Hi Monica!

After my thorough review, I found that the best path forward to get the Landaeur 1 returned to production is by recompleting it in the Mesaverde as a part of our team's 2022/2023 zone-add program. With the Dakota zone TA'd, the wellbore is actually prepped for a Mesaverde recomplete, so I did not proceed with the work in the NOI approved 7/20/2021. This is why we are requesting a TA extension, as the TA should not have expired (based off the 10-year rule with an MIT at 5 years, which was successful), but we were asked to NOI a path forward by 6/14/2021. The plan has changed.

Please let me know if you have any other questions, thank you!

Hello Mandi

The last sundry in the well file dated 6/10/21 with approval date 7/20/21 is to put the well back on production. Was this done?

Subject: Landaeur 1 - 3004511081

Good afternoon Brandon and Monica,

Priscilla sent us a note that you needed some additional information from us on the above mentioned well. We have put a new set of eyes on this well and we have identified uphole Mesaverde potential. The well would be recompleted as a part of our 2022 or 2023 zone-add program. We can submit an NOI to this effect if necessary to achieve the TA extension.

Please let me know if this is acceptable and I will get the NOI for the TA extension filed this week.

Thank you,

**Mandi Walker**
