5/1/2007 Spudded well.

Spud 17-1/2" @ 6:15pm 5-1-07. Current approved TD is 5500'. COG respectfully requests permission to deepen this well to 6000'. 5-1/2" csg would be set @ approximately 6000'. Because we don't mud log these wells, it is hard to know for sure exactly where the top of the Tubb begins. We are wanting to drill through the Tubb in order to be sure we have all of the Blinbry open. We do not intend to produce or test the Tubb. It will be a Paddock and Blinbry (Yeso reservoir) test. We are just trying to give ourselves a little room so we make certain we get through all of the Yeso.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
