Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	False
Please explain reason for why this event was beyond this operator's control	the installation of a new high pressure gas lift line required oxygen to be purged from the system in order for the line to be placed into service. this line purge resulted in venting to atmosphere.
Steps taken to limit the duration and magnitude of vent or flare	The newly installed gas lift line was placed into service and purging was completed as soon as practicable.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	The newly installed gas lift line is installed and not further venting is expected from commissioning this piece of equipment.
