Subject: RE: [EXTERNAL] Hagood 100 45-33599

Good afternoon Monica and Kenny,

Attached is the CBL run this morning (4/2/2024). The log shows TOC @ ~62'. Surface casing shoe is at ~133'.

Additionally, the following was performed/discovered:

- Pressure tested the 4-1/2" casing above the CICR to 560 psi (Good Test).

Moving forward, Hilcorp received verbal approval from the NMOCD for the following adjustments to the approved NOI (attached):

- PLUG #1: 109sx of Class G Cement (15.8 PPG, 1.15 yield); FRD Perfs @ 1,456' | KRD Top @ 309' | Surf. Casing Shoe @ 133':
 - Pump a 109 sack balanced cement plug inside the 4-1/2" casing (est. TOC @ +/- 0' & est. BOC @ +/- 1,394').
 - RIH w/ 1" polyline in the 4-1/2" Casing x 7" Casing annulus, circulate cement to surface.
 - Top off as needed

Kenny, does the BLM approve of this adjustment?

Please let us know if you have any issues with this.

Thanks,

John LaMond

John,

Ownership is the same as to the PC & FC for the Hagood #100 (API No. 30-045-33599).

Hilcorp and San Juan Basin Royalty Trust have 100% of the WI as to both formations.

Thanks,

Carson Parker Rice
