Accepted for record – NMOCD gc 3/21/2022

Notice of Intent

Sundry ID: 2654972

Type of Submission: Notice of Intent

Type of Action: Plug and Abandonment

Date Sundry Submitted: 01/31/2022

Time Sundry Submitted: 02:11

Date proposed operation will begin: 02/14/2022

Procedure Description: 1. NOTIFY OCD 24HRS IN ADVANCE OF MIRU P&A EQUIPMENT. 2. HOLD SAFETY AND PLANNING MEETING WITH ALL CREW MEMBERS. MIRU FISHING EQUIPMENT. NU BOP. 3. RU & FISH TOOLS FROM WELLBORE AS NEEDED. 4. SET 4-1/2" CIBP @ 3,630'. SPOT 35' CMT. WOC & TAG. ETOC-3,595'. RUN CBL (IF NOT PROVIDED) TO 3,595'. CIRC. MLF FROM 3,595'. 5. PERF @ 2,000' & SQZ 50 SKS 1,900'-2,000'. 6. PERF @ 1,385' & SQZ 110 SKS 1,225'-1,385'. GLORIETA & 10-3/4" SHOE. WOC & TAG. 7. PERF @ 296' & SQZ 80 SKS 196'-296'. SAN ANDRES. WOC & TAG. 8. PERF @ 100' & CIRC CMT TO SURFACE VIA 4-1/2"X10-3/4" ANNULUS. VERIFY CMT IN ALL ANNULI. MONITOR FLUID LEVEL FOR 30 MIN. 9. DISPOSAL OF FLUIDS AS NEEDED. RD P&A EQUIPMENT. REMOVE WELLHEAD. INSTALL MARKER WITH LOC & WELL INFO. CLEAN LOCATION & MOVE OFF. • CLASS "C" CEMENT ONLY. • CLOSED LOOP SYSTEM W/ STEEL PITS. • 3% CACL FOR CMT MIX. • SQUEEZE PSI NOT TO EXCEED 500 PSI. • USE 50' EXCESS CMT INSIDE CSG/100% EXCESS CMT OUTSIDE CSG

Surface Disturbance

Is any additional surface disturbance proposed?: No

Conditions of Approval

1. Operator shall place CIBP at **3,602'** (50'-100' above top most perf) and places **35 sx** of Class C cement on top as proposed. WOC and TAG.

Note: Top of Abo is at 3,433' which must be isolated.

2. Operator perf at 2,000' and squeeze cement to **1,880'** as proposed. WOC and TAG.
3. Operator perf at 1,385' and squeeze cement to 1,225' as proposed to isolate the Glorietta Formation and 10-3/4'' shoe. WOC and TAG. **Must tag a minimum of 1,225' to isolate the shoe.**
4. Operator perf at 296' and squeeze cement to 196' as proposed. WOC and TAG.
5. Operator shall perf and squeeze at 100'. Operator shall place a balanced Class C cement plug from 100' - surface as proposed.
6. See Attached for general plugging stipulations.

BUREAU OF LAND MANAGEMENT
Roswell Field Office
2909 W. Second Street
Roswell, New Mexico 88201
575-627-0272

General Requirements for Plug Backs

Failure to comply with the following Conditions of Approval may result in a Notice of Incidents of Noncompliance (INC) in accordance with 43 CFR 3163.1.

1. Plugging operations shall commence within **ninety (90)** days from this approval.

If you are unable to plug back the well by the 90th day provide this office, prior to the 90th day, with the reason for not meeting the deadline and a date when we can expect the well to be plugged back. Failure to do so will result in enforcement action.

2. **Notification:** Contact the appropriate BLM office at least 24 hours prior to the commencing of any plug back operations. Call 575-627-0205.

3. **Blowout Preventers:** A blowout preventer (BOP), as appropriate, shall be installed before commencing any plugging operation. The BOP must be installed and maintained as per API and manufacturer recommendations. The minimum BOP requirement is a 2M system for a well not deeper than 9,090 feet; a 3M system for a well not deeper than 13,636 feet; and a 5M system for a well not deeper than 22,727 feet.

4. **Mud Requirement:** Mud shall be placed between all plugs. Minimum consistency of plugging mud shall be obtained by mixing at the rate of 25 sacks (50 pounds each) of gel per 100 barrels of brine water. Minimum nine (9) pounds per gallon.

5. **Cement Requirement:** Sufficient cement shall be used to bring any required plug to the specified depth and length. Any given cement volumes on the proposed plugging procedure are merely estimates and are not final. Unless specific approval is received, no plug except the surface plug shall be less than 25 sacks of cement. Any plug that requires a tag will have a minimum WOC time of 4 hours.

In lieu of a cement plug across perforations in a cased hole (not for any other plugs), a bridge plug set within 50 feet to 100 feet above the perforations shall be capped with 25 sacks of cement.

Before pumping cement on top of CIBP, tag will be required to verify depth. Based on depth, a tag of the cement may be deemed necessary.

Unless otherwise specified in the approved procedure, the cement plug shall consist of either **Neat Class "C"**, for up to 7,500 feet of depth or **Neat Class "H"**, for deeper than 7,500 feet plugs.

6. **Subsequent Plug back Reporting:** Within 30 days after plug back work is completed, file one original and three copies of the Subsequent Report, Form 3160-5 to BLM. The report should give in detail the manner in which the plug back work was carried out, the extent (by depths) of cement plugs placed, and the size and location (by depths) of casing left in the well. **Show date work was completed.**

7. **Trash:** All trash, junk and other waste material shall be contained in trash cages or bins to prevent scattering and will be removed and deposited in an approved sanitary landfill. Burial on site is not permitted.
