Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Gas was vented to atmosphere to purge the pipeline of off-spec residue gas. It was necessary to purge the line to bring the residue gas line back within specification. Third party gas producers sent off spec gas to the inlet of the processing facilities which resulted in off spec gas in the residue line.
Steps taken to limit the duration and magnitude of vent or flare	Gas was vented until the pipeline was purged of off-spec residue gas. Once the residue gas was back within spec, the emission event ended.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	The pipeline was purged and the emission event ended. Once the emission event ended, the line was put back in service.
