#### **Subsequent Report:**

Procedure Description: Revise cementing plan for 7-5/8" intermediate casing

Verbal permission was received from the BLM (Carlsbad Field Office) to revise the intermediate cementing procedure.

The original plan was to pump a single stage down the casing and then to braden head a second stage down the annulus between the surface casing and the 7-5/8" intermediate casing. This operation was based on the expectations of lost returns in the intermediate hole section. As this did not occur, a revised plan was requested. The revised cementing plan called for a single stage cement job with cement returns to surface.

This revised cementing plan was performed on June 3, 2021 as follows:

- Ran 7-5/8" casing to 10,667'.
- Mixed and pumped:
  - First stage lead - 805 sx (579 bbls) at 10.5 ppg – 4.04 ft<sup>3</sup>/sk
  - First stage tail - 250 sx (68 bbls) at 13.5 ppg – 1.52 ft<sup>3</sup>/sk
- Displace cement with 10.4 ppg brine. Bumped plug.
- Had 5 bbls cement return to surface.
- Well static. Full returns throughout cement job.
