Review of the 2020
Groundwater
Remediation Report fro
GCU #204E: **Content**
Satisfactory
1. Continue to conduct
quarterly sampling until
eight (8) consecutive
quarterly samples have
been demonstrated
below NM WQCC
20.2.3103 of the
NMAC.
2. Continue to submit
annual reports by April
1, 2024.

GROUNDWATER REMEDIATION REPORT

GCU # 204E
(I) SECTION 34, T28N, R12W, NMPPM
SAN JUAN COUNTY, NEW MEXICO

PREPARED FOR:
NEW MEXICO OIL CONSERVATION DIVISION

JANUARY 2022

PREPARED BY:

SIMCOE LLC
GCU # 204E - Blow Pit
NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 34, T28N, R12W

Monitor Well Sampling Dates: 04/04/2021, 06/09/2021, 08/19/2021, 12/08/2021.

Pit Closure & Background:

The well site is located in San Juan County and within the Navajo Agricultural Product Industry (NAPI) area approximately 10 miles southeast of Farmington, New Mexico. An on-site earthen blow pit closure was initiated in June 2003. Groundwater impacts were first identified from sampling and analytical testing of MW #2 in November 2006. After receipt of the laboratory results, the New Mexico Oil Conservation Division (**NMOCD**) was notified with a letter dated March 2, 2007 of the groundwater impacts. Documentation of this work and subsequent groundwater monitoring data for the site was previously submitted to NMOCD for review. Continued sampling and testing pursuant to the previous operator's (BP America Production Company) NMOCD approved Groundwater Management Plan (**GMP**) was suggested in the last report submitted. Reporting herein is for groundwater site monitor well testing conducted from 2019 through 2020.

Alternative Groundwater Remediation:

In April 2019, BP America submitted an initial Remedial Action Plan requesting the deployment of an oxygen release compound (ORC) in sock form to existing site monitor wells (see supplier's specification documents on following pages). This active remediation approach to enhance the aerobic biodegradation was initially implemented in June 2019 by inserting three (3) ORC socks within MW #3, two (2) within MW #4 as well as MW #5. On March 31, 2020, five (5) ORC socks were placed within MW #3 and three (3) within MW #4 as well as MW #5. After the June 2020 sampling event, the ORC socks were removed from MW #4 and one was transferred to MW #5. As of the last sampling in December 2020, four (4) ORC socks remain in MW #5 and five (5) within MW #3.

Groundwater Monitor Well Sampling Procedures:

Prior to groundwater sample collection, depth-to-water measurements were collected.

Prior to sample collection, approximately three wellbore volumes were purged from the sample well with new disposable bailers. The groundwater sample was collected following US EPA SW-846 protocol. The groundwater sample was transferred into laboratory-provided containers with the appropriate preservative, stored in a cooler on ice, and submitted with a complete chain-of custody to Hall Environmental Analysis Laboratory for analysis of volatile organic compounds by US EPA Method 8260B. Cottonwood also collected field measurements of pH, conductivity, and temperature.

Fluids generated during the monitoring well purging were discarded into the tank located on the well site. The tank contents are disposed of through approved NMOCD operational procedures for removal of produced fluids.

Water Quality and Gradient Information:

The analytical results for MW #2R (source area) between June 2013 and August 2015 have documented nine (9) consecutive sampling events below the New Mexico Water Quality Control Commission (NMWQCC) allowable concentration levels for all BTEX constituents.

Since the introduction of the ORC socks within the lateral gradient MW #3, all BTEX constituents were reported as not detected (ND) at the laboratory reporting limits for the last four (4) consecutive sampling events.

Since September 2012, MW #4 has shown a significant reduction in benzene, ethylbenzene, and total xylenes. Between August 2013 and August 2014 as well as from June 2017 to June 2020, MW #4 has exhibited five (5) consecutive sampling events below the NMWQCC threshold for BTEX.

MW #5 continues to have elevated benzene and total xylenes concentrations exceeding NMWQCC standards. MW #5-SH BTEX levels were mostly ND during its sampling events between September 2011 and June 2013.

A historical summary of laboratory analytical results are included within the tables on the following pages. Field data sheets, laboratory reports, and laboratory quality assurance/quality control information are also included.

Summary and/or Recommendations:

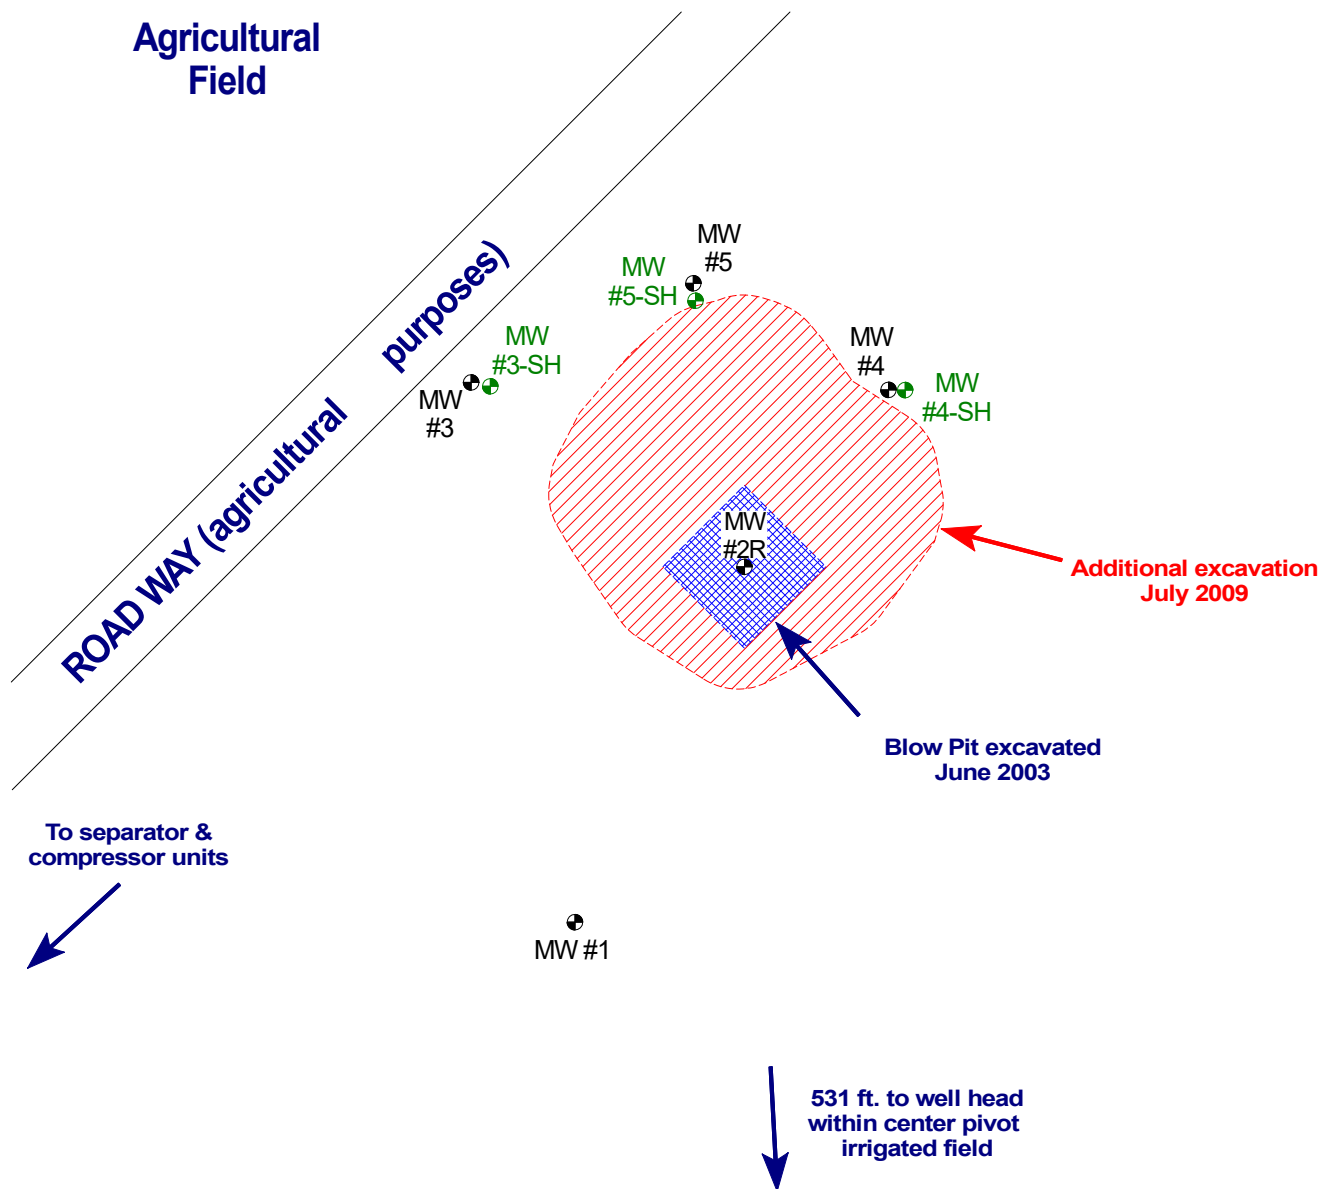

As stated in the previously submitted report, it appears that down gradient delineation has been achieved with the installation and testing of MW #6 and MW #7. Laboratory results from the down gradient installed MW #6 and MW #7 were all below the NMWQCC standards for BTEX and regulated general chemistry constituents except nitrate. Nitrate is used primarily for agricultural fertilization and most likely did not result from any BP operations since levels within the source and immediate down gradient areas met and were well below the acceptable limits for closure. The last report also recommended to discontinue sampling of MW #2R, MW #6, and MW #7.

Based on the laboratory BTEX results, it is recommended to discontinue sampling of MW #3 and MW #4.

The presence of BTEX above NMWQCC standards in MW #5 down gradient of the source area (MW #2R) suggest a continuance of monitoring and testing on an annual basis at a minimum. This site will continue to utilize and maintain site specific sampling frequency recommendations stated within the previous operator's NMOCD approved GMP.

Benzene was elevated above the New Mexico Water Quality Control Commission (NMWQCC) standard in MW #5 during all four sampling events conducted in 2021. Total xylenes were elevated above the NMWQCC standard in MW #5 during the June 9 and August 19, 2021 sampling events. A groundwater sampling results table is included and the groundwater sampling laboratory reports from the 2021 groundwater sampling are included.

RE: GCU 204E

OrderNo.: 2103378

Dear Steve Moskal:

Hall Environmental Analysis Laboratory received 1 sample(s) on 3/6/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read 'Andy Freeman', is written over a white background.

RE: Gallegos Canyon Unit 204E

OrderNo.: 2106554

Dear Steve Moskal:

Hall Environmental Analysis Laboratory received 1 sample(s) on 6/10/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman", is written over a horizontal line.

RE: GCU 204E

OrderNo.: 2108B47

Dear Steve Moskal:

Hall Environmental Analysis Laboratory received 1 sample(s) on 8/20/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman", is written over a horizontal line.

RE: GCU 204E

OrderNo.: 2112693

Dear Julie Best:

Hall Environmental Analysis Laboratory received 1 sample(s) on 12/9/2021 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman", is written over a horizontal line.

Andy Freeman
Laboratory Manager

Chain of Custody

1. Is Chain of Custody complete? Yes ☒ No ☐ Not Present ☐
2. How was the sample delivered? Courier

Log In

3. Was an attempt made to cool the samples? Yes ☒ No ☐ NA ☐
4. Were all samples received at a temperature of $>0^{\circ}\text{C}$ to 6.0°C ? Yes ☒ No ☐ NA ☐
5. Sample(s) in proper container(s)? Yes ☒ No ☐
6. Sufficient sample volume for indicated test(s)? Yes ☒ No ☐
7. Are samples (except VOA and ONG) properly preserved? Yes ☒ No ☐
8. Was preservative added to bottles? Yes ☐ No ☒ NA ☐
9. Received at least 1 vial with headspace $<1/4"$ for AQ VOA? Yes ☒ No ☐ NA ☐
10. Were any sample containers received broken? Yes ☐ No ☒
11. Does paperwork match bottle labels?
(Note discrepancies on chain of custody) Yes ☒ No ☐
12. Are matrices correctly identified on Chain of Custody? Yes ☒ No ☐
13. Is it clear what analyses were requested? Yes ☒ No ☐
14. Were all holding times able to be met?
(If no, notify customer for authorization.) Yes ☒ No ☐
