Notice of Intent

Sundry ID: 2647963

Procedure Description: Ascent Energy respectfully requests approval on the Gavilon Fed Com 704H for an option to:

- Addition of an External Casing Packer on the 13-3/8" Casing
- Addition of an Optional 7-5/8" Intermediate #3 casing string set 100' above KOP (10,802'). This hole section will be drilled with a 8-3/4" open hole. o Optional decrease of the open hole size of the production curve/lateral section to 6-3/4" if 7-5/8" Int #3 string is ran.
- Circulating Medium change to Oil-Based Mud in the Production Hole Section. The reason for the request is based on improved drilling efficiencies and improved cementing in-place for each casing string. We believe the larger casing diameters in the vertical section will increase the likelihood of getting cement to surface for each string. There will be no change in Geology formations, and casing depths as noted in the COA of the approved APD. Please see attached document for further detail.

Surface Disturbance

Is any additional surface disturbance proposed?: No
