Operations will be begin on, or around, February 19th, 2024. We will being by pumping test fluid into the void between the surface casing head and the tubing head to determine if the tubing head has an upper seal assembly.

If we determine there is an upper assembly seal, we will then pump the void full of plug off packing and then pressure test with test fluid to 70% of casing working pressure.

If we determine there is not an upper assembly seal, we will then we will pump three sticks of packing and monitor the bradenhead pressure to see if the leak is fixed.
