Lease operator found a blow seal on swd pump around 2 pm. Locked and tagged out valves and power. Looks to have spilled 3 to 4 bbls. All fluid inside containment. Will update email once vacuum truck has cleaned spill. And given a barrel count.

Thank you,

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
