Station Name: 503 Titan Inlet  
 Station Number: 1000-0503  
 Station Location: Northwind Midstream  
 Sample Point: Meter Run  
 Method: GPA-2261M  
 Cylinder No: 1111-002690  
 Instrument: 70142339 (Inficon GC-MicroFusion)  
 Last Inst. Cal.: 09/09/2024 08:30:14  
 Analyzed: 09/10/2024 11:07:21 by CDW

Report Date: 09/17/2024  
 Sampled By: Landon Buck  
 Sample Of: Gas Spot  
 Sample Date: 09/06/2024 13:11  
 Sample Conditions: 80 psia, @ 91 °F Ambient: 81 °F  
 Received Date: 09/07/2024  
 Login Date: 09/07/2024  
 Effective Date: 09/06/2024 13:11  
 Flow Rate: 0 MSCFD

QUESTIONS

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 09/25/2024 |
| Time vent or flare was discovered or commenced | 12:00 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                   |
|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Cause: Normal Operations   Gas Plant   Natural Gas Vented   Released: 258 Mcf   Recovered: 0 Mcf   Lost: 258 Mcf. |
| Natural Gas Flared (Mcf) Details                                          | Not answered.                                                                                                     |
| Other Released Details                                                    | Not answered.                                                                                                     |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                     |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                        |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                                                                                                                                  |
|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | False                                                                                                                                                                                                                                                                            |
| Please explain reason for why this event was beyond this operator's control                                                      | Not answered.                                                                                                                                                                                                                                                                    |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | All possible steps were taken to limit the duration and magnitude of this flaring event.                                                                                                                                                                                         |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | No feasible corrective actions are available as the event was essential for standard operations. Sweep gas continuously prevents oxygen from entering the flare header for over eight hours daily. The meter's accuracy is under investigation and will be replaced if necessary |
