SITE CHARACTERIZATION REMEDIATION PLAN

Culebra Bluff Section 26 CS

Eddy County, New Mexico

Incident Number nAPP2300944487

Prepared For:

Chevron USA, Inc.

6301 Deauville Blvd.

Midland, TX 79706

Carlsbad ● Houston ● Midland ● San Antonio ● Lubbock ● Hobbs ● Lafayette

SYNOPSIS

Etech Environmental & Safety Solutions, Inc. (Etech), on behalf of Chevron USA, Inc. (Chevron), presents the following Site Characterization Remediation Plan (SCRP) detailing current remediation activities and a corrective action plan for an inadvertent release of crude oil at the Culebra Bluff Section 26 CS (Site) (**Figure 1** in **Appendix A**). Based on completed remedial actions and laboratory analytical results from recent soil sampling events, Chevron proposes this SCRP, which details remediation objectives to rectify environmental impacts at the Site, which includes deferral residual impacted soil within an infrastructure area associated with multiple aboveground equipment, surface and subsurface lines for the safety of onsite personnel and requesting No Further Action (NFA) until the Site undergoes major deconstruction or plugging and abandonment (P&A), whichever comes first.

SITE LOCATION AND BACKGROUND

On December 27, 2022, a solenoid malfunction resulting in a pump failure caused the release of approximately 7.124 barrels (bbls) of crude oil onto the pad surface. No free-standing fluids were recovered. Chevron reported the release to the New Mexico Oil Conservation Division (NMOCD) on a Corrective Action Form C-141 (Form C-141), which was received by the NMOCD on January 1, 2023, and was subsequently assigned Incident Number nAPP2300944487. On January 18 and February 2, 2023, Etech conducted a site assessment and preliminary delineation activities to assess the presence and/or absence of impacts at the Site. Based on visual observation and field screening results from delineation activities, excavation appeared warranted.

The Site was reported on the Form C-141 to be located in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County, New Mexico (32.277825°, -104.054325°) and associated with oil and gas exploration and production operations on Private Land.

The location of the release is located northwest of the original provided coordinates in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County New Mexico (32.278086°, -104.054577°).

A Closure Request was submitted to the NMOCD but was denied on April 17, 2024, for not providing definition of the edge of the release via delineation soil sampling. On April 30, 2024, Etech visited the Site to collect horizontal delineation samples as requested by the NMOCD. It was determined that de minimis impacted soil was present surrounding the subject release area which required more extensive delineation soil sampling to fully characterize potentially unrelated impacts. Due to recent findings from continued delineation laboratory activities, Chevron has prepared this SCRP to propose a corrective action for nAPP2300944487.

SITE CHARACTERIZATION AND CLOSURE CRITERIA

The Site was characterized according to Table I, Closure Criteria for Soils Impacted by a Release, of Title 19, Chapter 15, Part 29, Section 12 (19.15.29.12) of the New Mexico Administrative Code (NMAC) considering depth to groundwater and the proximity to:

- Any continuously flowing watercourse or any other significant watercourse;
- Any lakebed, sinkhole or playa lake (measured from the ordinary high-water mark);
- An occupied permanent residence, school, hospital, institution or church;
- A spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes;
- Any freshwater well or spring;
- Incorporated municipal boundaries or a defined municipal fresh water well field covered under a municipal ordinance;

- A wetland;
- A subsurface mine;
- An unstable area (i.e. high karst potential); and
- A 100-year floodplain.

The nearest, current (less than 25 years old) permitted water well with depth to water data is New Mexico Office of the State Engineer (NMOSE) well C-03535, located approximately 0.72 miles southeast of the Site (**Figure 1A** in **Appendix A**). NMOSE well C-03535 has a reported depth of water 25 feet below ground surface (bgs) from 2012. The well record is provided in **Appendix B**.

The Site is located within a medium karst potential area and all other potential receptors are not within the established buffers defined in NMAC 19.15.29.12. Receptor details from the site characterization are included in **Figure 1B** and **Figure 1C** in **Appendix A**.

Based on the results from the desktop review and regional depth to groundwater at the Site, the following Closure Criteria was applied:

Constituents of Concern (COCs)	Laboratory Analytical Method	Closure Criteria†
Chloride	(Environmental Protection Agency) EPA 300.0	600 milligrams per kilogram (mg/kg)
Total Petroleum Hydrocarbon (TPH)	EPA 8015 M/D	100 mg/kg
Benzene	EPA 8021B	10 mg/kg
Benzene, Toluene, Ethylbenzene, Total Xylenes (BTEX)	EPA 8021B	50 mg/kg

†*The reclamation concentration requirements of 600 mg/kg chloride and 100 mg/kg TPH apply to the top 4 feet of areas to be immediately reclaimed following remediation pursuant to NMAC 19.15.17.13*.

EXCAVATION SOIL SAMPLING ACTIVITIES

On July 5, 2023, Etech personnel oversaw the excavation of identified impacts based on laboratory analytical results and visual observations via mechanical equipment. Excavation activities were driven by field screening soil samples for volatile organic compounds (VOCs) using a photoionization detector (PID) and chloride using Hach® chloride QuanTab® test strips.

Following the removal of soil, Etech collected 5-point composite confirmation excavation soil samples at a sampling frequency of 200 square feet from the excavation floor and sidewalls. The 5-point composite samples were comprised of five equivalent aliquots homogenized in a 1-gallon, resealable plastic bag. Floor soil samples were collected from approximately 6 inches bgs. Due to the shallow excavation depth, sidewall soil samples were included in the floor soil samples. The soil samples were then placed into lab provided pre-cleaned glass jars, packaged with minimal void space, labeled, and immediately placed on ice. The soil samples were transported under strict chain-of-custody procedures to Permian Basin Environmental Laboratory (PBELAB) in Midland, Texas, for analysis of COCs. The location of confirmation excavation soil samples and excavation area (AOC #1) is shown in **Figure 2** in **Appendix A**.

Impacted soil removed from the Site was transported to a licensed and approved landfill under Chevron approved waste manifests. Upon receipt of the final confirmation excavation soil samples results, the excavation was backfilled with clean, locally sourced soil and the Site was restored to “as close to its original state” as possible. Photographic documentation of excavation activities is included in **Appendix C**.

EXCAVATION LABORATORY ANALYTICAL RESULTS

Laboratory analytical results for all final confirmation excavation soil samples indicated all analyzed COCs were below the Site Closure Criteria. Laboratory analytical results are summarized in **Table 1** included in **Appendix D**. The executed chain-of-custody forms and laboratory analytical reports are provided in **Appendix E**.

LATERAL DELINEATION SOIL SAMPLING ACTIVITIES

On April 30, 2024, Etech visited the Site to collect horizontal delineation samples as requested by the NMOCD. Twelve boreholes (BH01 through BH12) were advanced via hand auger, which were driven by field screening soil samples as previously described or until advancement refusal. It was determined that de minimis impacted soil was present surrounding the subject release area. No samples were submitted for laboratory analysis at that time as heavy equipment was warranted to achieve full delineation. Elevated field screening results for chloride ranged from 632 mg/kg to 4,764 mg/kg. VOC concentrations via the PID were non-detectable. Delineation of soil sample locations and chloride field screening results are shown on **Figure 3** in **Appendix A**.

DELINEATION SOIL SAMPLING ACTIVITIES

On July 17, 2024, Etech conducted delineation activities to assess the presence or absence of residual impacts associated with the AOC. Eight boreholes (BH01 through BH08) were advanced via heavy equipment which were driven by field screening soil samples for VOCs using a PID and chloride using Hach® chloride QuanTab® test strips. A minimum of two soil samples per delineation sampling location were collected for laboratory analysis, representing the highest observed field screened concentrations and the greatest depth. Field screening results and soil descriptions were denoted on soil sampling logs, which are included as **Appendix C**. The locations of the delineation soil samples were mapped with a handheld GPS unit and are shown in **Figure 2** in **Appendix A**. Photographic documentation during delineation activities is included in **Appendix D**.

Delineation soil samples were placed directly into lab provided pre-cleaned glass jars, packaged with minimal void space, labeled, and immediately placed on ice. The soil samples were transported under strict chain-of-custody procedures, to Envirotech Analytical Laboratory (Envirotech) in Farmington, New Mexico, for analysis of COCs.

DELINEATION LABORATORY ANALYTICAL RESULTS

Laboratory analytical results indicated COC concentrations were below the Site Closure Criteria, however, soil samples BH04 and BH06 (AOC #2 on **Figure 2** in **Appendix A**) exceeded the Closure Criteria at 0.5-foot bgs. Laboratory analytical results are summarized in **Table 1** as **Attachment E**, and the complete laboratory reports with chain-of-custody documentation is included as **Attachment F**.

PROPOSED REMEDIATION PLAN

Based on the delineation soil sample laboratory analytical results, the following conclusions regarding the release are presented:

- Based on laboratory analytical results, TPH, BTEX and benzene concentrations were below the Site Closure Criteria for all analyzed soil samples.

- Based on laboratory analytical results, chloride concentrations exceeding the Closure Criteria exist at 0.5-foot bgs at BH04 and BH06. Chloride concentrations were below the Closure Criteria for all other delineation soil samples.
- Concentrations of all the COCs for the terminus delineation soil samples from each sampling location were below the applicable Site Closure Criteria, providing sufficient vertical delineation.
- Vertical delineation within the previous excavation was achieved via confirmation sampling.

Based on the conclusion drawn above, Chevron proposes the following remedial corrective actions:

- Based off delineation laboratory analytical results, Chevron proposes to excavate a minimum of 1-foot bgs within proximity of delineation soil sampling locations BH04 though BH06 (approximately 52 cubic yards). The excavation will extend laterally until the concentrations of the COCs for confirmation soil sample results are in accordance with the applicable Site Closure Criteria. The proposed excavation is presented on **Figure 4** in **Appendix A.**
- The proposed excavation may require third-party operator oversight and additional safety measures near their respective subsurface pipelines before or during excavation activities. In which case, Chevron and/or the third-party operator may implement additional safety precautions above encroachment guidelines at their company's discretion for the health and safety of on-site personnel and for the structural integrity of utilities. Such restrictions include but are not limited to:
    i. Shifting the proposed excavation extent(s) to adhere to established buffer zone(s) around one or more utilities.
    ii. Inducing a change in proposed excavation(s) depth(s) around one or more utilities.
- Upon receipt and review of excavation confirmation soil sample laboratory analytical results, Chevron will determine the appropriate measure of corrective actions that will include:
    i. Documenting the removal of impacted soil at the Site with a subsequent Report detailing assessment, sampling activities, and Site restoration activities including, but not limited to backfilling the excavation with lean, locally sourced soil and restored to "as close to its original state as possible."
- Chevron estimates residual impacts within the infrastructure area to not exceed 4 feet bgs based on field screening and laboratory data collected within and around the AOC. Additional vertical delineation within the previously excavated area will be performed to confirm as well as other areas within and around the infrastructure area via discrete sampling. Once supplemental vertical delineation is achieved, Chevron will request to defer residual impacted soil that cannot be safely removed within multiple aboveground equipment, surface and subsurface lines for the safety of onsite personnel. A deferral request summarizing estimated residual impacts and detailed corrective action summary will be prepared for NMOCD following remediation activities associated with the Site.

SCRP PROPOSAL

Chevron believes residual soil impacts associated with the inadvertent release were initially excavated and removed from the Site based on the reportable volume, visual observation from the initial assessment and laboratory analytical results from confirmation excavation soil samples. However, based on the recent site

review and laboratory results from delineation soil sampling activities conducted around the AOC, further remediation is warranted.

Remediation activities will begin within 90 days following the approval of this SCRP, which will include excavation of the area associated with BH04 and BH06 and collecting all delineation soil sample laboratory data to complete a deferral request for NMOCD based on the current Site conditions.

Chevron believes this SCRP will meet requirements set forth in NMAC 19.15.29.13 and be a balanced protection of human health, the environment and groundwater. As such, Chevron respectfully requests approval of this SCRPA from NMOCD. If you have any questions or comments, please do not hesitate to contact Joseph Hernandez at (281) 702-2329 or joseph@etechenv.com or Erick Herrera at (432) 305-6416 or erick@etechenv.com. Documentation of correspondence and notifications regarding Incident Number nAPP2220225509 is presented as **Appendix G**. Previously submitted reports are located in **Appendix H**. The NMOCD incident file link with incident events and additional correspondence can be found here.

Sincerely,
Etech Environmental and Safety Solutions, Inc.

Notes and Definitions

SUB-13	Subcontract of analyte/analysis to ALS Houston.
S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate.
ROI	Received on Ice
R3	The RPD exceeded the acceptance limit due to sample matrix effects.
NPBEL C(	Chain of Custody was not generated at PBELAB
BULK	Samples received in Bulk soil containers may be biased low in the nC6-C12 TPH Range
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Work Order: **HS23070676**

Laboratory Results for: **3G11011**

Dear Brent Barron,

ALS Environmental received 2 sample(s) on Jul 12, 2023 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: JUMOKE.LAWAL

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
M	Manually integrated, see raw data for justification
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL/SDL

Acronym	Description
DCS	Detectability Check Study
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitaion Limit
SD	Serial Dilution
SDL	Sample Detection Limit
TRRP	Texas Risk Reduction Program

Unit Reported	Description
mg/Kg	Milligrams per Kilogram

After printing this label:
CONSIGNEE COPY - PLEASE PLACE IN FRONT OF POUCH
1. Fold the printed page along the horizontal line.
2. Place label in shipping pouch and affix it to your shipment.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Workorder: E407153
Date Received: 7/19/2024 7:15:00AM

Erick Herrera,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 7/19/2024 7:15:00AM, under the Project Name: Culebra Bluff Section 26 Compressor Station.

The analytical test results summarized in this report with the Project Name: Culebra Bluff Section 26 Compressor Station apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues reguarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

Walter Hinchman

QC Summary Report Comment:
Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

Definitions and Notes

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.
If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client:	Chevron	Date Received:	07/19/24 07:15	Work Order ID:	E407153
Phone:	(505)326-2657	Date Logged In:	07/18/24 14:28	Logged In By:	Noe Soto
Email:		Due Date:	07/25/24 17:00 (4 day TAT)		

Chain of Custody (COC)

1. Does the sample ID match the COC?	Yes	
2. Does the number of samples per sampling site location match the COC	Yes	
3. Were samples dropped off by client or carrier?	Yes	Carrier: Courier
4. Was the COC complete, i.e., signatures, dates/times, requested analyses?	Yes	
5. Were all samples received within holding time? Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this disucssion.	Yes	

Comments/Resolution

Sample Turn Around Time (TAT)

6. Did the COC indicate standard TAT, or Expedited TAT?	Yes	

Sample Cooler

7. Was a sample cooler received?	Yes	
8. If yes, was cooler received in good condition?	Yes	
9. Was the sample(s) received intact, i.e., not broken?	Yes	
10. Were custody/security seals present?	No	
11. If yes, were custody/security seals intact?	NA	
12. Was the sample received on ice? If yes, the recorded temp is 4°C, i.e., 6°±2°C Note: Thermal preservation is not required, if samples are received w/i 15 minutes of sampling	Yes	
13. If no visible ice, record the temperature. Actual sample temperature: 4°C		

Sample Container

14. Are aqueous VOC samples present?	No	
15. Are VOC samples collected in VOA Vials?	NA	
16. Is the head space less than 6-8 mm (pea sized or less)?	NA	
17. Was a trip blank (TB) included for VOC analyses?	NA	
18. Are non-VOC samples collected in the correct containers?	Yes	
19. Is the appropriate volume/weight or number of sample containers collected?	Yes	

Field Label

20. Were field sample labels filled out with the minimum information:		
Sample ID?	Yes	
Date/Time Collected?	Yes	
Collectors name?	Yes	

Sample Preservation

21. Does the COC or field labels indicate the samples were preserved?	No	
22. Are sample(s) correctly preserved?	NA	
24. Is lab filteration required and/or requested for dissolved metals?	No	

Multiphase Sample Matrix

26. Does the sample have more than one phase, i.e., multiphase?	No	
27. If yes, does the COC specify which phase(s) is to be analyzed?	NA	

Subcontract Laboratory

28. Are samples required to get sent to a subcontract laboratory?	No	
29. Was a subcontract laboratory specified by the client and if so who?	NA	Subcontract Lab: NA

Workorder: E407151
Date Received: 7/19/2024 7:15:00AM

Erick Herrera,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 7/19/2024 7:15:00AM, under the Project Name: Culebra Bluff Section 26 Compressor Station.

The analytical test results summarized in this report with the Project Name: Culebra Bluff Section 26 Compressor Station apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues reguarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

Walter Hinchman

QC Summary Report Comment:
Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

Definitions and Notes

Chevron	Project Name:	Culebra Bluff Section 26 Compressor Station	
322 Road 3100	Project Number:	23077-0001	**Reported:**
Aztec NM, 87410	Project Manager:	Erick Herrera	07/23/24 14:11

M2	Matrix spike recovery was outside quality control limits. The associated LCS spike recovery was acceptable.
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
RPD	Relative Percent Difference
DNI	Did Not Ignite
DNR	Did not react with the addition of acid or base.

Note (1): Methods marked with ** are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.
If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client:	Chevron	Date Received:	07/19/24 07:15	Work Order ID:	E407151
Phone:	(505)326-2657	Date Logged In:	07/18/24 14:15	Logged In By:	Noe Soto
Email:		Due Date:	07/25/24 17:00 (4 day TAT)		

Chain of Custody (COC)

1. Does the sample ID match the COC?	Yes	
2. Does the number of samples per sampling site location match the COC	Yes	
3. Were samples dropped off by client or carrier?	Yes	Carrier: Courier
4. Was the COC complete, i.e., signatures, dates/times, requested analyses?	Yes	
5. Were all samples received within holding time? Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this disucssion.	Yes	

Comments/Resolution

Sample Turn Around Time (TAT)

6. Did the COC indicate standard TAT, or Expedited TAT?	Yes	

Sample Cooler

7. Was a sample cooler received?	Yes	
8. If yes, was cooler received in good condition?	Yes	
9. Was the sample(s) received intact, i.e., not broken?	Yes	
10. Were custody/security seals present?	No	
11. If yes, were custody/security seals intact?	NA	
12. Was the sample received on ice? If yes, the recorded temp is 4°C, i.e., 6°±2°C Note: Thermal preservation is not required, if samples are received w/i 15 minutes of sampling	Yes	
13. If no visible ice, record the temperature. Actual sample temperature: 4°C		

Sample Container

14. Are aqueous VOC samples present?	No	
15. Are VOC samples collected in VOA Vials?	NA	
16. Is the head space less than 6-8 mm (pea sized or less)?	NA	
17. Was a trip blank (TB) included for VOC analyses?	NA	
18. Are non-VOC samples collected in the correct containers?	Yes	
19. Is the appropriate volume/weight or number of sample containers collected?	Yes	

Field Label

20. Were field sample labels filled out with the minimum information:		
Sample ID?	Yes	
Date/Time Collected?	Yes	
Collectors name?	Yes	

Sample Preservation

21. Does the COC or field labels indicate the samples were preserved?	No	
22. Are sample(s) correctly preserved?	NA	
24. Is lab filteration required and/or requested for dissolved metals?	No	

Multiphase Sample Matrix

26. Does the sample have more than one phase, i.e., multiphase?	No	
27. If yes, does the COC specify which phase(s) is to be analyzed?	NA	

Subcontract Laboratory

28. Are samples required to get sent to a subcontract laboratory?	No	
29. Was a subcontract laboratory specified by the client and if so who?	NA	Subcontract Lab: NA

Client Instruction

Signature of client authorizing changes to the COC or sample disposition.

Subject: [EXTERNAL] Confirmation Sampling

Good afternoon,

Chevron anticipates conducting confirmation soil sampling activities at the following sites between July 5-7, 2023:

Site Name: Culebra Bluff Section 26 Compressor Station
Incident Number: nAPP2300944487

Site Name: Culebra Bluff West 15 CTB
Incident Number: nAPP2226533583

Have a great weekend and 4th of July!

Thank you,

Blake Estep
Etech Environmental & Safety Solutions, Inc.

[NOTIFY] Notification Of Sampling (C-141N) Application

Submission Information

Submission ID:	337840	**Districts:**	Artesia
Operator:	[4323] CHEVRON U S A INC	**Counties:**	Eddy
Description:	CHEVRON U S A INC [4323] , CULEBRA BLUFF SECTION 26 CS , nAPP2300944487		
Status:	APPROVED		
Status Date:	04/25/2024		
References (2):	fAPP2132753053, nAPP2300944487		

Forms

This application type does not have attachments.

Questions

Prerequisites

Incident ID (n#)	**nAPP2300944487**
Incident Name	**NAPP2300944487 CULEBRA BLUFF SECTION 26 CS @ 0**
Incident Type	**Oil Release**
Incident Status	**Initial C-141 Approved**
Incident Facility	**[fAPP2132753053] Culebra Bluff Section 26 CS**

Location of Release Source

Site Name	**CULEBRA BLUFF SECTION 26 CS**
Date Release Discovered	**12/27/2022**
Surface Owner	**Private**

Sampling Event General Information

Please answer all the questions in this group.

What is the sampling surface area in square feet	177
What is the estimated number of samples that will be gathered	4
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	04/30/2024
Time sampling will commence	08:30 AM
Warning: Notification can not be less than two business days prior to conducting final sampling.	
Please provide any information necessary for observers to contact samplers	Please contact Gilbert Moreno at 432-305-6414 with any questions
Please provide any information necessary for navigation to sampling site	From the intersection of NM-387 & GR Howard Road, travel South on 387 for 0.5 miles. Turn East and travel 0.25 miles. Turn South and travel 0.49 miles. Turn East and travel 0.76 miles. Turn North and travel 0.05 miles to the provided GPS coordinates (32.278089, -104.054574).

Acknowledgments

This submission type does not have acknowledgments, at this time.

Comments

No comments found for this submission.

Conditions

Summary: *abarnhill (4/25/2024).* Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.

Reasons

No reasons found for this submission.

Questions

Prerequisites

Incident ID (n#)	**nAPP2300944487**
Incident Name	**NAPP2300944487 CULEBRA BLUFF SECTION 26 CS @ 0**
Incident Type	**Oil Release**
Incident Status	**Initial C-141 Approved**
Incident Facility	**[fAPP2132753053] Culebra Bluff Section 26 CS**

Location of Release Source

Site Name	**CULEBRA BLUFF SECTION 26 CS**
Date Release Discovered	**12/27/2022**
Surface Owner	**Private**

Sampling Event General Information

Please answer all the questions in this group.

What is the sampling surface area in square feet	18,000
What is the estimated number of samples that will be gathered	30
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	07/17/2024
Time sampling will commence	08:30 AM
Warning: Notification can not be less than two business days prior to conducting final sampling.	
Please provide any information necessary for observers to contact samplers	Please contact Joseph Hernandez at 432-305-6413 with any questions. Sampling will take place over 3 days.
Please provide any information necessary for navigation to sampling site	From the intersection of NM-387 & GR Howard Road, travel South on 387 for 0.5 miles. Turn East and travel 0.25 miles. Turn South and travel 0.49 miles. Turn East and travel 0.76 miles. Turn North and travel 0.05 miles to the provided GPS coordinates (32.278089, -104.054574).

Acknowledgments

This submission type does not have acknowledgments, at this time.

Comments

No comments found for this submission.

Conditions

Summary: *abarnhill (7/11/2024).* Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.

Reasons

No reasons found for this submission.

CLOSURE REQUEST REPORT

Culebra Bluff Section 26 CS

Eddy County, New Mexico

Incident Number nAPP2300944487

Prepared For:

Chevron USA, Inc.

6301 Deauville Blvd.

Midland, TX 79706

Carlsbad ● Midland ● San Antonio ● Lubbock ● Hobbs ● Lafayette

SYNOPSIS

Etech Environmental & Safety Solutions, Inc. (Etech), on behalf of Chevron USA, Inc. (Chevron), presents the following Closure Request Report (CRR) detailing excavation activities and subsequent soil sampling activities associated with an inadvertent release of crude oil at the Culebra Bluff Section 26 CS (Site) (**Figure 1** in **Appendix A**). Based on completed remedial actions and laboratory analytical results from recent soil sampling events, Chevron is requesting No Further Action (NFA) at the Site.

SITE LOCATION AND BACKGROUND

On December 27, 2022, a solenoid malfunction resulting in a pump failure caused the release of approximately 7.124 barrels (bbls) of crude oil onto the pad surface. No free-standing fluids were recovered. Chevron reported the release to the New Mexico Oil Conservation Division (NMOCD) on a Corrective Action Form C-141 (Form C-141), which was received by the NMOCD on January 1, 2023, and was subsequently assigned Incident Number nAPP2300944487. On January 18 and February 2, 2023, Etech conducted a site assessment and delineation activities to assess the presence and/or absence of impacts at the Site. Based on visual observation and field screening results from delineation activities, excavation appeared warranted.

The Site was reported on the Form C-141 to be located in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County, New Mexico (32.277825°, -104.054325°) and associated with oil and gas exploration and production operations on Private Land.

The location of the release is located northwest of the original provided coordinates in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County New Mexico (32.278086°, -104.054577°).

SITE CHARACTERIZATION AND CLOSURE CRITERIA

The Site was characterized according to Table I, Closure Criteria for Soils Impacted by a Release, of Title 19, Chapter 15, Part 29, Section 12 (19.15.29.12) of the New Mexico Administrative Code (NMAC) considering depth to groundwater and the proximity to:

- Any continuously flowing watercourse or any other significant watercourse;
- Any lakebed, sinkhole or playa lake (measured from the ordinary high-water mark);
- An occupied permanent residence, school, hospital, institution or church;
- A spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes;
- Any freshwater well or spring;
- Incorporated municipal boundaries or a defined municipal fresh water well field covered under a municipal ordinance;
- A wetland;
- A subsurface mine;
- An unstable area (i.e. high karst potential); and
- A 100-year floodplain.

Regional depth to groundwater at the Site is estimated to be less than 50 feet below ground surface (bgs), based off nearby wells with available depth to groundwater data. The closest well with recent depth to groundwater data is United States Geological Survey (USGS) well 321701104034401, located approximately 0.64 miles northwest of the Site. USGS well 321701104034401 has a reported depth to groundwater at 48.74 feet below ground surface (bgs) from 2022. Referenced well records used to determine the regional depth to groundwater are included in **Appendix B**.

All other potential receptors are not within the established buffers in NMAC 19.15.29.12. Receptor details and sources used for the site characterization are included in **Figure 1** in **Appendix A**.

Based on the results from the desktop review and regional depth to groundwater at the Site, the following Closure Criteria was applied:

Constituents of Concern (COCs)	Laboratory Analytical Method	Closure Criteria†
Chloride	(Environmental Protection Agency) EPA 300.0	600 milligrams per kilogram (mg/kg)
Total Petroleum Hydrocarbon (TPH)	EPA 8015 M/D	100 mg/kg
Benzene	EPA 8021B	10 mg/kg
Benzene, Toluene, Ethylbenzene, Total Xylenes (BTEX)	EPA 8021B	50 mg/kg

†The reclamation concentration requirements of 600 mg/kg chloride and 100 mg/kg TPH apply to the top 4 feet of areas to be immediately reclaimed following remediation pursuant to NMAC 19.15.17.13.

EXCAVATION SOIL SAMPLING ACTIVITIES

On July 5, 2023, Etech personnel oversaw the excavation of identified impacts based on laboratory analytical results and visual observations via mechanical equipment. Excavation activities were driven by field screening soil samples for volatile organic compounds (VOCs) using a photoionization detector (PID) and chloride using Hach® chloride QuanTab® test strips.

Following the removal of soil, Etech collected 5-point composite confirmation excavation soil samples at a sampling frequency of 200 square feet from the excavation floor and sidewalls. The 5-point composite samples were comprised of five equivalent aliquots homogenized in a 1-gallon, resealable plastic bag. Floor soil samples were collected from approximately 6 inches bgs. Due to the shallow excavation depth, sidewall soil samples were included in the floor soil samples. The soil samples were then placed into lab provided pre-cleaned glass jars, packaged with minimal void space, labeled, and immediately placed on ice. The soil samples were transported under strict chain-of-custody procedures to Permian Basin Environmental Laboratory (PBELAB) in Midland, Texas, for analysis of COCs. The location of confirmation excavation soil samples is shown in **Figure 2** in **Appendix A**.

Impacted soil removed from the Site was transported to a licensed and approved landfill under Chevron approved waste manifests. Upon receipt of the final confirmation excavation soil samples results, the excavation was backfilled with clean, locally sourced soil and the Site was restored to “as close to its original state” as possible. Photographic documentation of excavation activities is included in **Appendix C**.

LABORATORY ANALYTICAL RESULTS

Laboratory analytical results for all final confirmation excavation soil samples indicated all analyzed COCs were below the Site Closure Criteria. Laboratory analytical results are summarized in **Table 1** included in **Appendix D**. The executed chain-of-custody forms and laboratory analytical reports are provided in **Appendix E**.

SITE CLOSURE REQUEST

Based on laboratory analytical results for confirmation excavation soil samples, Chevron believes residual soil impacts associated with the inadvertent release have been excavated and removed from the Site. Concentrations of COCs for all final excavation confirmation soil samples were below the Site Closure

Criteria. Chevron believes the completed remedial actions have mitigated impacts at the Site and the requirements set forth in NMAC guidelines and be protective of human health, the environment, and groundwater. As such, NFA appears warranted at this time and Incident Number nAPP2300944487 should be respectfully considered for Closure by the NMOCD.

If you have any questions or comments, please do not hesitate to contact Blake Estep at (432) 894-6038 or blake@etechenv.com. **Appendix F** provides correspondence email notification receipts associated with the subject release.

Sincerely,
Etech Environmental and Safety Solutions, Inc.

Blake Estep

Notes and Definitions

SUB-13	Subcontract of analyte/analysis to ALS Houston.
S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate.
ROI	Received on Ice
R3	The RPD exceeded the acceptance limit due to sample matrix effects.
NPBEL C(	Chain of Custody was not generated at PBELAB
BULK	Samples received in Bulk soil containers may be biased low in the nC6-C12 TPH Range
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Laboratory Results for: **3G11011**

Dear Brent Barron,

ALS Environmental received 2 sample(s) on Jul 12, 2023 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: JUMOKE.LAWAL

After printing this label:
CONSIGNEE COPY - PLEASE PLACE IN FRONT OF POUCH
1. Fold the printed page along the horizontal line.
2. Place label in shipping pouch and affix it to your shipment.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Subject: [EXTERNAL] Confirmation Sampling

Good afternoon,

Chevron anticipates conducting confirmation soil sampling activities at the following sites between July 5-7, 2023:

Site Name: Culebra Bluff Section 26 Compressor Station
Incident Number: nAPP2300944487

Site Name: Culebra Bluff West 15 CTB
Incident Number: nAPP2226533583

Have a great weekend and 4th of July!

Thank you,

Blake Estep

SITE CHARACTERIZATION REMEDIATION PLAN

Culebra Bluff Section 26 CS

Eddy County, New Mexico

Incident Number nAPP2300944487

Prepared For:

Chevron USA, Inc.

6301 Deauville Blvd.

Midland, TX 79706

Carlsbad ● Midland ● San Antonio ● Lubbock ● Hobbs ● Lafayette

SYNOPSIS

Etech Environmental & Safety Solutions, Inc. (Etech), on behalf of Chevron USA, Inc. (Chevron), presents the following Site Characterization Remediation Plan (SCRP) detailing remediation activities completed to date and proposing additional delineation to investigate residual impacts to develop and corrective action plan for an inadvertent release of crude oil at the Culebra Bluff Section 26 CS (Site) (**Figure 1** in **Appendix A**). Based on completed remedial actions and laboratory analytical results from recent soil sampling events, Chevron proposes this SCRP, which details remediation objectives to rectify environmental impacts at the Site.

SITE LOCATION AND BACKGROUND

On December 27, 2022, a solenoid malfunction resulting in a pump failure caused the release of approximately 7.124 barrels (bbls) of crude oil onto the pad surface. No free-standing fluids were recovered. Chevron reported the release to the New Mexico Oil Conservation Division (NMOCD) on a Corrective Action Form C-141 (Form C-141), which was received by the NMOCD on January 1, 2023, and was subsequently assigned Incident Number nAPP2300944487. On January 18 and February 2, 2023, Etech conducted a site assessment and delineation activities to assess the presence and/or absence of impacts at the Site. Based on visual observation and field screening results from delineation activities, excavation appeared warranted.

The Site was reported on the Form C-141 to be located in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County, New Mexico (32.277825°, -104.054325°) and associated with oil and gas exploration and production operations on Private Land.

The location of the release is located northwest of the original provided coordinates in Unit G, Section 26, Township 23 South, Range 28 East, in Eddy County New Mexico (32.278086°, -104.054577°).

A Closure Request was submitted to the NMOCD but was denied on April 17, 2024, for not providing definition of the edge of the release via delineation soil sampling. On April 30, 2024, Etech visited the Site to collect horizontal delineation samples as requested by the NMOCD. It was determined that de minimis impacted soil was present surrounding the subject release area which required more extensive delineation soil sampling to fully characterize potentially unrelated impacts. Chevron inadvertently submitted an extension request for Incident Number nAPP2300944487 beyond the deadline date and therefore was not granted a 90-day deadline to complete additional delineation activities. Additional time was requested in an effort to plan and complete delineation activities concurrently with nAPP222022550, which occurred at the same facility and has a current deadline of September 11, 2024. Due to recent Site findings, Chevron respectfully requested NMOCD to reconsider the extension in order to accommodate additional time to complete delineation activities concurrently with nAPP222022550, receive and review delineation laboratory analytical results, and prepare a SCRP. The extension request was denied on July 10, 2024. A summary detailing horizontal sampling activities is included in a section below.

SITE CHARACTERIZATION AND CLOSURE CRITERIA

The Site was characterized according to Table I, Closure Criteria for Soils Impacted by a Release, of Title 19, Chapter 15, Part 29, Section 12 (19.15.29.12) of the New Mexico Administrative Code (NMAC) considering depth to groundwater and the proximity to:

- Any continuously flowing watercourse or any other significant watercourse;
- Any lakebed, sinkhole or playa lake (measured from the ordinary high-water mark);
- An occupied permanent residence, school, hospital, institution or church;

- A spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes;
- Any freshwater well or spring;
- Incorporated municipal boundaries or a defined municipal fresh water well field covered under a municipal ordinance;
- A wetland;
- A subsurface mine;
- An unstable area (i.e. high karst potential); and
- A 100-year floodplain.

Regional depth to groundwater at the Site is estimated to be less than 50 feet below ground surface (bgs), based off nearby wells with available depth to groundwater data. The closest well with recent depth to groundwater data is United States Geological Survey (USGS) well 321701104034401, located approximately 0.64 miles northwest of the Site. USGS well 321701104034401 has a reported depth to groundwater at 48.74 feet below ground surface (bgs) from 2022. Referenced well records used to determine the regional depth to groundwater are included in **Appendix B**.

All other potential receptors are not within the established buffers in NMAC 19.15.29.12. Receptor details and sources used for the site characterization are included in **Figure 1** in **Appendix A**.

Based on the results from the desktop review and regional depth to groundwater at the Site, the following Closure Criteria was applied:

Constituents of Concern (COCs)	Laboratory Analytical Method	Closure Criteria†
Chloride	(Environmental Protection Agency) EPA 300.0	600 milligrams per kilogram (mg/kg)
Total Petroleum Hydrocarbon (TPH)	EPA 8015 M/D	100 mg/kg
Benzene	EPA 8021B	10 mg/kg
Benzene, Toluene, Ethylbenzene, Total Xylenes (BTEX)	EPA 8021B	50 mg/kg

†The reclamation concentration requirements of 600 mg/kg chloride and 100 mg/kg TPH apply to the top 4 feet of areas to be immediately reclaimed following remediation pursuant to NMAC 19.15.17.13.

EXCAVATION SOIL SAMPLING ACTIVITIES

On July 5, 2023, Etech personnel oversaw the excavation of identified impacts based on laboratory analytical results and visual observations via mechanical equipment. Excavation activities were driven by field screening soil samples for volatile organic compounds (VOCs) using a photoionization detector (PID) and chloride using Hach® chloride QuanTab® test strips.

Following the removal of soil, Etech collected 5-point composite confirmation excavation soil samples at a sampling frequency of 200 square feet from the excavation floor and sidewalls. The 5-point composite samples were comprised of five equivalent aliquots homogenized in a 1-gallon, resealable plastic bag. Floor soil samples were collected from approximately 6 inches bgs. Due to the shallow excavation depth, sidewall soil samples were included in the floor soil samples. The soil samples were then placed into lab provided pre-cleaned glass jars, packaged with minimal void space, labeled, and immediately placed on ice. The soil samples were transported under strict chain-of-custody procedures to Permian Basin Environmental Laboratory (PBELAB) in Midland, Texas, for analysis of COCs. The location of confirmation excavation soil samples is shown in **Figure 2** in **Appendix A**.

Impacted soil removed from the Site was transported to a licensed and approved landfill under Chevron approved waste manifests. Upon receipt of the final confirmation excavation soil samples results, the excavation was backfilled with clean, locally sourced soil and the Site was restored to "as close to its original state" as possible. Photographic documentation of excavation activities is included in **Appendix C**.

LABORATORY ANALYTICAL RESULTS

Laboratory analytical results for all final confirmation excavation soil samples indicated all analyzed COCs were below the Site Closure Criteria. Laboratory analytical results are summarized in **Table 1** included in **Appendix D**. The executed chain-of-custody forms and laboratory analytical reports are provided in **Appendix E**.

LATERAL DELINEATION SOIL SAMPLING ACTIVITIES

On April 30, 2024, Etech visited the Site to collect horizontal delineation samples as requested by the NMOCD. **Figure 3** in **Appendix A** depicts the proposed sample locations approved by the NMOCD. Twelve boreholes (BH01 through BH12) were advanced via hand auger, which were driven by field screening soil samples as previously described or until advancement refusal. It was determined that de minimis impacted soil was present surrounding the subject release area. No samples were submitted for laboratory analysis at that time as heavy equipment was warranted to achieve full delineation. Elevated field screening results for chloride ranged from 632 mg/kg to 4,764 mg/kg. VOC concentrations via the PID were non-detectable. Delineation soil sample locations and chloride field screening results are shown on **Figure 4** in **Appendix A**.

SUMMARY AND SCRP PROPOSAL

Chevron believes residual soil impacts associated with the inadvertent release were excavated and removed from the Site based on the reportable volume, visual observation from the initial assessment and laboratory analytical results from confirmation excavation soil samples. However, additional Site investigation is required based on field screening results collected during efforts to fulfill additional NMOCD conditions.

Continued delineation activities is scheduled for the week of July 15, 2024, in order to complete vertical and lateral delineation of residual impacts that may be unrelated to the release. Chevron anticipates collecting all delineation soil sample laboratory data to complete an updated SCRP with a corrective action plan for NMOCD.

If you have any questions or comments, please do not hesitate to contact Joseph S. Hernandez at (432) 305-6413 or joseph@etechenv.com. **Appendix F** provides correspondence email notification and sampling notice receipts associated with the subject release.

Sincerely,
Etech Environmental and Safety Solutions, Inc.

Joseph S. Hernandez

Notes and Definitions

SUB-13	Subcontract of analyte/analysis to ALS Houston.
S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate.
ROI	Received on Ice
R3	The RPD exceeded the acceptance limit due to sample matrix effects.
NPBEL C(	Chain of Custody was not generated at PBELAB
BULK	Samples received in Bulk soil containers may be biased low in the nC6-C12 TPH Range
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
LCS	Laboratory Control Spike
MS	Matrix Spike
Dup	Duplicate

Work Order: **HS23070676**

Laboratory Results for: **3G11011**

Dear Brent Barron,

ALS Environmental received 2 sample(s) on Jul 12, 2023 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: JUMOKE.LAWAL

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Subject: [EXTERNAL] Confirmation Sampling

Good afternoon,

Chevron anticipates conducting confirmation soil sampling activities at the following sites between July 5-7, 2023:

Site Name: Culebra Bluff Section 26 Compressor Station
Incident Number: nAPP2300944487

Site Name: Culebra Bluff West 15 CTB
Incident Number: nAPP2226533583

Have a great weekend and 4th of July!

Thank you,

Blake Estep

Acknowledgments

This submission type does not have acknowledgments, at this time.

Comments

No comments found for this submission.

Conditions

No conditions found for this submission.

Reasons

Summary: *scwells (4/17/2024),* Remediation closure denied. No sidewall samples were able to be collected to ensure edges of release are defined and no delineation data was submitted with report. Please collect 4 delineation samples around excavation area (1 collected in each of the cardinal directions surrounding excavation site at a depth of 6") to ensure entire release area has been laterally defined. Send proposed sampling locations via email to me for approval before collecting them. Note, a C-141N must be submitted two business days prior to collecting samples or they will not be accepted for closure. Resubmit report by May 17, 2024.

Go Back

Subject: [EXTERNAL] Culebra Bluff Section 26 CS - Incident Number nAPP2300944487 Proposed Sampling Point Locations

Good afternoon Shelly,

As discussed earlier today, on behalf of Chevron, please find attached the proposed delineation sample point locations around the excavation area for an inadvertent release on Private Land at the Culebra Bluff Section 26 CS (Site) associated with Incident Number nAPP2300944487.

As requested, below is our sampling plan:

- Collect four (4) soil borings with a hand auger to a depth of 6 inches bgs at the proposed locations (Attached Figure 3), to complete horizontal delineation.
    - One sample will be collected to 6 inches in each cardinal direction surrounding the excavation area.

- Samples will be submitted to an accredited laboratory for laboratory analysis for BTEX, TPH, and Chlorides.
- Prior to collection of delineation soil samples, a sampling notification (C-141N) will be submitted two business days in accordance with Subsection D of 19.15.29.12 NMAC.

Upon receipt and review of laboratory analytical results, a report will be submitted detailing the delineation activities and soil sample results.

I appreciate you taking the time to provide additional details on your denial of this incident.

Please let me know if you have any questions.

Thank you,

Erick Herrera

Incident Type	**Oil Release**
Incident Status	**Initial C-141 Approved**
Incident Facility	**[fAPP2132753053] Culebra Bluff Section 26 CS**

Location of Release Source

Site Name	**CULEBRA BLUFF SECTION 26 CS**
Date Release Discovered	**12/27/2022**
Surface Owner	**Private**

Sampling Event General Information

Please answer all the questions in this group.

What is the sampling surface area in square feet	177
What is the estimated number of samples that will be gathered	4
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	04/30/2024
Time sampling will commence	08:30 AM
Warning: Notification can not be less than two business days prior to conducting final sampling.	
Please provide any information necessary for observers to contact samplers	Please contact Gilbert Moreno at 432-305-6414 with any questions
Please provide any information necessary for navigation to sampling site	From the intersection of NM-387 & GR Howard Road, travel South on 387 for 0.5 miles. Turn East and travel 0.25 miles. Turn South and travel 0.49 miles. Turn East and travel 0.76 miles. Turn North and travel 0.05 miles to the provided GPS coordinates (32.278089, -104.054574).

Site Name	CULEBRA BLUFF SECTION 26 CS
Date Release Discovered	12/27/2022
Surface Owner	Private

Incident Details	
Please answer all the questions in this group.	
Incident Type	Oil Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

Nature and Volume of Release	
Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.	
Crude Oil Released (bbls) Details	Cause: Equipment Failure | Gas Compressor Station | Crude Oil | Released: 7 BBL | Recovered: 0 BBL | Lost: 7 BBL.
Produced Water Released (bbls) Details	*Not answered.*
Is the concentration of chloride in the produced water >10,000 mg/l	*Not answered.*
Condensate Released (bbls) Details	*Not answered.*
Natural Gas Vented (Mcf) Details	*Not answered.*
Natural Gas Flared (Mcf) Details	*Not answered.*
Other Released Details	*Not answered.*
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	*Not answered.*

QUESTIONS (continued)

Operator: CHEVRON U S A INC 6301 Deauville Blvd Midland, TX 79706	OGRID: 4323
	Action Number: 389687
	Action Type: [C-141] Site Char./Remediation Plan C-141 (C-141-v-Plan)

QUESTIONS

Nature and Volume of Release (continued)	
Is this a gas only submission (i.e. only significant Mcf values reported)	**No, according to supplied volumes this does not appear to be a "gas only" report.**
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	**No**
Reasons why this would be considered a submission for a notification of a major release	*Unavailable.*
With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.	

Initial Response	
The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.	
The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	*Not answered.*
Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.	

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Amy Barnhill Title: Waste & Water Specialist Email: ABarnhill@chevron.com Date: 10/03/2024

QUESTIONS (continued)

Operator: CHEVRON U S A INC 6301 Deauville Blvd Midland, TX 79706	OGRID: 4323
	Action Number: 389687
	Action Type: [C-141] Site Char./Remediation Plan C-141 (C-141-v-Plan)

QUESTIONS

Site Characterization	
Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 26 and 50 (ft.)
What method was used to determine the depth to ground water	U.S. Geological Survey
Did this release impact groundwater or surface water	No
What is the minimum distance, between the closest lateral extents of the release and the following surface areas:	
A continuously flowing watercourse or any other significant watercourse	Between 1 and 5 (mi.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Greater than 5 (mi.)
An occupied permanent residence, school, hospital, institution, or church	Between 1000 (ft.) and ½ (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Between 1000 (ft.) and ½ (mi.)
Any other fresh water well or spring	Between ½ and 1 (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Greater than 5 (mi.)
A wetland	Between 1 and 5 (mi.)
A subsurface mine	Between 1 and 5 (mi.)
An (non-karst) unstable area	Between 1 and 5 (mi.)
Categorize the risk of this well / site being in a karst geology	Medium
A 100-year floodplain	Between 1 and 5 (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	No

Remediation Plan	
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
Requesting a remediation plan approval with this submission	Yes
Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.	
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
Soil Contamination Sampling: (Provide the highest observable value for each, in milligrams per kilograms.)	
Chloride (EPA 300.0 or SM4500 Cl B)	440
TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M)	0
GRO+DRO (EPA SW-846 Method 8015M)	0
BTEX (EPA SW-846 Method 8021B or 8260B)	0
Benzene (EPA SW-846 Method 8021B or 8260B)	0
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.	
On what estimated date will the remediation commence	02/02/2023
On what date will (or did) the final sampling or liner inspection occur	11/01/2024
On what date will (or was) the remediation complete(d)	11/15/2024
What is the estimated surface area (in square feet) that will be reclaimed	0
What is the estimated volume (in cubic yards) that will be reclaimed	0
What is the estimated surface area (in square feet) that will be remediated	52
What is the estimated volume (in cubic yards) that will be remediated	2
These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.	
The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

QUESTIONS

Remediation Plan (continued)	
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:	
(Select all answers below that apply.)	
(Ex Situ) Excavation and **off-site** disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for **off-site** disposal	SUNDANCE SERVICES, INC [fKJ1600527371]
OR which OCD approved well (API) will be used for **off-site** disposal	*Not answered.*
OR is the **off-site** disposal site, to be used, out-of-state	*Not answered.*
OR is the **off-site** disposal site, to be used, an NMED facility	*Not answered.*
(Ex Situ) Excavation and **on-site** remediation (i.e. On-Site Land Farms)	*Not answered.*
(In Situ) Soil Vapor Extraction	*Not answered.*
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	*Not answered.*
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	*Not answered.*
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	*Not answered.*
Ground Water Abatement pursuant to 19.15.30 NMAC	*Not answered.*
OTHER (Non-listed remedial process)	*Not answered.*
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.
