Is this well the defining well for the Horizontal Spacing Unit?

Is this well an infill well?

Yes

If infill is yes please provide API if available, Operator Name and well number for Defining well for Horizontal Spacing Unit.

Section 2 – Enhanced Plan EFFECTIVE APRIL 1, 2022

Beginning April 1, 2022, an operator that is not in compliance with its statewide natural gas capture requirement for the applicable reporting area must complete this section.

□ Operator certifies that it is not required to complete this section because Operator is in compliance with its statewide natural gas capture requirement for the applicable reporting area.

IX. Anticipated Natural Gas Production:

| Well | API | Anticipated Average Natural Gas Rate MCF/D | Anticipated Volume of Natural Gas for the First Year MCF |
|------|-----|---|---|
| | | | |
| | | | |
| | | | |

X. Natural Gas Gathering System (NGGS):

| Operator | System | ULSTR of Tie-in | Anticipated Gathering Start Date | Available Maximum Daily Capacity of System Segment Tie-in |
|----------|--------|-----------------|-------------------------------------|--|
| | | | | |
| | | | | |

XI. Map. \boxtimes Attach an accurate and legible map depicting the location of the well(s), the anticipated pipeline route(s) connecting the production operations to the existing or planned interconnect of the natural gas gathering system(s), and the maximum daily capacity of the segment or portion of the natural gas gathering system(s) to which the well(s) will be connected.

XII. Line Capacity. The natural gas gathering system \Box will \boxtimes will not have capacity to gather 100% of the anticipated natural gas production volume from the well prior to the date of first production.

XIII. Line Pressure. Operator \boxtimes does \square does not anticipate that its existing well(s) connected to the same segment, or portion, of the natural gas gathering system(s) described above will continue to meet anticipated increases in line pressure caused by the new well(s).

Attach Operator's plan to manage production in response to the increased line pressure.

XIV. Confidentiality: \square Operator asserts confidentiality pursuant to Section 71-2-8 NMSA 1978 for the information provided in Section 2 as provided in Paragraph (2) of Subsection D of 19.15.27.9 NMAC, and attaches a full description of the specific information for which confidentiality is asserted and the basis for such assertion.

Section 3 - Certifications Effective May 25, 2021

Operator certifies that, after reasonable inquiry and based on the available information at the time of submittal:

□ Operator will be able to connect the well(s) to a natural gas gathering system in the general area with sufficient capacity to transport one hundred percent of the anticipated volume of natural gas produced from the well(s) commencing on the date of first production, taking into account the current and anticipated volumes of produced natural gas from other wells connected to the pipeline gathering system; or

 \boxtimes Operator will not be able to connect to a natural gas gathering system in the general area with sufficient capacity to transport one hundred percent of the anticipated volume of natural gas produced from the well(s) commencing on the date of first production, taking into account the current and anticipated volumes of produced natural gas from other wells connected to the pipeline gathering system. *If Operator checks this box, Operator will select one of the following:*

Well Shut-In. 🛛 Operator will shut-in and not produce the well until it submits the certification required by Paragraph (4) of Subsection D of 19.15.27.9 NMAC; or

Venting and Flaring Plan. \Box Operator has attached a venting and flaring plan that evaluates and selects one or more of the potential alternative beneficial uses for the natural gas until a natural gas gathering system is available, including:

- (a) power generation on lease;
- (b) power generation for grid;
- (c) compression on lease;
- (d) liquids removal on lease;
- (e) reinjection for underground storage;
- (f) reinjection for temporary storage;
- (g) reinjection for enhanced oil recovery;
- (h) fuel cell production; and
- (i) other alternative beneficial uses approved by the division.

Section 4 - Notices

1. If, at any time after Operator submits this Natural Gas Management Plan and before the well is spud:

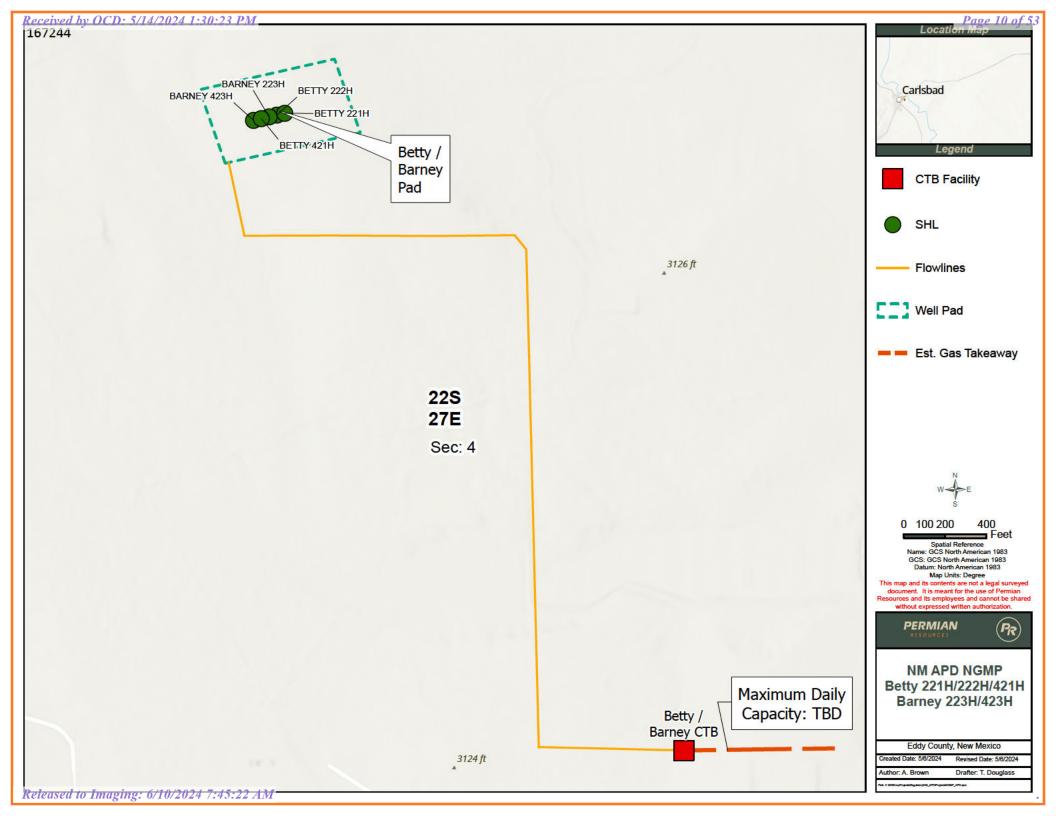

(a) Operator becomes aware that the natural gas gathering system it planned to connect the well(s) to has become unavailable or will not have capacity to transport one hundred percent of the production from the well(s), no later than 20 days after becoming aware of such information, Operator shall submit for OCD's approval a new or revised venting and flaring plan containing the information specified in Paragraph (5) of Subsection D of 19.15.27.9 NMAC; or

(b) Operator becomes aware that it has, cumulatively for the year, become out of compliance with its baseline natural gas capture rate or natural gas capture requirement, no later than 20 days after becoming aware of such information, Operator shall submit for OCD's approval a new or revised Natural Gas Management Plan for each well it plans to spud during the next 90 days containing the information specified in Paragraph (2) of Subsection D of 19.15.27.9 NMAC, and shall file an update for each Natural Gas Management Plan until Operator is back in compliance with its baseline natural gas capture rate or natural gas capture requirement.

2. OCD may deny or conditionally approve an APD if Operator does not make a certification, fails to submit an adequate venting and flaring plan which includes alternative beneficial uses for the anticipated volume of natural gas produced, or if OCD determines that Operator will not have adequate natural gas takeaway capacity at the time a well will be spud.

I certify that, after reasonable inquiry, the statements in and attached to this Natural Gas Management Plan are true and correct to the best of my knowledge and acknowledge that a false statement may be subject to civil and criminal penalties under the Oil and Gas Act.

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

Section 1.0 – Introduction

I. Purpose

The purpose of this contingency plan (Plan) is to provide Permian Resources Corporation. (Permian Resources) with an organized plan of action for alerting and protecting Permian Resources employees, the general public, and any potential first responders prior to any intentional release or immediately following the accidental / unintentional release of a potentially hazardous volume / concentration of Hydrogen Sulfide Gas (H2S).

II. Scope & Applicability

This Plan applies to all planned, unplanned, uncontrolled and/or unauthorized releases of hazardous concentrations of H₂S or any associated hazardous byproducts of combustion, occurring at any Permian Resources owned or operated facilities including but not limited to: wells, flowlines, pipelines, tank batteries, production facilities, SWD facilities, compressor stations, gas processing plants, drilling / completions / workover operations, and any other applicable company owned property.

Section 2.0 - Plan Implementation

I. Activation Requirements

In accordance with the requirements of Bureau of Land Management Onshore Order #6 and NMAC 19.15.11, this Plan shall be activated in advance of any authorized, planned, unplanned, uncontrolled, or unauthorized release of a hazardous volume / concentration of H_2S gas, or SO^2 , which could potentially adversely impact the workers, general public or the environment.

II. Emergency Evacuation

In the event of an unplanned, uncontrolled, or unauthorized release of a hazardous volume / concentration of H_2S gas, the first priority is to ensure the safety of the workers and general public. Upon discovery and subsequent determination of an applicable release, which cannot be quickly mitigated, immediately by using 911, notify local authorities to begin the process of alerting the general public, evacuate any residents within the Radius of Exposure (ROE), and limit any general public or employee access to any areas within the ROE of the affected facility.

III. Emergency Response Activities

The purpose of emergency response actions is to take steps to quickly mitigate / stop the ongoing release of the hazardous source of H_2S . Upon discovery of any hazardous release, immediately notify Permian Resources management to activate the Emergency Response Team (ERT). Once Permian Resources supervision arrives and assesses the situation, a work plan identifying the proper procedures shall be developed to stop the release.

Section 3.0 - Potential Hazardous Conditions & Response Actions

During a planned or unplanned release of H₂S, there are several hazardous conditions that are presented both to employees, the general public, and emergency responders. These specific hazardous conditions are identified in the tables below.

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

| H2S OPERATING CONDITIONS – RESPONSE ACTIONS TO CONSIDER | ✓ |
|--|----|
| H ₂ S CONDITION 1: POTENTIAL DANGER TO LIFE AND HEALTH -> WARNING SIG GREEN | GN |
| H ₂ S concentration <10 ppm detected by location monitors | |
| General Actions During Condition 1 | |
| Notify Site Supervisor / Permian Resources Person-in-Charge (PIC) of any observed increase in ambient H ₂ S concentrations | |
| All personnel check safety equipment is in adequate working order & store in accessible location | |
| Sensitize crews with safety meetings. | |
| Limit visitors and non-essential personnel on location | |
| Continuously monitor H ₂ S concentrations and check calibration of sensors | |
| Ensure H ₂ S scavenger is on location. | |
| H₂S CONDITION 2: MODERATE DANGER TO LIFE AND HEALTH → WARNING SIGN YELLOW | |
| H ₂ S concentration >10 ppm and < 30 ppm in atmosphere detected by location monitors: | |
| General Actions During Condition 2 | |
| Sound H ₂ S alarm and/or display yellow flag. | |
| Account for on-site personnel | |
| Upon sounding of an area or personal H_2S monitor alarm when 10 ppm is reached, proceed to a safe briefing area upwind of the location immediately (see MA-4, Figure 5-1). | |
| Don proper respiratory protection. | |
| Alert other affected personnel | |
| <u>If trained and safe to do so</u> undertake measures to control source H2S discharge and eliminate possible ignition sources. Initiate Emergency Shutdown procedures as deemed necessary to correct or control the specific situation. | |
| Account for on-site personnel at safe briefing area. | |
| Stay in safe briefing area if not working to correct the situation. | |
| Keep Site Supervisor / Permian Resources PIC informed. Notify applicable government agencies (Appendix A) If off-site impact; notify any neighbors within Radius of Exposure (ROE), Fig 5.11 | |
| Continuously monitor H ₂ S until readings below 10 ppm. Evacuated area shall not be re-entered except by trained and authorized personnel utilizing appropriate respiratory protection; or until "all clear" sounded by Permian Resources PIC / Site Supervisor. | |
| | |

.

Permian Resources Corporation

Eddy County, New Mexico

| Betty 221H, 222H, 421H | |
|---|--|
| H₂S CONDITION 3: EXTREME DANGER TO LIFE AND HEALTH → WARNING SIGN RED | |
| > 30 ppm H_2S concentration in air detected by location monitors: Extreme danger to life | |
| General Actions During Condition 3 | |
| Sound H ₂ S alarm and/or display red flag. | |
| Account for on-site personnel | |
| Move away from H_2S source and get out of the affected area. | |
| Proceed to designated safe briefing area; alert other affected personnel. | |
| Account for personnel at safe briefing area. | |
| If trained and safe to do so undertake measures to control source H2S discharge and eliminate possible ignition sources. Initiate Emergency Shutdown procedures as deemed necessary to correct or control the specific situation. | |
| Notify vehicles or situation and divert all traffic away from location. | |
| Permian Resources Peron-in-Charge will make appropriate community notifications. | |
| Red warning flag must be on display until the situation has been corrected and the Permian Resources Person-in-Charge determines it is safe to resume operations under Condition 1 . | |
| Notify management of the condition and action taken. If H ₂ S concentration is increasing and steps to correct the situation are not successful – or at any time if well control is questionable – alert all responsible parties for possible activation of the H ₂ S Contingency Plan. If well control at the surface is lost, determine if situation warrants igniting the well. | |
| If uncontrolled flow at the surface occurs, the Permian Resources PIC, with approval, if possible, from those coordinating the emergency (as specified in the site-specific H_2S Contingency Plan) are responsible for determining if the situation warrants igniting the flow of the uncontrolled well. This decision should be made only as a last resort and in a situation where it is obvious that human life is in danger and there is no hope of controlling the flow under prevailing conditions. | |
| If the flow is ignited, burning H ₂ S will be converted to sulfur dioxide (SO ₂), which is also highly toxic. Do not assume that area is safe after the flow is ignited. If the well is ignited, evacuation of the area is mandatory, because SO ₂ will remain in low-lying places under no-wind conditions. | |
| Keep Site Supervisor / Permian Resources PIC informed. Notify applicable government agencies and local law enforcement (Appendix A) If off-site impact; notify any neighbors within the Radius of Exposure (ROE), see example in Figure 5-11. | |
| Continuously monitor H ₂ S until readings fall below 10 ppm. | |
| Evacuated area shall not be re-entered except by trained and authorized personnel utilizing appropriate respiratory protection; or until "all clear" sounded by Permian Resources PIC / Site Supervisor. | |
| IF ABOVE ACTIONS CANNOT BE ACCOMPLISHED IN TIME TO PREVENT EXPOSURE TO THE PUBLIC | |
| Alert public (directly or through appropriate government agencies) who may be subject to potentially harmful exposure levels. | |
| Make recommendations to public officials regarding blocking unauthorized access to the unsafe area and assist as appropriate. | |

H₂S Contingency Plan

|---|--|
| Monitor ambient air in the area of exposure (after following abatement measures) to determine when it is safe for re-entry. | |

Section 4.0 - Notification of H₂S Release Event

I. Local & State Law Enforcement

Prior to the planned / controlled release of a hazardous concentration of H_2S gas or any associated byproducts of the combustion of H_2S gas, notify local law enforcement agencies regarding the contents of this plan.

In the event of the discovery of an unplanned/uncontrolled release of a hazardous concentration of H₂S gas or any associated byproducts of combustion, immediately notify local and/or state law enforcement agencies of the situation and ask for their assistance.

II. General Public

In the event of a planned or unplanned release of a hazardous concentration of H₂S gas or any associated byproducts of combustion, notify local law enforcement agencies and ask for their assistance in alerting the general public and limiting access to any public roads that may be impacted by such a release.

III. New Mexico Oil Conservation Division

The Permian Resources HSE Department will make any applicable notification to the New Mexico OCD regarding any release of a hazardous concentration of H_2S Gas or any associated byproducts of combustion.

IV. New Mexico Environment Department

The Permian Resources HSE Department will make any applicable notifications to the NMED regarding any release of a hazardous concentration of H_2S gas or any associated byproducts of combustion.

V. Bureau of Land Management

The Permian Resources Regulatory Department will make any applicable notifications to the BLM regarding any release of a hazardous concentration of H_2S gas or any associated byproducts of combustion.

Section 6.0 – Drilling Location Information

I. Site Safety Information

- 1. Safe Briefing Area
 - a. There shall be two areas that will be designated as "SAFE BRIEFING AREAS". If H₂S is detected in concentrations equal to or in excess of 10 ppm all personnel not assigned emergency duties are to assemble in the designated Safe Briefing area for instructions. These two areas shall be positioned in accessible locations to facilitate the availability of self-contained breathing air devices. The briefing areas shall be positioned no less than 250' from the wellhead and in such locations that at least one briefing area will be upwind from the well at all times.

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

- 2. Wind Indicators
 - a. 4 Windsocks will be installed at strategic points on the facility.
- 3. Danger Signs
 - a. A warning sign indicating the possible well conditions will be displayed at the location entrance.

4. H₂S Detectors and Alarms

- a. Continuous monitoring type H₂S detectors, capable of sensing a minimum of 5ppm H₂S in air will be located centrally located at the tanks, heater treater, and combustor. Continuous monitoring type SO₂ detector will also be located at the combustor. The automatic H₂S alarm/flashing light will be located at the site entrance and in front of tank battery.
- 5. Safety Trailer
 - a. A safety trailer equipped with an emergency cascade breathing air system with 2 ea. Work/escape packs, a stretcher, 2 OSHA approved full body harnesses, and a 20# Class ABC fire extinguisher shall be available at the site in close proximity to the safe briefing area. The cascade system shall be able to be deployed to the drill floor when needed to provide safe breathing air to the workers as needed.
- 6. Well Control Equipment
 - a. The location shall have a flare line to a remote automatic ignitor and back up flare gun, placed 150' from the wellhead.
 - b. The location shall be equipped with a remotely operated choke system and a mud gas separator.

7. Mud Program

- a. Company shall have a mud program that contains sufficient weight and additives to control H_2S .
- 8. Metallurgy
 - a. All drill strings, casing, tubing, wellhead, BOP, spools, kill lines, choke manifold and lines, and valves shall be suitable for anticipated H₂S volume and pressure.
- 9. Communication
 - a. The location shall be equipped with a means of effective communication such as a cell phones, intercoms, satellite phones or landlines.

|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

Section 7.0 – Hazard Communication

I. Physical Characteristics of Hydrogen Sulfide Gas

Hydrogen sulfide (H₂S) is a colorless, poisonous gas that is soluble in water. It can be present in crude oils, condensates, natural gas and wastewater streams.

 H_2S is heavier than air with a vapor density of 1.189 (air = 1.0); however, H_2S is most often mixed with other gases. These mixtures of H_2S and other gases can be heavier or lighter than air. If the H_2S -containing mixture is heavier, it can collect in low areas such as ditches, ravines, firewalls, and pits; in storage tanks; and in areas of poor ventilation. Please see physical properties in **Table 7.0**.

With H₂S the sense of smell is rapidly lost allowing lethal concentrations to be accumulated without warning. The toxicity of hydrogen sulfide at varying concentrations is indicated in the **Table 7.1**.

Warning: Do not use the mouth-to-mouth method if a victim ingested or inhaled hydrogen sulfide. Give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.

Table 7.0. Physical Properties of H₂S

| Properties of H2S | Description |
|--|--|
| Vapor Density > 1 = 1.189 Air = 1 | H2S gas is slightly heavier than air, which can cause it to settle in low places and build in concentration. Produced as a mixture with other gases associated with oil and gas production. |
| Flammable Range 4.3%-46% 43000 ppm – 460000 ppm | H2S can be extremely flammable / explosive when these concentrations are reached by volume in air. |

Although H₂S is primarily a respiratory hazard, it is also flammable and forms an explosive mixture at concentrations of 4.3%–46.0% (40,000ppm – 460,000 ppm) by volume in air.

H₂S can be encountered when:

- Venting and draining equipment.
- Opening equipment (separators, pumps, and tanks).
- Opening piping connections ("line breaking").
- Gauging and sampling storage tanks.
- Entering confined spaces.
- Working around wastewater pits, skimmers, and treatment facilities.
- II. Human Health Hazards Toxicological Information

Table 7.1. Hazards & Toxicity

| Concentration | Symptoms/Effects |
|---------------|------------------|
| (ppm) | |

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

| 0.00011-0.00033 ppm | Typical background concentrations |
|---------------------|---|
| 0.01-1.5 ppm | Odor threshold (when rotten egg smell is first noticeable to some). Odor becomes more offensive at 3-5 ppm. Above 30 ppm, odor described as sweet or sickeningly sweet. |
| 2-5 ppm | Prolonged exposure may cause nausea, tearing of the eyes, headaches or loss of sleep. Airway problems (bronchial constriction) in some asthma patients. |
| 20 ppm | Possible fatigue, loss of appetite, headache, irritability, poor memory, dizziness. |
| 50-100 ppm | Slight conjunctivitis ("gas eye") and respiratory tract irritation after 1 hour. May cause digestive upset and loss of appetite. |
| 100 ppm | Coughing, eye irritation, loss of smell after 2-15 minutes (olfactory fatigue). Altered breathing, drowsiness after 15-30 minutes. Throat irritation after 1 hour. Gradual increase in severity of symptoms over several hours. Death may occur after 48 hours. |
| 100-150 ppm | Loss of smell (olfactory fatigue or paralysis). |
| 200-300 ppm | Marked conjunctivitis and respiratory tract irritation after 1 hour. Pulmonary edema may occur from prolonged exposure. |
| 500-700 ppm | Staggering, collapse in 5 minutes. Serious damage to the eyes in 30 minutes. Death after 30-60 minutes. |
| 700-1000 ppm | Rapid unconsciousness, "knockdown" or immediate collapse within 1 to 2 breaths, breathing stops, death within minutes. |
| 1000-2000 ppm | Nearly instant death |

III. Environmental Hazards

H₂S and its associated byproducts from combustion presents a serious environmental hazard. Sulphur Dioxide SO₂ is produced as a constituent of flaring H₂S Gas and can present hazards associated, which are similar to H₂S. Although SO₂ is heavier than air, it will be picked up by a breeze and carried downwind at elevated temperatures. Since Sulfur Dioxide is extremely irritating to the eyes and mucous membranes of the upper respiratory tract, it has exceptionally good warning powers in this respect. The following table indicates the toxic nature of the gas. Please see the attached SDS in Appendix B for reference.

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

| SULFUR DIOXIDE TOXICITY | | | |
|-------------------------|--------|--|--|
| Concentration Effects | | Effects | |
| %SO ₂ | PPM | | |
| 0.0005 | 3 to 5 | Pungent odor-normally a person can detect SO ₂ in this range. | |
| 0.0012 | 12 | Throat irritation, coughing, and constriction of the chest tearing and smarting of eyes. | |
| 0.15 | 150 | So irritating that it can only be endured for a few minutes. | |
| 0.05 | 500 | Causes a sense of suffocation, even with first breath. | |

Section 8.0 - Regulatory Information

I. OSHA & NIOSH Information

II. Table 8.0. OSHA & NIOSH H₂S Information

| PEL, IDLH, TLV | Description | |
|---|---|--|
| NIOSH PEL 10 PPM | PEL is the Permissible Exposure Limit that an employee may be exposed up to 8 hr / day. | |
| OSHA General Industry Ceiling PEL – 20 PPM | The maximum exposure limit, which cannot be exceeded for any length of time. | |
| IDLH 100 PPM | Immediately Dangerous to Life and Health | |
| Permian Resources PEL 10 PPM | Permian Resources Policy Regarding H2S for employee safety | |

III. New Mexico OCD & BLM – H₂S Concentration Threshold Requirements

New Mexico NMAC 19.15.11 and Onshore Order #6 identify two Radii of Exposure (ROE) that identify potential danger to the public and require additional compliance measures. Permian Resources is required to install safety devices, establish safety procedures and develop a written H₂S contingency plan for sites where the H₂S concentrations are as follows.

| H₂S Radius of Exposure | Description | Control and Equipment Requirements |
|---------------------------|---|---|
| 100 ppm | Distance from a release to where the H ₂ S concentration in the air will dilute below 100ppm | ROE > 50-ft and includes any part of a "public area" (residence, school, business, etc., or any area that can be expected to be populated). ROE > 3,000-ft |
| 500 ppm | Distance from a release to where the H ₂ S concentration in the air will dilute below 500ppm | ROE > 50-ft and includes any part of a public road (public roads are tax supported roads or any road used for public access or use) |

Calculating H₂S Radius of Exposure

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

The ROE of an H₂S release is calculated to determine if a potentially hazardous volume of H₂S gas at 100 or 500 parts per million (ppm) is within a regulated distance requiring further action. If information about the concentration of H₂S and the potential gas release volume is known, the location of the Muster Areas will be set, and safety measures will be implemented based on the calculated radius of exposure (ROE). NMAC 19.15.11 – Hydrogen Sulfide Safety defines the ROE as the radius constructed with the gas's point of escape as its center and its length calculated by the following Pasquill-Gifford equations:

To determine the extent of the **<u>100 ppm ROE</u>**:

 $x = [(1.589) \text{ (mole fraction H}_2S)(Q)]^{(.6258)}$.

To determine the extent of the **<u>500 ppm ROE</u>**:

 $x = [(0.4546) \text{ (mole fraction H}_2S)(Q)]^{(.6258)}$.

Table 8.2. Calculating H2S Radius of Exposure

| ROE Variable | Description |
|----------------------------------|--|
| X = | ROE in feet |
| Q = | Max volume of gas released determined to be released in cubic feet per day (ft ³ /d) normalized to standard temperature and pressure, 60°F and 14.65 psia |
| Mole fraction H ₂ S = | Mole fraction of H ₂ S in the gaseous mixture released. |

The volume used as the escape rate in determining the ROE is specified in the rule as follows:

- The maximum daily volume rate of gas containing H₂S handled by that system element for which the ROE is calculated.
- For existing gas wells, the current adjusted open-flow rate, or the operator's estimate of the well's capacity to flow against zero back-pressure at the wellhead.

New Mexico Oil Conservation Division & BLM Site Requirements under NMAC 19.15.11 & Onshore Order #6

- Two cleared areas will be designated as Safe Briefing Areas. During an emergency, personnel will assemble in one of these areas for instructions from the Permian Resources Person-in-Charge. Prevailing wind direction should be considered in locating the briefing areas 200' or more on either side of the well head. One area should offset the other at an angle of 45° to 90° with respect to prevailing wind direction to allow for wind shifts during the work period.
- In the event of either an intentional or accidental releases of hydrogen sulfide, safeguards to protect the general public from the harmful effects of hydrogen sulfide must be in place for operations. A summary of the provisions in each of three H₂S ROE cases is included in **Table 8.3**.
 - **CASE 1 -**100 ppm ROE < 50'
 - **CASE 2** 100 ppm ROE is 50' or greater, but < 3000' and does not penetrate public area.
 - **CASE 3** -100 ppm ROE is 50' or greater and penetrates a public area or 500 ppm ROE includes a public road. Also if 100 ppm ROE > 3000' regardless of public area.

Section 9.0 - Training Requirements

Training

The following elements are considered a minimum level of training for personnel assigned to operations who may encounter H₂S as part of routine or maintenance work.

- The hazards, characteristics, and properties of hydrogen sulfide (H₂S) and (SO₂).
- Sources of H₂S and SO₂.
- Proper use of H₂S and SO₂ detection methods used at the workplace.
- Recognition of, and proper response to, the warning signals initiated by H₂S and SO₂ detection systems in use at the workplace.
- Symptoms of H₂S exposure; symptoms of SO₂ exposure
- Rescue techniques and first aid to victims of H₂S and SO₂ exposure.
- Proper use and maintenance of breathing equipment for working in H₂S and SO₂ atmospheres, as appropriate theory and hands-on practice, with demonstrated proficiency (29 *CFR* Part 1910.134).
- Workplace practices and relevant maintenance procedures that have been established to protect personnel from the hazards of H₂S and SO₂.
- Wind direction awareness and routes of egress.
- Confined space and enclosed facility entry procedures (if applicable).
- Emergency response procedures that have been developed for the facility or operations.
- Locations and use of safety equipment.
- Locations of safe briefing areas.

Refresher training will be conducted annually.

| Permian Resources Corporation | H ₂ S Contingency Plan | Eddy County, New Mexico |
|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

Section 10.0 - Personal Protective Equipment

I. <u>Personal H₂S Monitors</u>

All personnel engaged in planned or unplanned work activity to mitigate the release of a hazardous concentration of H₂S shall have on their person a personal H2S monitor.

- II. Fixed H₂S Detection and Alarms
 - 4 channel H₂S monitor
 - 4 wireless H₂S monitors
 - H₂S alarm system (Audible/Red strobe)
 - Personal gas monitor for each person on location
 - Gas sample tubes

III. Flame Resistant Clothing

All personnel engaged in planned or unplanned work activity associated with this Plan shall have on the appropriate level of FRC clothing.

IV. <u>Respiratory Protection</u>

The following respiratory protection equipment shall be available at each drilling location.

- Working cascade system available on rig floor and pit system & 750' of air line hose
- Four (4) breathing air manifolds
- Four (4) 30-minute rescue packs
- Five (5) work/Escape units
- Five (5) escape units
- One (1) filler hose for the work/escape/rescue units

Supplied air (airline or SCBA) respiratory protection against hydrogen sulfide exposure is required in the following situations:

- When routine or maintenance work tasks involve exposure to H₂S concentrations of 10 ppm or greater.
- When a fixed location area monitor alarms, and re-entry to the work area is required to complete a job.
- When confined spaces are to be entered without knowledge of H₂S levels present, or if initial measurements are to be taken of H₂S levels.
- During rescue of employees suspected of H₂S overexposure.
- For specific tasks identified with significant exposure potential and outlined in local program guidelines.
- All respiratory equipment for hydrogen sulfide must be of the supplied-air type, equipped with pressure-demand regulators and operated in the pressure-demand mode only. This is the only type of respiratory protection recommended for hydrogen sulfide application. Equipment should be approved by NIOSH/MSHA or other recognized national authority as required. If airline units are used, a five-minute egress bottle should also be carried.
- Gas masks or other air-purifying respirators MUST NEVER BE USED FOR HYDROGEN SULFIDE due to the poor warning properties of the gas.
- Use of respiratory protection should be accompanied by a written respiratory protection program.

 Hydrogen sulfide

 Safety Data Sheet E-4611

 according to the Hazardous Products Regulation (February 11, 2015)

 Date of issue: 10-15-1979
 Revision date: 08-10-2016
 Su
 Supersedes: 10-15-2013

| Fire hazard | | rdous product EXTREMELY FLAMMABLE GAS. If venting or leaking gas catches fire, do not extinguish |
|--|------|--|
| -ire nazaro | : | EXTREMELT FLAMMADLE GAS. If vehicing or leaking gas calcreds line, do not extinguish frames. Flammable vapors may spread from leak, creating an explosive reignition hazard. Vapors can be ignited by pilot lights, other flames, smoking, sparks, heaters, electrical equipment, static discharge, or other ignition sources at locations distant from product handling point. Explosive atmospheres may linger. Before entering an area, especially a confined area, check the atmosphere with an appropriate device. |
| Explosion hazard | : | EXTREMELY FLAMMABLE GAS. Forms explosive mixtures with air and oxidizing agents. |
| Reactivity | : | No reactivity hazard other than the effects described in sub-sections below. |
| Reactivity in case of fire | | No reactivity hazard other than the effects described in sub-sections below. |
| 5.4. Special protective equipment and p | rec | autions for fire-fighters |
| irefighting instructions | | DANGER! Toxic, flammable liquefied gas |
| | ं | |
| | | Evacuate all personnel from the danger area. Use self-contained breathing apparatus (SCBA) and protective clothing. Immediately cool containers with water from maximum distance. Stop flow of gas if safe to do so, while continuing cooling water spray. Remove ignition sources if safe to do so. Remove containers from area of fire if safe to do so. On-site fire brigades must comply with their provincial and local fire code regulations. |
| Special protective equipment for fire fighters | : | Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters. |
| Other information | : | Containers are equipped with a pressure relief device. (Exceptions may exist where authorized by TC.). |
| SECTION 6: Accidental release mea | su | res |
| 5.1. Personal precautions, protective ec | quip | ment and emergency procedures |
| General measures | : | DANGER! Toxic, flammable liquefied gas . Forms explosive mixtures with air and oxidizing agents. Immediately evacuate all personnel from danger area. Use self-contained breathing apparatus where needed. Remove all sources of ignition if safe to do so. Reduce vapors with fog or fine water spray, taking care not to spread liquid with water. Shut off flow if safe to do so. Ventilate area or move container to a well-ventilated area. Flammable vapors may spread from leak and could explode if reignited by sparks or flames. Explosive atmospheres may linger. Before entering area, especially confined areas, check atmosphere with an appropriate device. |
| .2. Methods and materials for containn | nen | t and cleaning up |
| Nethods for cleaning up | : | Try to stop release. Reduce vapour with fog or fine water spray. Prevent waste from contaminating the surrounding environment. Prevent soil and water pollution. Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements. |
| 6.3. Reference to other sections | | |
| For further information refer to section 8: Ex | pos | ure controls/personal protection |
| SECTION 7: Handling and storage | - | |
| 1. Precautions for safe handling | | |
| Precautions for safe handling | | Leak-check system with soapy water; never use a flame |
| | | |
| | | All piped systems and associated equipment must be grounded |
| | | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No |
| | | smoking. Use only non-sparking tools. Use only explosion-proof equipment |

Hydrogen sulfide Safety Data Sheet E-4611 according to the Hazardous Products Regulation (February 11, 2015) Date of issue: 10-15-1979 Revision date: 08-10-2016 Supersedes: 10-15-2013

| 7.2. | Conditions for safe storage, inclu | ding any incompatibilities |
|--------|------------------------------------|--|
| Storaç | ge conditions | : Store only where temperature will not exceed 125°F (52°C). Post "No Smoking/No Open Flames" signs in storage and use areas. There must be no sources of ignition. Separate packages and protect against potential fire and/or explosion damage following appropriate codes and requirements (e.g. NFPA 30, NFPA 55, NFPA 70, and/or NFPA 221 in the U.S.) or according to requirements determined by the Authority Having Jurisdiction (AHJ). Always secure containers upright to keep them from falling or being knocked over. Install valve protection cap, if provided, firmly in place by hand when the container is not in use. Store full and empty containers separately. Use a first-in, first-out inventory system to prevent storing full containers for long periods. For other precautions in using this product, see section 16 |
| | | OTHER PRECAUTIONS FOR HANDLING, STORAGE, AND USE: When handling product under pressure, use piping and equipment adequately designed to withstand the pressures to be encountered. Never work on a pressurized system. Use a back flow preventive device in the |

piping. Gases can cause rapid suffocation because of oxygen deficiency; store and use with adequate ventilation. If a leak occurs, close the container valve and blow down the system in a safe and environmentally correct manner in compliance with all international, federal/national, state/provincial, and local laws; then repair the leak. Never place a container where it may become part of an electrical circuit.

| 8.2. Appropriate engineering controls | | | | | |

8.2. Appropriate engineering con

Appropriate engineering controls

: Use corrosion-resistant equipment. Use an explosion-proof local exhaust system. Local exhaust and general ventilation must be adequate to meet exposure standards. MECHANICAL (GENERAL): **Inadequate - Use only in a closed system.** Use explosion proof equipment and lighting.

| 8.3. Individual protection measu | 3. Individual protection measures/Personal protective equipment | | | |
|----------------------------------|---|--|--|--|
| Personal protective equipment | : Safety glasses. Face shield. Gloves. | | | |
| | | | | |
| Hand protection | : Wear work gloves when handling containers. Wear heavy rubber gloves where contact with product may occur. | | | |
| Eye protection | : Wear goggles and a face shield when transfilling or breaking transfer connections. Select in accordance with the current CSA standard Z94.3, "Industrial Eye and Face Protection", and any provincial regulations, local bylaws or guidelines. | | | |
| Respiratory protection | : Respiratory protection: Use respirable fume respirator or air supplied respirator when working in confined space or where local exhaust or ventilation does not keep exposure below TLV. Select in accordance with provincial regulations, local bylaws or guidelines. Selection should be based on the current CSA standard Z94.4, "Selection, Care, and Use of Respirators." Respirators should also be approved by NIOSH and MSHA. For emergencies or instances with unknown exposure levels, use a self-contained breathing apparatus (SCBA). | | | |
| Thermal hazard protection | : Wear cold insulating gloves when transfilling or breaking transfer connections. Standard EN 511 - Cold insulating gloves. | | | |
| Other information | : Other protection : Safety shoes for general handling at customer sites. Metatarsal shoes and cuffless trousers for cylinder handling at packaging and filling plants. Select in accordance with the current CSA standard Z195, "Protective Foot Wear", and any provincial regulations, local bylaws or guidelines. For working with flammable and oxidizing materials, consider the use of flame resistant anti-static safety clothing. | | | |
| SECTION 9: Physical and che | mical properties | | | |
| 9.1. Information on basic physic | al and chemical properties | | | |
| Physical state | : Gas | | | |
| Appearance | : Colorless gas. Colorless liquid at low temperature or under high pressure. | | | |

 Molecular mass
 : 34 g/mol

 Colour
 : Colourless.

 Odour
 : Odour can persist. Poor warning properties at low concentrations. Rotten eggs.

 Odour threshold
 : Odour threshold is subjective and inadequate to warn of overexposure.

| PRAXAIR | Hydrogen sulfide Safety Data Sheet E-4611 coording to the Hazardous Products Regulation (February 11, 2015) | |
|--------------------|--|--|
| | Date of issue: 10-15-1979 Revision date: 08-10-2016 Supersedes: 10-15-2013 | |
| Other information | : When you mix two or more chemicals, you can create additional, unexpected hazards. Obtain and evaluate the safety information for each component before you produce the mixture. Consult an industrial hygienist or other trained person when you evaluate the end product. Before using any plastics, confirm their compatibility with this product | |
| | Praxair asks users of this product to study this SDS and become aware of the product hazards and safety information. To promote safe use of this product, a user should (1) notify employees, agents, and contractors of the information in this SDS and of any other known product hazards and safety information, (2) furnish this information to each purchaser of the product, and (3) ask each purchaser to notify its employees and customers of the product hazards and safety information | |
| | The opinions expressed herein are those of qualified experts within Praxair Canada Inc. We believe that the information contained herein is current as of the date of this Safety Data Sheet. Since the use of this information and the conditions of use are not within the control of Praxair Canada Inc, it is the user's obligation to determine the conditions of safe use of the product. Praxair Canada Inc, SDSs are furnished on sale or delivery by Praxair Canada Inc, or the independent distributors and suppliers who package and sell our products. To obtain current SDSs for these products, contact your Praxair sales representative, local distributor, or supplier, or download from www.praxair.ca. If you have questions regarding Praxair SDSs, would like the document number and date of the latest SDS, or would like the names of the Praxair suppliers in your area, phone or write Praxair Canada Inc, (Phone: 1-888-257-5149; Address: Praxair Canada Inc, 1 City Centre Drive, Suite 1200, Mississauga, Ontario, L5B 1M2). | |
| | PRAXAIR and the Flowing Airstream design are trademarks or registered trademarks of Praxain Technology, Inc. in the United States and/or other countries. | |
| NFPA health hazard | : 4 - Very short exposure could cause death or serious residual injury even though prompt medical attention was given. | |
| NFPA fire hazard | : 4 - Will rapidly or completely vaporize at normal pressure and temperature, or is readily dispersed in air and will burn readily. | |
| NFPA reactivity | : 0 - Normally stable, even under fire exposure conditions, and are not reactive with water. | |
| HMIS III Rating | | |
| Health | : 2 Moderate Hazard - Temporary or minor injury may occur | |
| Flammability | : 4 Severe Hazard - Flammable gases, or very volatile flammable liquids with flash points below 73 F, and boiling points below 100 F. Materials may ignite spontaneously with air. (Class IA) | |
| Physical | 2 Moderate Hazard - Materials that are unstable and may undergo violent chemical changes a normal temperature and pressure with low risk for explosion. Materials may react violently with water or form peroxides upon exposure to air. | |

|-------------------------------|-----------------------------------|-------------------------|
| | Betty 221H, 222H, 421H | |

Material Name: SULFUR DIOXIDE

SDS ID: MAT22290 Wash thoroughly after handling. Do not breathe dusts or mists. Response IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor. Specific treatment (see label). Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up. Protect from sunlight. Disposal Dispose of contents/container in accordance with local/regional/national/international regulations. Other Hazards

Contact with liquified gas may cause frostbite.

| Section 3 - COMPOSITION / INFORMATION ON INGREDIENTS | | |
|--|----------------|---------|
| CAS | Component Name | Percent |
| 7446-09-5 | Sulfur dioxide | 100.0 |
| Section 4 - FIRST AID MEASURES | | |

Inhalation

IF INHALED: Remove person to fresh air and keep at rest in a position comfortable for breathing. Get immediate medical attention.

Skin

IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If frostbite or freezing occur, immediately flush with plenty of lukewarm water (105-115°F; 41-46°C). If warm water is not available, gently wrap affected parts in blankets. DO NOT induce vomiting. Get immediate medical attention.

Eyes

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get immediate medical attention.

Ingestion

IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Get immediate medical attention. Most Important Symptoms/Effects

Acute

Toxic if inhaled, frostbite, suffocation, respiratory tract burns, skin burns, eye burns

Delayed

No information on significant adverse effects.

Indication of any immediate medical attention and special treatment needed

For inhalation, consider oxygen.

Page 2 of 9

Issue date: 2021-01-30 Revision 8.0

Print date: 2021-01-30

Treat symptomatically and supportively.

| Section 5 - FIRE FIGHTING MEASURES | |
|---|----------|
| Extinguishing Media | |
| Suitable Extinguishing Media | |
| carbon dioxide, regular dry chemical, Large fires: Use regular foam or flood with fine water spray. | |
| Unsuitable Extinguishing Media | |
| None known. | |
| Special Hazards Arising from the Chemical | |
| Negligible fire hazard. | |
| Hazardous Combustion Products | |
| sulfur oxides | |
| Fire Fighting Measures | |
| Move container from fire area if it can be done without risk. Cool containers with water spray until well after the | ne fire |
| is out. Stay away from the ends of tanks. Keep unnecessary people away, isolate hazard area and deny entry. | |
| Special Protective Equipment and Precautions for Firefighters | |
| Wear full protective fire fighting gear including self contained breathing apparatus (SCBA) for protection again | ist |
| possible exposure. | |
| Section 6 - ACCIDENTAL RELEASE MEASURES | |
| Personal Precautions, Protective Equipment and Emergency Procedures | |
| Wear personal protective clothing and equipment, see Section 8. | |
| Methods and Materials for Containment and Cleaning Up | |
| Keep unnecessary people away, isolate hazard area and deny entry. Stay upwind and keep out of low areas. | |
| Ventilate closed spaces before entering. Evacuation radius: 150 feet. Stop leak if possible without personal risk | - |
| Reduce vapors with water spray. Do not get water directly on material. | |
| Environmental Precautions | |
| Avoid release to the environment. | |
| Section 7 - HANDLING AND STORAGE | |
| Precautions for Safe Handling | |
| Do not get in eyes, on skin, or on clothing. Do not breathe gas, fumes, vapor, or spray. Wash hands thoroughly | after |
| handling. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye | |
| protection/face protection. Contaminated work clothing should not be allowed out of the workplace. Do not eat | , |
| drink or smoke when using this product. Keep only in original container. Avoid release to the environment. | |
| Conditions for Safe Storage, Including any Incompatibilities | |
| Store in a well-ventilated place. Keep container tightly closed. | |
| Store locked up. | |
| Protect from sunlight. | |
| Store and handle in accordance with all current regulations and standards. Protect from physical damage. Store | |
| outside or in a detached building. Keep separated from incompatible substances. | |
| Incompatible Materials | |
| bases, combustible materials, halogens, metal carbide, metal oxides, metals, oxidizing materials, peroxides, red | ucing |
| agents | |
| Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION | |

Component Exposure Limits Sulfur dioxide 7446-09-5

ACGIH: 0.25 ppm STEL

ACGIH - Threshold Limit Values - Biological Exposure Indices (BEI)

There are no biological limit values for any of this product's components.

Engineering Controls

Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits. Individual Protection Measures, such as Personal Protective Equipment

Eye/face protection

Wear splash resistant safety goggles with a faceshield. Contact lenses should not be worn. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.

Skin Protection

Wear appropriate chemical resistant clothing. Wear chemical resistant clothing to prevent skin contact.

Respiratory Protection

Any self-contained breathing apparatus that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode.

Glove Recommendations

Wear appropriate chemical resistant gloves.

| SARA 302: | 500 lb TPQ |
| OSHA (safety): | 1000 lb TQ (Liquid) |
| SARA 304: | 500 lb EPCRA RQ |

SARA Section 311/312 (40 CFR 370 Subparts B and C) reporting categories

Gas Under Pressure; Acute toxicity; Skin Corrosion/Irritation; Serious Eye Damage/Eye Irritation; Simple Asphyxiant

U.S. State Regulations

The following components appear on one or more of the following state hazardous substances lists:

| Component | CAS | CA | MA | MN | NJ | PA |
|----------------|-----------|-----|-----|-----|-----|-----|
| Sulfur dioxide | 7446-09-5 | Yes | Yes | Yes | Yes | Yes |

California Safe Drinking Water and Toxic Enforcement Act (Proposition 65)

This product can expose you to chemicals including Sulfur dioxide, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.
