**Re: Remediation Work Plan  
ConocoPhillips Company (Heritage COG Operating, LLC)  
Windward Federal #001H  
Unit Letter D, Section 30, Township 24 South, Range 32 East  
Lea County, New Mexico  
Incident ID# nOY1721336457**

Ms. Hall:

Tetra Tech, Inc. (Tetra Tech) was contacted by ConocoPhillips Company (ConocoPhillips) to assess a Heritage COG Operating, LLC (Concho) release that occurred at a flowline associated with the Windward Federal #001H well (API No. 30-025-41414). The release footprint is located in Public Land Survey System (PLSS) Unit Letter D, Section 30, Township 24 South, Range 32 East, in Lea County, New Mexico (Site). The approximate release point occurred at coordinates 32.194551°, -103.720252°, as shown on Figures 1 and 2.

## BACKGROUND

According to the NMOCD C-141 Initial Report, the release occurred on July 25, 2017 when a flowline associated with the Windward Federal #001H well ruptured and released 70 bbls of produced water into the pipeline rights-of-way. Approximately 60 bbls of fluids were recovered with a vacuum truck. The NMOCD assigned this release the Incident ID nOY1721336457 and the remediation permit number 1RP-4772. A copy of the C-141 is included as Appendix A.

This incident is included in an Agreed Compliance Order-Releases (ACO-R) between Concho and the NMOCD signed on November 20 and 26, 2018, respectively.

The Windward Federal #001H release (nOY1721336457) footprint coincides with three additional flowline release incidents associated with the King Tut Federal #001H well (nAB1905046526 and nKL1630650239), and the King Tut Federal #003H release (nOY1713048453), respectively. Separate Remediation Work Plan reports will be submitted for the other three incidents.

## SITE CHARACTERIZATION

A site characterization was performed and no sinkholes, residences, schools, hospitals, institutions, churches, springs, private domestic water wells, playa lakes, stream bodies, wetlands, incorporated municipal boundaries, subsurface mines, or floodplains are located within the distances specified in 19.15.29 New Mexico Administrative Code (NMAC). The Site is in an area of low karst potential.

Tetra Tech

901 West Wall St., Suite 100, Midland, TX 79701

Tel 432.682.4559

Fax 432.682.3946

www.tetrattech.com

According to the New Mexico Office of the State Engineers (NMOSE) reporting system, there is one (1) water well located within ½ mile (800 meters) of the Site at a depth of 120 feet bgs with no groundwater elevation reported. This dry water well provides a reasonable determination to establish groundwater as greater than 100 bgs in the ½ mile radius. The minimum depth to groundwater based on data from one (1) well located approximately 1.26 miles (2,028 meters) away from the Site is 135 feet below ground surface (bgs). The site characterization data are presented in Appendix B.

## REGULATORY FRAMEWORK

Based upon the release footprint location and in accordance with Subsection E of 19.15.29.12 NMAC, per 19.15.29.11 NMAC, the site characterization data was used to determine recommended remedial action levels (RRALs) for benzene, toluene, ethylbenzene, and xylene (collectively referred to as BTEX), total petroleum hydrocarbons (TPH), and chlorides in soil.

Based on the site characterization, depth to groundwater, and in accordance with Table I of 19.15.29.12 NMAC, the recommended remedial action levels (RRALs) for the Site are as follows:

Constituent	Site RRALs
Chloride	20,000 mg/kg
TPH	2,500 mg/kg
BTEX	50 mg/kg

Additionally, in accordance with the NMOCD guidance *Procedures for Implementation of the Spill Rule (19.15.29 NMAC)* (September 6, 2019), the following reclamation requirements for surface soils (0-4 ft bgs) outside of active oil and gas operations are as follows:

Constituent	Reclamation Requirements
Chloride	600 mg/kg
TPH	100 mg/kg

## INITIAL SITE ASSESSMENT AND 2018 CLOSURE REQUEST

On August 15, 2017, Tetra Tech conducted assessment soil sampling at the Site on behalf of Concho. A total of eight (8) boreholes (BH-1 through BH-8) were installed using an air rotary drill rig to depths ranging from 10-25 feet bgs. The sampling locations are presented in Figure 3. The analytical results from the August 2017 soil sampling activities are summarized in Table 1.

Based on the analytical results of the August 2017 assessment sampling, a Work Plan dated September 21, 2017 was submitted to the NMOCD. This Work Plan incorporated all three release extents in the assessment. The Work Plan proposed excavating the release areas with elevated chloride concentrations to approximately 4 feet below surface and installing a 20-mil liner at the base of the excavation. The NMOCD conditionally approved the Work Plan in an email dated October 12, 2017. A copy of regulatory correspondence is included as Appendix C.

During preparations to begin the remediation activities, it was discovered that a second pipeline had been installed by Plains Pipeline adjacent to the first identified pipeline in the release footprint. In order to evaluate the soil after the pipeline installation activities, Tetra Tech returned to the Site on July 27, 2018 to collect additional samples. A total of six (6) auger holes (AH-1 through AH-6) were installed in the areas of boreholes BH-1, BH-2, BH-3, BH-6, BH-7, and BH-8. The sampling locations are presented in Figure 3. The analytical results from the July 2018 soil sampling activities are summarized in Table 1.

Tetra Tech prepared a Closure Report on behalf of Concho dated November 7, 2018 summarizing the assessment sampling results. That same Closure Report was submitted for each individual incident (nAB1905046526, nOY1713048453, and nOY1721336457). The analytical results from the July 2018 soil sampling event were below the Site RRALs for all constituents. Chloride concentrations in samples

Remediation Work Plan  
November 30, 2023

ConocoPhillips

collected from auger holes AH-4, AH-5, and AH-6 exceeded the reclamation requirement of 600 mg/kg in surface soils (0-4 feet bgs). Closure was requested due to safety concerns around the Plains Pipeline infrastructure and soil analytical results below the Site RRALs. Chloride impacts are minimal at the total depth within the deepest assessment boring (BH-8). The analytical results from the sample collected from the 24-25 bgs interval (782 mg/kg) were slightly above the most stringent chloride reclamation requirement and well below the RRAL of 20,000 mg/kg. Surficial impacts were confined to areas within the Plains rights-of-way.

The NMOCD rejected each individual Closure Report in emails dated December 9, 2022 with the following comments:

- *“Request for closure denied. Several sample locations are above the reclamation standard of 600 mg/kg for chloride in the upper 4 feet of the impacted area. If necessary, a deferral of the remediation and reclamation could be requested until the equipment is removed during other operations, or when the well or facility is plugged or abandoned, whichever comes first. A deferral may be granted so long as the contamination is fully delineated and does not cause an imminent risk to human health, the environment, or ground water.*
- *1RP-4696 closed. Refer to incident #nOY1713048453 in all future communication.*
- *Submit a complete report through the OCD Permitting website by 03/10/2023.”*

The NMOCD approved an individual request for a 90-day extension to June 10, 2023 in an email dated March 10, 2023. A copy of regulatory correspondence is included as Appendix C.

## 2023 HORIZONTAL DELINEATION SAMPLING AND DEFERRAL REQUEST

Following receipt of the NMOCD rejection of the 2018 Closure Report, Tetra Tech conducted additional assessment sampling at the Site on behalf of ConocoPhillips in order to complete horizontal delineation of the release. On May 5, 2023 Tetra Tech installed eleven (11) hand auger borings (AH-23-1 through AH-23-11) along the perimeter of the reported release extent to complete horizontal delineation. The 2023 boring locations are shown on Figure 4. Photographic documentation of the release area at the time of the horizontal delineation sampling demonstrates established uniform vegetative cover that reflects a life-form ratio of plus or minus fifty percent of pre-disturbance levels (Appendix D).

A total of eleven (11) soil samples were collected and sent to Cardinal Laboratories in Midland, Texas to be analyzed for chloride via EPA Method 300.0, TPH via EPA Method 8015M, and BTEX via EPA Method 8261B. Analytical results from the 2023 horizontal delineation soil assessment activities are summarized in Table 2. All analytical results were below the applicable Site RRALs for all constituents.

Tetra Tech prepared a Revised Deferral Request dated May 26, 2023 on behalf of ConocoPhillips based on the results of the additional assessment results and the comments provided by the NMOCD in the December 9, 2022 closure rejection email. The NMOCD rejected the deferral request in an email dated June 6, 2023 with the following comments:

- *“Deferral denied. There is another open incident for a release that occurred in the same area under incident #NAB1905046526. The release occurred on 2/8/2019. A closure request was submitted 7/22/2019 and subsequently denied by both the BLM and OCD on 8/15/2019. Per 19.15.29.12 C. (3) “The responsible party shall remediate the impacted surface area of a release not occurring on a lined, bermed or otherwise contained exploration, development, production or storage site to meet the standards of Table I of 19.15.29.12 NMAC or other applicable remediation standards and restore and reclaim the area pursuant to 19.15.29.13 NMAC.” Remediation can take place by using hand hovels, hydrovac, etc. to safely remove contaminated soil around the pipelines. In-situ remediation can also be utilized as long as the remediation plan is approved by the OCD prior to implementation. Submit a complete report through the OCD Permitting website by 9/6/2023.”*

An extension request to December 5, 2023 was granted in an email dated September 12, 2023. A copy of regulatory correspondence is included in Appendix C.

## 2023 ADDITIONAL ASSESSMENT ACTIVITIES

Tetra Tech conducted additional assessment sampling on behalf of ConocoPhillips within the release extent to evaluate current soil concentration levels. On September 7, 2023, Tetra Tech personnel installed nine (9) hand auger borings (AH-23-12 through AH-23-20) within the combined release extent at the locations that had elevated soil chloride concentrations in the August 2017 sampling event. The 2023 sampling locations are presented in Figure 4.

A total of forty-five (45) soil samples were collected and sent to Cardinal Laboratories in Midland, Texas to be analyzed for chloride via EPA Method 300.0, TPH via EPA Method 8015M, and BTEX via EPA Method 8261B. A copy of the laboratory analytical report and chain-of-custody documentation are included in Appendix E.

Analytical results from the 2023 vertical delineation soil assessment are summarized in Table 3. Chloride concentrations were detected in surface soils (0-4 feet bgs) at all nine boring locations at levels above the reclamation limit of 600 mg/kg. There were no analytical results exceeding the chloride RRAL of 20,000 mg/kg. All analytical results were below the reclamation limits and Site RRALs for all other constituents.

## REMEDIATION WORK PLAN

Based on the site characterization, the collected analytical results, and the NMOCD rejection of the 2023 deferral request, ConocoPhillips proposes to remove the impacted material as indicated in Figure 5. Impacted soils will be excavated using heavy equipment (backhoes, hoe rams, and track hoes) to a maximum depth of 4 feet below surface grade or until a representative sample from the excavation floor is below the applicable reclamation limit or RRAL for chloride. Heavy equipment (backhoe and trackhoe) will be utilized to excavate areas outside the immediate vicinity of pressurized lines and will come no more than 4 feet from any pressurized lines. Impacted soils within the vicinity of the surface and subsurface lines will be removed to the maximum extent practicable using non-aggressive excavation methods.

Excavated soils will be transported offsite and disposed of at an NMOCD-approved or permitted facility. In accordance with subsection D of 19.15.29.12 NMAC, the responsible party will notify the appropriate division district office prior to conducting confirmation sampling. Confirmation bottom and sidewall samples representative of no more than 200 square feet will be collected for verification of remedial activities, and analyzed for TPH, BTEX, and chlorides. Once results are received, the excavation will then be backfilled with clean material to surface grade. The estimated volume of material to be remediated is approximately 560 cubic yards.

## VARIANCE REQUEST

ConocoPhillips proposes to leave impacted surface (upper four feet) soils (with concentrations greater than the reclamation limit of 600 mg/kg) in place at three (3) of the 2023 additional vertical delineation sampling locations. The areas of boring locations AH-23-12, AH-23-13, and AH-23-20 are overlain with 2 to 3 feet of clean soils, as summarized in Table 3. Only select soil intervals in the upper four feet are impacted with chlorides above the reclamation limit, and the impacted soils are situated stratigraphically below the clean soils.

The root zone for most native plants is in the uppermost four feet, however, most roots are in the top 6 to 24 inches of the soil. Furthermore, the water-absorbing feeder roots are mostly within the upper four inches. There is existing vegetative cover in many portions of the site, and the primary purpose of remediation and reclamation is to re-establish vegetative growth. Disturbance and excavation of areas exhibiting recolonization and a self-sustaining plant community are proposed to be left undisturbed.

The release impact is fully delineated and groundwater in this area is more than 100 feet below surface. The established vegetative cover at the Site reflects a life-form ratio of plus or minus fifty percent of pre-disturbance levels. As the Site is located on federal land, ConocoPhillips will seek BLM concurrence for this variance request and proposed scope of remediation.

Remediation Work Plan  
November 30, 2023

ConocoPhillips

## CONCLUSION

All analytical results associated with the horizontal delineation to the north, east, south, and west of the release area were below applicable reclamation requirements for all constituents. Horizontal delineation was achieved, per NMOCD request.

Based on the results of the additional release delineation activities, ConocoPhillips will remediate impacted areas to 4 feet bgs, as indicated in Figure 5. As described in the variance request, the areas which have soil chloride concentrations above the reclamation limit but which are overlain by 2-3 feet of clean soil do not cause an imminent risk to human health, the environment, or groundwater.

The proposed remediation activities will be conducted within 90 days of acceptance of the proposed plan. If you have any questions concerning the additional assessment activities for the Site or the proposed remediation work plan, please call me at (512) 739-7874.

Sincerely,

## Release Notification and Corrective Action

### OPERATOR

☒ Initial Report ☐ Final Report

Name of Company: COG Operating LLC OGRID # 229137	Contact: Robert McNeill
Address: 600 West Illinois Avenue, Midland TX 79701	Telephone No. 432-683-7443
Facility Name: Windward Federal #001H	Facility Type: Flowline
Surface Owner: Federal	Mineral Owner: Federal
API No. 30-025-41414	

### LOCATION OF RELEASE

Unit Letter D	Section 30	Township 24S	Range 32E	Feet from the 190	North/South Line North	Feet from the 430	East/West Line West	County Lea
------------------	---------------	-----------------	--------------	----------------------	---------------------------	----------------------	------------------------	---------------

Latitude 32.194551 Longitude -103.720252

### NATURE OF RELEASE

Type of Release: Produced Water	Volume of Release: 70 bbls.	Volume Recovered: 60 bbls.
Source of Release: Flowline	Date and Hour of Occurrence: July 25, 2017 3:00 pm	Date and Hour of Discovery: July 25, 2017 3:00 pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Ms. Yu - NMOCD / Ms. Tucker - BLM	
By Whom? Rebecca Haskell	Date and Hour: July 26, 2017 8:31 am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

**RECEIVED**

By Olivia Yu at 7:31 am, Aug 01, 2017

Describe Cause of Problem and Remedial Action Taken.\*

The release was caused by a rupture in a flowline. The flowline was repaired.

Describe Area Affected and Cleanup Action Taken.\*

The release was within a pasture. A vacuum truck was dispatched to remove all freestanding fluids. Concho will have the spill area sampled to delineate any possible impact from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation activities.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

## Site Assessment/Characterization

*This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

What is the shallowest depth to groundwater beneath the area affected by the release?	_____ (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Did the release impact areas <b>not</b> on an exploration, development, production, or storage site?	<input type="checkbox"/> Yes <input type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

### **Characterization Report Checklist:** *Each of the following items must be included in the report.*

- ☐ Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- ☐ Field data
- ☐ Data table of soil contaminant concentration data
- ☐ Depth to water determination
- ☐ Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release
- ☐ Boring or excavation logs
- ☐ Photographs including date and GIS information
- ☐ Topographic/Aerial maps
- ☐ Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

## Remediation Plan

**Remediation Plan Checklist:** *Each of the following items must be included in the plan.*

- ☐ Detailed description of proposed remediation technique
- ☐ Scaled sitemap with GPS coordinates showing delineation points
- ☐ Estimated volume of material to be remediated
- ☐ Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- ☐ Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

**Deferral Requests Only:** *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- ☐ Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- ☐ Extents of contamination must be fully delineated.
- ☐ Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. ---

Ms. Haskell:

In regards to the proposed remedial activities for 1RP-4485, 1RP-4696, 1RP-4772:

- After review of the provided data, NMOCDD will agree that BTEX and TPH analyses will not be necessary for the stockpiled soil used for backfilling.
- Correct; for point #3, bottom confirmation samples were not required, only samples from sidewalls.

Thanks,  
Olivia

**Subject:** RE: COG - King Tut/Windward Work Plan Approval Request

Ms. Yu,

1. For areas represented by B-2, B-3, and B-6:
  - First bullet point, why are you requiring that we sample for BTEX and TPH. The spills were produced water and we have already established that BTEX and TPH are not a concern at this site?
  - Third bullet point, bottom samples should not be required because we are installing a liner.

Otherwise COG agrees to the stipulations outlined below,

Thank You,

Becky Haskell

**Sent:** Thursday, October 12, 2017 9:38 AM

**To:** Tavaréz, Ike; Tucker, Shelly; [hprice@blm.gov](mailto:hprice@blm.gov); Billings, Bradford, EMNRD

**Cc:** Rebecca Haskell; Robert McNeill; Dakota Neel; Aaron Lieb; Gonzales, Clair

**Subject:** [External] RE: COG - King Tut/Windward Work Plan Approval Request

\*\*\*\* External email. Use caution. \*\*\*\*

Mr. Tavaréz:

NMOCD will agree to the proposed remediation plan for 1RP-4485, 1RP-4696, 1RP-4772 with these stipulations.

1. For the areas represented by B-2, B-3, and B-6:
  - 2-3 ft. of low-chloride soil is allowed to be stockpiled on plastic on location for use in backfilling. One soil sample per 25 yd<sup>3</sup> must be laboratory tested for BTEX (Method 8260 or 8021), TPH extended (Method 8015), and chlorides (Method 300).
  - The 4<sup>th</sup>-5<sup>th</sup> foot bgs of soil must be removed and a 40 mil liner properly placed at the bottom.
  - Confirmation bottoms and sidewalls for each of these areas are required at no greater than 50 ft. distance interval.
2. For the area represented by B-4 and B-5, NMOCD will grant that no remedial activity will be required. 2 sidewall samples are required: 1 at the border with the area represented by B-8 and 1 at the border for B-3 area.
3. For the areas represented by B-1, B-7, and B-8: remove 4 ft. of chloride-impacted soil and properly set a 40 mil liner at the bottom. Confirmation sidewall samples are required.
4. Provide a scaled map with 1) locations of confirmation bottom and sidewalls marked for each of the excavated areas; 2) lined areas outlined; and 3) release points for 1RP-4485, 1RP-4696, and 1RP-4772 annotated.

Also, for this release only, NMOCD will not require further vertical delineation for B-8. Please be advised that this is an exception.

Please confirm or inform if additional clarification is required.

Thanks,

Olivia Yu

Environmental Specialist

NMOCD, District I

**Subject:** RE: COG - King Tut/Windward Work Plan Approval Request

Olivia,

Thanks for meeting with me to discuss some of the questions for the above mention project. Let me know if you need additional information. Once approved, the proposed remediation will be implemented.

- For the reuse material, Tetra Tech will remove (0-3'), segregate and stockpile the material into 25-50 cubic yards piles for sampling. If the stockpile is below 600 mg/kg (chlorides), the material will be placed back into the excavation. Any stockpile material (25-50 cubic yards) above 600 mg/kg will be hauled to disposal.
- The area of BH-8 did show a chloride concentration of 782 mg/kg at 24'-25', slightly above the 600 mg/kg threshold. As discussed, the area of BH-8 will be capped with a 40 mil liner, as proposed in the work plan.

**Subject:** RE: COG - King Tut/Windward Work Plan Approval Request

Ms. Gonzales:

Based on the information provided, is the implication that all samples for 1RP-4485, 1RP-4696, 1RP-4772 are elevated due to cross contamination?

Irrespective of the depth to groundwater, permissible chloride levels is  $\leq 600$  mg/kg in 0-4 ft. of soil for remediation. Except for specific circumstances, 4 ft. of chloride-impacted soils must be removed with a minimal 20 mil liner at 4 ft. bgs to encapsulate elevated chloride levels in depth. This is standard NMOCD policy.

NMOCD has not yet decided to grant permission for removal and reuse of soil from 0-3 ft.

Olivia

**Subject:** RE: COG - King Tut/Windward Work Plan Approval Request

*Ms. Yu,*

*Referring to the bottom hole chloride concentration of 782 mg/kg at BH-8; as stated in the work plan, the slightly elevated concentration appears to be caused by cross contamination from the upper soils.*

*The area of BH-2 did show a chloride concentration of 1,110 mg/kg at 4'-5' below surface, while the areas of boreholes (BH-3 and BH-6) showed elevated concentrations of 7,960 mg/kg (4'-5') and 2,440 mg/kg (6'-7'), respectively. Based on the depth to groundwater in the area, which is between 325' and 350' below surface, the chloride concentration of 1,110 mg/kg detected at BH-2 is not significant and does not appear to be an environmental concern or imminent threat to groundwater.*

*The work plan proposes excavating the areas of BH-1, BH-3, BH-6, and BH-7 to between 3.0' and 4.0' below surface and capping the areas with a 40 mil liner. The*

*area of BH-8 will be excavated to 6.0' below surface, if accessible. Based on the data, the soils in the areas of BH-3 and BH-6 are to be removed (0-3.0') and reused for backfill. Soil samples will be collected every 50 yd<sup>3</sup> for chlorides by Method 300, as directed.*

*Thank you,  
Clair Gonzales*

**Subject:** RE: COG - King Tut/Windward Work Plan Approval Request

Dear Ms. Gonzales:

Please address these concerns regarding the workplan covering 1RP-4485, 1RP-4696, 1RP-4772:

- Vertical delineation for BH-8 is not considered complete at 25 ft. bgs. What is the proposed plan of action?
- Chloride content of the soil profile for BH-2 is similar to BH-3 and BH-6. Why is the proposed course of remedial activity different?
- Please be advised that the conventional remedial activity is 4 ft. excavation with a liner.
- If the proposed 0-3 ft. of soil at BH-3 and BH-6 is to be removed and reused for backfill is deemed permissible, NMOCD will request soils to be sampled every 50 yd<sup>3</sup> with Method 300.

Thanks,

Olivia Yu

To whom it may concern (c/o Charles Beauvais for COG OPERATING LLC),

The OCD has rejected the submitted *Internal Manual Incident File Supporting Documentation (ENV)* (IM-BNF), for incident ID (n#) nOY1721336457, for the following reasons:

- **Request for closure denied.** Several sample locations are above the reclamation standard of 600 mg/kg for chloride in the upper 4 feet of the impacted area. If necessary, a deferral of the remediation and reclamation could be requested until the equipment is removed during other operations, or when the well or facility is plugged or abandoned, whichever comes first. A deferral may be granted so long as the contamination is fully delineated and does not cause an imminent risk to human health, the environment, or ground water.
- **1RP-4772 closed.** Refer to incident #nOY1721336457 in all future communication.
- **Please submit a complete report through the OCD Permitting website by 03/10/2023.**

The rejected IM-BNF can be found in the OCD Online: Permitting - Action Status, under the Application ID: 165819. Please review and make the required correction(s) prior to resubmitting.

If you have any questions why this application was rejected or believe it was rejected in error, please contact me prior to submitting an additional IM-BNF.

**CAUTION:** This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Ms. Hall:

On behalf of ConocoPhillips, Tetra Tech is requesting a 90-day extension (until June 10, 2023) to complete release delineation activities and associated reporting for the Windward Federal #001H Release site (**nOY1721336457**).

ConocoPhillips recently received a large volume of NMOCD determinations related to unresolved releases from ConocoPhillips' predecessor-in-interest ("COG") via the *Internal Manual Incident File Supporting Documentation (ENV)* (IM-BNF) process.

Given the difficulties inherent with available resource allocation for several projects with similar deadlines within a short period of time, this extension is required to safely complete the additional assessment. ConocoPhillips plans to conduct the additional assessment in the coming month however, and once the sampling data is collected, tabulated, and evaluated, a revised report will be submitted to the OCD.

Please let me know if you have any questions or concerns.

Sam

**CAUTION:** This email originated from an external sender. Verify the source before opening links or attachments.

To whom it may concern (c/o Christian Lull for COG OPERATING LLC),

The OCD has rejected the submitted *Application for administrative approval of a release notification and corrective action* (C-141), for incident ID (n#) nOY1721336457, for the following reasons:

- **Deferral denied.** There is another open incident for a release that occurred in the same area under incident #NAB1905046526. The release occurred on 2/8/2019. A closure request was submitted 7/22/2019 and subsequently denied by both the BLM and OCD on 8/15/2019. Per 19.15.29.12 C. (3) "The responsible party shall remediate the impacted surface area of a release not occurring on a lined, bermed or otherwise contained exploration, development, production or storage site to meet the standards of Table I of 19.15.29.12 NMAC or other applicable remediation standards and restore and reclaim the area pursuant to 19.15.29.13 NMAC." Remediation can take place by using hand hovels, hydrovac, etc. to safely remove contaminated soil around the pipelines. In-situ remediation can also be utilized as long as the remediation plan is approved by the OCD prior to implementation. Submit a complete report through the OCD Permitting website by 9/6/2023.

The rejected C-141 can be found in the OCD Online: Permitting - Action Status, under the Application ID: 222230.

Please review and make the required correction(s) prior to resubmitting.

If you have any questions why this application was rejected or believe it was rejected in error, please contact me prior to submitting an additional C-141.

**Subject:** [EXTERNAL] Extension Request - Application ID 222230 (nOY1721336457)

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Ms. Hall,

On behalf of ConocoPhillips, Tetra Tech is requesting a 90-day extension (until December 5, 2023) to complete the remediation and ensuing reporting for the Windward Federal #001H Release site (**nOY1721336457**).

The OCD rejected submitted *Application for administrative approval of a release notification and corrective action* (C-141), for incident ID (n#) nOY1721336457, for the following reasons:

- **Deferral denied. There is another open incident for a release that occurred in the same area under incident #NAB1905046526. The release occurred on 2/8/2019. A closure**

request was submitted 7/22/2019 and subsequently denied by both the BLM and OCD on 8/15/2019. Per 19.15.29.12 C. (3) "The responsible party shall remediate the impacted surface area of a release not occurring on a lined, bermed or otherwise contained exploration, development, production or storage site to meet the standards of Table I of 19.15.29.12 NMAC or other applicable remediation standards and restore and reclaim the area pursuant to 19.15.29.13 NMAC." Remediation can take place by using hand hovels, hydrovac, etc. to safely remove contaminated soil around the pipelines. In-situ remediation can also be utilized as long as the remediation plan is approved by the OCD prior to implementation. Submit a complete report through the OCD Permitting website by 9/6/2023.

ConocoPhillips has safely completed additional assessment activities at the Site to evaluate the status of the identified open incident # NAB1905046526. Given the complexities of this site, including numerous surface and subsurface utilities within the release footprint, this incident is now being handled by the risk management and remediation group at ConocoPhillips. Based on the results of the additional assessment completed at the combined release area, ConocoPhillips will proceed with remediation of soils to meet the standards of Table I of 19.15.29.12 NMAC or other applicable remediation standards and restore and reclaim the area pursuant to 19.15.29.13 NMAC.

Please let me know if you have any questions or concerns.

Thank you,  
Sam

RE: KING TUT #001H RELEASE

Enclosed are the results of analyses for samples received by the laboratory on 09/08/23 9:25.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-22-15. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

CONDITIONS  
  
Action 290143

CONDITIONS

Operator: COG OPERATING LLC 600 W Illinois Ave Midland, TX 79701	OGRID: 229137
	Action Number: 290143
	Action Type: [C-141] Release Corrective Action (C-141)

CONDITIONS

Created By	Condition	Condition Date
bhall	Remediation plan and variance request are conditionally approved. If the horizontal extents of the release remediation excavation extend beyond AH-23-12, AH-23-13, and AH-23-20; then these areas will need to be addressed at time of remediation as there are no horizontal delineation points that meet the most stringent closure criteria in the upper four feet east of AH-23-15 and the horizontal delineation points are 70+ feet west of AH-23-20.	1/17/2024
bhall	Wall samples along any 4 foot buffer area of buried pressurized lines will need to be collected and analyzed for all constituents listed in Table I.	1/17/2024
bhall	Submit a complete report through the OCD Permitting website by 4/17/2023.	1/17/2024
