Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	High 2nd stage scrubber level on 1800 started the chain reaction which resulted in flaring.
Steps taken to limit the duration and magnitude of vent or flare	Operator bled level down on 1800, blew 1800 and 2700 down and put units back online. All facilities and emissions control devices at this site are operating as designed and, where applicable, are authorized. Chevron field personnel will execute practicable measures to minimize emissions.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Corrective measures focused on reducing gas production as quickly and safely as possible to minimize the duration and volume of gas flared. Reportable quantities, process knowledge, excel spreadsheet, metered volumes, and gas analysis were used in the calculations.
