Heather, sorry for the delayed response.

Normally, field operations personnel are responsible for removal of equipment from field locations especially when it is due to reclamation requests. This is due to having to isolate certain pipeline segments, isolation valve maintenance, cutting and capping lines.

Currently, operations personnel are short-handed and very busy. It is my understanding that they have had no time to address the below requests to remove all facilities. My apologies for this.

If you need further information, please continue to email the same group in this email chain.

Thanks.

[Use caution with links/attachments]  
Good Morning Amy & Hector,

We would like to request the disconnect & removal of the following meters:

68663 Box Canyon #5  
61919 Brainerd IO Fed #1

In addition to removing the meters please make sure to remove any meter runs, meter houses, concrete pads and pipelines are capped so that we can complete reclamation at these locations. If there are questions please let me know. If there are any additional folks who need to be included in these emails in the future please feel free to send me their info and I make sure to add them.

Thanks,
