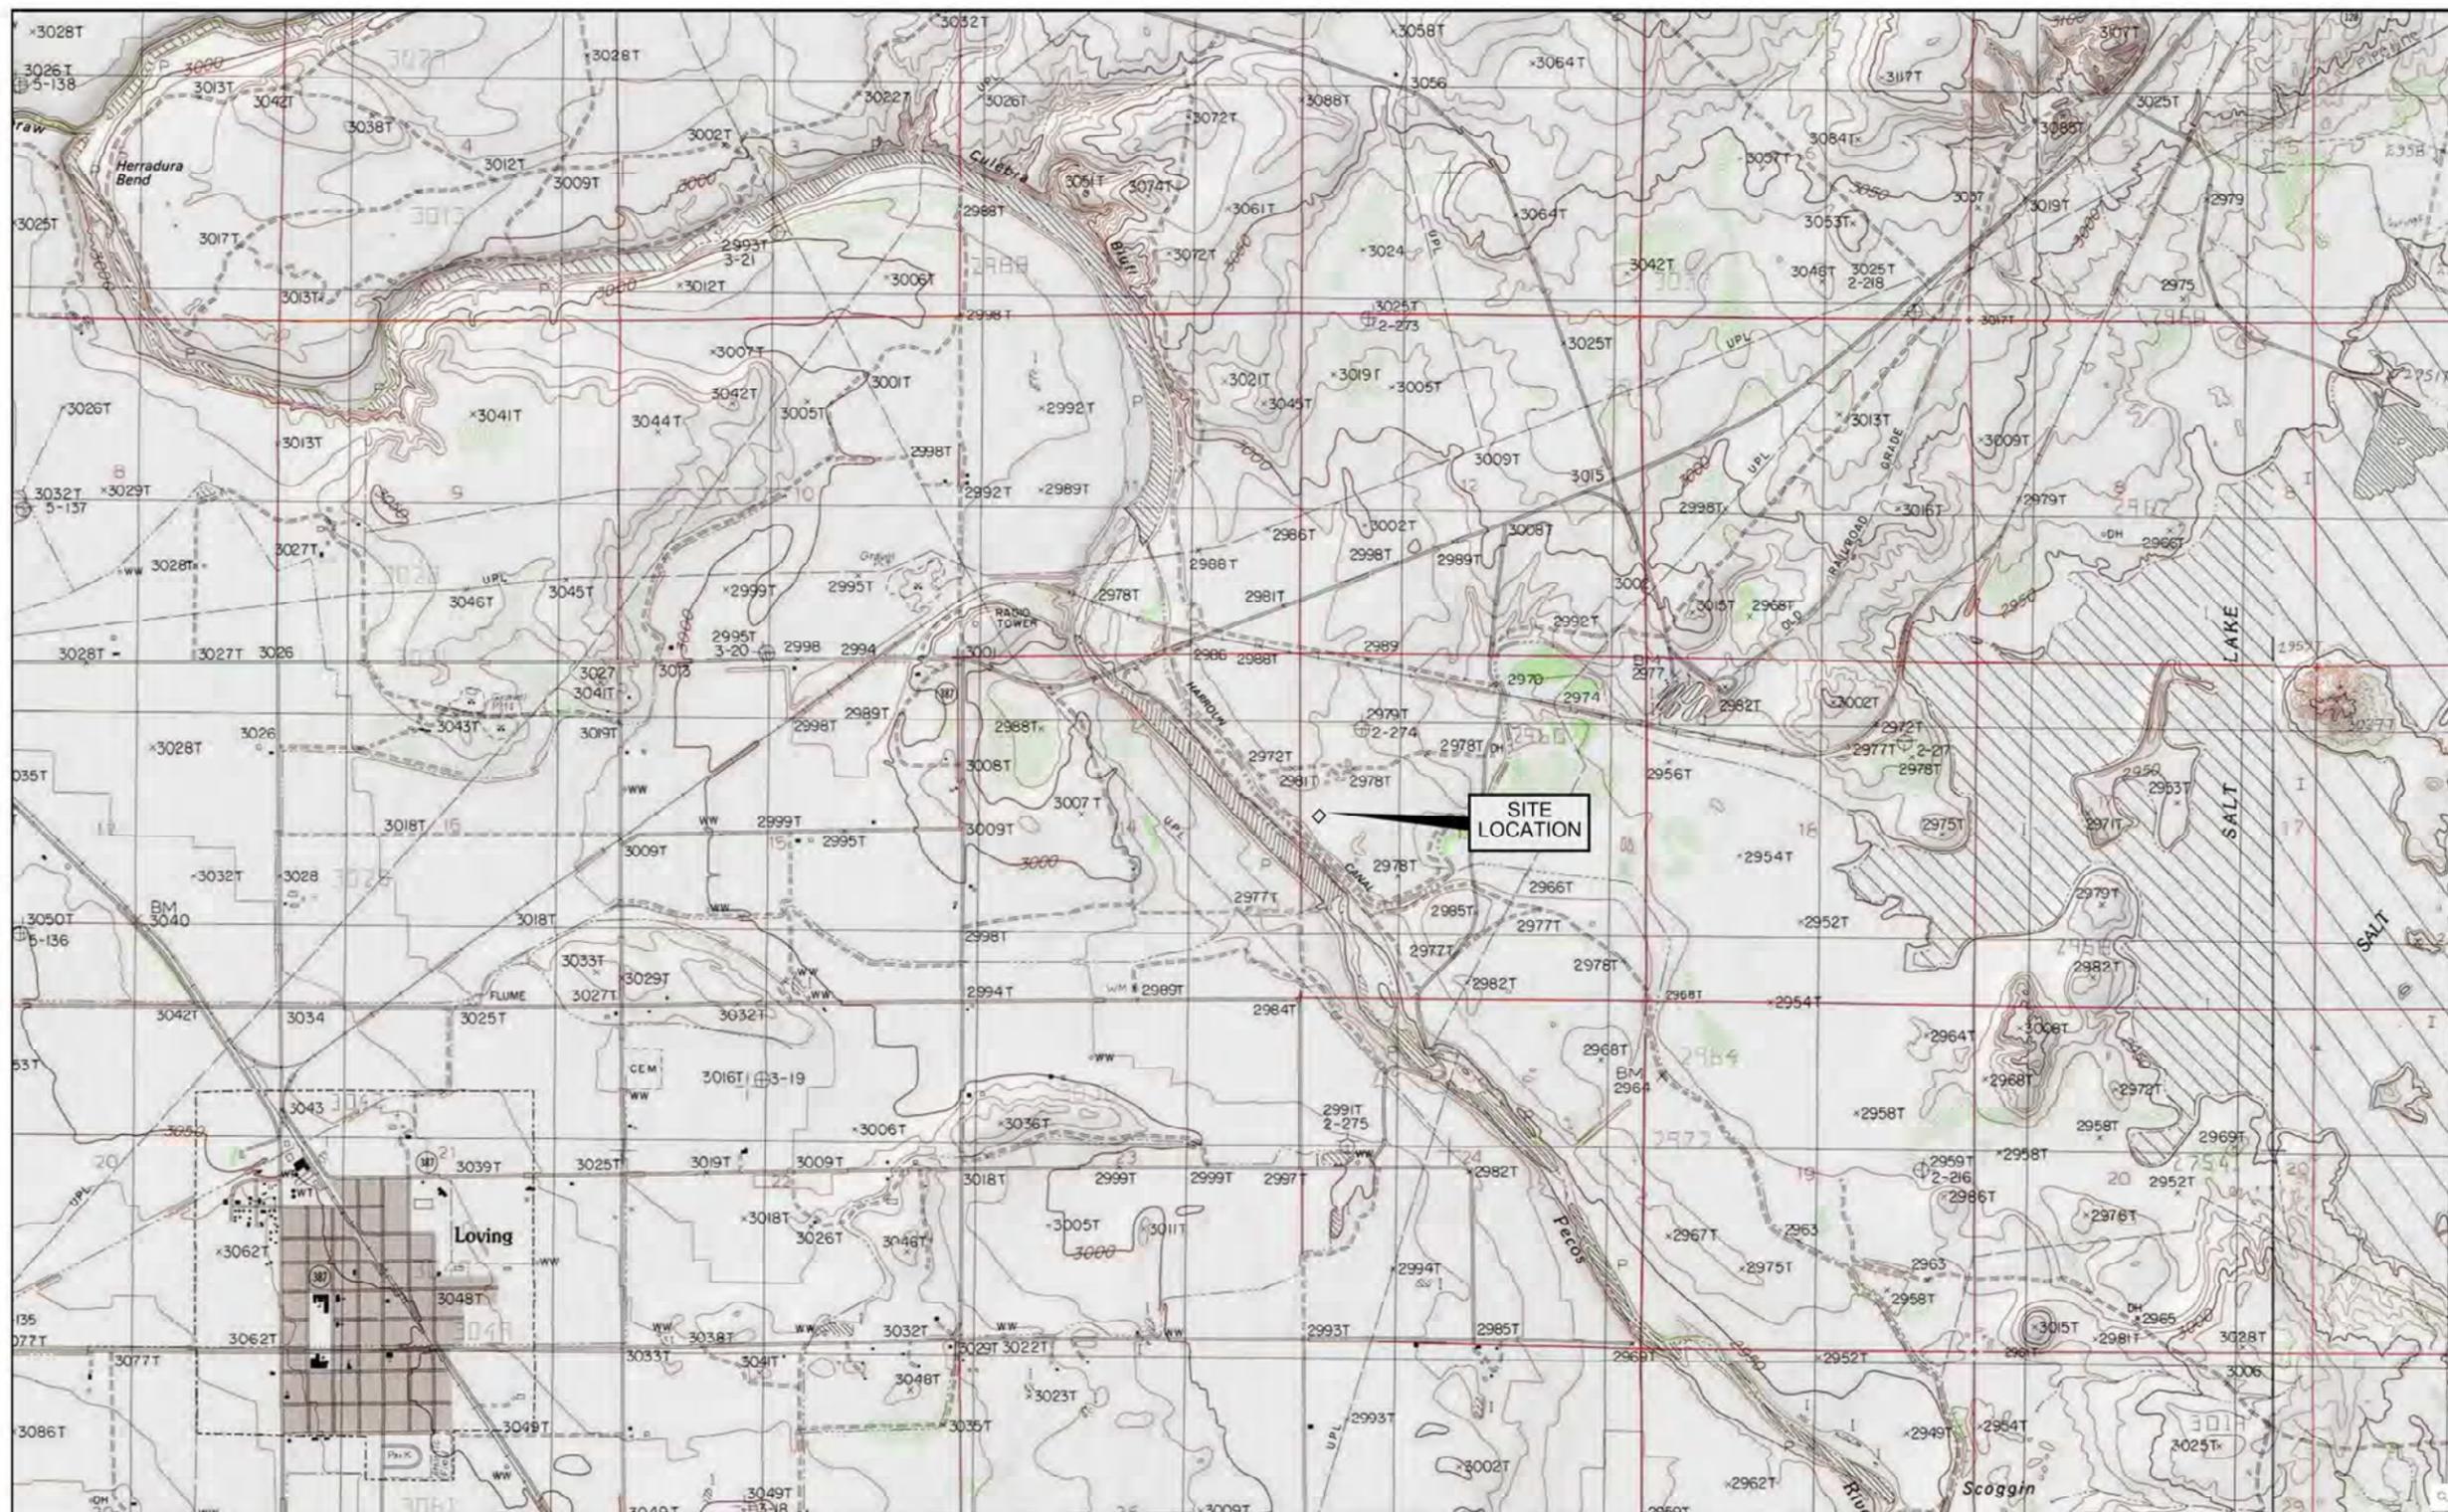

- Soil on-site has been remediated to chloride levels less than 600 mg/kg, TPH less than 100 mg/kg, BTEX less than 50 mg/kg and benzene less than 10 mg/kg.
- Reclamation and restoration efforts have been completed.
- A deferment for the active well operational area is being requested.
- No further response action/remediation is necessary for this release Site.
- Novo would respectfully like to request regulatory closure for Incident ID: nAPP2235068529.

**Notes:**

All results are in mg/kg

Closure Criteria Soils - Table I of 19.15.29.12 NMAC

TPH - Total Petroleum Hydrocarbons - includes GRO, DRO, MRO

BTEX - Benzene, Toluene, Ethylbenzene, Xylenes

<RL - results were not detected above the Laboratory Reporting Limit

- Not analyzed

**Bold** indicates a detection above the Laboratory Sample Reporting Limit

Shading indicates that a detected result exceeded the NMOCD Table 1 Closure Criteria Levels

\* - Closure Criteria based on depth to groundwater less than 51 feet below ground surface

Shading indicates grids that were partially excavated and sampled that were determined to be inside a former Chevron Reserve Pit Area

---

## Release Notification

### Responsible Party

Responsible Party: Novo Oil & Gas Northern Delaware, LLC	OGRID: 372920
Contact Name: Kurt A. Shipley	Contact Telephone: 405-286-3916
Contact email: kshipley@novooog.com	Incident # (assigned by OCD): nAPP2235068529
Contact mailing address: 1001 West Wilshire Blvd., Suite 206 Oklahoma City, OK 73116	

### Location of Release Source

Latitude 32.308641

Longitude -104.052567  
(NAD 83 in decimal degrees to 5 decimal places)

Site Name: Ovation Pad - O	Site Type: Well Pad
Date Release Discovered: 12/13/2022	API# (if applicable)

Unit Letter	Section	Township	Range	County
A	14	T23S	R28E	Eddy

Surface Owner:  State  Federal  Tribal  Private (Name: Lionel Onsurez)

### Nature and Volume of Release

Material(s) Released (Select all that apply and attach calculations or specific justification for the volumes provided below)

<input checked="" type="checkbox"/> Crude Oil	Volume Released (bbls): Estimated 352	Volume Recovered (bbls): Estimated 295
<input checked="" type="checkbox"/> Produced Water	Volume Released (bbls): Estimated 1,078	Volume Recovered (bbls): Estimated 1,020
	Is the concentration of dissolved chloride in the produced water >10,000 mg/l?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<input type="checkbox"/> Condensate	Volume Released (bbls)	Volume Recovered (bbls)
<input type="checkbox"/> Natural Gas	Volume Released (Mcf)	Volume Recovered (Mcf)
<input type="checkbox"/> Other	Volume/Weight Released (provide units)	Volume/Weight Recovered (provide units)

Incident ID	nAPP2235068529
District RP	
Facility ID	
Application ID	167954

**Cause of Release**  
 At 12:07am on 12/13/2022, during a workover of the Ovation 242H well, the well started flowing and BOP equipment could not shut off the flow of the well. While fishing for stuck tubing, Novo was tripping in the hole with wash pipe and tubing. Well was sufficiently killed with 14.8 ppg fluid. When 200 feet in the well with the wash pipe, the well started flowing. Attempts were made to install a FOSV (full opening safety valve) but were not successful. Shear rams in BOP could not sever the tubing so well began flowing kill fluid and then crude oil to the surface and on the location area. Well flowed from 12:07am to 10:35am and then the BOP rams activated and shut off the flow. Well was secured.

Volume of the release was calculated by the estimated flow rate during the duration of the release.  
 Estimated Flow: See attached pages

Was this a major release as defined by 19.15.29.7(A) NMAC?  <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, for what reason(s) does the responsible party consider this a major release?  Estimated volume of crude oil and produced water exceeded 25 bbls
---	---

If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?  
 Yes – Kurt Shipley (Novo Oil and Gas) and Bryan Haney (Altamira)  
 12/13/2022 at 2:20pm NMOCD spill hotline (Mike Bratcher) - left voice message  
 12/13/2022 at 3:09pm NMOCD – Rosa Romero – left voice message  
 12/13/2022 at 2:33pm BLM – Jim Amos (discussion on release and actions)  
 12/13/2022 – Bryan Haney with Altamira provided email notification to Mike Bratcher and Robert Hamlet at NMOCD

### Initial Response

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury*

- The source of the release has been stopped.
- The impacted area has been secured to protect human health and the environment.
- Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.
- All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

All initial response actions above have been completed.

Remediation efforts (excavated affected soil) will be confirmed with sampling.

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

Incident ID	nAPP2235068529
District RP	
Facility ID	
Application ID	167954

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Injury <input type="checkbox"/>	Fatality <input type="checkbox"/>	Property Damage <input type="checkbox"/>	Explosion <input type="checkbox"/>		
Nature and Cause of Event: Well release and equipment failfure					
Environmental Impact: Mist/spray to surface soil and vegetation					
Time Required to Control Event (Hours):		Approximately 10 hours			
Volume Discharged or Consumed:		Oil: <u>352</u> bbls	Water: <u>1,078</u> bbls	Gas: <u>   </u> mcf	
Volumes Recovered:		Oil: <u>295</u> bbls	Water: <u>1,020</u> bbls		
Net Volume Lost:		Oil: <u>   </u> bbls	Water: <u>   </u> bbls	Gas: <u>   </u> mcf	
Action Taken to Control Event: Use vacuum truck to remove standing recoverable liquids. Use earth moving equipment to scrape and remove affected soil area					
Resulting Damage: minor damage to surficial soil and vegetation					
Clean-Up Procedures: Use of vacuum truck and soil excavation machinery to remove standing liquids and affected soil. Additional affected soil excavation will occur to ensure remediation.					
Cause/Extent of Personal Injury: None					
Actions the operator has taken or will take to prevent a recurrence of the incident: Well and equipment are repaired.					
Agency Notification List: (Federal/ State/ Local):	Agency Name	Contact Name	Date/Time		
	NMOCD	Mike Bratcher	12/13/2022 at 2:20pm		
	NMOCD	Rosa Romero	12/13/2022 at 3:09pm		
	BLM	Jim Amos	12/13/2022 at 2:33pm		

Remarks: Include available Major Undesirable Events (MUE) history (attach additional sheet, if needed) for the past 3 years of the same well. Include pictures, if available.

None associated with well.

**From:** [OCDOnline@state.nm.us](mailto:OCDOnline@state.nm.us)  
**To:** [Bryan Haney](#)  
**Subject:** The Oil Conservation Division (OCD) has accepted the application, Application ID: 167954  
**Date:** Friday, December 16, 2022 8:02:41 PM

---

To whom it may concern (c/o Bryan Haney for NOVO OIL & GAS NORTHERN DELAWARE, LLC),

The OCD has accepted the submitted *Notification of a release* (NOR), for incident ID (n#) nAPP2235068529, with the following conditions:

- **When submitting future reports regarding this release, please submit the calculations used or specific justification for the volumes reported on the initial C-141.**

Please reference nAPP2235068529, on all subsequent C-141 submissions and communications regarding the remediation of this release.

**NOTE:** As of December 2019, NMOCD has discontinued the use of the “RP” number.

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

**Date:** Tuesday, December 13, 2022 9:22:00 PM  
**Attachments:** [image001.png](#)

---

Mike and Rob,

Kurt and I called the OCD hotline number today at 2:20pm central time to provide phone notification of a major release at the Novo Ovation O Pad. The pad is located on private property (Lionel Onsurez), but the Novo permit is federal since it is a horizontal well. At approximately 12:07am on December 13, 2022, during a workover of the Ovation 242H the well began to release a combination of crude oil and produced water. The BOP equipment malfunctioned and did not shut down the flow. The flow was finally stopped when equipment activated at approximately 10:35am on December 13, 2022.

Unit A, Section 14, Township T23S, Range R28E, Eddy County (off of State Highway 31 near Loving, NM).

The release occurred generally within the bermed operation pad area. Some spray from the blow out extended offsite to the Onsurez property and possibly federal BLM property (under evaluation).

Notification has been provided to the land owner, NMOCD hotline, and BLM (Jim Amos).

Current approximate release volumes are 500 bbl crude oil and 200 bbl produced water. Novo has recovered approximately 200+ bbl crude oil and 100+ bbl produced water.

The area has been secured, well is shut in, vacuum trucks remain onsite to recover standing fluids. Heavy equipment is also onsite to begin scraping and initial remedial activities to surface soils on the pad.

Novo and Altamira will be onsite on 12/14/2022 to mark the perimeter of the release area, identify offsite impact and possible minimal impacts to federal BLM property.

Novo will submit the C-141 as soon as more detailed information can be obtained and confirmed.

If you have any questions at this point please contact myself or Kurt Shipley copied on this email.

Thank you both

Hi Jim

Just following up with you to ensure we have permission to conduct initial soil remediation at this location. Again at this point it should consist mainly of a very shallow scrape of a generally small area. We would just like to get the residual spray cleaned up as soon as possible.

Please let us know so we can proceed.

Thank you  
Bryan

---

Hi,

Below is the approval that Jim provided us to scrape the release area on BLM property.

The release area centers around:

Coordinates for the central portion of the spray area believed to be BLM property are:

32.307976 N

-104.048352 W

Can you please conduct an environmental impact review for this point and a radius of 1000 feet outward. Not saying all of this is affected but creating a buffer. I am specifically asking for a BLM review of arch, karst, and species for this area.

As we discussed earlier, we do have email permission from Jim Amos to conduct the initial scraping of hydrocarbon affected soil and vegetation. We are proceeding with this on December 29<sup>th</sup>. If you have any any questions or concerns, please contact me to discuss.

Thank you

Bryan

---

Bryan,

The short answer to both questions is yes. I would recommend a liner for the staged impacted soils also. If soils are going to be onsite very long, and depending on weather/weather forecasts, you might need to push a berm up around all of it.

**Subject:** [EXTERNAL] Question on Management of Affected Soil during Remediation

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Rob and Mike,

Is it acceptable during remediation phases to stage excavated soil onsite prior to load and transport? Is it also acceptable to store soil excavated by hydro-vac onsite in a lined staging area, so to prevent leaking or spillage. This of course would be temporary until it dries and can be loaded and transported for disposal.

Novo just wants to make sure we adhere to all acceptable practices and wanted ensure this was acceptable during remediation.

Thank you,

**Bryan Haney, TX P.G**

---

Bryan,

A Remediation Plan is required within 90 days of the release date even if the remediation involves (dig and haul). Alternatively, you can submit a Closure Report within 90 days of the release date if you choose to remediate at "risk". The responsible party may seek an extension of time to submit Remediation Plan and/or Closure Report for good cause as determined by the division. An extension must be requested before the 90 day due date is up.

Hopefully, this answers your question

Rob and Mike,

I am looking for confirmation that a formal Remediation Plan is not required if the remediation (dig and haul) is conducted within the first 90 days following the release. Is this correct?

We did provide notification of remediation activities and subsequent confirmation soil sampling.

Thank you both,

Bryan

---

On behalf of Novo Oil & Gas, Altamira is providing an update regarding the Ovation Pad-O Release that occurred on December 13, 2022. Novo continues to make progress on soil remediation on both Fee and BLM properties. Soil excavation, gridding and sampling has been completed on an estimated 65-70% of the release area. Altamira will continue to grid and collect confirmation soil samples in excavated areas. Novo and Altamira anticipate completion of all remediation activities within the initial 90 days following the date of release.

If you have any questions please reach out.

Thank you,  
Bryan

**Importance:** High

---

Rob and Mike,

As you are aware, Novo and Altamira are working on remediation efforts following the 12/13/2022 well blowout and release to the site and area. To-date, the confirmation sample protocol has been to collect 5-point composite soil samples in 200 square foot grids with analysis for chlorides, TPH and BTEX.

The Novo Ovation Pad-O area is located on private property owned by Mr. Onsurez. The landowner has asked us to utilize/borrow native backfill material located adjacent to Pad-O and outside of the release area. Altamira has collected a series of soil samples from the proposed borrow area with samples collected from near surface to 10 feet below ground surface. We are observing elevated chloride concentrations in the native soil and **no detected TPH or BTEX**. There also appears to be an increasing trend in chloride concentration with depth (see attached data summary table). There appears to be evidence of naturally occurring chlorides in this area, which is also indicative of the mining operations in the vicinity.

We have been working to cleanup chlorides in the release area to 600 mg/kg; however, if the native soil proposed to be used as backfill material (and likely underlying soil in the release area) contains chloride concentrations greater than 600 mg/kg, we may be in a position where we would be using native higher chloride soils to backfill (if and as directed by the landowner).

What is the Opinion of the NMOCD on the following:

1. Evidence that native soils in the site area appear to have naturally occurring high chloride concentrations.
2. Establishment of a Background Concentration for chlorides based on the attached data (current high chloride concentration is 1,250 mg/kg in soil sample BF-1 (4-6')).
3. Use of the native soil containing chlorides greater than 600 mg/kg as backfill material.

If the NMOCD allows the use of the native high chloride soil as backfill, can we adjust our current cleanup level for chlorides to 1,250 mg/kg (at a minimum) to fall in line with the naturally occurring concentration identified in the borrow soil area?

We are looking to start backfilling in the next week. We would like to get this resolved quickly so that there is a clear path forward and we can discuss with the landowner.

Thank you both for your help,

Bryan

Rob and Mike,

We are close to our 90-day mark on this project. We are fairly close to being complete. However, we are still needing to deal with the borrow area soil material, complete backfilling, and address additional grid areas.

Our goal was to complete all remediation and submit the final closure report within the 90-day, but we are running into a few challenges.

**Novo would like to request a 60-day time extension in order to complete this work and submit the final closure report.** I think this will be more than enough time, but want to make sure we are covered.

Please let us know if you can approve this. We will certainly need your help on the back end of this to complete all final closure activities.

Thank you both for your help,

Bryan

---

Crisha,

Below is the approval for our request for a 60-day extension to complete remediation efforts. We are very close on the BLM property and plan to start backfilling. We do have several sample grid areas that are exhibiting high chloride concentrations as we get deeper, which is leading us to believe there may be some historical issues out there prior to the Novo release. We are going to collect several samples today outside of our remediation area to try to establish a background concentration.

Please let me know if you have any questions.

Thank you

RE: Incident #**NAPP2235068529**

Rob and Crisha,

We have completed remediation for the Novo Ovation Pad release that occurred on December 13, 2022. We will be watering the planted seed this week and next to help promote growth. Our time is set to expire on May 13, 2023. We need time to capture all waste disposal documents and prepare the final Closure Report.

**Novo would like to request a 60 day extension to complete and submit the Final Closure Report.**

Thank you for your consideration. We are glad this remediation effort is almost complete.

Bryan

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Rob and Mike,

I wanted to follow-up on our request for a 60-day extension for this site. I know we spoke about it on Monday, but was looking for something from you all with official approval. Let me know if you need any further information.

Thank you

**Subject:** Novo Ovation Pad-O (12/13/2022) Release - nAPP2235068529 - REQUEST FOR TIME EXTENSION FOR FINAL CLOSURE

Rob and Mike,

We are close to our 90-day mark on this project. We are fairly close to being complete. However, we are still needing to deal with the borrow area soil material, complete backfilling, and address additional grid areas.

Our goal was to complete all remediation and submit the final closure report within the 90-day, but we are running into a few challenges.

**Novo would like to request a 60-day time extension in order to complete this work and submit the final closure report.** I think this will be more than enough time, but want to make sure we are covered.

Please let us know if you can approve this. We will certainly need your help on the back end of this to complete all final closure activities.

Thank you both for your help,

Bryan

# Soils

## Soils Types Found

Target Property	PD
Within 0.25 miles of Target Property	Hk, PD, DP, Ao, Ak, W, Ah

## Soil Type Descriptions

### Ah - Anthony sandy loam, 0 to 1 percent slopes

Percent Hydric	5
Minimum Depth to Bedrock	

#### Anthony (95 percent)

Hydrologic Group	Low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	Moderate
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Sandy loam	0 cm	15 cm	A-4	SM
H2	Sandy loam	15 cm	152 cm	A-4	SM

#### Harkey (3 percent)

Hydrologic Group	Moderately low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Very fine sandy loam	0 cm	23 cm	A-4	CL-ML, ML
H2	Loam	23 cm	152 cm	A-4	CL, CL-ML, ML

#### Arno (2 percent)

Hydrologic Group	High runoff potential
Soil Drainage Class	Moderately well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Silty clay loam	0 cm	23 cm	A-7-6	CL
H2	Clay	23 cm	152 cm	A-7-6	CH, CL

### Ak - Arno-Harkey complex, saline, 0 to 1 percent slopes

Percent Hydric	2
Minimum Depth to Bedrock	

#### Arno (50 percent)

Hydrologic Group	High runoff potential
Soil Drainage Class	Moderately well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Silty clay loam	0 cm	23 cm	A-7-6	CL
H2	Silty clay	23 cm	152 cm	A-7-6	CH, CL

#### Harkey (25 percent)

Hydrologic Group	Moderately low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

# Soils

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified

Anthony (1 percent)

Hydrologic Group	Moderately low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Sandy loam	0 cm	15 cm	A-4	SM
H2	Sandy loam	15 cm	152 cm	A-4	SM

Pima variant (1 percent)

Hydrologic Group	Moderately low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Silt loam	0 cm	8 cm	A-4	CL-ML
H2	Clay loam	8 cm	152 cm	A-6	CL

Ao - Atoka loam, 0 to 1 percent slopes

Percent Hydric	0
Minimum Depth to Bedrock	

Atoka (97 percent)

Hydrologic Group	Moderately high runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	Moderate
Depth to Restrictive Feature	51 to 102 cm to Petrocalcic

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Loam	0 cm	20 cm	A-4	CL-ML
H2	Loam	20 cm	84 cm	A-4, A-6	CL, CL-ML
H3	Indurated	84 cm	94 cm		

Atoka (1 percent)

Hydrologic Group	Moderately high runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	51 to 102 cm to Petrocalcic

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Loam	0 cm	20 cm	A-4	CL-ML
H2		20 cm	84 cm	A-4, A-6	CL, CL-ML
H3	Indurated	84 cm	94 cm		

Reagan (1 percent)

Hydrologic Group	Moderately low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Loam	0 cm	20 cm	A-6	CL
H2		20 cm	152 cm	A-6, A-7-6	CL

## Soils

### Upton (1 percent)

Hydrologic Group	Moderately high runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	High
Depth to Restrictive Feature	18 to 51 cm to Petrocalcic

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Gravelly loam	0 cm	23 cm	A-4, A-6	CL, GC, SC
H2		23 cm	33 cm	A-4, A-6	CL, GC, SC
H3	Cemented	33 cm	53 cm		
H4		53 cm	152 cm	A-2, A-4, A-6	GC, GP-GC, SC, SP-SC

### DP - Dev-Pima complex, 0 to 3 percent slopes

Percent Hydric	0
Minimum Depth to Bedrock	

### Dev (55 percent)

Hydrologic Group	Low runoff potential
Soil Drainage Class	Well drained
Corrosion Potential - Uncoated Steel	Moderate
Depth to Restrictive Feature	

Horizon	Soil Texture	Upper Boundary	Lower Boundary	AASHTO	Unified
H1	Very gravelly loam	0 cm	38 cm	A-2, A-4, A-6, A-7	GC, SC
H2	Very gravelly loam	38 cm	152 cm	A-2-4, A-2-6, A-6, A-7	GC, GP-GC, SC, SP-SC

## Soils Descriptions

### AASHTO Classification Definitions

A-1, A-1-a, A-1-b	Granular materials (35% or less passing No. 200 sieve), some fragments, gravel and sand
A-2, A-2-4, A-2-5, A-2-6, A-2-7	Granular materials (35% or less passing No. 200 sieve), silty or clayey gravel and sand
A-3	Granular materials (35% or less passing No. 200 sieve), fine sand
A-4	Silt-Clay materials (more than 35% passing No. 200 sieve), silty soils
A-5	Silt-Clay materials (more than 35% passing No. 200 sieve), silty soils
A-6	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils
A-7, A-7-5, A-7-6	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils
A-8	Silt-Clay materials (more than 35% passing No. 200 sieve), clayey soils

### Unified Classification Definitions

CH	Fine-grained soils, silts and clays (liquid limit is 50% or more), Fat Clay
CL, CL-A (proposed), CL-K (proposed), CL-ML, CL-O (proposed), CL-T (proposed)	Fine-grained soils, silts and clays (liquid limit is less than 50%), Lean Clay
GC, GC-GM	Coarse-grained soils, Gravels, gravel with fines, Clayey Gravel
GM	Coarse-grained soils, Gravels, gravel with fines, Silty Gravel
GP, GP-GC, GP-GM	Coarse-grained soils, Gravels, clean gravels, Poorly Graded Gravel
GW, GW-GC, GW-GM	Coarse-grained soils, Gravels, clean gravels, Well-Graded Gravel
MH, MH-A, MH-K, MH-O, MH-T	Fine-grained soils, silts and clays (liquid limit is 50% or more), Elastic Silt
ML, ML-A (proposed), ML-K (proposed), ML-O (proposed), ML-T (proposed)	Fine-grained soils, silts and clays (liquid limit is less than 50%), Silt
OH, OH-T (proposed)	Fine-grained soils, silts and clays (liquid limit is 50% or more), Organic Clay or Organic Silt
OL	Fine-grained soils, silts and clays (liquid limit is less than 50%), Organic Clay or Organic Silt
PT	Highly organic soils, Peat
SC, SC-SM	Coarse-grained soils, Sands, sands with fines, Clayey Sand
SM	Coarse-grained soils, Sands, sands with fines, Silty Sand
SP, SP-SC, SP-SM	Coarse-grained soils, Sands, clean sands, Poorly Graded Sand
SW, SW-SC, SW-SM	Coarse-grained soils, Sands, clean sands, Well-Graded Sand

**Disclaimer**

This well scan from Banks Environmental Data, Inc. has included a digital search of state and federal wells currently digitized in our geospatial database. Since this scan includes only well data that is currently mapped in our geospatial database, more wells could exist within the search area. For a complete well search or to locate more details, please contact Banks to obtain a full Water Well Report or Oil & Gas Well/Pipeline Search Report. More detailed individual well records can also be obtained from Banks for an additional cost, please reference a Well ID # from this well scan.

All well locations are based on information obtained from state and federal sources. Although Banks performs quality assurance and quality control on all data, inaccuracies of the records and mapped locations could possibly be traced to the specific regulatory authority or individual well driller. Banks Environmental Data, Inc. cannot fully guarantee the accuracy of the data or well location(s) of the maps and records maintained by the state and federal agencies.

## Mapped Sites Summary

**Banks Environmental Data performed a thorough search and no mapped sites were found.**

## Dataset Descriptions and Sources

Dataset	Source	Dataset Description	Update Schedule	Data Requested	Data Obtained	Data Updated	Source Updated
<b>NPL -- National Priority List</b>	EPA	NPL is the list of high priority hazardous waste sites in the United States eligible for long-term remedial action financed under the federal Superfund program or SEMS database (formerly known as the CERCLIS database). The EPA will only add sites to the NPL list based upon completion of the Hazard Ranking System (HRS) screening, public solicitation of comments about the proposed site, and after all comments have been addressed.	Quarterly	01/16/2023	01/16/2023	01/17/2023	12/22/2023
<b>DNPL -- Delisted National Priority List</b>	EPA	DNPL is a list of all sites that have been deleted from the EPA NPL list (SEMS database). These sites are taken off the NPL list usually due to no further response or remedial action being required on them. Notices to delete NPL sites are published in the Federal Register and become effective unless the EPA receives significant adverse or critical comments during the 30-day public comment period.	Quarterly	01/16/2023	01/16/2023	01/17/2023	12/22/2022
<b>CER SEMS -- SEMS</b>	EPA	The EPA maintains the SEMS database to track sites under the Comprehensive Environmental Response, Compensation, and Liability Act, a federal law designed to clean up abandoned hazardous waste sites. These sites are either proposed, listed or under review currently to be a part of the National Priority List.	Quarterly	01/16/2023	01/16/2023	01/17/2023	12/22/2022
<b>CER SEMS NFRAP -- SEMS NFRAP</b>	EPA	From the Superfund Enterprise Management System (SEMS) database No Further Remedial Action Planned or NFRAP have been removed from the listing. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the site being placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.	Quarterly	01/16/2023	01/16/2023	01/17/2023	12/22/2023
<b>RCRA COR -- RCRA CORRACTS</b>	EPA	These sites are registered hazardous waste generators or handlers that fall under the Resource Conservation and Recovery Act (RCRA) and subject to corrective action activity.	Quarterly	01/18/2023	01/18/2023	01/24/2023	01/16/2023
<b>RCRA TSD -- RCRA non-CORRACTS TSD</b>	EPA	This database lists all treatment, storage and disposal of hazardous material sites that fall under the Resource Conservation and Recovery Act (RCRA). All hazardous waste TSD facilities are required to notify EPA of their existence.	Quarterly	01/18/2023	01/18/2023	01/24/2023	01/16/2023
<b>RCRA GEN -- RCRA Generators</b>	EPA	The EPA regulates all Hazardous Waste Generators subject to the Resource Conservation and Recovery Act (RCRA). They are classified by the quantity of hazardous waste generated. A Small Quantity Generator (SQG) generates between 100kg and 1,000 kg of waste per month. A Large Quantity Generator (LQG) generates over 1,000 kg of waste per month. A Conditionally Exempt SQG (CEG) generates less than 100 kg of waste per month.	Quarterly	01/18/2023	01/18/2023	01/24/2023	01/16/2023
<b>FED BWN -- Federal Brownfields</b>	EPA	A listing of sites that assist the EPA in collecting, tracking, and updating information of sites in relation to the Small Business Liability Relief and Brownfields Revitalization Act. These sites are real property that is either abandoned or underutilized where redevelopment or expansion is complicated by real or perceived environmental contamination.	Quarterly	12/19/2022	12/19/2022	12/26/2022	12/19/2022
<b>FED IC -- Federal Institutional Control</b>	EPA	This is a listing of Brownfield Management System (BMS) sites that have had Institutional Controls (ICs) placed on them. ICs are administrative restrictions, such as legal controls, that help minimize the potential for human exposure to known contamination by ensuring appropriate land or resource use. ICs are meant to supplement Engineering Controls and will rarely be the sole remedy at a site. ICs are a type of Activity and Use Limitation (AUL).	Quarterly	12/19/2022	12/19/2022	12/26/2022	12/19/2022
<b>FED EC -- Federal Engineering Control</b>	EPA	This is a listing of Brownfield Management System (BMS) sites that have had Engineering Controls (ECs) placed on them. ECs are physical methods or modifications put into place on a site to reduce or eliminate the possibility of human exposure to known contamination. ECs are a type of Activity and Use Limitation (AUL).	Quarterly	12/19/2022	12/19/2022	12/26/2022	12/19/2022

## Dataset Descriptions and Sources

Dataset	Source	Dataset Description	Update Schedule	Data Requested	Data Obtained	Data Updated	Source Updated
<b>ERNS -- ERNS List</b>	EPA/National Response Center	ERNS is a national database used to store information on unauthorized releases of oil and hazardous substances that have been reported to the National Response Center since 2001. The NRC is the sole federal point of contact for reporting oil and chemical spills. Prior to 2001 this information was maintained by the EPA.	Annually	01/09/2023	01/09/2023	01/09/2023	01/09/2023
<b>ST NPL -- State/Tribal Equivalent NPL (NM)</b>	N/A	This database is not currently available from this state. If this state does make this database available in the future, Banks Environmental Data will obtain it for reporting purposes.	N/A	N/A	N/A	N/A	N/A
<b>ST CER -- State/Tribal Equivalent CERCLIS (NM)</b>	N/A	This database is not currently available from this state. If this state does make this database available in the future, Banks Environmental Data will obtain it for reporting purposes.	N/A	N/A	N/A	N/A	N/A
<b>SWLF -- State/Tribal Disposal or Landfill (NM)</b>	NMED	This database contains a listing of all Solid Waste Landfills and other facilities that regulate the handling, processing, recycling, marketing of recycled materials, and disposal of non-hazardous solid waste. These sites are registered with the Solid Waste Bureau of the NMED.	Annually	01/25/2023	02/04/2022	02/04/2022	02/04/2022
<b>LPST -- State/Tribal Leaking Storage Tank (NM)</b>	NMED	This database is a listing of all underground storage tanks that are leaking or have been registered with New Mexico Environment Department (NMED) Petroleum Storage Tank Bureau.	Quarterly	10/25/2022	10/25/2022	01/16/2023	08/31/2022
<b>LPST -- State/Tribal Leaking Storage Tank (NM)</b>	EPA	The Tribal LUST database (maintained by EPA Region 6) provides information on leaking underground storage tank on tribal lands in Louisiana, Arkansas, Oklahoma, New Mexico and Tribal Nations.	Quarterly	12/29/2022	12/29/2022	12/29/2022	04/28/2022

**Disclaimer**

The Banks Environmental Data Regulatory Database Report was prepared based upon data obtained from State, Tribal, and Federal sources known to Banks Environmental Data at the time the data was obtained. Great care has been taken by Banks in obtaining the best available data from the best available sources. However, there is a possibility that there are sources of data applicable or pertaining to this report's target property, and/or surrounding properties, to which Banks does not have access or has not accessed. Furthermore, although Banks Environmental Data performs quality assurance and quality control on all data, including data it obtains, Banks recognizes that inaccuracies in data from these sources may, and do, exist; accordingly, inaccurate data may have been used or relied upon in the preparation of this report. Even though Banks Environmental Data performs a thorough and diligent search to locate and fix any inaccuracies in the data relied upon in the preparation of this report, Banks cannot guarantee or warrant the accuracy of the locations, information, data, or report. The purchaser of this report accepts this report "as is" and assumes all risk related to any potential inaccuracy contained in the report or not reported in it, whether due to a reliance by Banks Environmental Data on inaccurate data, or for any other reason [including but not limited to the negligence or express negligence of Banks Environmental Data]. If this report is being used for the Records Review section of a Phase I Site Assessment according to the ASTM 1527-21, for EPA's All Appropriate Inquiry, or for any other purpose (public or private), all liability and responsibility is assumed by the Environmental Professional or other individual or entity acquiring the report.

Field Documentation

## Novo O-Pad Release

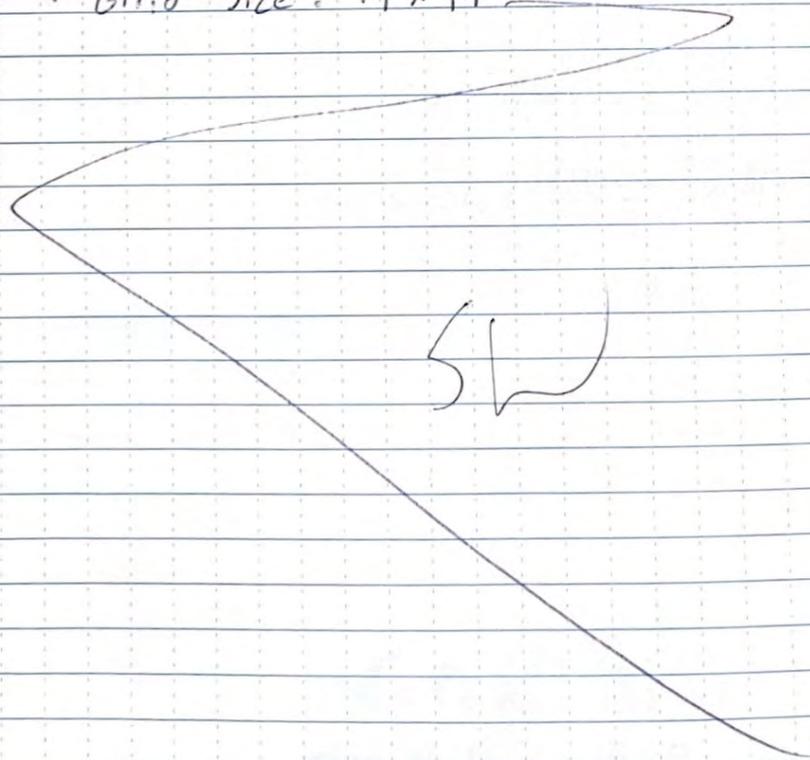

- 1/13/2023
- Staff on site: Stormy Waters
- JSA Filled out
- Sunny day w/ some wind
- Daily Goal: Sample 8 Grid S.E. side of lease road
- Set up Procedure for Sampling: 5 random scoops of live soil / grid;  
New latex gloves / grid;  
Clean equipment between every grid;  
Transfer sample from bags to jars and  
put them on ice.  
Fill out chain-of-custody
- Grid size is 14' x 14'
- Final Count of samples took today: 30
- Took samples to Lab in Hobbs, NM
- ~~Resupplied Field Equipment~~

Field Notes  
get better  
I promise.

SW

# Novo O-PAD Release

- 1/17/2023
- Staff on site: Stormy
- Went to Lowe's for more supplies
- Filled out JSA
- Sunny Day, little wind
- Daily Goal: Griding today, sampling tomorrow (weekend)  
Finished high traffic areas
- Will sample Sunday so they aren't sitting too long
- Grid Size: 14' x 14'

Scale: 1 square = \_\_\_\_\_

## Novo O-Pad Release

- 1/15/2023
- Staff on site: Stormy
- JSA Filled out
- Sunny Day, High wind in afternoon
- Daily Goal:
  - Sampling (finish high traffic areas)
  - Clean up site (theres some trash laying around)
  - Continue Gridding
- Set up Procedure for Sampling:
  - Laxtex Gloves
  - Clean field equipment each Grid
  - 5 random scoops/ Grid of live soil in a bag
  - Mix bag of 5 scoops then transfer to jar
  - Put jar on ice
  - Fill out Chain of Custody
- Grid size: 14' x 14'
- Final Sample Count for the Day: 30 →

SW

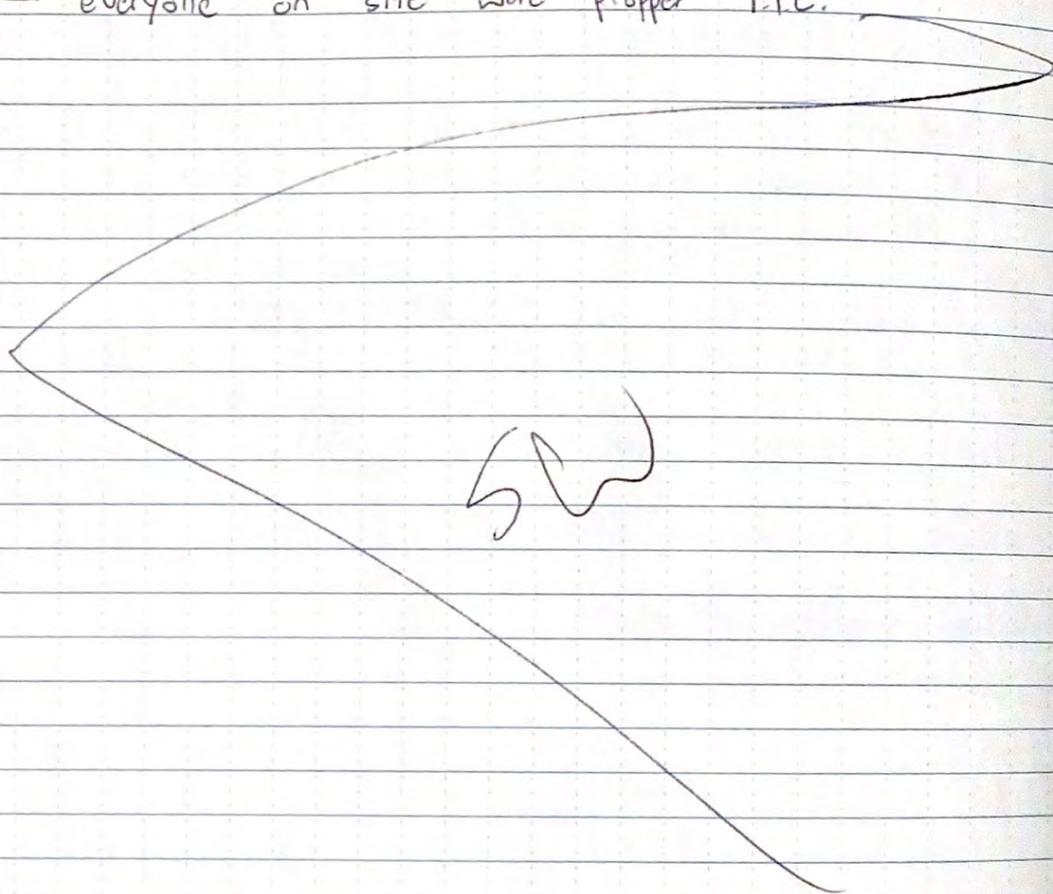

Novo O-Pad Release

1/16/23

Today we (Stormy & Alex) completed 46 samples that were taken to the lab in Hobbs.

We also worked on gridding 14' x 14' sections to sample later on. We finished around 40 grids.

The JSA was filled out before work began and everyone on site wore proper PPE.

Scale: 1 square = \_\_\_\_\_

# Novo Clation O-Pad Release

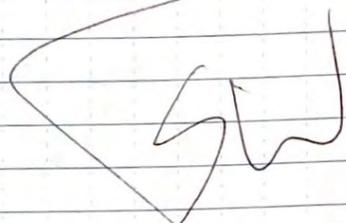

1/17/23

Objective: Continue Griding & sampling BLM Land

Weather: Cloudy, Windy, 40°F - 60°F, possible rain

Personel on Site (Altamira) Stormy, Alex, Bryan

Left Hotel @ 7:30, arrived on site, safety meeting JSA, began griding and sampling East side of lease road

Scale: 1 square = \_\_\_\_\_

## Novo Ovation O Pd Release

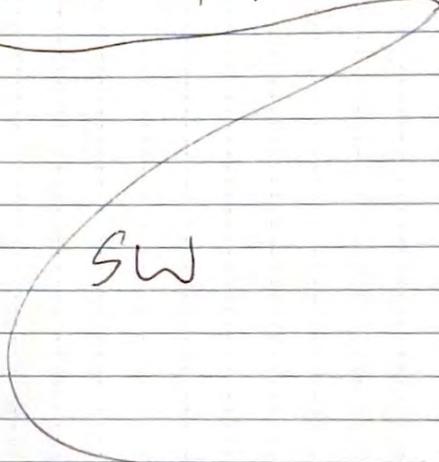

1/18/23

Objectives: Continue Griding & Sampling BLM land,  
Start Griding & Sampling Onsurz land

Weather: Sunny, slight breeze, upper 30°F - 60°F

Altamira Site Personnel: Stormy, Alex, Orlando

Left Hotel @ 7:30, arrived on site filled out JSA, had team safety meeting  
8:00 we checked East side of Lease road to see how many samples left  
Orlando went to get more stakes @ 8:30, Alex & Stormy finished  
griding North East side of lease road. Orlando returned w/ supplies and  
he & stormy began griding Eric's land. Alex sampled Grids on North East  
side of BLM land. Had to stop work around 12:00 because sand storms  
We went to Carlsbad for goggles to protect our eyes and returned  
@ 12:45. Alex continued ~~griding~~ sampling BLM land as  
Orlando and I gridded Eric's property. We sampled 18 grids on  
Eric's property and Alex took samples to Lab in Hobbs.  
Orlando and I continued to grid and sample, until Dusty gas to bad. 4:30

Scale: 1 square = \_\_\_\_\_

*Return to lab*

# Novo Ovation O-Pad Release

1/19/2023

Objectives: Finish Sampling Grids on BLM land then sample & Grid Eric's land.

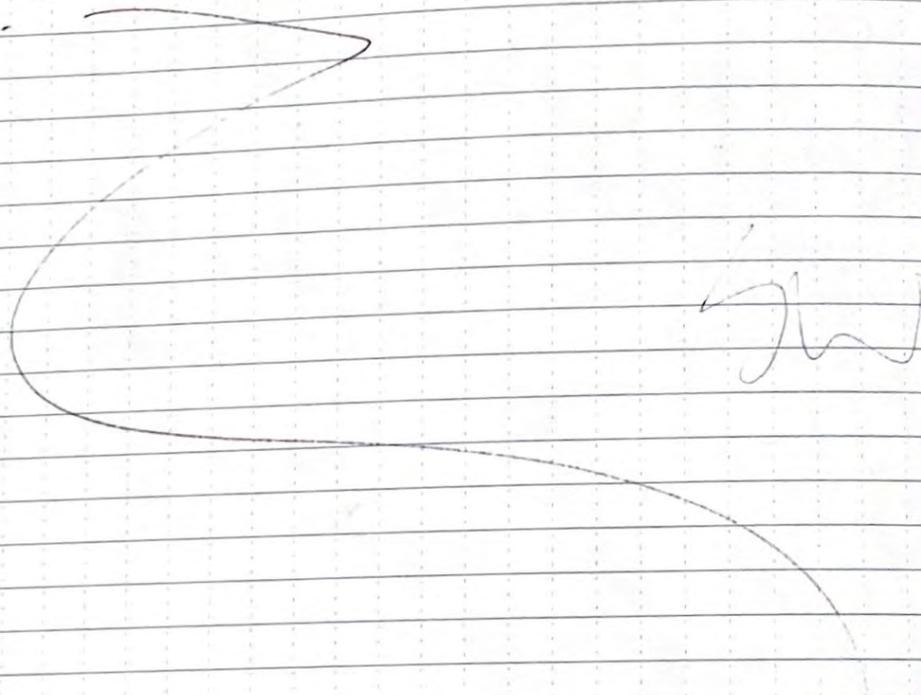

Weather: Sunny, high wind gusts throughout the day

Altamira Staff on Site: Stormy, Alex, Orlando, Bryan, Jason

Left hotel @ 7:30. Arrived on site and completed JSA. Held team safety meeting and discussed potential risks. 8:00 A.M. we began sampling BLM

land, we finished sampling all grids set out on BLM land. Began gridding & sampling Eric's property where we left off yesterday around 12:30.

In total we sampled 76 grids. Alex took samples to Lab in Hobbs. Orlando & I cleaned site area of trash. Inspected Ovation Pad new spill.

Scale: 1 square = \_\_\_\_\_

# Novus Quation O-Pad Release

1/20/2023

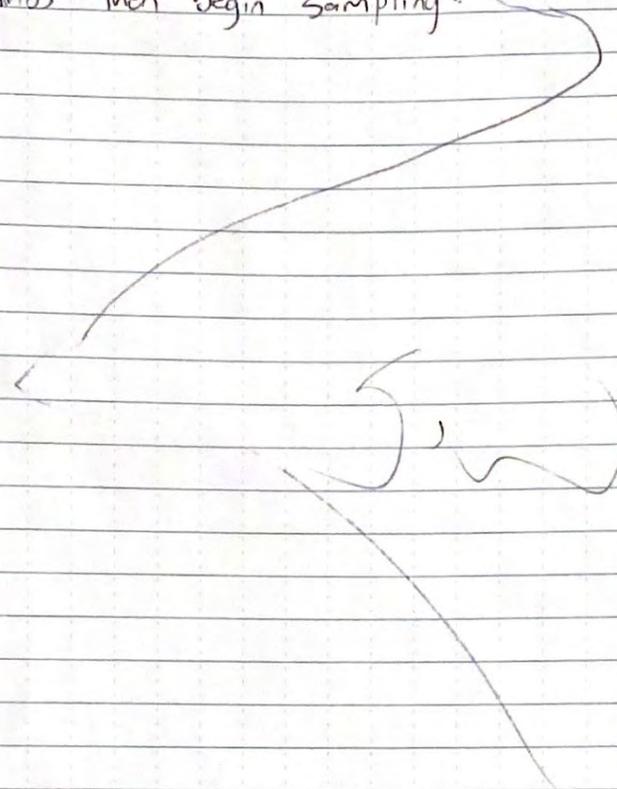

Objectives: Sample & Grid on Eric's property

Weather: Sunny, slight wind gusts, cold temps today

Altamira Staff on Site: Alex, Orlando, Stormy

Left Hotel around 7:30. Arrived on site and completed JSA and toolbox safety meeting with crew. 8 AM we began ~~sampling R-grid~~ Griding R-grid.

Going to I-ID. All Grids then begin sampling.

Scale: 1 square = \_\_\_\_\_

*Att on the Rain*

# NoVo Ovation O-Pad Release

1/29/2023

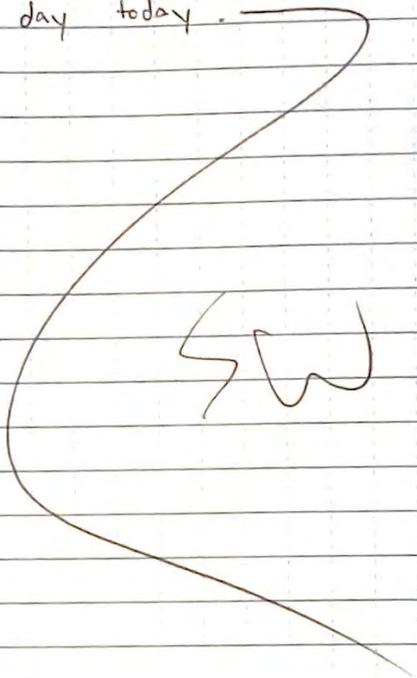

Objectives: Do as much gridding as we can.

Weather: Sunny, not much wind.

Altamira Staff on Site: Stormy & Orlando

Left Hotel around 7:30, reviewed JSA, arrived on site and began gridding North of Frac tank. Rouge crew was working where we need to continue (South East side of Frac tank). We did what we could then went to town for supplies to tackle gridding the hard crotch.

Had a short day today.

Scale: 1 square = \_\_\_\_\_

# Novo Ovation O-Pad Release

1/22/2023

Objectives: Continue Gridding Around Frac Tank and sample West Side excavation area and around the Frac Tank.

Weather: Sunny, No wind, Cold

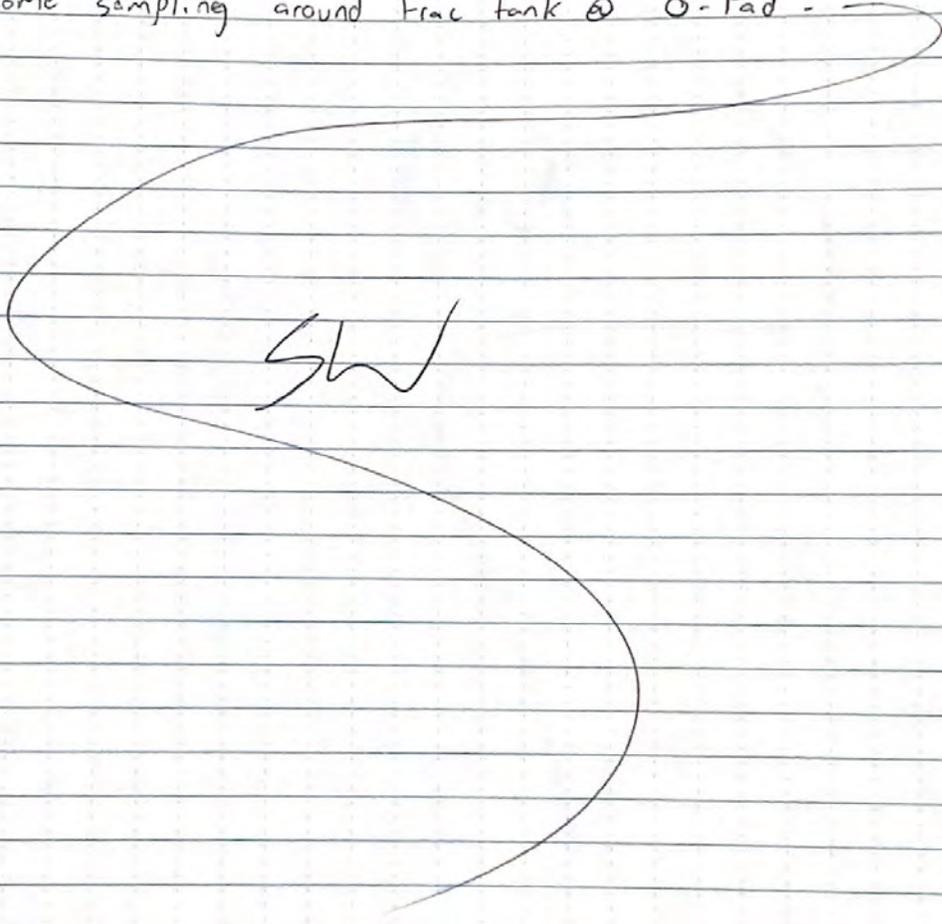

Altamira Staff on Site: Stormy & Orlando

Left Hotel @ 7:30, reviewed JSA once we arrived on site.

Began sampling West side excavation area. Will have to do side wall samples in the excavation pit. The North side side wall measures around 5 feet deep by 49 feet wide and the South side side wall measures around 4 feet deep and 54 feet wide so in total we will take 4 side wall samples in this pit excavation area.

South Side side walls will be blue on the map & North Side side walls will be shown with red. Finished ~~gridding~~ <sup>sampling</sup> excavation area. After we went to grid A-Pad - ✓

Still have some sampling around Frac tank @ O-Pad -

Scale: 1 square = \_\_\_\_\_

*Plot in the Rain*

# Novo Ovation O-Pad Release

1/23/2023

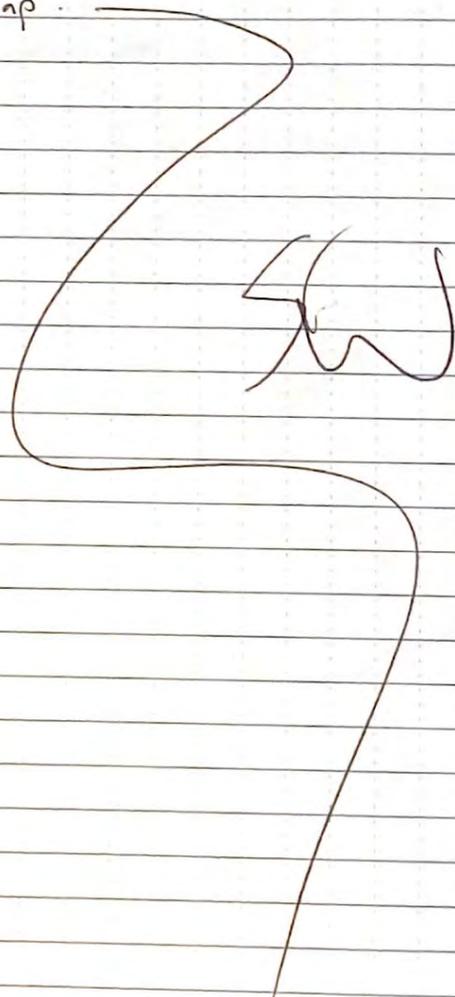

Objectives: Continue to Grid & Sample around Frac tank and Close gaps on

Weather: Cloudy & Cold

Altamira Staff on Site: Stormy, Orlando

Left Hotel around 7:30, got ice for samples, Orlando bought markers for gridding around Frac tank (stakes don't drive in the celiche as easily). Discussed w/ Novo Personnel where they will be removing surface level dirt. Began gridding. Sampled grids

G-142 thru G-154 & B-406 thru B-421. Did a lot of gridding on South East side of lease road. Went to Pad A to sample grids we made yesterday. Orlando took samples to lab in Hobbs. I want to get more short stakes for grid ID's and to print copy of O-Pad Map.

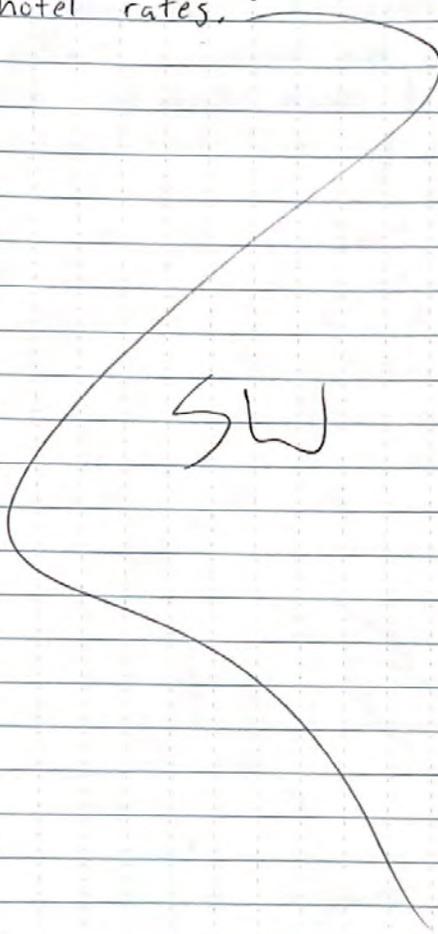

Scale: 1 square = \_\_\_\_\_

# Novo Ovation O-Pad Release

1/24/2023

Objectives: Grid & Sample what we can if weather permits  
 Weather: Snow, Cold, Windy / Ground Conditions on site were extremely muddy  
 Altamira Staff on Site: Stormy, Orlando  
 Left hotel around 8 AM, arrived on site and Orlando got his truck stuck. Couldn't get pulled out for a couple hours.  
 After we were we left, got more supplies and tried finding cheaper hotel rates.

Scale: 1 square = \_\_\_\_\_

*Ret. 1/2*

# Novo Ovation O-Pad Release

1/25/2023

Objectives: Grid & Sample on Eric's Property

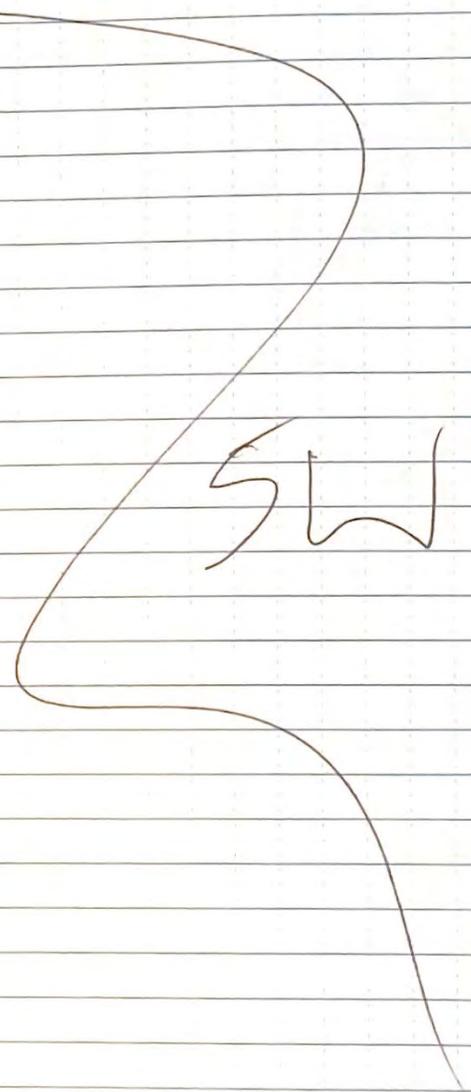

Weather: Sunny, Cold / Ground Conditions: Extremely muddy / wet

Altamira Staff on Site: Stormy

Left Hotel @ 7:30. Arrived on site & filled out JSA. Began to Grid in areas where I could. There was a lot of traffic w/ 18 wheelers hooking up to the Frac Tank & Forklifts loading up equipment.

Pad is mostly clear @ end of day on south west side of Eric's property. The ground has a lot of muddy tire tracks and standing water still.

Was able to sample around South East side of frac tank. Did R-123 to R-145. Got ice and took samples to lab in Hobbs.

Scale: 1 square = \_\_\_\_\_

## Novo Ovation O-Pad Release

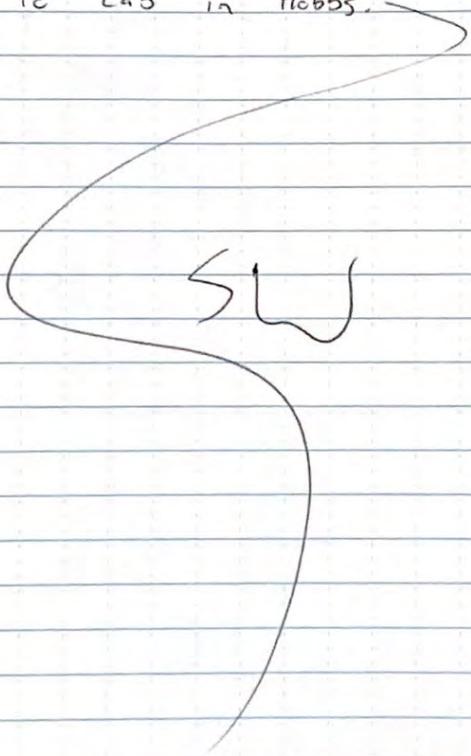

1/26/2023

Objectives: Grid and Sample where I can on Eric's property, it's still really muddy and wet in many areas.

Weather: Sunny, Cold, Muddy

Altamira Staff on Site: Stormy

Left Hotel @ 7:15. Arrived on site, checked conditions, filled out JSA. Began sampling around Frac Tank while there's not a lot of traffic yet. Coordinated w/ Jason and his crew so they can redig on samples that've previously failed. When Jason arrived he confirmed what I thought; it's too muddy for them to scrape the ground on most the areas I still need to grid. We'll have to wait until it dries up. I made a list of the samples that failed and gave it to Jason and marked which grids need to be dug deeper. Sampled R-146 to R-154 while they were digging. Will resample what's been dug. Resampled R1, R7, R12, R13, R16, R18, R21, R22, R24, R25, R29, R31, R32, R33, R43, R94, R111, R119, G38. Delivered samples to Lab in Hobbs.

SW

Scale: 1 square = \_\_\_\_\_

# Novo Oviaton O-Pad Release

1/27/2023

Objective: Finish resampling grids that were dug deeper yesterday & continue sampling around Frac Tank on Eric's Property. If traffic allows, IF 18 wheelers are in and out all day I will sample some grids on BLM.

Weather: Sunny, Cold

Altamira Staff on Site: Stormy

Left hotel @ 7:15, Arrived on site and completed JSA. Jason's crew is here loading 18 wheelers w/ dirt dug yesterday. Coordinated w/ the where else needs to be dug deeper (A lot of failed samples are on lease road so will have to wait on those). Got a few grids redug on BLM land and sampled them and resampled All the R grids that've failed so far. 18 wheelers are back for 2nd trip of the day so will redig ~~B-357, 367, 368, 377, 385, 391, 396, 398 & 401~~ B-357, 367, 368, 377, 385, 391, 396, 398 & 401 when they leave (currently 10:30). After, I sampled from R-156 to R-17. Delivered samples to lab in Hobbs.

SLW

Scale: 1 square = \_\_\_\_\_

# New Ovation O-Pad Release

1/28/2023

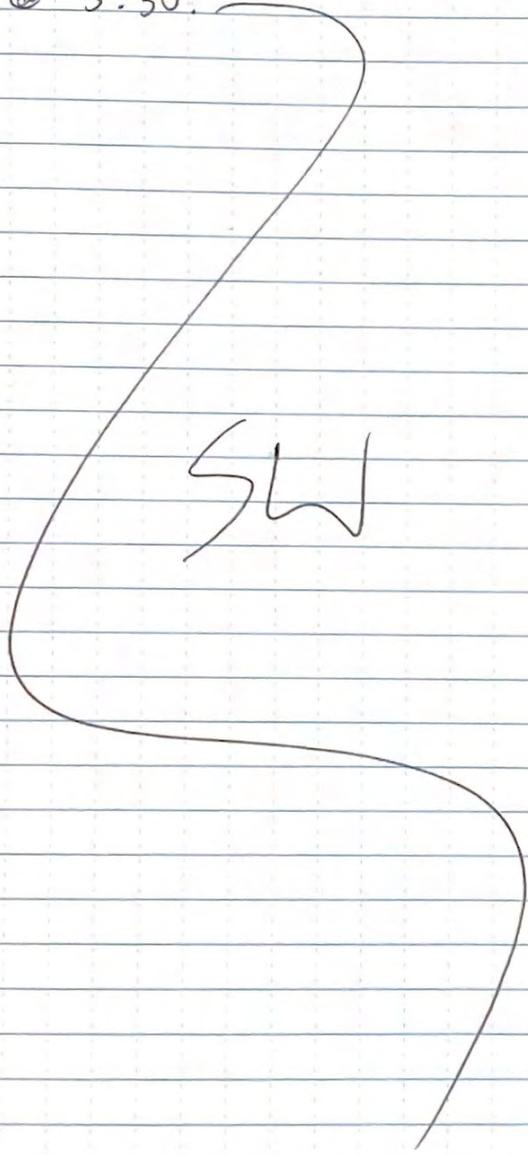

Objective: Grid out Eric's property.

Weather: Cold, partially cloudy

Altamira Staff on site: Stormy

Left Hotel @ 7. Arrived on site and filled out JSA. Began gridding.

Did a lot of gridding today, got all around frac tank. Leaving site @ 5:30.

Scale: 1 square = \_\_\_\_\_

*Stormy*

# Novo Ovation O-Pad Release

1/29/2023

Objective: Sample Grids I made yesterday & continue gridding.

Weather: Cold, Cloudy

Altamira Staff on Site: Stormy

Left Hotel @ 7. Arrived on site and filled out JSA. Began gridding a few grids then started taking samples. A lot of samples, in all did 40 today.

SW

Scale: 1 square = \_\_\_\_\_

# Novo Ovation O-Pad Release

1/30/2023

Objective: Resample some Failures after they're dug deeper and continue gridding & sampling

Weather Conditions: Foggy, ~~Cold~~ Extremely Cold

Altamira Staff on Site: Stormy

Left Hotel @ 7, arrived on site and completed ISA. Jasons crew arrived and we coordinated which grids needed to be dug deeper, resampled failures on BLM land 1st, Resampled all the B grid failures we can get to (Have to hold off on the ones in the middle of the lease road). Resampled B-35, 367, 368, 377, 385, 391, 396, 398, & 401. Sampled & gridded on Eric's Property. Delivered samples to Lab in Hobbs.

Scale: 1 square = \_\_\_\_\_

*Return to the Rain*

# Novo Aviation U-Pad Release

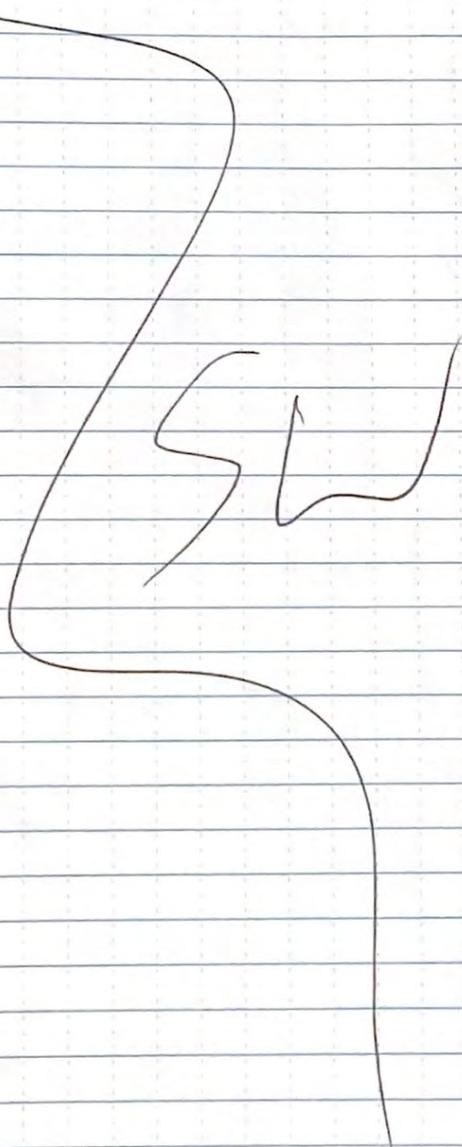

1/31/2023

Objective: Sample and Grid on Eric's Property where I can, a lot of equipment moving dirt is in my way.

Weather: Freezing COLD, Cloudy

Altamira Staff on Site: Stormy

Left hotel @ 7:15, arrived on site and completed JSA. All my squirt bottles to clean my shovel between samples with were frozen so I had to thaw them out. Did I mention it was COLD today? Knocked out 24 samples on Eric's land then did some gridding. Delivered samples to Lab in Hobbs. Went to get more supplies for sampling.

Scale: 1 square = \_\_\_\_\_

### Novo Oviation O-Pad Release

2/1/2023

Objective: Grid & Sample Eric's Property, Work with Equipment Operator to see which grids we can dig deeper for resampling.

Weather: COLD, Cloudy, Big Chance of Snow

Left hotel around 7:30, arrived on site completed JSA. Met with operator. ~~talked~~ Resampled 9 grids on East side of Frac Tank. Talked w/ Project Manager and we decided to take another 6" of ground on West Side of Frac Tank since a lot were failing. Coordinated that w/ the operator, He would dig a grid and I'd follow sampling. Didn't want him working too far ahead of me incase it rains/snows, didn't want another mud pit. Sampled 25 grids, 18 wheelers hauled off most the dirt. Delivered samples to Lab in Hobbs, went to Lowe's for equipment.

SW

1/10/00

2/2/2023

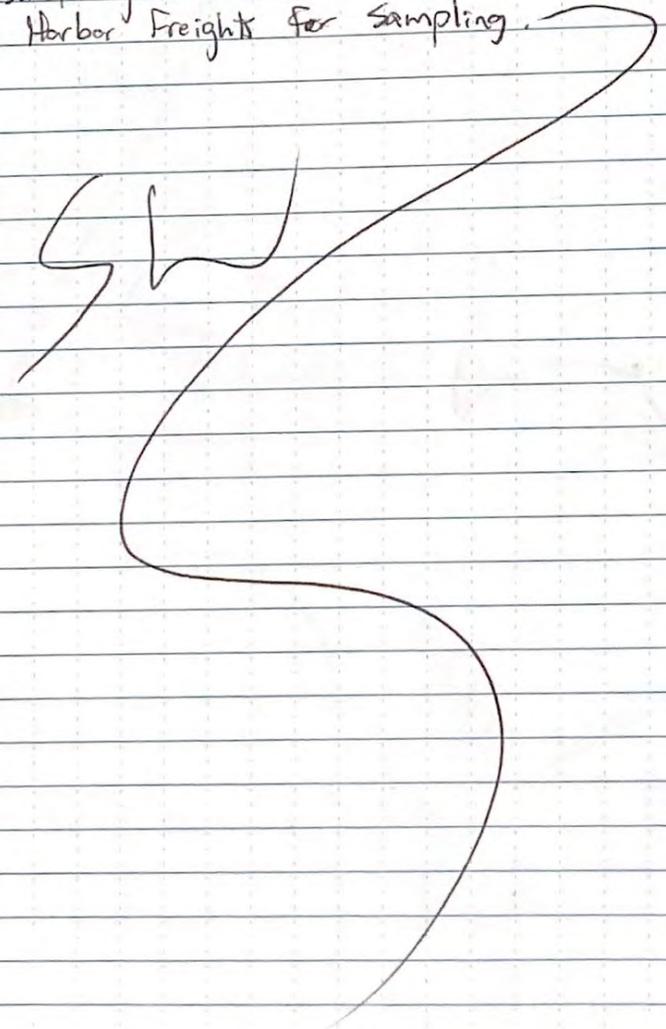

Objectives: Get top layer west of frac tank dug a few inches deeper and

Continue sampling & gridding.

Weather: Cold, Cloudy

Altamira Staff on site: Stormy, Orlando, Jimmy  
left Hotel @ 7:15, arrived on site & filled out JSA. Communicated with Dig

Crew where needs to be dug deeper. Began taking samples, Orlando  
& Jimmy arrived on site. Dig crew scrapes west side of frac tank,  
can't sample yet, they're in the way. We are sampling some grids  
on BLM while waiting on them to finish digging. Finished those, they  
finished digging a nice section, we gridded that area and took some samples  
Orlando went to lab to deliver samples. Jimmy & Stormy stayed and continued  
gridding & sampling til around 18:15. Had to get more supplies @  
Walmart & Harbor Freight for sampling.

Scale: 1 square = \_\_\_\_\_

# Novo Ovation O-Pad Release

2/3/2023

Objectives: Continue sampling & gridding on Eric's Property and resample failures.

Weather: Sunny, Cold

Altamira Staff on Site: Stormy, Orlando, Jimmy

Left Hotel @ 2:30, arrived on site and completed JSA and updated map.

Began sampling and gridding, working west.

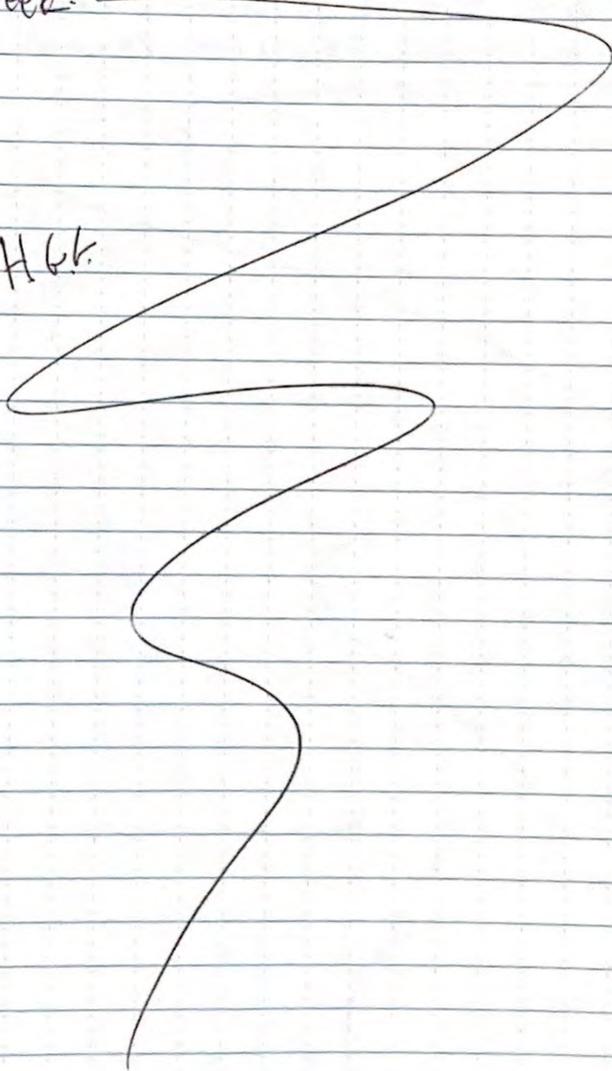

Gridded excavated area, sampled R314 - R333. Stormy performed resampling.

Jimmy left at 15:15 to Hobbs to Lab to drop off samples.

Stormy & Orlando stayed and put ID stakes in sample grid. Planned for next days activities. Left site at 17:00

Multiple loads of soil removed off site, still more piles left to be removed next week.

## Novo OPad Release

2/27/2023

Objective: Have excavation crew go deeper on the NW corner of the frac tank. Also have the excavation crew scrape the perimeter of the frac tank to establish grids.

Weather: Cold Sunny Wind: NE 3 mph  
 Attamira Staff on site? High D.G.

Left hotel at 0730 to drive to site. Upon arrival to site, got with the excavation crew to let them know where we were to excavate for the day. I informed them of needing to scrape the perimeter of the frac tank to establish grids that were not sampled due to the proximity of the tank prior to its removal.

0920, left to other Novo site to collect one sample. Returned to OPad at 1015.

Set up grids in the north east corner for verification samples that failed. Collected three verification samples, but could not collect more due to waste soil pile being in the way.

Moved to the south of the frac tank along the road to set up 14x14 grids and collected 14 samples total there. Left to lab at 1530.

H.G.

Scale: 1 square = \_\_\_\_\_

# Novo OPad Release

3/1/2023

Objective: Start setting up grids around the fuel tank location

Weather: Cold, Sunny

Wind: NE 5 mph

Staff on site: Aigho.G

Left hotel at 0745 and got to site at 0810. Started on JSA's and notes for the day. Got excavation crews up to speed on plans for the day and showed them areas that needed further excavation.

They're only mainly 3 trucks to remove soil throughout the day. Backfill operators still ongoing but no compactor today to finish up the backfill area. Asked operator to start removing larger soil pile by SE corner of the tanks so I could start sampling that area.

More backfill being brought in tomorrow.

Started on grids around the tanks. Decided to go clockwise around it starting to the east of R216 and using the number scheme FT(x).

Collected 26 samples in this area FT-1 to FT-26 and one resample R193. Left to lab at 1520.

HGW

Scale: 1 square = \_\_\_\_\_

MOVO OPad Release.

3/2/2023

Objective: finish collecting samples around the frac tank and collect remaining resamples SE of the tank if soil pile is removed.

Weather: Cold, Sunny

Wind: High Wind alerts for the day.

Staff on site: Higinio-G

Left hotel at 0730, stopped for ice then continued to site.

Arrived on site at 0820, travel delayed due to road closure caused by traffic collision. Started on JSA's and notes for the day.

Got with excavation crews to show them areas still needing to be excavated.

High winds started at 1000, started extending grids around frac tank.

Got a few done, stopped at 1130, noticed crews leaving, so I left to town to get subseq equipment and returned to site at 1300. Was able to collect 4 samples south of the tank. Took site photos and fired stakes until leaving the site at 1445.

NOVO OPad Release

3/3/2023

Objective; have Crews go to 12" around frac tank, and excavate remaining resample locations

Weather: Cool, Sunny Wind: NE 1 mph

Altamira Staff on site: Higley, D.G

Left hotel at 0740, headed to OPad. Got with Crews to go over Plans for the day, but Jason had a few issues with doing more digging. Had Soil trucks running throughout the day to remove last remaining Piles of waste material.

Extended grids needing to be resampled SE of the tank.

After Crews were done loading up waste material, I went to the BLM side of the spill to mark out resample locations for them to dig out further. Collected 8 samples, G-96, R131, 139, 140, 141, 146, 147 152. Left to Hobbs at 1535.

HG5

Scale: 1 square = \_\_\_\_\_

# Novo OPad Release

3/5/2023

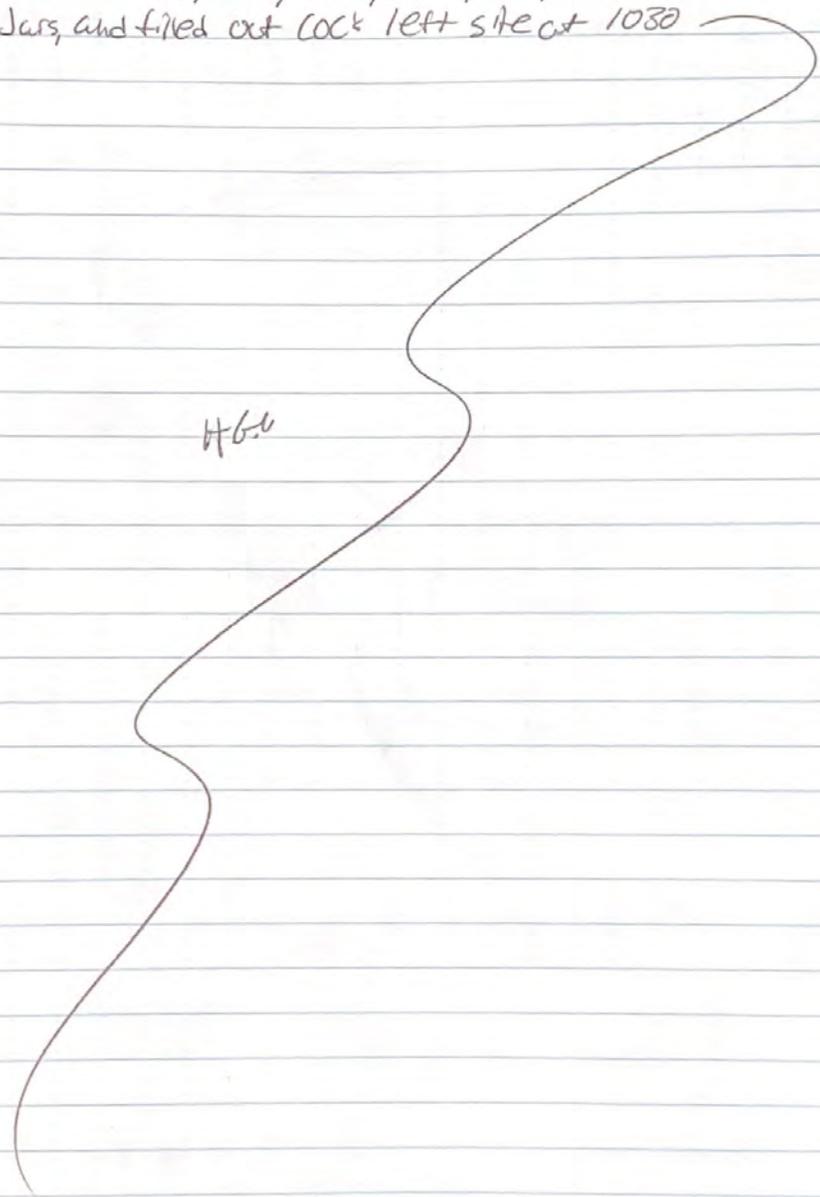

Objective: Collect 7 Samples on the BLM side of the site.

Weather: Warm, Sunny

Wind: NE 2 mph

Left hotel at 0830, stopped for fuel then headed to site. On arrival, got JSA filled out and started on notes. Went to 7 grids that had been excavated to collect samples. Collected B 368, 377, 385, B391, 514, 517, 518.

Jarred, Placed Samples in Jars, and filled out COC. Left site at 1030

Objective: Collect Hand auger Sample at R145.

Weather: Hot Sunny.

Staff on site: H. Gonzalez

Arrived on site at 1100 to collect 4 bore samples on R145

Located Grid using existing grid spikes.

R145 - 27-30"

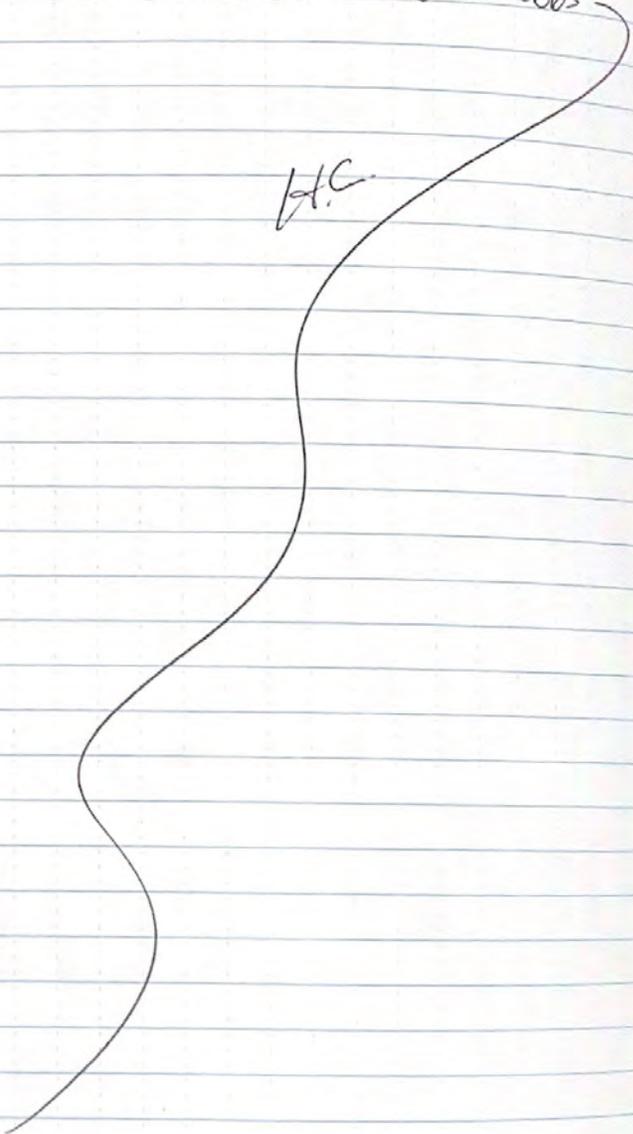

R145 - 33-36" hold

R145 - 40-43" hold

R145 - 46-49" hold.

Left site at 1230 to Hades site and then to lab in Hobbs

H.C.

Scale: 1 square = \_\_\_\_\_

4 - 14 - 23

Objective: Collect R470, R464 hand dugger samples.

weather: hot Sunny.

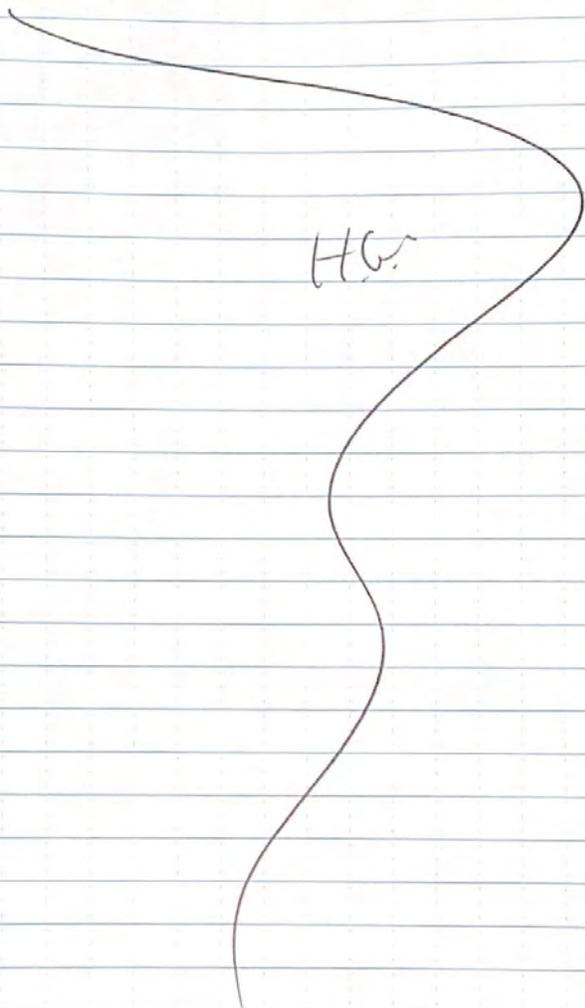

Staff on site: A Gonzalez.

Arrived on site at 0730 met with Jason to show where we still lacked excavation of site. left site at 1000 to heades site. Returned to site 1215 to start breaking open the Pad material. using a tamping iron. Collected 12 total samples with hand digger. left to lab at 1530.

4-20-23

Objective: collect new samples around the AST.  
Weather: Hot, Sunny.

Arrived on site at 1745, using the GPS unit, located grid  
collected grids, FT 39, 1, 2, 3, 4, 5, 6, 7, 8. left site at  
1845.

Scale: 1 square = \_\_\_\_\_

4-21-23

Objective: Collect remaining AST Grids. Start road excavation.  
 weather: Hot, Sunny.  
 Staff on site: H-fonzalez

Arrived on site at 0815 to mark out boundary of the reserve pit as mentioned by Jason. Using the GPS unit, walked out the boundary as the unit recorded locations for us automatically. Marked out the area on the road that was previously unsampled to be excavated. Had excavation crew break the surface at DB-1, DB-2 so I could hand auger them. Collected two soil borings DB-1, 2 and sampled them at 3-4', 5-6'. After collecting soil borings, moved to collect remaining AST samples. Collected FT, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 34, 35, 36, 37, 38. Collected new samples along the road, R496, 497, 498, 499, S01, S02, S03, S04, S05, S06. All to be tested for BTEX, TPH, CL. Left to lab at 1540.

HG

4/25/2023

Objectives: collect samples from FT 36, 29, 28, 27  
20, 19, 17 R-230 R-229 R-209 R-210

0810 Arrive @ site meet up with Jason to show him Area that FT Grids that failed from previous sampling Also will mark out GRID FT-28 & FT-29 that had not been sampled

0850 called Aaron to get instruction on operation of GPS No answer called Jimmy to get instruction on GPS. After GPS was working proceeded to identify FT Sample locations.

Went to identify Grids R-249, 230, 229, 209, & 210 Marked them Jason came back to look @ Grids R Grids in relation to underground water table Agreed to excavate 4 of the 6 grids R-249 in middle of ramp to process equipment

BDS excavating

made call to Aaron @ 5 grids that needed to be sampled ~~at~~ @ southwest corner didn't appear on GPS map He will try and get resolved

1230 excavating complete w/ collect samples need to have BDS excavate R-210

1430 completed sampling waiting on GPS issue to be resolved

Found out GPS not going to be updated until later this evening.

1500 depart site to deliver samples to lab in Hobbs

4/126/2023

Objectives: mark sample grids southwest corner of site

weather: cool 60° - 70°s

personnel: Orlando Gonzalez

0851 Arrive on site from Hudes. set up BGS to mark sample grids. Locations marked soil pile on south of excavator. Area needs to be moved as there are several grid locations are located beneath pile. Soil pile @ west end also needs to be moved. Directed operator on what needed to be done

Called Jason to let him know what was being done. He said to stop operator & he was heading back to site

Jason Arrived & stopped all further moving soil or excavation to south. He didn't want any possibility of

Approaching Reserve pit. Will only be able to collect 4 samples R 508, 509, 700 & 701.

0900 Orlando off site to get fuel in field truck

11:00 back on site to collect samples. Also will excavate R 470 & 464

11:20 begin sample collection excavations of R 464 started

11:25 Reserve pit liner exposed approx 1' BGS stopped further excavation of that grid. Moved to R 470 to excavate to 50" BGS

11:40 completed sample collection. Operator still working on R 470. Orlando off site

12:30 back on site taking site photos

12:50 R 470 excavation complete take photos.

Will wait on site for results from lab for previous day samples

14:07 Lab results received. All samples from previous day are below PCL's. Orlando to leave site to deliver samples to lab.

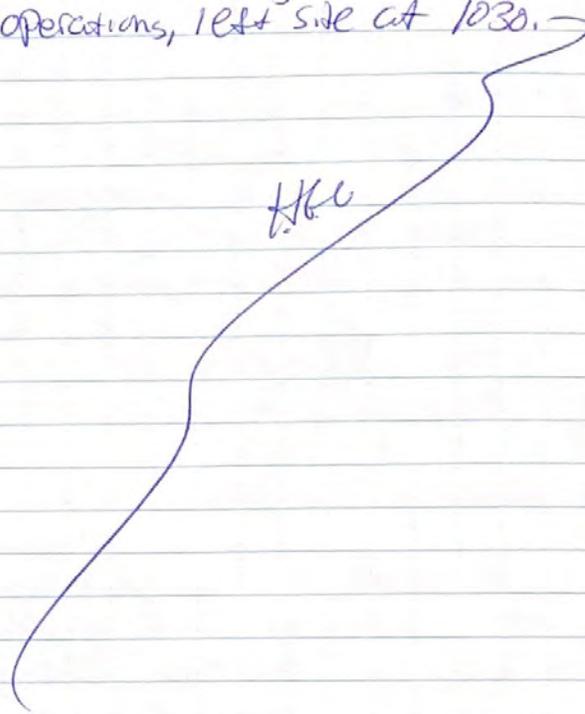

5-5-2023

Objective: Document Seeding operations on Onsurez and BLM side of the site.

Weather: Hot, Sunny.

Staff on site: H. Gonzalez

Drove to site at 0930, arrived at 0955, Tractor on site with seed drill implement. Roustabout crew on site moving obstructions from path of tractor. Took photos of seeding operations, left site at 1030.

CONDITIONS

Action 239325

**CONDITIONS**

Operator: NOVO OIL & GAS NORTHERN DELAWARE, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701	OGRID: 372920
	Action Number: 239325
	Action Type: [C-141] Release Corrective Action (C-141)

**CONDITIONS**

Created By	Condition	Condition Date
rhamlet	Novo's deferral requests deferral of final remediation for Incident Numbers NAPP2235068529 until the site is reconstructed, and/or the well pad is abandoned. Altamira and Novo do not believe deferment will result in imminent risk to human health, the environment, or groundwater. The area requested for deferral is the impacted soil associated with the active well operational area (Figure 3). The area has been delineated and documented in the report. At this time, OCD approves this request. The Deferral Request and C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue.	1/2/2024
