

## \*\*\*\*\* LIQUID SPILLS - VOLUME CALCULATIONS \*\*\*\*\*

Location of spill: Jalapeno 3

Date of Spill: 8/7/2024

Site Soil Type:

Average Daily Production: BBL Oil BBL Water

## Total Area Calculations

| Total Surface Area | width  |   | length |   | wet soil depth | oil (%) |
|--------------------|--------|---|--------|---|----------------|---------|
| Rectangle Area #1  | 100 ft | X | 188 ft | X | 3 in           | 5%      |
| Rectangle Area #2  | 100 ft | X | 44 ft  | X | 1 in           | 0%      |
| Rectangle Area #3  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |
| Rectangle Area #4  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |
| Rectangle Area #5  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |
| Rectangle Area #6  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |
| Rectangle Area #7  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |
| Rectangle Area #8  | 0 ft   | X | 0 ft   | X | 0 in           | 0%      |

Porosity 0.15 gal per gal

## Saturated Soil Volume Calculations:

|                            |                | H2O           | OIL         |
|----------------------------|----------------|---------------|-------------|
| Area #1                    | 18800 sq. ft.  | 4,465 cu. ft. | 235 cu. ft. |
| Area #2                    | 4400 sq. ft.   | 367 cu. ft.   | cu. ft.     |
| Area #3                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Area #4                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Area #5                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Area #6                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Area #7                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Area #8                    | 0 sq. ft.      | cu. ft.       | cu. ft.     |
| Total Solid/Liquid Volume: | 23,200 sq. ft. | 4,832 cu. ft. | 235 cu. ft. |

## Estimated Volumes Spilled

|                     | H2O       | OIL     |
|---------------------|-----------|---------|
| Liquid in Soil:     | 129.1 BBL | 6.3 BBL |
| Liquid Recovered :  | 0.0 BBL   | 0.0 BBL |
| Spill Liquid        | 129.1 BBL | 6.3 BBL |
| Total Spill Liquid: | 135.4     |         |

## Recovered Volumes

Estimated oil recovered: 0.0 BBL  
 Estimated water recovered: 0.0 BBL

| Soil Type         | Porosity |
|-------------------|----------|
| Clay              | 0.15     |
| Peat              | 0.40     |
| Glacial Sediments | 0.13     |
| Sandy Clay        | 0.12     |
| Silt              | 0.16     |
| Loess             | 0.25     |
| Fine Sand         | 0.16     |

**QUESTIONS**

| <b>Nature and Volume of Release (continued)</b>                                                                                                         |                                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Is this a gas only submission (i.e. only significant Mcf values reported)                                                                               | No, according to supplied volumes this does not appear to be a "gas only" report.                                                      |
| Was this a major release as defined by Subsection A of 19.15.29.7 NMAC                                                                                  | Yes                                                                                                                                    |
| Reasons why this would be considered a submission for a notification of a major release                                                                 | From paragraph A. "Major release" determine using:<br>(1) an unauthorized release of a volume, excluding gases, of 25 barrels or more. |
| With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form. |                                                                                                                                        |

**Initial Response**

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.

|                                                                                                                    |               |
|--------------------------------------------------------------------------------------------------------------------|---------------|
| The source of the release has been stopped                                                                         | True          |
| The impacted area has been secured to protect human health and the environment                                     | True          |
| Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices | True          |
| All free liquids and recoverable materials have been removed and managed appropriately                             | True          |
| If all the actions described above have not been undertaken, explain why                                           | Not answered. |

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

QUESTIONS

Site Characterization

Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

|                                                                                                                            |               |
|----------------------------------------------------------------------------------------------------------------------------|---------------|
| What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs) | Not answered. |
| What method was used to determine the depth to ground water                                                                | Not answered. |
| Did this release impact groundwater or surface water                                                                       | Not answered. |

What is the minimum distance, between the closest lateral extents of the release and the following surface areas:

|                                                                                                                           |               |
|---------------------------------------------------------------------------------------------------------------------------|---------------|
| A continuously flowing watercourse or any other significant watercourse                                                   | Not answered. |
| Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)                                         | Not answered. |
| An occupied permanent residence, school, hospital, institution, or church                                                 | Not answered. |
| A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes | Not answered. |
| Any other fresh water well or spring                                                                                      | Not answered. |
| Incorporated municipal boundaries or a defined municipal fresh water well field                                           | Not answered. |
| A wetland                                                                                                                 | Not answered. |
| A subsurface mine                                                                                                         | Not answered. |
| An (non-karst) unstable area                                                                                              | Not answered. |
| Categorize the risk of this well / site being in a karst geology                                                          | Not answered. |
| A 100-year floodplain                                                                                                     | Not answered. |
| Did the release impact areas not on an exploration, development, production, or storage site                              | Not answered. |

Remediation Plan

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

|                                                             |    |
|-------------------------------------------------------------|----|
| Requesting a remediation plan approval with this submission | No |
|-------------------------------------------------------------|----|

The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.
