## I. Objectives

The long-term objective of reclamation and remediation is to set the course for eventual ecosystem restoration, including the restoration of the natural vegetation community, hydrology, and wildlife habitats. In most cases, this means returning the land to a condition approximating or equal to that which existed prior to the disturbance. The operator is generally not responsible for achieving full ecological restoration of the site. Instead, the operator must achieve the short-term stability, visual aesthetic, hydrological, and productivity objectives of the Bureau of Land Management and take the steps necessary to ensure that long-term objectives will be reached through natural processes.

## II. Background

The surface owner is Richard Gatewood per the Eddy County Assessor's Office (Sidwell's Portico).

## III. Scope of Work

1. The drilling pit area (see diagram) was lined with 9 rolls of GC Liners. Prior to GCL placement, the area will be prepared by removing any significant ruts, debris, or other materials that could damage the liner. The GCL will be laid parallel to any natural sloping and will be anchored if necessary to avoid slippage. Scrap 6" of pad material and apply that on top of the liner first, avoid any large rocks laid on liner to avoid cutting/puncturing liner. Cap the remaining liner with 18-24" to the edges of the liner, then tapered to surface grade. Capping material was obtained from the surface owner.
2. Scrape any remaining surface and berm materials and deep bury 4' at the point designated on the diagram. Use brought up material to cap well pad (approximately 4-6", if needed obtain additional topsoil from above source).
3. The pad was ripped east to west or following any natural sloping.
4. The reclamation site was completed on 12/30/2021 and broadcast seeded on 1/12/2022, with the below seed mixture per the surface owner (see table below). A 500' radius trash sweep must be conducted with all trash removed.

Mix	Species	lb/acre (Drilled)	lb/acre (Broadcast)
Gissler Ranch	Sideoats Grama	2.0	4.0
"	Sand Dropseed	1.0	2.0
"	Alkali Sacaton	2.5	5.0
"	Little Bluestem	2.5	5.0

## IV. Notice of Intent

Figure 2, EOG Resources, Inc. is requesting approval to proceed with Reclamation activity as shown in green and yellow on attached map (Figure 1), with 3rd party company, Lucid Energy, taking responsibility for their equipment removal and Reclamation of that area as shown in red on the map.
