**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 10/06/2025 |
| Time vent or flare was discovered or commenced | 12:00 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 19         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                                     |
|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                                       |
| Natural Gas Flared (Mcf) Details                                          | Cause: Midstream Scheduled Maintenance   Separator   Natural Gas Flared   Released: 3,613 Mcf   Recovered: 0 Mcf   Lost: 3,613 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                                                       |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                                       |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                                          |

| Venting or Flaring Resulting from Downstream Activity             |                             |
|-------------------------------------------------------------------|-----------------------------|
| Was this vent or flare a result of downstream activity            | Yes                         |
| Was notification of downstream activity received by this operator | Yes                         |
| Downstream OGRID that should have notified this operator          | [34019] PHILLIPS 66 COMPANY |
| Date notified of downstream activity requiring this vent or flare | 10/02/2025                  |
| Time notified of downstream activity requiring this vent or flare | 08:00 AM                    |

| Steps and Actions to Prevent Waste                                                                                              |                                                                                                                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control | True                                                                                                                                                                                                                       |
| Please explain reason for why this event was beyond this operator's control                                                     | 3rd party high line pressure due to scheduled maintenance. Gas prices are extremely low, so Devon would need to pay 3rd parties to take the gas. Devon also does not want to shut-in wells and lose out on oil production. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                | Flaring at the facility until the maintenance is done.                                                                                                                                                                     |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                               | Keep in contact with 3rd parties on when the major gas takeaway line maintenance will be complete.                                                                                                                         |
