Re: Remediation Work Plan
EOG Resources
Klondike Reuse Pit
Unit G, Section 32, Township 24 South, Range 34 East
Site Coordinates: 32.177017, -103.487712
Lea County, New Mexico
Incident ID: nAPP2516149053

Introduction

New Tech Global Environmental, LLC (NTGE), on behalf of EOG Resources (EOG), submits this Remediation Work Plan to the New Mexico Oil Conservation Division (NMOCD). This report provides documentation of initial soil delineation, sample analysis, and proposed remediation activities for the Klondike Reuse Pit. The site is located in Unit Letter G, Section 32, of Township 24 South and Range 34 East in Lea County, New Mexico. The GPS coordinates for the release site are 32.177017° N Latitude and -103.487712° W Longitude. The Site location with respect to the nearest town is shown on Figure 1 and the topography of the area is shown on Figure 2.

Background

Based on the initial C-141 submitted by EOG and obtained by the New Mexico Oil Conservation District (NMOCD), the release was discovered on June 10, 2025. The release was the result of a tank overflowing, resulting in the release of 3,772 barrels (bbls) of produced water, of which 365 bbls were recovered for a net loss of 3,407 bbls. The release area is shown on Figure 3.

Groundwater and Site Characterization

Based on a review of the New Mexico Office of State Engineers and USGS databases, there are no known water wells within a ½-mile radius of the site. Prior to the permitting process for the recycling facility, EOG had White Drilling install a boring at the site to determine depth to groundwater. The boring was drilled to seventy-five (75) feet (ft) below ground surface (bgs) and no water was encountered. Additionally, on September 25, 2023, Scarborough Drilling Inc., installed a groundwater determination boring to a depth of 55 ft bgs. The soil boring was left open for 72 hours. After 72 hours a water probe was utilized to determine the presence or absence of

groundwater. No groundwater was encountered, and the soil boring was plugged. The boring logs are included with the Site characterization documentation.

What is the shallowest depth to groundwater beneath the area affected by the spill?	Between 75 and 100 (ft)
What method was used to determine the depth to groundwater?	Estimate or Other
Did this spill impact groundwater or surface water?	No
What is the minimum distance between the closest lateral extents of the release and the following surface areas:	
A continuously flowing watercourse or any other significant watercourse?	Between 300 and 500 (ft)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	Between 1/2 and 1 miles
An occupied permanent residence, school, hospital, institution, or church?	Greater than 5 miles
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	Between 1 and 5 miles
Any other fresh water well or spring?	Between 500 and 1/2 mile
Incorporated municipal boundaries or within a defined municipal fresh water well field?	Greater than 5 miles
A wetland?	Between 300 and 500 (ft)
A subsurface mine?	Greater than 5 miles
Categorize the risk of this well / site being in karst geology	Low
A 100-year floodplain?	Greater than 5 miles
Did the release impact areas not on an exploration, development, production, or storage site	Yes

General Site Characterization and Groundwater:

Site Characterization	Average Groundwater Depth (ft)
Low Karst	>75

Table 3.1 Closure Criteria for Soils Impacted by a Release (NMAC 19.15.29.12 & 19.15.29.13)

Regulatory Standard	Chloride	TPH (GRO+DRO)	TPH (GRO+DRO+MRO)	BTEX	Benzene
19.15.29.12 NMAC Table I Closure Criteria for Soils Impacted by a Release	10,000 mg/kg	1,000 mg/kg	2,500 mg/kg	50 mg/kg	10 mg/kg

19.15.29.13 Restoration, Reclamation, and Re-vegetation (top 4 feet)	600 mg/kg	---	100 mg/kg	50 mg/kg	10 mg/kg
Notes: --- = not defined					

NTGE characterized the Site according to Table I, Closure Criteria for Soils Impacted by a Release, from the New Mexico Administrative Code (NMCA) Title 19, Chapter 15, Part 29, Section 12 (NMAC 19.15.29.12). The Site characterization documentation (Points of Diversion, Karst Potential, Significant Watercourse Map, Wetlands Map, and FEMA Map) is attached to the report.

Cultural Properties Protection Rule and Biological Sensitivity Areas

The majority of the impacted area is on areas not previously disturbed by oil and gas; therefore, the Cultural Properties Protection Rule (CPP) is applicable. On June 12, 2025, and August 11, 2025, Goshawk Environmental Consulting, Inc (Goshawk) performed a Class III Archaeological Survey of the release area. Goshawk did not identify any historic properties within the area of potential effect. The Archaeological Survey Cover Sheet is included with this work plan.

Additionally, Goshawk evaluated ecological resources in and within the vicinity of the release. They conducted an evaluation to determine if any waters, as regulated by the US Armey Corps of Engineers (USACE) were present. No potential waters were noted during their investigation and determined that no impacts would be likely to occur within the release area.

NTGE conducted a desktop review of the area for potential habitats of Special Status Plant Species (SSPS). It was determined that the release area on State Trust Land was not within an area for potential habitats. However, on the adjacent BLM land there is potential for Scheer's Beehive Cactus. Goshawk conducted a survey in the area which did not reveal any Scheer's Beehive cactus.

Additionally, a desktop review of the area to determine if the release area is within the Lesser Prairie Chicken (LPC) and Dunes Sagebrush Lizard habitats. It was determined that the release area is within an isolated population area for the LPC. A map of the release area with respect to both habitats is included with this work plan. A review of the Critical Habitat Assessment Tool (CHAT) determined that the area has a CHAT score of five (5). A map depicting the CHAT score is included with this work plan.

Goshawk determined that the release is unlikely to impact any protected ecological resources, karst resources, or cultural resources. The Goshawk report is included with this report.

Soil Survey Information

The site soil is comprised predominately (95 percent) by the Simona Series. The Simona Series of soils consists of shallow and very shallow, well drained soils formed in calcareous sandy sediments over fractured indurated caliche. Soils are found mainly on upland plains, mesa tops, and low ridges with slopes of zero (0) to ten (10) percent. A typical profile consists of grayish

brown fine grain sandy loam from one (1) to eight (8) inches bgs consisting of weak thin platy structure. From eight (8) to sixteen (16) inches bgs the soils are a pale brown fine sandy loam of weak fine subangular blocky structures. From sixteen (16) to thirty (30) inches bgs the soils are whitish caliche of which grades into nodular cemented caliche. From thirty (30) to eighty (80) inches bgs the soils consist of massive, soft calcium carbonate soil with a loam texture with fifteen (15) percent cemented caliche, twenty-five (25) percent moderately cemented caliche with remainder a laminar cap.

The remaining soils at the site are composed of the Bernio Cacique located at the southeast corner of the site. The two distinct soils are characterized by deep, well-drained soils formed in mixed alluvium, with the surface frequently reworked by wind. The Berino Series is typically found on sandy plains, fan piedmonts, piedmont slopes, and valley floors with slopes of zero (0) to seven (7) percent, receiving about ten (10) inches of rain annually. The Cacique Series consists of moderately deep, well-drained soils formed in sandy alluvium, with slopes of zero (0) to five (5) percent and a mean annual precipitation of nine (9) inches.

Site Assessment Activities

Between June 18th, and July 18, 2025, NTGE conducted site assessment activities to assess the extent of impacts at the site. Thirty-four (34) vertical sample points (V-1 through V-34) were installed within the release area, while fifteen (15) horizontal sample points (H-1 through H-15) were installed adjacent to the release area to characterize the impacts. Soil samples were collected at half foot (0.5) intervals from depths ranging from zero (0) to six and a half (6.5) ft bgs by way of a hand auger and/or an excavator. Soil samples were placed directly into laboratory provided sample containers, stored on ice, and transported under proper chain of-custody protocol to Cardinal Laboratories in Hobbs, New Mexico for analysis of benzene, toluene, ethylbenzene, and xylene (BTEX) (by EPA Method 8021B), total petroleum hydrocarbon (TPH) (by EPA method 8015 modified), and chloride (method SM4500Cl-B or EPA 300.0).

Analytical results indicated TPH and/or chloride concentrations were above NMOCD Table I Closure Criteria in the areas of V-1 through V-25, V-27 and V-28, and V-30 through V-34 and ranged in depths from surface to three and a half (3.5) ft bgs. None of the samples exhibited benzene or BTEX concentrations above Table I Closure Criteria. Analytical results are included in Table 1, while sample locations are shown on Figure 3 through 3B. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report. Delineation points V-21, V-26, and V-29 exhibited TPH and chloride concentrations below Table I Closure Criteria. Delineation points V-26 and V-29 were confirmation sampled and are discussed further in the report.

From October 30 through November 4, 2025, NTGE conducted an additional delineation event utilizing mechanical equipment. An additional seventy-six (76) delineation points (V-35 through V-110) were installed throughout the release area. Soil samples were collected at half foot (0.5) intervals from depths ranging from zero (0) to eight and a half (8.5) ft bgs. Soil samples were placed directly into laboratory provided sample containers, stored on ice, and transported under proper chain of-custody protocol to Eurofins in Albuquerque, New Mexico for analysis of BTEX, TPH, and chloride. Analytical results indicated that sixty-six (66) delineation points exhibited

concentrations of TPH and/or chloride above Table I Closure Criteria. The following sample areas returned concentrations below Table I Closure Criteria: V-40, V-57, V58, V-59, V-61, V-62, V-76, V-79, V-84, and V-96. None of the samples exhibited benzene or BTEX concentrations above Table I Closure Criteria. Analytical results are included in Table 1, while sample locations are shown on Figure 3 through 3B. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

V-26 Confirmation Sampling

The area represented by V-26 was divided into five (5) areas (V-26 Area A through E). From October 21 through 27, 2025, NTGE collected confirmation samples from each area. Confirmation samples were collected as five-point composite samples from areas representing no more than two hundred (200) square feet. Soil samples were placed directly into laboratory provided samples containers, stored on ice, and transported under proper chain of-custody protocol to Eurofins in Albuquerque, New Mexico for analysis of BTEX (by EPA Method 8021B), TPH (by EPA method 8015 modified), and chloride (method SM4500Cl-B or EPA 300.0). Areas observed to have hydrocarbon staining were not sampled and were noted so they could later be remediated. Area V-26 is depicted on Figure 8, Area V-26 Overview Map.

- **V-26 Area A**

On October 21, 2025, NTGE conducted a confirmation sampling event in the area represented by V-26 Area A. A total of one hundred and twenty-eight (128) confirmation samples were collected from Area V-26 Area A (V-26-1 through V-10, V-26-12 through V-26-16, V-26-23 through V-26-26, V-26-29, V-26-35 through V-26-96, V-26-100 through V-26-106, V-26-108 through V-26-113, V-26-116 through V-26-122, V-26-125 through V-26-131, and V-26-133 through V-26-160). Analytical results indicated that none of the confirmation samples collected in Area A exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. A total of twenty-three confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-26-6 through V-26-8, V-26-10, V-26-13, V-26-14, V-26-24 through V-26-26, V-26-37 through V-26-40, V-26-43 through V-26-47, V-26-53, V-26-54 V-26-57, V-26-59, and V-26-76). TPH concentrations ranged from 123 mg/kg at V-26-37 to 5,300 mg/kg at V-26-14.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figure 8A, Area V-26 Area A Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-26 Area B**

On October 22, 2025, NTGE conducted a confirmation sampling event in the area represented by V-26 Area B. A total of one hundred-fifty (150) confirmation samples were collected from V-26 Area B (V-26-161 through V-26-310). Analytical results indicated that none of the confirmation samples collected in Area B exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. A total of five (5) confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-26-165, V-26-255, V-26-256, V-26-267, and V-26-304). TPH concentrations ranged from 165 mg/kg at V-26-267 to 1,100 mg/kg at V-26-165.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figure 8B, Area V-26 Area B Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-26 Area C**

On October 23, 2025, NTGE conducted a confirmation sampling event in the area represented by V-26 Area C. A total of one hundred-fifty (150) confirmation samples were collected from V-26 Area C (V-26-61 through V-26-69, V-26-714, and V-26-311 through V-26-450). Analytical results indicated that none of the confirmation samples collected in Area C exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. Confirmation sample V-26-345 exhibited TPH concentrations of 570 mg/kg which is above Table I Closure Criteria, while all other confirmation samples exhibited TPH concentrations below Table I Closure Criteria.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figure 8C, Area V-26 Area C Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-26 Area D**

On October 24, 2025, NTGE conducted a confirmation sampling event in the area represented by V-26 Area D. A total of one hundred forty-eight (148) confirmation samples were collected from V-26 Area D (V-26-451 through V-26-486, V-26-488 through V-26-560, and V-26-562 through V-26-600). Analytical results indicated that none of the confirmation samples collected in Area D exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. A total of ten (10) confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-26-468, V-26-469, V-26-480, V-26-493, V-26-517, V-26-546, V-26-563, V-26-566, V-26-594, and V-26-599). TPH concentrations ranged from 137 mg/kg at V-26-594 to 7,600 mg/kg at V-26-546.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figure 8D, Area V-26 Area D Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-26 Area E**

On October 27, 2025, NTGE conducted a confirmation sampling event in the area represented by V-26 Area E. A total of eighty-one (81) confirmation samples were collected from V-26 Area E (V-26-601 through V-26-620, V-26-622 through V-26-626, V-26-630, V-26-633 through V-26-642, V-26-647, V-26-649 through V-26-659, V-26-655 through V-26-675, V-26-677 through V-26-680, V-26-683 through V-26-689, V-26-690, V-26-692, V-26-697 through V-26-702, V-26-704, V-26-708, V-26-712, and V-26-713). Analytical results indicated that none of the confirmation samples collected in Area E exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. A total of four (4) confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-26-659, V-26-675, V-26-690, and V-26-704). TPH concentrations ranged from 134 mg/kg at V-26-704 to 360 mg/kg at V-26-675.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figures 8E, Area V-26 Area E-A Map and 8F, Area V-26 Area E-B Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

V-29 Confirmation Sampling

The area represented by V-29 was divided into three (3) areas (V-29 Area A through C). From October 27 through 29, 2025, NTGE collected confirmation samples from each area. Confirmation samples were collected as five-point composite samples from areas representing no more than two hundred (200) square feet. Soil samples were placed directly into laboratory provided samples containers, stored on ice, and transported under proper chain of-custody protocol to Eurofins in Albuquerque, New Mexico for analysis of BTEX (by EPA Method 8021B), TPH (by EPA method 8015 modified), and chloride (method SM4500Cl-B or EPA 300.0). Areas observed to have hydrocarbon staining or if field screening for chloride indicated concentrations over limits were not sampled and were noted so they could later be remediated. Area V-29 is depicted on Figure 9, Area V-29 Overview Map.

- **V-29 Area A**

On October 29, 2025, NTGE conducted a confirmation sampling event in the area represented by V-29 Area A. A total of one hundred-forty (140) confirmation samples were collected from V-29 Area A (V-29-2, V-29-4, V-29-5, V-29-7 through V-29-12, V-29-14 through V-29-24, V-29-26, V-29-27, V-29-30 through V-29-77, V-29-79 through V-29-81, V-29-83 through V-29-97, and V-29-99 through V-29-150). Analytical results indicated that none of the confirmation samples collected in Area A exhibited benzene or BTEX concentrations above Table I Closure Criteria. A total of four (4) confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-29-23, V-29-52, V-29-130, and V-29-147). TPH concentrations ranged from 120 mg/kg at V-29-52 and V-29-130 to 2,470 mg/kg at V-29-23. Additionally, three (3) confirmation samples exhibited chloride concentrations above Table I Closure Criteria (V-29-14, V-29-30, and V-29-84), the concentrations ranged from 610 mg/kg at V-29-30 to 3,000 mg/kg at V-29-14.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figure 9A, Area V-29 Area A Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-29 Area B**

On October 28, 2025, NTGE conducted a confirmation sampling event in the area represented by V-29 Area B. A total of one hundred-fifty (150) confirmation samples were collected from V-29 Area B (V-29-151 through V-29-300). Analytical results indicated that none of the confirmation samples collected in Area B exhibited benzene, BTEX, or chloride concentrations above Table I Closure Criteria. A total of eight (8) confirmation samples exhibited TPH concentrations above Table I Closure Criteria (V-29-105, V-29-160, V-29-161, V-29-166, V-29-167, V-29-175, V-29-206 and V-29-237). TPH concentrations ranged from 105 mg/kg at V-29-154 to 740 mg/kg at V-29-160.

Analytical results are included in Table 2, while confirmation sample locations are shown on Figures 9B, Area V-29 Area B-A Map and 9C, Area V-29 Area B-B Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

- **V-29 Area C**

On October 27, 2025, NTGE conducted a confirmation sampling event in the area represented by V-29 Area C. A total of fourteen (14) confirmation samples were collected from V-29 Area C (V-29-301 through V-29-314). Analytical results indicated that none of the confirmation samples collected in Area C exhibited benzene, BTEX, TPH, or chloride concentrations above Table I Closure Criteria.

Analytical results are included in Table 2, while soil confirmation sample locations are shown on Figure 9D, Area V-29 Area A Map. The laboratory reports containing analytical methods and chain-of-custody documents are attached to the report.

Proposed Soil Bioremediation Work Plan

Once all assessment data was evaluated and discussed with EOG, NTGE is proposing to use dual remediation methods, bioremediation and dig and haul for the areas that exhibited TPH and/or chloride concentration above Table I Closure Criteria. Liquid Remediact™ would be utilized for the bioremediation portion of the remediation. Remediact™ is an environmentally and ecologically safe concentrated liquid formula that uses synergistic bacteria. The probiotic live bacteria will break down the hydrocarbons in the soil. When mixed with water the bacteria are activated and begin to multiply rapidly, forming a biomass that digests the hydrocarbons. These microbes use hydrocarbons as a source of energy leaving water (H_2O) and small amounts of inert gases as a by-product. Case studies included with this work plan show that hydrocarbon levels were decreased in some cases, from 21,000 parts per million (ppm) down to just over 50ppm in a time span of 60 days. The use of microbial strains to remediate hydrocarbons is a common industry practice. Bioremediation reduces the carbon footprint of dig and haul methods and allows the native soils to remain on site and providing greater nutrient quality for site revegetation.

NTGE is proposing to treat select areas with Remediact™. The areas identified for bioremediation exhibit concentrations of TPH only, with no chloride impacts and select areas exhibiting TPH and chloride concentrations ranging from 650 mg/Kg to 864 mg/Kg. Additionally, there are six (6) areas (V-9, V-50, V-52, V-72, V-74, and V-87) that will be excavated one (1) to two (2) ft bgs to remove chloride impacted soil above Table I Closure Criteria, leaving only TPH impacted soil. The six areas will then be treated with Remediact to remediate the remaining hydrocarbon impacts. V-9, V-74, and V-87 will be excavated one (1) ft bgs prior to treatment while V-50, V-52, and V-72 will be excavated two (2) ft bgs prior to treatment. The areas that will be excavated prior to treatment are depicted on Figure 6, Excavation and Treatment Area Map. The areas with chloride concentrations exceeding 900 mg/Kg will be excavated and the soil will be transported to an NMOCD approved disposal facility. The volume of soil proposed to be bioremediated is approximately 27,476 cubic yards and the volume of soil to be remediated by dig and haul methods is approximately 50,108 cubic yards, for a total of 77,584 cubic yards.

Liquid Remediact™ works best when diluted at a rate of one (1) gallon of Liquid Remediact™ with ten (10) gallons of water. Prior to applying the Remediact™, the soil will be ripped utilizing mechanical equipment to aerate the soil which will aid the bioremediation process. Subsequently, the diluted Liquid Remediact™ will be applied at a rate of one diluted gallon of Remediact™ per one cubic yard of impacted soil. An email from the manufacturer with the proposed treatment process is also included with this report.

The bioremediation process is proposed to take up to 240 days (the schedule is outlined below). Each gallon of Remediact™ and ten (10) gallons of water treat eleven (11) cubic yards of soil. Treatment of 27,476 cubic yards of soil will require 2,497.85 gallons of Remediact™ and 24,978 gallons of fresh water (sourced water will be tested to ensure that chloride concentrations are below 600 mg/kg as not to inadvertently impact soil in the treated areas). After the initial application on day one (1), each area will be ripped and watered on day thirty (30) and on day sixty (60) to promote aeration and microbial growth. Additional watering will be conducted on or around day fifteen (15), day forty-five (45), and day seventy-five (75) to ensure that the microbes do not go into dormancy and continue to degrade the hydrocarbons. On day ninety (90), the treated areas will be confirmation sampled to determine the effectiveness of the bioremediation. Confirmation samples will be collected as five-point composite samples from the treatment cells from areas representing no more than two hundred (200) square feet. Soil samples will be placed directly into laboratory provided samples containers, stored on ice, and transported under proper chain of-custody protocol to an accredited laboratory for analysis of BTEX (by EPA Method 8021B), TPH (by EPA method 8015 modified), and chloride (method SM4500Cl-B or EPA 300.0). Once analytical results are received a review of the analytical results will be conducted to determine the effectiveness of the bioremediation.

If any areas continue to exhibit TPH concentration above Table I Closure Criteria a second treatment of Remediact™ will be applied in the manner described above. The areas will be ripped and watered on day thirty (30) and day sixty (60) to promote aeration and microbial growth as well as following the same watering protocols for day fifteen (15), forty-five (45), and seventy-five (75). Then on day ninety (90), post treatment, the treated areas will undergo confirmation sampling every two hundred (200) square feet.

See the treatment schedule below for a more detailed breakdown of the proposed treatment schedule, sampling schedule, and application mixture information. See Figure 4A through 4D for the areas proposed for treatment areas and Figure 6 for the areas proposed for excavation and treatment. Treatment area is color coded to indicate contamination depth.

The total proposed treatment areas measure approximately 405,854 square feet representing approximately 27,347 cubic yards of soil.

- **Pink Areas – Areas with one (1) ft of impacted soil**
  Total of 173,394 square feet in size
  Approximately 6,422 cubic yards of soil
  Confirmation samples will be collected every 200 sq. ft. at surface and at 1 ft bgs
- **Blue Areas – Areas with two (2) ft of impacted soil**

Total of 128,914 square feet in size
Approximately 9,549 cubic yards of soil
Confirmation samples will be collected every 200 sq. ft. at surface, 1ft, and 2 ft bgs

- **Green Areas – Areas with three (3) ft of impacted soil**
  Total of 103,546 square feet in size
  Approximately 11,505 cubic yards of soil
  Confirmation samples will be collected every 200 sq. ft. at surface, 1 ft, 2 ft, and 3 ft bgs

The schedule for treatment, confirmation sampling and reporting is as follows:

Day 1 through Day 14 (2 weeks): Rip the treatment areas with mechanical equipment and apply the diluted Remediact™ at a rate of one gallon to one cubic yard of soil. It is expected to take approximately two weeks.

Day 15 water the treatment areas, 24,978 gallons of fresh water.

Day 30 through Day 44 (2 weeks): The treatment areas will be ripped with mechanical equipment and watered to promote aeration and microbial growth, 24,978 gallons of fresh water.

Day 45 water the treatment areas, 24,978 gallons of fresh water.

Day 60 through Day 74 (2 weeks): The treatment areas will be ripped with mechanical equipment and watered to promote aeration and microbial growth, 24,978 gallons of fresh water.

Day 75 water the treatment areas, 24,978 gallons of fresh water.

Day 90 through Day 104 (2 weeks): Collect confirmation samples every two hundred (200) square feet.

Day 104 through Day 118 (2 weeks): Evaluate analytical results as they are returned from the laboratory. If the areas are still exhibiting TPH concentration above Table I Closure Criteria, the process will be repeated as below.

Second Treatment (if Needed):

Day 118 through Day 132 (2 weeks): Rip the treatment areas with mechanical equipment and apply the diluted Remediact™ at a rate of one gallon to one cubic yard of soil. It is expected to take approximately two weeks.

Day 120 A progress report will be submitted with confirmation results for the dig and haul remediation areas with an update on the bioremediation areas.

Day 133 water the treatment areas, 24,978 gallons of fresh water.

Day 148 through Day 162 (2 weeks): The treatment areas will be ripped with mechanical equipment and watered to promote aeration and microbial growth.

Day 163 water the treatment areas, 24,978 gallons of fresh water.

Day 178 through Day 192 (2 weeks): The treatment areas will be ripped with mechanical equipment and watered to promote aeration and microbial growth.

Day 208 through 207 (2 weeks): Collect confirmation samples every two hundred (200) square feet.

Day 208 through Day 222 (2 weeks): Evaluate analytical results as they are returned from the laboratory.

Day 240: A final report will be submitted with all confirmation sample results.

The rate of application mixture information:

- One (1) gallon Liquid Remediact™ x ten (10) gallons water (H_2O) = eleven (11) gallons of diluted Remediact™
- One (1) gallon of diluted Remediact™ treats one (1) cubic yard of soil and eleven (11) gallons of diluted Remediact™ treats eleven (11) cubic yards.

Each treatment area is summarized in Table 3, Summary of Treatment Areas. Delineation points V-21, V-26, and V-29 exhibited TPH and chloride concentrations below Table I Closure Criteria. The area represented by delineation point V-21 is being proposed for treatment due to hydrocarbon staining that was observed during field activities. Delineation points V-26 and V-29 were confirmation sampled. Based on analytical results, select areas that exhibited TPH concentrations over Table I Closure Criteria were selected for bioremediation.

Proposed Dig and Haul Activities

NTGE is proposing to excavate all areas exhibiting chloride impaction exceeding 600 mg/kg, except for those discussed previously. The proposed excavation depths are summarized in Table 4, Summary of Proposed Excavation Depths. The total volume to be excavated and hauled to an approved disposal facility/facilities is approximately 50,108 cubic yards. The proposed dig and haul is expected to take one hundred twenty (120) days, including submittal of a report with confirmation sample results and an update regarding the bioremediation areas. See Figure 5 through 5C for excavation locations, depths, and dimensions.

Confirmation samples from the sidewalls of the excavated areas will be collected as five-point composite samples from areas representing an area no greater than two hundred (200) square feet. NTGE on behalf of EOG is requesting a four hundred (400) square foot confirmation sampling variance for the bottom of the excavated areas.

All samples collected will be stored on ice and transported Cardinal Laboratory in Hobbs, NM for analysis of BTEX (by EPA Method 8021B), TPH (by EPA Method 8015M), and chlorides (method

SM4500Cl-B or EPA 300.0). Should any samples exhibit concentrations above Table 1 Closure Criteria, those areas will be further excavated until closure criteria has been met. A variance is requested for the above mentioned dig and haul activities which are proposed to be completed within 120 days of Remediation Plan approval due to the volume of material which will need to be excavated and hauled.

Confirmation Sampling Areas Under Table I Closure Criteria

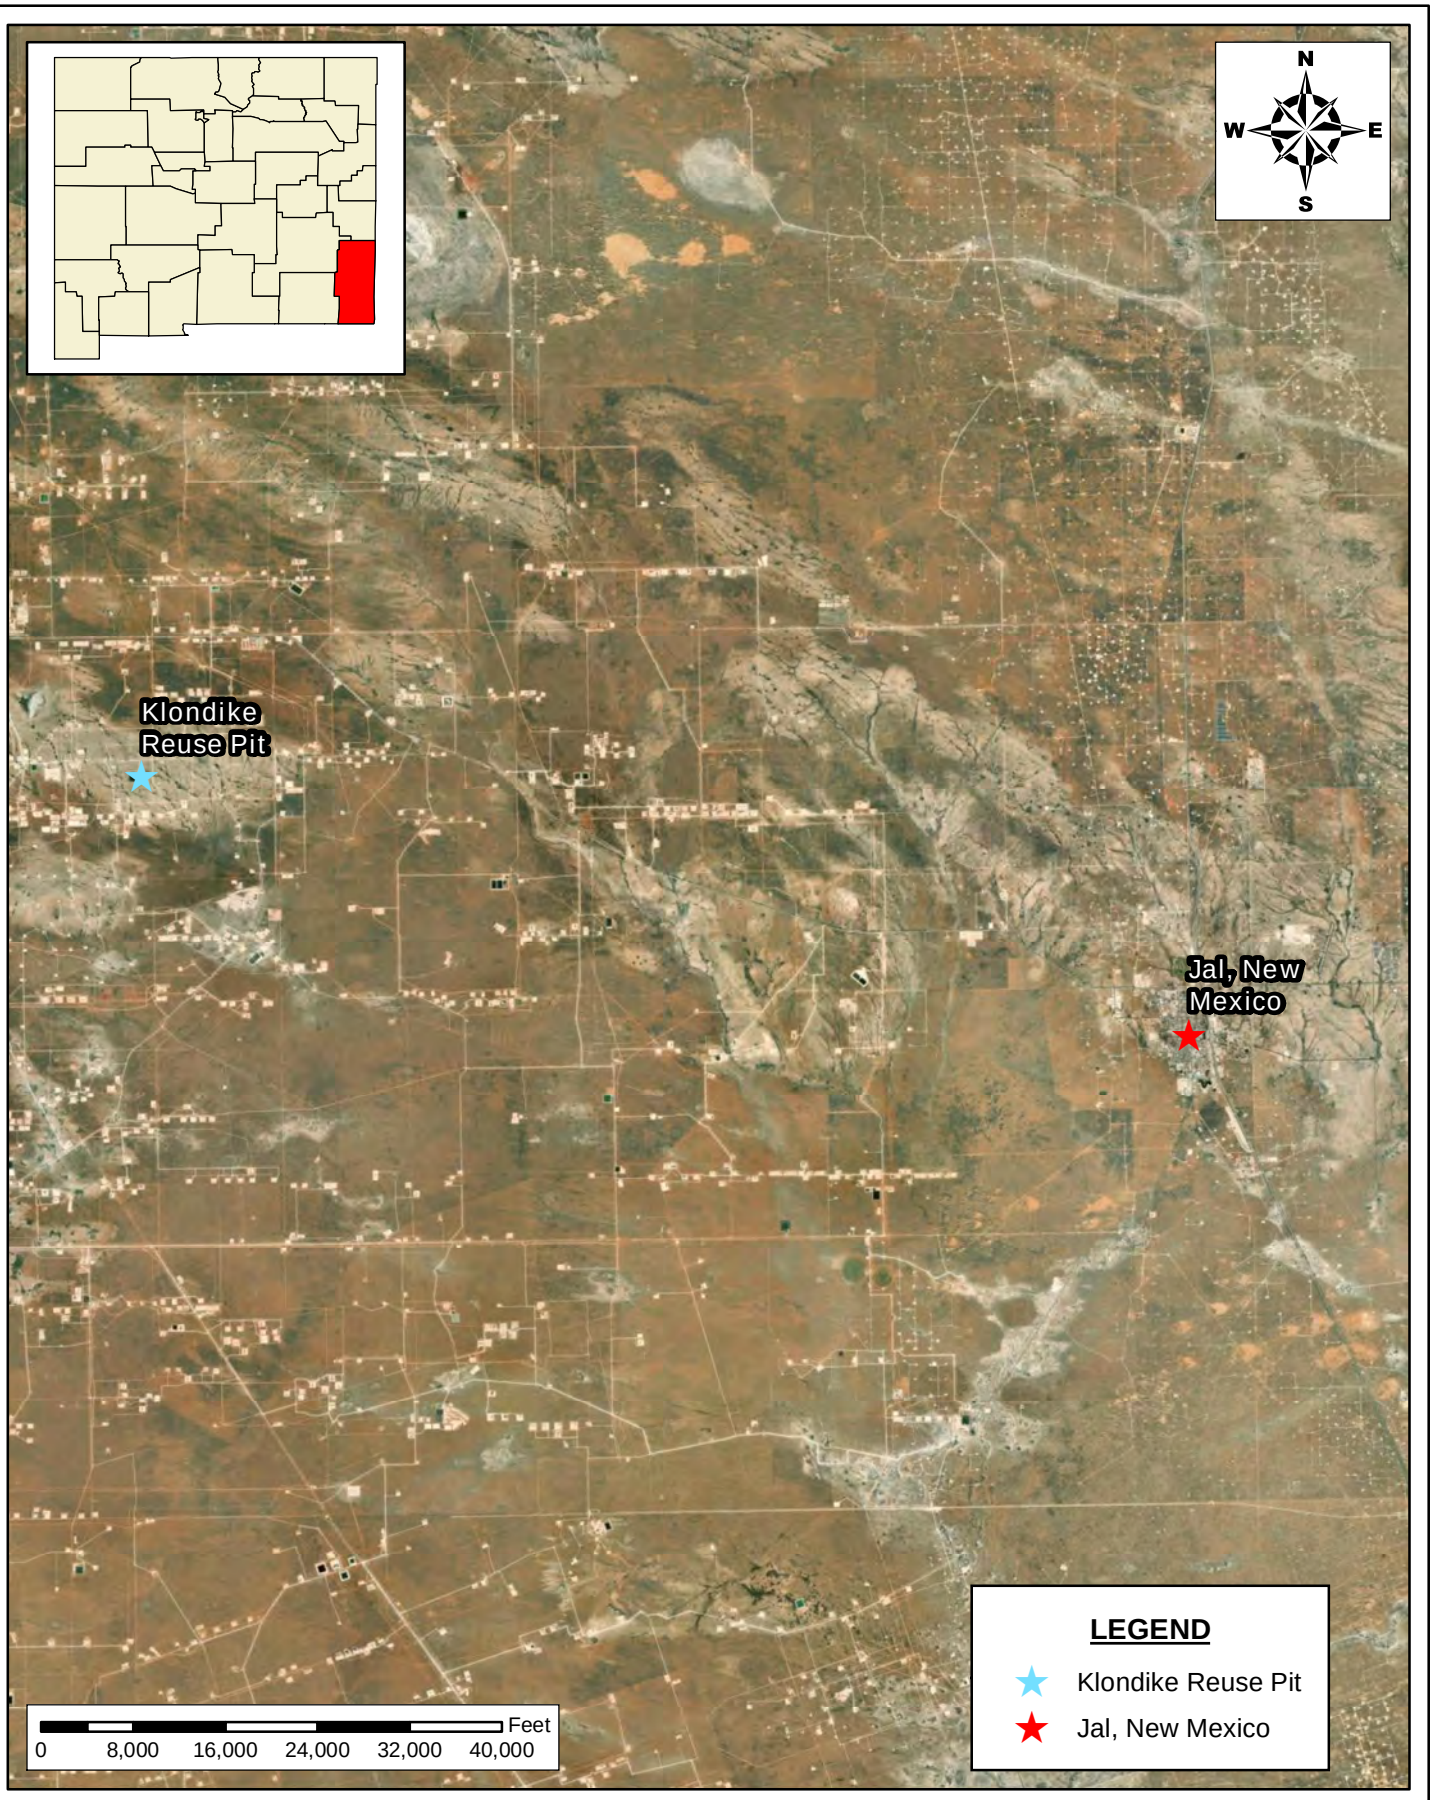
There were thirteen (13) delineation sample points that did not exhibit benzene, BTEX, TPH, or chloride concentrations above Table I Closure Criteria, V-21 (included in the bioremediation areas), V-26 (discussed above), V-29 (discussed above), V-40, V-57, V-58, V-59, V-61, V-62, V-76, V-79, V-84, V-96. NTGE will collect confirmation samples every two hundred (200) square feet from the areas represented by V-40, V-57, V-58, V-59, V-61, V-62, V-76, V-79, V-84, V-96 to ensure there are no benzene, BTEX, TPH, or chloride impacts above Table I Closure Criteria. If any area(s) are determined to exhibit concentrations of benzene, BTEX, TPH, or chloride they will either be bioremediated or excavated, depending on if they exhibit only hydrocarbon impacts or chloride impacts.

Proposed Reclamation Activities

Once all excavations and treatment cells meet closure criteria requirements, the excavated areas will be backfilled with locally sourced caliche and topsoil that has been laboratory analyzed to ensure no contamination is present. Once the Site has been backfilled, the Site will be crossed ripped with a furrow spacing of two (2) feet and tilled prior to seeding. The ripped areas will be recontoured for initial seedbed preparation. The original landform will be restored, as near as possible, for all unvegetated and/or disturbed areas from remedial action activities. Preparation of the seed bed will follow best practices. A certified weed-free seed mix designed by the NMSLO to meet reclamation standards will be used. Based on the ecological site (Simona Series) within and surrounding the Site, the NMSLO Sandy Loam (SL) Seed Mixture will be used for seeding and will be seeded at a rate of 17.75 pounds per live seed (PLS) per acre or at a rate of 35.5 PLS/acre if the broadcast method is used. The seed mixture will be spread by seed box drill method or handheld broadcaster and raked in. A Reclamation Work Plan will be submitted once remediation activities have been completed.

If you have any questions regarding this report or need additional information, please contact us at (432) 701-2159.

Sincerely,
NTG Environmental



Rebecca Haskell

Notes:

1. Values reported in mg/kg
2.< = Value Less Than Reporting Limit (RL)
3. Bold indicates Analyte Detected
4. BTEX analyses by EPA Method SW 8021B
~~SP-1~~ Sample Point Excavated
5. TPH analyses by EPA Method SW 8015 Mod.
6. GRO/DRO/MRO - Gasoline/Diesel/Motor Oil
7. Yellow shaded cells indicate analytical samples that exceed the NMAC 19.15.29.12 Table I Closure Criteria for the site.
8. Peach shaded cells indicate analytical samples that exceed the NMAC 19.15.29.13 Table I Closure Criteria for the site (Surface to 4 Feet Below Grade).
9. --- Not Analyzed

Notes:

1. Values reported in mg/kg
2.< = Value Less Than Reporting Limit (RL)
3. Bold indicates Analyte Detected
4. BTEX analyses by EPA Method SW 8021B
~~SP-1~~ Sample Point Excavated
5. TPH analyses by EPA Method SW 8015 Mod.
6. GRO/DRO/MRO - Gasoline/Diesel/Motor Oil
7. Yellow shaded cells indicate analytical samples that exceed the NMAC 19.15.29.12 Table I Closure Criteria for the site.
8. Peach shaded cells indicate analytical samples that exceed the NMAC 19.15.29.13 Table I Closure Criteria for the site (Surface to 4 Feet Below Grade).
9. --- Not Analyzed

Notes:

1. Values reported in mg/kg
2.< = Value Less Than Reporting Limit (RL)
3. Bold indicates Analyte Detected
4. BTEX analyses by EPA Method SW 8021B
~~SP-1~~ Sample Point Excavated
5. TPH analyses by EPA Method SW 8015 Mod.
6. GRO/DRO/MRO - Gasoline/Diesel/Motor Oil
7. Yellow shaded cells indicate analytical samples that exceed the NMAC 19.15.29.12 Table I Closure Criteria for the site.
8. Peach shaded cells indicate analytical samples that exceed the NMAC 19.15.29.13 Table I Closure Criteria for the site (Surface to 4 Feet Below Grade).
9. --- Not Analyzed

Notes:

1. Values reported in mg/kg
2.< = Value Less Than Reporting Limit (RL)
3. Bold indicates Analyte Detected
4. BTEX analyses by EPA Method SW 8021B
~~SP-1~~ Sample Point Excavated
5. TPH analyses by EPA Method SW 8015 Mod.
6. GRO/DRO/MRO - Gasoline/Diesel/Motor Oil
7. Yellow shaded cells indicate analytical samples that exceed the NMAC 19.15.29.12 Table I Closure Criteria for the site.
8. Peach shaded cells indicate analytical samples that exceed the NMAC 19.15.29.13 Table I Closure Criteria for the site (Surface to 4 Feet Below Grade).
9. --- Not Analyzed

SPECIAL FLOOD HAZARD AREAS
- Without Base Flood Elevation (BFE) *Zone A, V, A99*
- With BFE or Depth *Zone AE, AO, AH, VE, AR*
- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD
- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee. See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

OTHER AREAS
- NO SCREEN Area of Minimal Flood Hazard *Zone X*
- Effective LOMRs
- Area of Undetermined Flood Hazard *Zone D*

GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES
- 20.2 Cross Sections with 1% Annual Chance
- 17.5 Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

MAP PANELS

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/24/2025 at 1:56 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning Todd,

Thank you for the correspondence. A 90-day time extension is approved. Remediation Due date has been updated to December 9, 2025.

Please keep a copy of this communication for inclusion within the appropriate report submittal.

The OCD requires a copy of all correspondence related to remedial activities be included in all proposals and/or final closure reports. Correspondence required to be included in reports may include, but not limited to, notifications for liner inspections, sample events, request for time extensions, an alternative sampling plan, and/or variances.

Regards,

Nelson Velez ● Environmental Specialist - Adv

Subject: [EXTERNAL] nAPP2516149053 - Klondike Reuse Pit Release - Extension Request

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good Afternoon Mr. Velez,

This correspondence is to request a ninety-day extension of time from the OCD for the produced water release at the EOG, Klondike Reuse Pit site, Incident #nAPP2516149053 location in Lea County, New Mexico. The release happened on NMSLO land, much of the spill path ran across SLO land and then BLM land at the end of the release path. The initial site assessment activities have been completed and the site delineated. EOG personnel met with the SLO last Tuesday and we are currently in correspondence with the SLO regarding the proposed remediation activities work plan. The requested extension of time is to review, discuss and decide on the proposed remediation activities with the SLO for the site, write and submit the remediation work plan. Please let us know if you have any questions regarding this site.

Thank you,

Todd Wells
Environmental Specialist

GOSHAWK COMPREHENSIVE RESOURCE REVIEW REPORT

NTGE Project No.: 2510142

GOSHAWK ENVIRONMENTAL CONSULTING, INC.

13 August 2025

Mr. Mike Yemm
EOG Resources, Inc.
5509 Champions Drive
Midland, TX 79706

Re: Klondike Reuse Pit Release - Comprehensive Resource Review
Lea County, New Mexico

EXECUTIVE SUMMARY

The release occurring from the Klondike Reuse Pit did not impact any sensitive natural or cultural resources. A field investigation did not reveal Waters of the US (WATERS), karst resources, Threatened or Endangered (T/E) species, or other sensitive species.

BACKGROUND

Goshawk Environmental Consulting, Inc. (Goshawk) conducted a comprehensive resource review for the Klondike Reuse Pit Release in Lea County, New Mexico. A release from the Klondike Reuse Pit consisted of a release area of approximately 34.8 acres.

The release area is located on federally owned and state-owned land within Sections 32 and 33 of Township 24S, Range 34E (Map 1). This resource review included a desktop review of ecological resources (including WATERS, T/E Species, and sensitive plant and animal species), karst resources, and cultural resources. Sensitive species considered during the desktop review included burrowing owls and raptors, and potential habitat for Scheer's beehive cactus, Wright's waterwillow, gypsum milkvetch, and Tharp's blue-star (special status plant species [SSPS]).

Portions the release area were addressed by previous field investigations for previous projects in the same area. A field investigation for the remaining portions of the currently proposed project area was conducted on 12 June and 11 August 2025. The purpose of this investigation was to evaluate whether release area contained any protected/sensitive resources, the approximate size and location of identified protected/sensitive resources, and associated development constraints, if applicable.

The release area is not within or medium, high, or critical karst occurrence zones; therefore, these resources are not discussed in this document.

ECOLOGICAL RESOURCE REVIEW

WATERS OF THE US

Goshawk evaluated the release area to determine if any WATERS, as regulated by the US Army Corps of Engineers (USACE), are present. The topographic map (Map 2) indicates the release area is located entirely within grasslands (white background). The terrain is relatively flat to gently sloping with elevations ranging from approximately 3,400 to 3,450 feet above mean sea level. There are no

Released to Imaging: 3/12/2026 10:01:48 AM

potential WATERS indicated within the release area on the topographic map. The nearest mapped water feature is an unnamed tributary, located approximately 110 feet east of the release area.

The aerial orthoimagery (Map 3) indicates the release area is within a shrubland vegetative community. Channelization within the unnamed tributary is not visible on the aerial orthoimagery. However, darker vegetative signatures, typically indicative of mesic conditions, are visible along the tributary corridor. Additional oil/gas development, such as water pits, rights-of-way, and access roads, is evident intersecting, adjacent to, and in the vicinity of the release area.

Field Investigation

According to the field investigation, terrain within the release area is relatively flat to gently sloping (Photo 1). The vegetative community observed during the field investigation was consistent with that shown in the aerial orthoimagery. Vegetation was dominated by shrubs, intermixed with grasses and forbs (Photo 2). Species observed include honey mesquite, broom snakeweed, croton, plains bristlegrass, lovegrass, and threeawn. No potential WATERS were noted during the field investigations. No impacts to USACE regulated WATERS are likely to occur within the release area.

SPECIES OF CONCERN

Threatened or Endangered Species

The release area was evaluated for both federally and state-listed T/E species. An internet search of the US Fish and Wildlife Service (USFWS) *Information for Planning and Consultation* (IPaC) screening tool was used to identify federally listed T/E species "that should be considered as part of an effects analysis" for areas within 5 miles of the release area (Table 1). Critical habitat for these species is not mapped within the release area. Additionally, a report from the New Mexico Department of Game and Fish (NMDGF) Biota Information System of New Mexico (BISON-M) was obtained and reviewed for Lea County (Table 2).

Table 1: IPaC 5-mile Report

Species	Status	Impacts Expected	Observed?
Birds			
Lesser prairie-chicken	Federally listed	No	No

Table 2: BISON-M Lea County List of Threatened or Endangered Species

Species	Status	Impacts Expected	Observed?
Birds			
Lesser prairie-chicken	Federally listed	No	No
Baird's sparrow	State-listed	No	No
Bald eagle	State-listed	No	No
Bell's vireo	State-listed	No	No
Broad-billed hummingbird	State-listed	No	No
Least tern	State-listed	No	No

Northern aplomado falcon	Federally and State-listed	No	No
Peregrine falcon	State-listed	No	No
Reptiles			
Dunes sagebrush lizard	Federally and State-listed	No	No

FEDERALLY LISTED SPECIES

The T/E species listed in the IPaC Trust Resource Report for areas within 5 miles of the release area is the lesser prairie-chicken.

The lesser prairie-chicken (LPC) in southeast New Mexico occupy dry grasslands that contain shinnery oak and/or sand sagebrush. They are most commonly found in areas with sandy soils and a mixed-grass vegetative community; however, they have been known to occupy areas with clay or loamy soils and a short-grass vegetative community. They are occasionally found in farmland and smaller fields, particularly in winter. The LPC and shinnery oak are sometimes considered ecological partners, as their current geographic ranges are nearly congruent. LPC population densities are greater in shinnery oak habitat than in sand sagebrush habitat. The release area is within the historic range for the LPC and in an area categorized as an LPC "Isolated Population Area" (Map 4) as defined by the Bureau of Land Management (BLM). The high density of existing oil/gas development in the surrounding area likely precludes the proposed project from providing ample habitat for the LPC.

BURROWING OWLS AND RAPTORS

Burrowing owls are considered a species of concern by the USFWS. Burrowing owls are generally associated with dry, open plains; however, they also utilize grasslands, shrublands, and human-modified landscapes. They depend on burrows that were previously excavated by other animals, such as prairie dogs, badgers, ground squirrels, and foxes. Although they are migratory, some individuals will over-winter in southeast New Mexico. Raptors and their active nests are protected by the Migratory Bird Treaty Act. A variety of species can potentially occur in southeast New Mexico, occupying many different habitat types. Most often, raptors build a large stick nest, typically in taller trees and shrubs. No burrowing owls, raptors, or nests were observed during the field investigation.

SCHEER'S BEEHIVE CACTUS

Scheer's beehive cactus is a Bureau of Land Management (BLM) Special Status Species (Sensitive) and a New Mexico State Endangered species. This species sparsely occupies calcareous gravelly to loamy soils in desert grassland and Chihuahuan desert scrub, usually in slightly sloping to nearly level areas between 3,000 and 3,600 feet in elevation, on or surrounding limestone or gypsum benches, hills, and bajadas. The Scheer's beehive cactus is found within Brewster, Crockett, Loving, Pecos, Reeves, Terrell, and Ward counties, Texas; and Chaves, Lea, and Eddy counties, New Mexico. Previous surveys in the vicinity, and an extensive search utilizing linear transects within a 100-meter buffer for the currently proposed project, did not reveal any Scheer's beehive cactus (Maps 5 and 6).

Released to Imaging: 3/12/2026 10:01:48 AM

CONTINGENCY MEASURES

Direct impacts (including harassment, harm, killing, and/or collecting) to any T/E, Special Status Species, or other species of concern should be avoided. A New Mexico State Lands Office Biologist will be notified as needed regarding species of concern.

CULTURAL RESOURCES REVIEW

Cultural resources on public lands, including archaeological sites and historic properties, are protected by federal law and regulations (Section 106 of the National Historic Preservation Act and the National Environmental Policy Act). A Class III cultural resource inventory was conducted on 12 June 2025 during New Mexico Cultural Resources Information System Activity 158790 and on 11 August 2025 during New Mexico Cultural Resources Information System Activity 159252 to identify any resources eligible for listing on the National Register of Historic Places (Map 7). No historic properties were identified within the area of potential effect.

SUMMARY

Based on the results of the comprehensive resource review, it is Goshawk's opinion that the release occurring from the Klondike Reuse Pit is unlikely to impact any protected ecological resources, karst resources, or cultural resources. If you have any questions or desire additional information, please contact our office.

Sincerely,

Thomas Norris

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Lea County, New Mexico
Survey Area Data: Version 21, Sep 3, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Feb 7, 2020—May 12, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

REMEDIACTTM CASE STUDIES, PRODUCT INFORMATION, AND SDS

NTGE Project No.: 2510142

Becky Haskell

From: Dale Rankin <dalerankin@icloud.com>
Sent: Friday, October 17, 2025 4:19 PM
To: Becky Haskell
Cc: Brian Bluhm
Subject: Bio remediation products
Attachments: LIQUID REMEDIACT Product Sheet.pdf; Bioremediaiton Presentation.pdf

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello Becky,

Following up on our conversation this morning, here is information on our treatment proposal for the areas listed in your table below.

- We propose to ship 9 totes of 275 gallons each of concentrated Liquid Remediact for your first application to your location in New Mexico.

- Upon applying the product to the contaminated area, your operator would dilute at the product to a ratio of 1 gallon of concentrate to 10 gallons of water.

- Your first application would involve tilling the soil (where possible) and then spraying the diluted Liquid Remediact onto the soil at a rate of one diluted gallon per cubic yard of contaminated soil.

- At the end of 30 days, test the soil and be prepared to do a second application of Liquid Remediact the same as the first application.

- Repeat the same process at the end of 60 days. In areas where your testing has reached the desired TPH levels, no more treatment will be needed.

The price for each 275 gallon tote of concentrated Liquid Remediact is $21,128.00 delivered to your location New Mexico.

I have attached the product sheet for Liquid Remediact, and also some pages from a presentation we have given in the past showing several examples of successful treatment

with our product in the past. There is also some additional information in there you may find interesting.

Brian should be back in the office next week and available by phone. You may reach either of us for more discussion about this proposal. Please let us know if you need additional information.

Thank you for this opportunity to serve NTG Environmental.

Regards,

Dale Rankin

> Thank you for taking your time today. My client is requesting a treatment protocol and cost for said protocol. The protocol you provide us will be included in the Remediation Plan going to the New Mexico Oil Conservation Division and the New Mexico State Lands Office so the more professional it is, the better. It's a large site but we are only treating the areas that have TPH impacts with no chloride impacts, there are three areas we are treating that have chloride impacts, but they are really low levels. See table below, we will need to treat down to the depths listed below for each area, that is the depth in cleaned up.

Square Feet	Depth to "Clean"	Cubic Yards	Area
18,841.00	1.00	698	V-2
45,253.00	3.00	5,028	V-3 and V-4
35,330.00	2.00	2,617	V-5

39,633.00	3.00	4,404	V-6
32,646.00	2.00	2,418	V-7
8,727.00	5.00	1,616	V-10
10,468.00	2.00	775	V-11
23,994.00	2.00	1,777	V-19 and V-20
27,703.00	1.00	1,026	V-23
21,712.00	3.00	2,412	V-24
96,576.00	1.00	3,577	V-27 and V-28

You don't usually receive emails from this address. Make sure you trust this sender before taking any actions.

Becky, it was good chatting with you today. As I mentioned, I am forwarding our most popular bio-remediation products for use in soil and water. We have a full line of other products for use in operations as well, but these are the ones that Chase has found to fit well into his program over the years. Please let me know if you have any questions or I can be of further assistance.

BARRATT HOMES, CHIPPENHAM

SAVING COSTS AND THE ENVIRONMENT

SOIL BIOREMEDIATION

- Reduces the costs of dealing with contamination
- Ultra fast odour removal
- Contamination issues dealt with on-site - no need for dig and pump
- Environmentally friendly solution
- Easy to use - no need for protective clothing

HEATING OIL

In the vicinity of the old heating oil tank on this ex-industrial site the levels of hydro-carbons in the ground, measured by independent Geo-technical analysts, Robson Liddle, equated to over 21,000 parts per million. The contaminated land was contained within a bunded area and treated with Liquid Remediact, Dry Remediact and HC300 products. Initial tests were taken at 15 days, with good progress noted and an absence of the smell and final tests at 60 days which showed a hydro-carbon parts per million figure of a little over 50.

GENERAL SOILS

Substantial areas of other soils showing lower levels of hydrocarbon contamination were oversprayed with Liquid and Dry Remediact product reducing these levels to an insignificant amount leaving the soil clean for distribution around the site.

Stylish new homes right in the heart of an historic market town.
Barratt have the perfect place: The Piazza.

BARRATT HOMES
built around you

SAVE MONEY

SAVE TIME

COMPLETELY GREEN

BIOREMEDIATION FOR THE OILFIELD

ENVIROLOGIC SOLUTIONS

Solving Oilfield & Industrial Problems Using Advanced Biotechnology

Released to Imaging: 3/12/2026 10:01:48 AM

All Rights Reserved

WHAT WE CAN DO FOR YOU

- **Permanently and eco-responsibly clean up hydrocarbon and salt water contaminations at a fraction of the cost of traditional remediation**

✓Save Money

- ✓ We do this by eliminating the costs for transportation, disposal, and long-term liability

✓Save Time

- ✓ Minimize downtime on location
- ✓ Quickly get you back to business

✓Completely Green & Better Results

- ✓ We don't just move the problem, we permanently remediate and restore the environment

Released to Imaging: 3/12/2026 10:01:48 AM

HOW WE OPERATE

- **Working as a team with oilfield construction and roustabout companies, we offer a full range of services, from site remediation and clean-up, to construction projects**

  - ✓ **We partner with environmental engineering, oilfield construction, roustabout, OSRO, and other companies to tackle any project, on land or water**

  - ✓ **When combined with our advanced, targeted, biotechnology, these capabilities will:**
    - ✓ **SAVE YOU MONEY**
    - ✓ **SAVE YOU TIME**
    - ✓ **GIVE YOU BETTER, PERMANENT, AND COMPLETELY "GREEN" RESULTS**

Released to Imaging: 3/12/2026 10:01:48 AM

HYDROCARBON BIOREMEDIATION

- **Microbial, Enzymatic Bioremediation**
  - ✓ We use naturally occurring microorganisms in a highly advanced, proprietary surfactant and preservative mixture as the key to our success
  - ✓ When activated, these bacteria react with the hydrocarbons and produce enzymes
  - ✓ The enzymes break down the hydrocarbon into their basic components: Carbon Dioxide and Water
  - ✓ 100% SAFE, NONPATHOGENIC, and READILY BIODEGRADABLE
  - ✓ 100% GREEN
  - ✓ ***Our family of hydrocarbon remediation, cleaning, and absorbent products enjoy a 20+ year history of success, innovation, and continuous improvement in applications worldwide***

Released to Imaging: 3/12/2026 10:01:48 AM

HOW WE DO HYDROCARBON REMEDIATION

- **In all cases, the first step is to take soil/water samples to determine what we are dealing with. For large and/or complex problems, we partner with an Environmental Engineer.**

Ground Contamination

- **Surface Contamination (12" or less)**
  - ✓ **Break the surface to allow for absorption. Apply product to area (application rate, method, and amount are dependent on circumstance)**
  - ✓ **Return in 1 week to rehydrate and possibly turn the soil, monitor, and retest at intervals until acceptable TPH levels are reached**

- **Deeper contamination (break up ground or inject)**
  - ✓ **Using a tractor or bulldozer, we break up the ground**
  - ✓ **Treat the aerated soil with remediation products**
  - ✓ **Repeat first two steps as required, monitor, and retest at intervals**

  Alternatively
  - ✓ **Use geoprobe or drilling to sample and inject microbials**

Released to Imaging: 3/12/2026 10:01:48 AM

HOW WE DO HYDROCARBON REMEDIATION

Water Contamination

- **Fresh and salt water contamination**
  - ✓ Water is essential to our microbial remediation products; therefore, a water contamination situation is an ideal environment for our services
  - ✓ Since our products are completely safe, no harm is done to plant or animal life
  - ✓ As always, you save money and time, and we provide a safe, completely green solution
- **For standing bodies of water**
  - ✓ Apply product to surface
  - ✓ Apply product on any soil bordering contaminated areas
  - ✓ Apply aeration if needed, monitor, and retest at intervals
- **For moving bodies of water**
  - ✓ Isolate contamination
  - ✓ Apply product to surface
  - ✓ Apply product to any soil bordering contaminated areas, monitor, and retest

Released to Imaging: 3/12/2026 10:01:48 AM

OIL BASED DRILL CUTTING REMEDIATION

- **We partner with producers and drillers to remediate oil based drill cuttings**
  - ✓ This reduces cost by eliminating costly transportation and disposal fees of getting rid of drill cuttings
  - ✓ We can apply our services to any drilling operation
  - ✓ Allows your company to maintain a "GREEN" environmental footprint

Released to Imaging: 3/12/2026 10:01:48 AM

SUCCESS STORIES

- The following is a portfolio of testimonies, lab tests, and other products in which we have achieved success.
- Our services and products show proven success time and time again, whether remediating a pipeline spill or cleaning the concrete around a gas pump.
- EnviroLogic Solutions provides advanced, efficient, and effective products and services to handle your environmental clean-up needs.

ITC REMEDIATION

- **ITC terminal in the Port of Houston had a spill that was estimated at 6,000 gallons of toluene. The spill occurred on a busy railhead**
- **The entire remediation time, from the date of application to the non-detect test, was 60 days. The contamination level before the products were applied was several thousand PPM**

---------- Forwarded message ----------
From: **Dale Rankin** <[redacted]>
Date: Tue, Oct 8, 2013 at 3:09 PM
Subject: Final results of the ITC remediation
To: Brian Bluhm <[redacted]>

Here is the final result of our treatment. Initially, the ppm contamination level was fluctuating because of the movement of railcars over the pad where the spill occurred. So we were considering geoprobing an additional treatment, but it wasn't necessary as the bugs eventually ate all the hydrocarbons.

Dale

Sent: Thursday, May 06, 2010 3:27 PM
To: Dale Rankin
Subject: RE: Geoprobe Injection at the Hot Spots

Dale, soil samples from latest sampling event are non-detect. Thanks for your help.

U.S.D.A. FOREST SERVICE

- The U.S.D.A. Forest Service was charged with overseeing the cleanup of a gasoline spill due to a truck accident. The gasoline release from the truck ran down the side of a mountain and into a ravine in the San Bernardino National Forest

- Due to the difficult terrain and the concern for water quality, our bio-remediation was chosen as the best option. The reports on the following page show the data from the spill site for both water and sediment contamination levels

Released to Imaging: 3/12/2026 10:01:48 AM

U.S.D.A. Forest Service Results

SEDIMENT – SUMMARY OF ANALYTICAL RESULTS

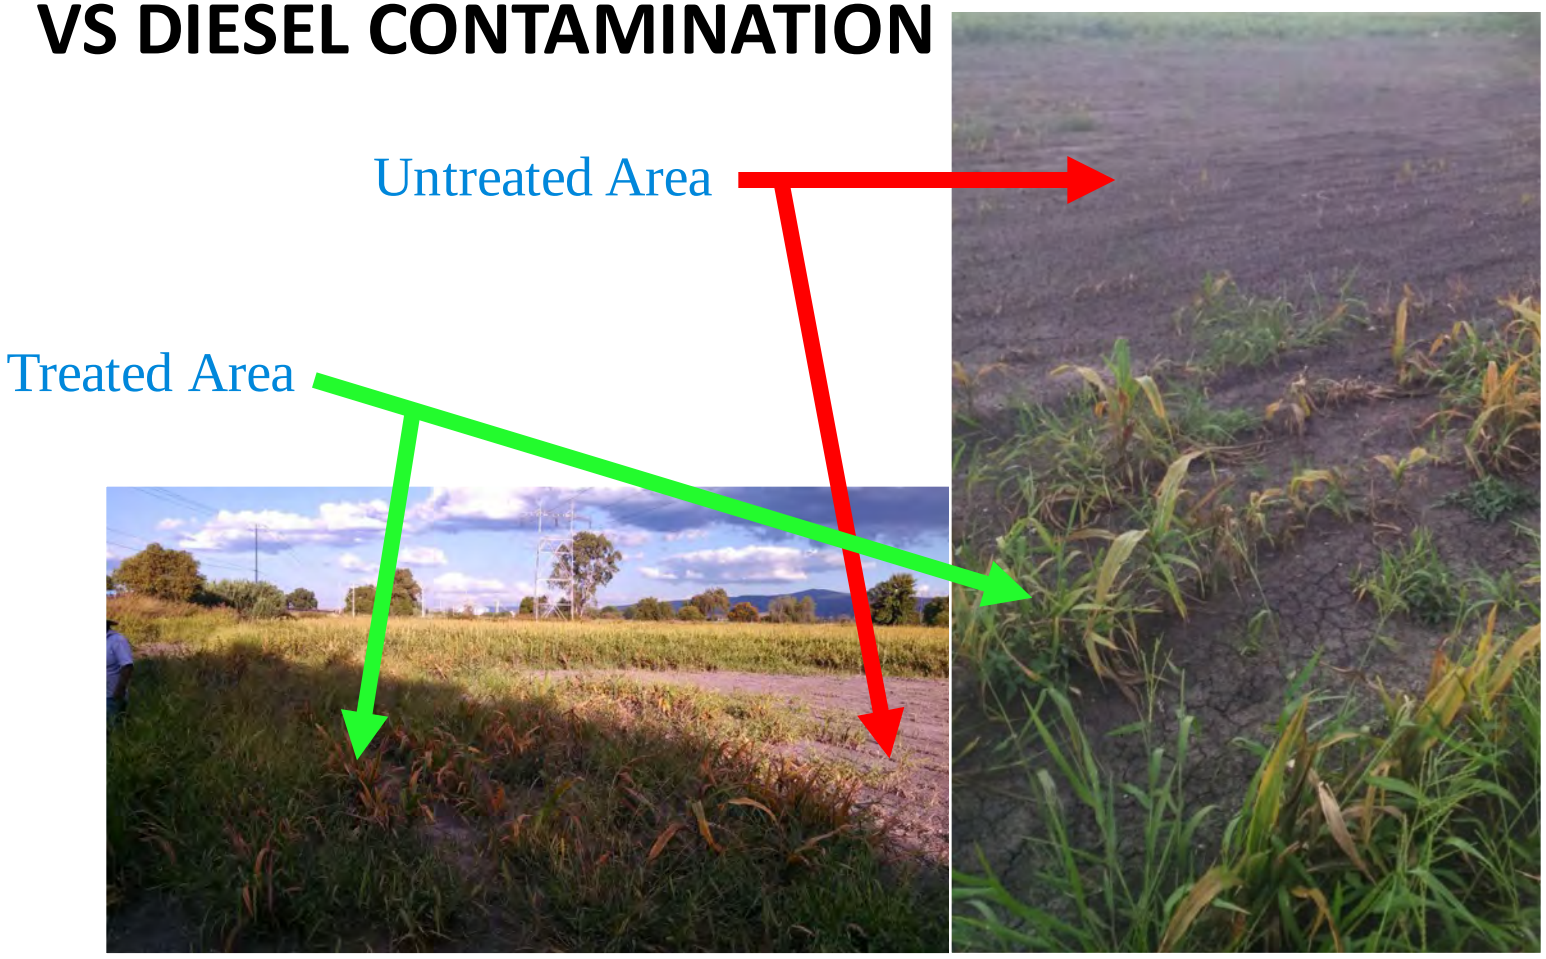
DEPARTMENT OF ENERGY SPILL CLEAN-UP

- Crude oil spill. 1500 yd^3 of earth was impacted. Analytical taken prior to remediation solutions being applied came back in excess of 19000 PPM in all areas tested. EnviroLogic Solutions products were applied on July 8th and tilled into soil only once.
- Samples were taken on July 15th. The PPM of TPH in all areas tested dropped below 573 PPM.
- This was done at a fraction of the cost of traditional remediation.

SAMPLE REMEDIATION VS DIESEL CONTAMINATION



- A barley field in Salamanca was contaminated multiple times with diesel from the underground pipeline in the area.

- EnviroLogic Solutions treated a 10m x 12m area, approximately 3m deep.

Liquid Remediact

MICROBIAL HYDROCARBON REMEDIATION FORMULA

PRODUCT INFORMATION BULLETIN

ENVIROLOGIC SOLUTIONS

Product Overview

Liquid Remediact™ is a newly developed product that was created to solve soil & water hydrocarbon contamination problems. This product has the ability to bio-remediate most hydrocarbons with a minimum amount of equipment, labor and cost. What sets *Liquid Remediact™* apart from all other products is the high concentration of live synergistic bacteria, in a remediation liquid, that quickly starts the bio-remediation process. Because of it's relatively low cost, *Liquid Remediact™* is the ideal solution for most industries to solve their own hydrocarbon contamination problems.

How To Use This Product

Liquid Remediact™ is highly concentrated. This product must be mixed in a ratio of 10 parts water to 1 part *Liquid Remediact™.* Changing this dilution is not recommended. Each mixed or diluted gallon will remediate approximately one cubic yard of soil or 200 gallons of water. *Liquid Remediact™* is an exceptionally universal product and can be applied to in-situ and ex-situ contamination projects by any of the following methods:

Land Farming • Pressure Spraying • "Geoprobe" Injection • Monitoring Well Injection
Gravity Feed System • Automatic Dosing Equipment

Liquid Remediact™ can be used in conjunction with ***Dry Remediact and HC Series*** products as your specific circumstances require. *Liquid Remediact Kit™* includes Nutrients and "BioEnhancers" to accelerate your task.
Consult your Distributor or Factory Representative for details

This Product Will Treat

The following is a partial list of the hydrocarbons that *Liquid Remediact™* can remediate:

- DIESEL FUEL
- HEATING OIL
- GASOLINE
- BENZENE
- PARAFFIN
- LUBRICATING OIL
- PAINT THINNERS
- MINERAL SPIRITS
- MOTOR OIL
- AROMATICS
- ETHYLBENZENE
- JET FUEL
- CUTTING OILS
- GLYCOLS
- ALCOHOL
- NAPHTHALENE
- CRUDE OIL
- TOLUENE
- KEROSENE
- SOLVENTS
- ANTI-FREEZE
- ORGANIC PESTICIDES
- ORGANIC HERBICIDES
- TRANSMISSION FLUID
- XYLENE
- ORGANIC SOLVENTS
- GREASE
- TARS

Technical Information

Liquid Remediact™ is an active mixture of hydrocarbon-oxidizing, naturally occurring, single-celled micro-organisms with a "bio-surface cleaning agent" and water.
It is specially formulated to be safe, environmentally enhancing and effective.

PHYSICAL PROPERTIES:

Appearance:	Clear Liquid
Odor:	Orange Citrus
Boiling Point:	212° F.
Soluble in Water:	Complete
pH Concentrate"	6.9 to 7.2
pH Diluted:	6.9 to 7.5
Evaporation Rate:	Same as Water

PRODUCT EFFECTIVENESS: The effectiveness of this product and the "speed" at which it works is determined by certain factors. In general these factors are as follows:
TEMPERATURE: The warmer the temperature, the faster this product will work.
The effective operating temperature is between 42° F. & 120° F.
AERATION & PRESSURE: Aeration (air hose or "bubbler) & pressure speeds the process.
TYPE OF HYDROCARBON: Some hydrocarbons take longer than others.
The bio-remedial process generally will begin immediately but may take longer to complete depending on the above factors.

Packaging Information

1 GALLON JUG (4 PER CASE)
5 GALLONS
55 GALLON DRUM
275 GALLON TOTE

Material Safety Data Sheet

SpillAway Projects Ltd

Emergency Tel No: +44 (0)7767 018418

Section 1 – Product Identification

Product: **Liquid Remediact™**

Description: Bioremedial Cleaner for Hydrocarbon Contamination in water and soil.

Section 2 – Ingredients Classification

Hazardous Components: None

Typical Composition: An aqueous-water based solution of single-celled micro-organisms in a solution of micronutrients, extracts and bio-surfactants with natural food colour added for identification.

NAME	EC NUMBER	CAS NUMBER	CONTENT
NON-IONIC SHORT CHAIN ALCOHOL	500-019-9	9005-65-6	4-<5%
BACTERIAL CULTURES		N/A	5-<6%
FOLDED ORANGE OIL	232-433-8	8028-48-6	5-<6%

All contents are non-hazardous and readily biodegradable.

Section 3 – Hazards Identification

Hazardous Components: None

SARA Hazard: ***Title III Section 313:*** Not Listed
Fire-(Section 311/312): None Noted

Section 4 – Emergency First Aid Measures

Follow Standard First Aid Procedures:

Swallowing: Call Physician or poison control centre
Skin Contact: Wash affected area with water
Eye Contact: Flush eyes with cool water for at least 15 minutes
Inhalation: Remove victim to fresh air

Section 5 – Fire & Explosion Hazards

Flash Point & Method Used: N/A
Flammable Limits: N/A
NFPA Rating: NO NFPA RATING

HMIS Rating: **Health:** 0 **Fire:** 0 **Reactivity:** 0

Special fire fighting procedures & precautions: NONE
Unusual Fire & Explosion Hazards: NONE

Section 6 – Accidental Release Measures

Spill or Leak Precautions: None
Waste Disposal: May be disposed of in normal waste stream according to local government rules and other by-law requirements

Section 7 – Precautions: Handling, Storage & Usage

Although there are no special precautions to be taken in handling, storage or usage of this product that will change its safe use, it is recommended that it be kept at a temperature between 32° F. & 120° F. in order for it to be most effective.

Section 8 – Exposure Controls & Personal Protection

Exposure Limits: **WEL:** NO OSHA WEL **TLV:** NO ACGIH TLV

Employee Protection:

Control Measures: Adequate Ventilation
Respiratory Protection: None Required
Protective Clothing: None Required
Eye Protection: None Required, but recommended

Section 9 – Physical Data

Boiling Point: 212° F.
Melting Point: N/A
Vapour Pressure: MM/HG: <0.01 @ 20°C
Specific Gravity: H_2O=1 1.00=+/- 0.1
Solubility in Water: Complete
Appearance: Liquid
Odour: Mild Citrus
Colour: Colourless
pH: 6.9 to 7.2

Section 10 – Stability & Reactivity

Stability: Stable
Hazardous Polymerization: None
Materials to Avoid: Strong oxidizing agents & strong acids
Hazardous Decomposition Products: None
Conditions to Avoid: Do not quick freeze or expose to temperatures over 150° F. These temperatures pose no hazard but they are not compatible to this product.

Section 11 – Toxicological Information

Effects of Overexposure:

Inhalation: No Known Problem
Ingestion: May Cause Mild Transient Gastrointestinal Irritation.
Eye Contact: May Cause Mild Transient Irritation. Not Classified.
Skin Contact: Not Classified as a Skin Irritant or Corrosive Material.

Section 12 – Environmental Information

Environmental Protection: None. This product is environmentally safe even when large quantities are released into the environment.
Spill or Leak Precautions: None

Section 13 – Disposal Consideration

Waste Disposal: May be disposed of in normal waste stream according to federal, state or local requirements

Section 14 – Transport Information

Special Precautions: None
DOT Classification: Class 55
DOT Proper Shipping Name: Cleaning Compounds

Section 15 – Regulatory Information

DOT Classification: Class 55
DOT Proper Shipping Name: Cleaning Compounds
Other Regulatory Requirements: None

Section 16 – Other Information

This information relates only to the specific material designated & may not be valid for such material used in combination with any other materials or in any other process. The stated M.S.D.S. is reliable to the best of the company's knowledge & believed to be accurate as of the date indicated. However, no representation, warranty or guarantee of any kind, expressed or implied, is made as to its accuracy, reliability or completeness & we assume no responsibility for any loss, damage or expense, direct or consequential, arising out of use. RE: KLONDIKE REUSE PIT

Enclosed are the results of analyses for samples received by the laboratory on 06/19/25 13:01.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-06	The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
GC-NC1	8260 confirmation analysis was performed; initial GC results were not supported by GC/MS analysis and are biased high with interfering compounds.
GC-NC	8260 confirmation analysis was performed; initial GC results were not supported by GC/MS analysis and are reported as ND.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

RE: KLONDIKE REUSE PIT

Enclosed are the results of analyses for samples received by the laboratory on 06/20/25 10:02.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

QR-04	The RPD for the BS/BSD was outside of historical limits.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

RE: KLONDIKE REUSE PIT

Enclosed are the results of analyses for samples received by the laboratory on 07/18/25 12:25.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Total Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Cardinal Laboratories is accredited through the State of New Mexico Environment Department for:

Method SM 9223-B	Total Coliform and E. coli (Colilert MMO-MUG)
Method EPA 524.2	Regulated VOCs and Total Trihalomethanes (TTHM)
Method EPA 552.2	Total Haloacetic Acids (HAA-5)

Accreditation applies to public drinking water matrices for State of Colorado and New Mexico.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Notes and Definitions

QR-04	The RPD for the BS/BSD was outside of historical limits.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

Qualifiers

GC VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
E	Result exceeded calibration range.
F1	MS and/or MSD recovery exceeds control limits.
S1-	Surrogate recovery exceeds control limits, low biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: NTG Environmental
Project: Klondike Reuse Pit

Job ID: 885-36001-1

Job ID: 885-36001-1 Eurofins Albuquerque

Job Narrative
885-36001-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

Receipt
The samples were received on 10/23/2025 7:55 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.5°C and 2.0°C.

Gasoline Range Organics
Method 8015D_GRO: The matrix spike (MS) recoveries for preparation batch 885-37105 and analytical batch 885-37152 were outside control limits. Non-homogeneity is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8015D_GRO: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 885-37107 and analytical batch 885-37248 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
Method 8021B: Surrogate recovery for the following samples were outside the upper control limit: V-26-84 (885-36001-61), V-26-85 (885-36001-62), V-26-86 (885-36001-63), V-26-87 (885-36001-64), V-26-88 (885-36001-65), V-26-89 (885-36001-66), V-26-90 (885-36001-67), V-26-91 (885-36001-68), V-26-92 (885-36001-69), V-26-93 (885-36001-70), V-26-94 (885-36001-71), V-26-95 (885-36001-72), V-26-96 (885-36001-73), V-26-100 (885-36001-74), V-26-101 (885-36001-75), V-26-102 (885-36001-76), V-26-103 (885-36001-77), V-26-104 (885-36001-78), V-26-105 (885-36001-79), V-26-106 (885-36001-80) and (CCV 885-37258/21). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batches 885-37115, 885-37127 and 885-37438 and analytical batches 885-37082, 885-37156 and 885-37444 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8015D_DRO: Surrogate recovery for the following sample is outside the lower control limit: (CCV 885-37082/40). Corresponding CCV has low surrogate. However, samples show surrogate within range. Therefore, sample data is reported.

Method 8015D_DRO: The following sample was diluted due to abundance of target analytes: V-26-14 (885-36001-13). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: NTG Environmental
Project/Site: Klondike Reuse Pit

Job ID: 885-36001-1

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

ANALYSIS REQUEST

Preservative Codes

None: NO — DI Water: H_2O

Cool: Cool — MeOH: Me

HCL: HC — HNO_3: HN

H_2S0_4: H_2 — NaOH: Na

H_3PO_4: HP

$NaHSO_4$: NABIS

$Na_2S_2O_3$: $NaSO_3$

Zn Acetate+NaOH: Zn

NaOH+Ascorbic Acid: SAPC

Sample Comments

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True

Released to Imaging: 3/12/2026 10:01:48 AM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC VOA

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits

GC Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
S1-	Surrogate recovery exceeds control limits, low biased.
S1+	Surrogate recovery exceeds control limits, high biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: NTG Environmental
Project: Klondike Reuse Pit

Job ID: 885-36126-1

Job ID: 885-36126-1 Eurofins Albuquerque

Job Narrative
885-36126-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

Receipt
The samples were received on 10/24/2025 7:55 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 1.5°C, 4.0°C and 5.0°C.

Gasoline Range Organics
Method 8015D_GRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-37218 and analytical batch 885-37776 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: Surrogate recovery for the following samples is outside the lower control limit: (CCV 885-37155/106), (CCV 885-37155/111), CCV 885-37156/56). and (CCV 885-37155/84). Corresponding CCV shows low surrogate. However, samples associated with this CCV show surrogate within range. Therefore, data is reported.

Method 8015D_DRO: Surrogate recovery was outside acceptance limits for the following matrix spike/matrix spike duplicate (MS/MSD) sample: (885-36126-A-60-C MS). The parent sample's surrogate recovery was within limits. The MS/MSD sample has been qualified and reported. Parent and MSD are passing within limits.

Method 8015D_DRO: Surrogate recovery for the following samples were outside control limits: V-26-200 (885-36126-40), (885-36126-A-40-C MS) and (885-36126-A-40-D MSD). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits. The MS/MSD confirms the low surrogate recovery of the parent; no re-extraction necessary.

Method 8015D_DRO: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 885-37293 and analytical batch 885-37261 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8015D_DRO: Surrogate recovery for the following sample was outside the upper control limit: V-26-275 (885-36126-115). This sample did not contain any target analytes; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Accreditation/Certification Summary

Client: NTG Environmental
Project/Site: Klondike Reuse Pit

Job ID: 885-36126-1

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
New Mexico	State	NM9425, NM0901	02-27-26

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
300.0	300_Prep	Solid	Chloride
8015D	5030C	Solid	Gasoline Range Organics [C6 - C10]
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

V-26-210	10/22/2025	10:38:00	x		Comp	1		X	X	X		

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

Sample Comments

Additional Comments:

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of $85.00 will be applied to each project and a charge of $5 for each sample submitted to Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True

ANALYTICAL REPORT

PREPARED FOR

Attn: Ms. Becky Haskell
NTG Environmental
209 W. McKay St
Carlsbad, New Mexico 88220

Generated 11/6/2025 1:00:24 PM

JOB DESCRIPTION

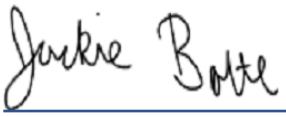
Klondike Reuse Pit

JOB NUMBER

885-36208-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.



Released to Imaging: 3/12/2026 10:01:48 AM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

HPLC/IC

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: NTG Environmental
Project: Klondike Reuse Pit

Job ID: 885-36208-1

Job ID: 885-36208-1 Eurofins Albuquerque

Job Narrative
885-36208-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

Receipt
The samples were received on 10/25/2025 8:45 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 1.8°C, 6.0°C and 6.0°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
Method 300_OF_28D_PREC: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 885-37315 and analytical batch 885-37347 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.
