Request to change plans; well design – Intermediate Casing:

	String Type	Hole Size	Casing Size	Top Set	Bottom Set	Grade	Weight	Conn
FROM:	Intermediate	12.25"	9.625"	0'	10,612'	HCP-110	40#	BUTT
TO:	Intermediate	12.25"	9.625"	0'	11,603'	P-110	40#	BUTT

Original well design was submitted by previous operator. Matador reviewed the previous operator's plan and feels Matador's design is safer in regards to extending casing and cement to deeper more competent formations prior to entering higher pressure producing formations. Matador feels their set depth is a better one for the overall life of the well as they are able to seal off more "lower pressure" formations and isolate them from a "higher pressure" wolfcamp formation.

When Matador planned the well they used their casing set depth methodology which had the intermediate casing set just above KOP (in this case 3rd Bone Spring) and reduces as much vertical open hole as possible prior to entering our producing formation. The original design had casing set ~1000' above this in a shallower 2nd Bone Spring.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
